Appendix IV:

Selected Music from British Library Add. MS 29246
Editorial Principles

1) Most of the vocal works on which the intabulations are based are easily available, which means that it is not necessary to present a full score of the work. Instead, only the top voice is included since this is the one left out in the intabulations. There is also a transcription of the Paston intabulation, which may or may not be the same as the original vocal edition. However, the scoring presented in this edition is not necessarily the only way of performing this music. The implications for performance are discussed in chapters IV and V of the thesis.

2) The Paston lute books use the breve as the bar value (one breve = one bar), and as one might expect, the vocal concordances used to create the edition come from many different sources, some of which have irregular bar lengths. This edition reduces the breve to a minim and uses regular bar lengths and common time signatures.

3) When choosing the time signature and the bar length, the intabulation takes precedence in order to ensure a consistent look throughout the edition.

4) All of the editorial changes are included in the commentary sheets that accompany each piece.

5) The following conventions apply to the tablature notation:

a) There is only one flag at the beginning of a bar, and no other change until there is a rhythmic change.
b) Rests in the intabulations are represented with a flag with nothing underneath.
c) In some instances it is not possible to distinguish the difference between a rest and two tied notes. For instance,
Could be interpreted as the following,

This is a problem in the nature of the notation, and therefore, the correct solution is taken from the vocal setting and presented in the transcription of the tablature.

6) Editorial additions in the intabulation are placed in brackets with any necessary explanations in the commentary sheet.

7) A clear omission by the scribe will be silently edited (without a bracket), with a letter indicating the change together with an explanation in the commentaries.

8) Only the standard clefs (F4, G2, and G2 down an octave) are used in the transcriptions, despite the fact that the concordances make use of the entire range from sub-bass F5 to the highest clef, G1. The original clefs are indicated along with the concordances in the comments.

9) The appropriate lute size is indicated for each piece, although in some cases there is more than one possibility that can be deduced from the information under “concordances and clefs” in the commentary.
10) The *musica ficta* used in this edition is usually the one from the lute source due to the fixed nature of the notation. For the missing part, (usually the soprano part), the *musica ficta* may differ even among the Paston sources, and in each case the origin of each alteration is explained. In some instances two alterations from two different sources may produce unconventional results such as chromatic motion due to the different solutions that exist in the various sources. For instance, *Maria stella dicta* by Tallis (no. 15) contains a rare melodic chromatic movement in the soprano.

![Musical example](image)

The natural sign appears in two of the Paston sources, Tenbury 342 and 354. The intabulation introduces the c-natural two beats later, which suggests eliminating the c-sharp on the second beat. These instances are addressed in more detail in the commentary.

11) Sometimes the lute intabulation includes only parts of a vocal line other than the soprano throughout the piece. The five-voice Credo from Taverner’s Mean Mass (No. 34) is a good example. The intabulation starts with the Alto II part but soon after the voice is dropped and only occasionally included. The piece works best as a duet for Soprano and Alto II since the text is only complete when the two voices are sung together. The transcription of the intabulation is set for three voices (Alto I, Tenor, and Bass), despite the occasional inclusion of the Alto II part, which is treated as idiomatic writing for the lute.
One of the explanations for including portions of a particular line in the intabulation is to assist an amateur singer.

12) The commentary for each piece contains information on the concordances and clefs. The clefs, key signature, and the starting note for the piece are indicated in the following manner: C1-2-f, which means that the clef is C1, the key signature has two flats, and the starting pitch for the piece is an f.

Note: The software used to create these musical examples has a number of limitations that will be obvious by their consistent appearance in the music. Once these limitations are understood, the pieces should work well.

1. Ave Rosa sine spinis [E lute]

Thomas Tallis
29246 fol. 1
1. Ave rosa sine spinis [E lute]

Thomas Tallis

British Library Add. 29246 fol. 1, Concordances and Clefs: TCM VI p. 169. (ii vv). 1 (6) [tacet, F4-1], 2035 (24v) [sop:G2-0-a; alto:C2-0-a; bass:tacet; up a 5th for B lute, high clefs]

Comments:

Note: Values larger than a minim are subdivided throughout the manuscript.

a) The intabulation has a d instead of the f in the vocal setting.

b) No rest in the intabulation.

c) The lute part includes the f and the d from the top line.
2. Ave plena gratia (Ave dei patris) [A lute]

Thomas Tallis

G2+C3 n.c.e. 1 (4) [bass: tacet; F5-0], 2035 (20v) [iv:sop:G2-1-a; alto: tacet; bass:C4-1-d; same as ed.]

**Comments:**

a) The crotchet rest is from the vocal setting. The intabulation has a minim.

b) The scribe omitted the two crotchets at the beginning of this bar, which were added from the vocal setting.

c) The rhythm in the intabulation does not work as well as the vocal setting and hence it has been replaced. (Intabulation in m18: crotchet-crotchet-minim).

**Comments:**

a) The lute part sometimes doubles the vocal part as it occurs in measures 10 and 11.
7. Gloria (Corona Spinea) [A lute]

John Taverner

British Library Add. 29246 fol. 2, Concordances and Clefs: EECM xx p. 75 (iii vv).
C2+C4 [great compass] 344 (97v), [iii], (101v) [iv], (103v) [vii], 2035 (14) [sop:G2-0-d; alto:C2-0-g; bass:C4-0-G; same as ed.]

Comments:

a) An extra minim had to be added at the beginning, probably a scribal omission.

**Comments:**

a) The lute part includes the c from the vocal line
b) The vocal ornamentation is simplified in the lute part.
c) The lute part plays the d from the vocal line
d) The c# from the intabulation is not used in the vocal setting
e) The g in the intabulation was probably missed by the scribe.
f) There is an extra f in the bass line of the intabulation
g) The rhythm in the intabulation differs from the vocal setting
h) The C in the bass of the intabulation is an A in the vocal setting
i) This ornament in the intabulation is not in the vocal setting

2035 (42v) [sop:G2-1-c; alto:C3-1-A; bass:F3-1-D; same as ed.]

Comments:

a) The vocal original sports a c instead of the d of the intabulation. Both of them make good counterpoint so the d was left.

b) This cadential gesture is not in the vocal original

c) The rhythm in the intabulation differs from the vocal, but the counterpoint is not affected.

d) This ornament in the intabulation is not present in the vocal score.

15. Maria stella dicta (Ave rosa) [G lute]

Thomas Tallis

British Library Add. 29246 fol. 4v, Concordances and Clefs: TCM vi p. 169 (iii vv). 1 (6) [bass:F4-1-D; same as ed.] 2035 (43v) [sop:G2-1-c; alto:C4-1-A; bass:F4-1-D same as ed.]

Comments:

a) The natural sign appears in Tenbury 342 and 354, and it agrees with the c-natural introduced by the lute two beats later. Perhaps the c-sharp should be eliminated instead for a more diatonic sound.
16. Ergo laudes [G lute]

Taverner

C3+F4 F's are left out. 2035 (45v) [sop:G2-1-d; alto:C4-1-d; bass:F4-1-G; same as ed.], 34049 (15v) [sop:G2-1-d'; same as ed.]

Comments:

a) The intabulation leaves out the low F'.

b) Ibid.

c) Ibid.

d) Ibid.

e) Ibid.

f) The g is from the vocal setting.

g) The intabulation leaves out the low F'.

**Comments:**

a) The d in the lute part has been changed to the f in the vocal part.

b) The second beat of this measure is not in the intabulation, it was probably omitted by the scribe.

British Library Add. 29246 fol. 5v, Concordances and Clefs: SLK, booklet 135 (iv vv). C1+C3+C3(taken from a ms w/ one flat. Prob. C4 or C5 in this set)+F5. 1 (48) [F5-0-A; same as ed.]., 354-8 (14) [sop:G1-1-a'; alto:C2-1-d'; tenor:C3-1-d; bass:F4-1-D; up a 4th from ed.]

**Comments:**

a) The a is added from the vocal setting.

b) The G in the bass line is not repeated in the vocal setting (a minim originally).

c) The E (third beat) in the bass part does not occur in the vocal original.

d) The F' is editorially added from the vocal setting.

e) The F' is not repeated in the vocal setting.

f) The B in the alto line is not present in the vocal setting, instead the preceding G is a minim.

Comments:

a) The c# is not in the vocal source.

b) Different rhythm from vocal source.

c) The bracketed note is from the vocal source, while the e is not in the vocal
setting.

d-e) Notes from the treble part.

f) Added A by the intabulator.

g) Dotted rhythm only in the intabulation.

h) The d in the alto is an f in the vocal source.

i) The ending is entirely different from the vocal setting.

Note: This piece presents a problem when performed as a piece for treble
plus lute. The text setting presents the whole text only in the mean and tenor,
leaving the treble to sing from 'dei patris' on. This suggests that it was
performed with all parts sung.

Comments:

a) The e's on the three c/e sonorities were added by the intabulator.

b) The e in the second beat of the bar is preceded by a crotchet rest. The intabulation omits the rest and places an e minim.

c) The dotted rhythm (dotted-crotchet, quaver, crotchet) is editorially added from the vocal setting. The intabulation changes the rhythm to minim-quaver-quaver.

Comments:

a) The rhythm in 29246 is simplified to two crotchets, and the tablature 2 in the fourth course in the first beat is a 3 in the Paston source.

b) The dotted rhythm is not in the vocal version.

c) The 2 is a 3 in 29246, probably a scribal error.

d) The two notes A and c are from the vocal version. 29246 has B and d instead.

e) The e in this chord is not from the vocal setting.

Comments:

a) The c, which appears in the vocal setting, seems to have been erased from
the intabulation.

b) The c in the intabulation is an f’ in the vocal score.

c) The dotted rhythm in the last beat was editorially added from the vocal
score.

d) The last two beats of bar 22 are different from the vocal setting. The
original intabulation has been left intact with the exception of the c in the last
beat (originally a d).

Comments:

a) 29246 adds a c on the upper line, the vocal score has an a in both voices.

b) The rhythm is not clear in 29246 so the one from the vocal score was used.

Comments:

a) There are only three g minims at the start of the intabulation in 29246, which means that the bar is short by a minim. Hence the first minim was made a semibreve to have the correct value and to imitate the top line.

b) The first g in this bar does not appear in the vocal setting.

c) The intabulation includes notes from the top part.

d) The B-flat is not indicated in the vocal setting.

e) The A is a rest in the vocal setting.

f) The repeated g's are not present in the vocal setting.

g) The alto line should be g, c, f, and not c, g, f.

h) The e is a g in the vocal setting.

G2+C2+C4+C4+F4+F4 [great comp.] but G2+C2+C4 (same as 57).

Comments:

a) The top singing line is doubled by the intabulation.

b) In the original setting by Taverner the Quoniam and Tu solus sections are set for the high voices separated by a section for the lower voices. The intabulation omits this low section and links the two sections for high voices. In order for this to work, the last note in the superius (in brackets) was transposed down a third to g, and changed to a minim instead of the semibreve in the vocal setting.

Comments:

a) 29246 has a minim which was corrected as a semibreve to have the full value of the bar.

b) The e on the top line of this chord is not in the vocal setting.

c) The f is from the top singing line.

d) The d on the top of this chord is not in the vocal setting and there is an error in the intabulation's rhythm (minim-crotchet instead of two minim).

e) The f at the octave is not part of the vocal setting.

f) Missing A in the countertenor.

g) The e is from the vocal setting, and the intabulation had a c.

h) The intabulation skips the alto line and instead follows the treble line for the rest of the bar.

John Taverner

British Library Add. 29246 fol. 11v, Concordances and Clefs: EECM xxxv p. 91 (iv vv). 2035 (13v) [sop[it is the second part]:G2-0-e; alto:C2-0-e,g; bass:C4-0-G; up a 5th from ed.]. 1 (12) [bass:F4-1; same as ed.]

Comments:

Note: This is a peculiar arrangement of this five voice section of the Credo. The five voices in the vocal setting are never present altogether; instead a three voice texture alternating between the different voices is maintained throughout. The lute intabulation excludes the Soprano, but includes the whole of the Alto I, and some parts of the Alto II. Perhaps the Alto II was performed by an amateur singer, and therefore the doubling by the lute was required to aid the singer. As expected, the bottom two voices, Tenor and Bass, are fully included in the intabulation. The intabulation then suggests that the piece is to be performed as a duet for Soprano and Alto II with the lute taking care of the rest of the voices. This is further supported by the fact that the Soprano does not have the full text, and therefore the Alto II is necessary to deliver the full text.

The other possibility is for an alto singer to sing both voices since they never sing together. The resulting range for the two voices is G-c', which supports this way of performance.

Note: The dotted rhythms from the vocal setting are loosely kept in the intabulation. In some instances, such as in measure 24, the dotted crotchet with the quaver is copied as two crotchets in the intabulation, and conversely in measure 22 the minim from the vocal setting is subdivided as a dotted crotchet plus a quaver in the intabulation.

Comments:

a) Some notes from the alto part are omitted.

b) The rhythm is simplified by the intabulator to the detriment of the music. In fact, the first beat of the measure produces a dissonance with the voice part that does not occur in the vocal setting. This is also the only four voice chord in the intabulation in a three voice texture (idiomatic writing).

b) The editorial note is from the vocal setting.
37. Agnus dei II (Gloria tibi trinitas) [F lute]

Comments:

Note: Values larger than a minim are subdivided.

a) The B-flat in the third beat is a rest in the vocal setting.
b) The a was editorially added from the vocal setting.
c) The C in the tenor is an E in the vocal setting.
d) The writing is not clear in the intabulation.
e) Idiomatic chord.
f) The sign appears in the original intabulation to indicate the vocal entrance.
g) The d is an octave lower in the vocal setting.
h) The G in the alto part is a d in the vocal setting.
i) The A in the tenor is an E in the vocal setting.
j) The c and e in the alto part are from the soprano part.

Comments:

a) The g (quaver) in the intabulation is a c in the vocal setting.

b) A dotted rhythm in the vocal setting.

c) The dotted rhythm in the intabulation (first half of the measure) is not present in the vocal setting.

d) Dotted quaver and a semiquaver in the vocal setting.

Comments:

a) The vocal setting ends with a 3/2 bar and the intabulation adds two beats to have two 4/4 bars. Therefore, the a minim was added to the soprano to match the intabulation.

ed.]; (38v) [ii:sop:C1-1sharp-b; alto:C4-1sharp-B; bass:F4-1 sharp-E; down a 4th from
ed. for A lute], 18936-9 (11) [ii, titled Sanctus], 41156-8 (24) [sop:C1-1-a; alto:C4-1-
A; bass:F4-1-D; down a 5th from ed.]

Comments:

This is a three voice section in which the voice sings the soprano, and the
lute plays the other two voices. However, the soprano does not deliver the full
text, suggesting that the piece should be performed with three voices and the
lute doubling the bottom two. Another possibility is that the piece is just an
eexercise and therefore there is no need to include the full text.

This is a good example of a high clef piece using the highest lute (d-treble) for
the transcription.

a) There is a small difference in the intabulation; from bottom to top, there is
an e below an e’ in the vocal setting, and it is changed to an f below a d’ in the
intabulation.

**Comments:**

a) The f in the top voice of the intabulation is on the 3rd beat in the vocal setting.

b) The intabulation takes a few notes from the vocal part.

c) In the cases where high clefs are used and the counterpoint is very close in range, the intabulator prefers to double the singing voice instead of allowing the voice crossings of the vocal setting.

Comments:

Note: There are several instances in which the intabulation doubles the soprano part.

a) Rhythmic discrepancy between the top line from the vocal original and the doubling from the lute intabulation. The original rhythm is crotchet, crotchet, dotted minim, minim, crotchet, and the intabulation's is crotchet, minim, minim, minim, minim, crotchet. The rhythm from the lute intabulation has been used in this edition.

57. Quoniam/Tu solus (Corona spinea) [A lute]

John Taverner

Comments:

a) This ornamented line appears only in the intabulation.

b) Notice how the singing line is doubled by the intabulation.

c) The two sections (Quoniam/Tu solus) are presented here as a continuous section even though they are separated by a short section in the vocal setting (Bass 1, Bass 2, and Tenor). The ending of the Quoniam and the beginning of the Tu solus were reworked by the intabulator in order to be able to link the two sections into one continuous piece. The resulting intabulation works if the ending of the Quoniam is changed from a B to a G as is the case in this edition.

British Library Add. 29246 fol. 21, Concordances and Clefs: from a version with one flat in BL R.M. 24.d.2 (iii vv). The top line is in the soprano range [c-f']. Same piece as no.43 but transposed. Also in: 1 (63v) [tacet; bass:F4-2-B-flat] 2036 (48v) [Sop:G2-0-c; alto:C2-0-g; bass:C3-0-C] 341-4 (56v, 68v, 57v, 58v) [sop:C1-2-b flat; alto:C3-2-b flat; tenor:C4-2-tacet; bass:C5-2-tacet, G lute] [prima pars, opening], 41156-8 (19) [prima pars, opening; sop:G2-0-c'; alto:C2-0-g; bass:C3-0-c; a step up from ed. for G lute], 30810-5 (28v) [+1 according to Brett] [sop:G2-0-c'; cantussec:C1-0-g; tenor:tacet; bass:tacet], 29247 (53v-54v) all three sections for G lute.

Comments:

Note that the choice of lute is only one of the possibilities since there are three intabulations and three vocal versions in three different keys in the Paston collection. This means that there are more possible permutations by means of mixing the different intabulations and vocal settings (see table below). Despite the fact that all of these versions are possible, it does not necessarily mean that all of them were used or that they are practical. The very low version presented here is for the lowest D-lute which results in a singing part with a range G-c' (alto).

66. Ave maris stella

W. Byrd

Comments:

a) The intabulation shows a crotchet which does not work so the quaver value from the vocal setting was used instead.

b) Ornamented only in the intabulation.

c) Simplified measure in the intabulation.

d) There is an e instead of an a in the alto line.

e) The counterpoint is different from the vocal setting.

Comments:

a) Some cantus sections are copied in the intabulation throughout the piece.

b) The two gs are crotchets instead of the quavers in the vocal setting.
