FUNCTION AND SIGNIFICANCE OF ANCIENT EGYPTIAN ROYAL PALACES FROM THE MIDDLE KINGDOM TO THE SAIITE PERIOD.

A LEXICOGRAPHICAL STUDY AND ITS POSSIBLE CONNECTION WITH THE ARCHAEOLOGICAL EVIDENCE

APPENDIX ONE. LISTS OF SOURCES 968-1001

APPENDIX TWO. SYNOPSIS OF THE USAGE OF THE EGYPTIAN WORDS FOR “PALACE” 1002-1072
When it was dawn, very early, they came and summoned me;
Ten men coming, ten men going, ushering me to the ‘ḥ.
(There) I touched the ground between the sphinxes
as the royal children stood in the portal, receiving me;
and the Friends who ushered to the Pillared Hall
were showing me the way to the Audience Hall.
I found His Majesty on the great throne in the portal of electrum.
Then I was stretched out prostrate,
unconscious of myself in front of him (...) 

(Tale of Sinuhe - pBerlin 3022, B 248-253)\(^1\)

INTRODUCTION

Philological evidence shows a significant variety in Egyptian terminology for the “royal palace”: five words referring to the palace institution have been identified in written sources: ‘ḥ, pr-‘3, pr-nswt, ḫnw and stp-s3. This lexical scope meets the planimetical variety of ancient Egyptian royal palaces, with their different extension and organization of inner spaces, suggesting that they had to fulfil a broad range of different functions. The architectural study of archaeological sources combined with the lexicographical research aims to identify such different functions. The actual work would not have been possible without a previous detailed study of the archeological evidences of ancient Egyptian palaces that I could conduct for my Master Degree. Starting with an architectural analysis of archaeologically known royal palaces, some common features may have been identified at

\(^1\) Translation: Parkinson 1997: 40.
the basis of their construction. These recurring models may have been intentional to ensure the performance of certain activities in a particular repeated arrangement of spaces. Royal palaces with a similar planimetric scheme may have served one or more specific functions. The main attempt of this work is to define the meaning of each term for “palace” in different contexts in order to derive from this what these terms would have been for and to observe a possible correspondence between words and architectural typologies with the same function. Another major objective will be to go deep into the interrelation of palace-terms and the parts or sections they could refer to. Specific words, referring to inner spaces of the royal building, will be treated by considering their connection with the five names for “palace” in official documents and private titles. Many architectural terms usually connected by scholars to the royal palace have no grammatical relationship with the five words for it. In order to verify their physical connection with royal buildings and their exact position in each of them, this research will concentrate upon the sequence in which they appear in private titles and their combination in narrative expressions.

In order to understand why a term was preferred to another in a specific context, the occurrences of each word have been all virtually collected. Since the present study aims to parallel the results of the architectural analysis with those of the philological research, the sources collected date back from the Middle Kingdom to the New Kingdom and the Late Period. Although sporadic archaeological remains are attested from the Early Dynastic time onwards, it is only from the Middle Kingdom that the archaeological remains are rich enough to allow an architectural analysis of the buildings and to add some substantial information to the typically allusive or vague references to palaces found in texts. For this reason the textual evidences used in this study will exclude the Archaic Period and the Old

---

3 I will refer to specific studies on private titlings for those palace related titles that do not carry the word “palace”, because it would go beyond the boundary of this study to analyze all the private epithets in their various functions. The main aim of this work is the identification of the meaning and function of the five words used to define the royal palace and the attention will be focused on epithet compounds with each of them.
5 Middle Kingdom structures present great difficulty in interpretation and have been only summarily published. At Ezet Rushdi in the eastern Delta we find a palace dating to the early 12th Dynasty (Adam 1959: 207 ff.). Another palace from the Delta has been unearthed at Tell Basta and has undergone several campaigns of excavation (Farid 1964: 85 ff. Bakr 1982: 153 ff. Van Siclen 1985: 28 ff.). Another Middle Kingdom palace at Tell el-Dab’a has been excavated in the area of Ezet Helmi and dated to the 13th Dynasty (Jánosi 1992: 345 ff.) The architectural features recognized in these buildings suggest certain affinities with two “campaign palaces” in Nubia, the earlier one at Kor (Vercoultter 1995: 4 ff. Smith 1966: 187 ff.) and the later one at Uronarti (Dunham 1967).
Kingdom, when palaces are too bad-preserved to allow a proper architectural reconstruction of their plans. The study of Late Period texts is mainly focused on 26th Dynasty examples as the palatial architecture of this phase all dates back to the Saite Period and comprises typical mud-brick platforms built on casematte foundations. A chronological presentation of the material has been chosen in order to allow a consideration of the development of the palace terminology in the course of the time. The dependence on the knowledge of architectural structures will impose chronological jumps, with gaps between one period and another. Although in this way considerations on the chronological development of the royal palace in ancient Egypt will be not complete, it will be possible anyway to highlight significant changes or resistances in both the architectural planning of the structures and the terminology used to define them. Due to such limitations imposed by a philological and archeological combined study, chronological considerations will be discussed at the beginning of each chapter. Few examples from periods other from those considered may be cited to provide comparisons or to plug gaps in the documentation, but whenever this possibility recurs it will be underlined.

The collected data will be organized primarily according to the nature of the citations, thus separating sources into three broad categories: official texts, private inscriptions and literary documents. This subdivision aims to highlight any peculiarities in the use of a word in the official sphere of the king and its relationship with the kingship and the government, in the private sphere and the fictional context of literature. Beyond these broad classifications, the most important distinction is within each category according to two main grammatical functions of the citations: narrative expressions, which can be found in royal inscriptions as well as in private autobiographies, and non-narrative captions consisting mainly of official titles and epithets which are contained in private inscriptions or administrative lists. For this reason material having a similar function or a common theme may be treated together, even at the cost of a departure from the planned scheme. For example, when the mention of a specific aspect of the word in an official text is reflected in another type of document, such as a private title, their common features will be treated together in order to understand how a word was used and reflected in more contexts.

8 For debates on the distinction between “narrative” and “non-narrative” texts and “non-literary” and “literary narrative texts” see Quirke 1996 and Baines 1996: 154 ff.
The primary sources for the study of the meaning of the words are narrative texts, being the most informative of all because of their nature. Here the terms for “palace” are compound with prepositions and verbs within descriptive passages, which are more instructive than short and often honorific titles. Inscriptions on religious and commemorative monuments texts are particularly useful because they are often intended to accompany illustration of activities related to the inscription itself and they have a narrative nature. Administrative papyri, both complex documents and those containing simple lists of royal personnel, are particularly instructive to reconstruct the organization of the palace and the activities performed within it. The category of the private inscriptions comprises both narrative autobiographies inscribed on the walls of private tombs or other monuments and titles or epithets compound with each term. The first type of sources has the form of verbal narrative accounts and contains more descriptive phrases than lists of epithets. However, the close relationship of the private autobiographies with the didactic literature and their self-presentation genre throw doubt whether these sources can represent the actual attributes or functions of the owners. According to J. Baines, biographies were limited by decorum and because they were an idealized description of the highest levels of Egyptian society, they tend to present an idealized description of society. Epithets and titles present difficulties of interpretation because of its own nature of short, repetitive and often merely honorary names. Its greatest deficiency consists in the lack of context in which a title occurs, often simply listed together with others titles having no connection with each other. In the case of some titles, it will not possible to list their every single occurrence because of their great frequency in texts, so that the possibility of some omission is high. Despite the inability to list every example of a specific title compound with one of the five words for “palace”, the present work aims at presenting every single possible type of them. Literary texts will be treated with special attention, considering their “fictional” nature. Despite their narrative structure provides articulated descriptions of the palace in comparison with many private inscriptions, the context in which these texts

---

9 Quirke and other scholars have repeatedly drawn attention to the difficulties involved in inferring administrative structures from monuments whose function was inextricably linked with the spheres of the temple and the tomb. Quirke 2004: 1-5; 15-17. Franke 1984a: 103-124. Martin-Pardey 1986: 533-536. Pressl 1998: 12 f.
were written and to whom they were destined must be considered before drawing any conclusion.

Among the numerous occurrences considered in this study, the same title or expression can be compound with more than one word for “palace”. However, the possibility of finding more terms used in the same expression does not mean that they were necessarily interchangeable. The process of copying texts and reproducing modelled inscription could have determined the insertion of an exceptional word in a given expression rather than another most commonly used. In this case we shall consider the percentage of occurrence of each term, assuming that the most common word is the nearest one to the meaning of a given context.

The examination of the use of each word is based on the grammatical aspects of its citations. The greatest distinction is between sentences and prepositional compounds, including verbs and prepositions, prevailing in narrative texts, and official epithets or title without any verb or auxiliary. The first ones are particularly instructive because of their nature intended to describe activities performed in the palace itself. In this case, the verbs most frequently used in relation to a given term will be distinguished and studied in their semantic value. Prepositions will help to understand the place of performance of the activities described by verbs and their physical connection with the palace.

While cataloguing all narrative texts and captions, the Egyptian palace-words will be rendered by transliterations. Although this chose might appear inconclusive, it aims to not affect an objective reading of the sources. This practice is also conditioned by the fact that the meaning of each term is not univocal and may vary according to the context. The hypothetical translation of each word will be discussed in every single chapter together with the analysis of the philological evidence. The ultimate goal is not to offer a definitive translation to each palace-word, but to identify one or more meanings in relation to the contexts of use and to derive from this an accurate picture of palace’s function and significance. Epithets and their combinations will be most useful in defining the relationship of a specific title with other bureaucratic identities within which an official may have operated. This information will be integrated by knowledge derived by other kind of sources, particularly the administrative monuments.
The purpose of this study is also to provide a collection of nearly every Middle, New Kingdom and Late Period texts containing reference to the royal palace, that I hope it will be used for future studies.

Goelet has conducted a similar study of the five major terms for the palace, specifically based on Old Kingdom sources, in his PhD dissertation submitted to the Columbia University.\textsuperscript{14} It can be considered the first detailed examination of a single such word by itself in the Egyptological study. Goelet has offered a comprehensive and precise examination of every single term providing a full documentation of Old Kingdom texts referring to the palace. His study has been very useful for me to understand palace terminology in the Archaic Period and the Old Kingdom, when the words were firstly used. My research aims to expand the horizontal timeline of this discussion to later periods of Egyptian history and to give added value to this, thanks to the comparison between textual evidence and archaeological knowledge. To the treatment of the evidence citation-by-citation chosen by Goelet, I have preferred to organize the sources in a separate catalogue.\textsuperscript{15} In this way quotations of the words may be used separately from the commentary as database for any future research. In order to facilitate the reading of the review and to avoid repetition, a system of cross-references will send the reader back to the catalogue and the original citation. The reference code consists of a combination of Roman numerals, alphabetical letters and numbers. Roman numerals are associated to the chronological periods discussed in the present study:

I - Middle Kingdom

II - New Kingdom

III - Late Period

Letters serve to distinguish the three broad categories in which the citations are divided:

A - Private Inscriptions

B - Official inscriptions

C - Literary texts

\textsuperscript{14} Goelet 1982. It must be mentioned even his article on the usage of the term \textit{stp}-\textit{s3} in Old Kingdom texts: Goelet 1986: 85 ff.

\textsuperscript{15} The catalogue is the first and most painful section of the work to have been realized, without which the comparison between the sources - on a horizontal level (sources of the same period) and on a vertical level (sources of different periods) - would not have been possible.
Numbers correspond to the progressive sequence of the cited evidences. So, for example, the code A.I.1 will identify the first source of the Middle Kingdom among the texts of official nature (royal inscriptions and administrative records). ⁶

Titles and narrative expressions will be organized in separate synopsis for each of the five words for “palace”, where they are listed in alphabetical order and schematic representation, with summarizing aim. The purpose of such schemes is to show the reader the main ways in which a term was used and how frequently it was adopted in a specific manner in the different periods considered in the present study. The following abbreviations have been used for the chronological presentation:

E.M.K.-- Early Middle Kingdom = 11-12th Dyn.
L.M.K. -- Late Middle Kingdom = 13th Dyn.
E.N.K. -- Early New Kingdom = 17-18th Dyn.
L.N.K. -- Late New Kingdom = 19-20th Dyn.
E.L.P. -- Early Late Period = 21st-22nd Dyn.
L.L.P. -- Late Period = 25-26th Dyn.

Through these charts, the reader will be able to find a specific epithet or phrase he is interested to, being referred to the original source in the catalogue.

Despite the attempt to provide nearly all evidence of the use of a given term, this work does not pretend to be exhaustive, since it might have missed something for its real nature. The methodology used involved the counting of collections of ancient Egyptian texts, without any index that would facilitate the research. As for the Middle Kingdom, the New Kingdom and Late Period, there are no glossaries that enable to find the occurrences of palace-terms in texts. The most time-consuming work of such a lexicographical research consists in searching through a mass of previously published materials in order to find examples of each particular term. At the same time this methodology involves a series of possible and inevitable omissions. Despite some of the occurrences may have been skipped because of the huge quantity of consulted sources, the arduous task of a complete catalogue will be simpler in the future thanks to the initiation of the work. The collection of epithets has been made easier by the consultation of many publications on Middle

⁶ This system allows to extract those parts of the original document which in turn are useful for the comment, without mentioning it all over again.
Kingdom private titles - which have been consistently studied – and some others on Late Period military titles.\textsuperscript{17} Actually, there’s not a comprehensive collection of private titles of the New Kingdom leaving out a recent publication of Al-Ayedi which only lists some of the most common New Kingdom titles and which I used as a starting point for research relating to this period,\textsuperscript{18} and the prosopography by Pierre-Marie Chevereau of New Kingdom military titles studied.\textsuperscript{19} Collecting Late Period sources has been facilitated by the use of Claus Jurman’s MPhil thesis submitted to the University of Birmingham\textsuperscript{20} focused on the problem of locating the royal residence in Late Period Egypt, which provides a rich bibliography on this phase of the Egyptian history.

As can be gathered from previous remarks, this study does not want to be a one-sided discussion, but rather aims to be a comparative research, both philological and archaeological, of the royal palace in ancient Egypt. The biggest obstacle in the attempt to combine these types of sources is that most of them come from contexts completely unrelated to those of archeologically known royal buildings. The almost complete lack of references to the palaces in sites where these buildings have been excavated can be explained as result of an archaeological coincidence. The building material of these structures has affected their preservation status: the mud-brick walls of palaces were decorated more easily with paintings than with stone reliefs, the use of stone being limited to columns, doorjams and thresholds. The majority of the stone components has been reused or stripped away and few inscribed blocks have been preserved. Furthermore, the excavations of many of these structures have been not sufficiently documented, and reconstruction of architectural plans must be based on preliminary reports or old school publications. Apart from some administrative papyrus whose origin is known, most of the citations come from religious and funerary contexts and are unlikely to be linked with an identified structure. With rare exceptions, sources mostly refer to the palace in general, without specifying the location of the structures they are talking about. Official and narrative documents refer mainly to structures that have not been archaeologically recognized, like palaces at Ijtawy, Memphis, Karnak and Piramesse. These sources are useful to localize and know about buildings that have not yet been discovered, but do not allow comparisons with the results of the architectural analysis. Although private monuments provide additional information to what gathered from royal inscriptions and

\textsuperscript{18} Al-Ayedi 2006.
\textsuperscript{19} Chevereau 2001.
\textsuperscript{20} Jurman 2006.
literary texts, they pose their own limit when they questioned with regard to the location of the “palace”, “residence” or “central administration” cited in the text. Despite documents relating to known palaces are very rare, the intention of this work is to identify a match between the functions identified by the architectural features of buildings and meanings suggested by the contexts of their citations.

Since it would have gone far beyond the aim of this research to include also the buildings belonging to governors, I have confined myself in analyzing only royal palaces. However, the architectural section of this study will comprehend some provincial monuments that may have belonged to local princes or governors and have been used temporarily by Pharaohs of various dynasties, in order to fill chronological gaps or add comparisons with proper royal palaces. Such a definition highlights the problem whether a “non-royal” palace may have existed in ancient Egypt. The problem in fixing the boundaries of a similar research coincides with the difficulty of defining what a royal palace is. The first difficulty lies in finding a modern terminology which may classify and represent the ancient one. Even if a perfect congruence is impossible to be found, we depend on the use of the modern dictionary and the modern concept of palatial entities if we aim to understand the function of ancient Egyptian royal palaces. As in the current language there are several labels to categorize different aspects of the palatial institution – “palace”, “royal residence”, “administrative center” – similar shades of meaning may have been expressed by the five words for palace in Egyptian vocabulary. Both archeological and textual evidence suggest that ancient Egyptian royal palaces were multi-functional complexes or clusters of buildings of monumental size and all focused on the person of the king. Their functions spanned from residential to governmental, economic, defensive and ceremonial and were performed in specifically dedicated spaces inside the same structure. These different functions necessitated different architectural features, including living quarters for the king and his entourage, spaces for ritual performances - both religious ceremonies performed by the king and secular proceedings like the royal audience of foreign princes -,

---

21 Implicit geographical data can be assumed by the localization of the monument; the original placement of a votive statue may reflect the owner’s location of the office played by him, but this is not the only determining factor possible. The commission of a monument at a particular site could result from the personal devotion of the owner to a local deity and generally by ideological individual’s choice (Jurman 2006: 90, 103). Similar caution is to be taken when deducing information by personal names, given the problematic and the conservatism of ancient Egyptian onomastic (Vernus 1982: 328-330). Furthermore, a name does not determine where an individual spent his professional career (Grapow 1937: 44-53).

22 Among “non royal” palatial buildings could be listed the “palatial” structures in the fortresses attributed to the viceroys during the 18th and the 19th Dynasty.

23 As Jurman has recently asserted in his work on Late Period kingship and residence, in Jurman 2006: 23.
administrative and economic facilities, bureaux and offices, reception and recreational spaces like gardens or animal enclosures. Although Egyptian literature has tried to give a concise definition of royal palace, every single structure would seem to have its own peculiarity. Some of these complexes were designed to serve as dwelling place for the king, the royal family and any other person of comparable power and administrative activity. Others would lack actual living quarters for the king, or would have confined them in a small back section of the structure not really practical. Adopting O’Connor’s terminology some of these buildings may have had a “ceremonial” function, having a main cultic section destined to the performance of ritual activities. Others would have a defensive nature, as suggested by their position on raised platforms. It must be remembered the possible presence of sanctuaries, shrines or other religious spaces used by the Pharaoh and the royal family for the worship of deities. Despite the separation between civil and religious building was accepted and emphasized by the use of different building materials - the stone for the temples and tombs - and mud-bricks for daily-life structures, the distinction between secular and religious activities carried out in the royal palace reality is not so sharp. If the same structure could accommodate different sections with multiple uses, the words for “palace” may have not necessarily referred to different structures, but to different spaces of the same building. The ambiguity of the performed functions and the architectural differences hamper a decisive definition of the palace itself and a more precise translation of each term used to define it. The meaning of each word can vary according to the context, sometimes being related to a whole building or entity and at other times to a specific section of a wider structure. The identification of these differences in function and variations in meaning over time is instrumental to understand the real use of ancient Egyptian royal palaces.

---

25 As pointed out by Jurman it is perhaps a justifiable question whether a royal monument lacking residential spaces for the king might not be labelled as “palace”. Jurman 2006: 8.
26 O’Connor 1995: 270-274.
27 Lacovara once refers to the northern platform at Deir el-Ballas as a “campaign palace” that would have served to host Theban Pharaohs during the expulsion of the Hyksos. Lacovara 1997: 13-15.
PART I

PART I. LEXICOGRAPHICAL STUDY OF THE ANCIENT EGYPTIAN ROYAL PALACE

Chapter 1. Middle Kingdom textual sources

1.1 Introduction

The political unification of Egypt after the First Intermediate Period came from the Theban provinces during the late 11th Dynasty (specifically under the reign of Mentuhotep II, 2008-1957 B.C.). The administration of Egypt during this time is known from later 11th Dynasty inscriptions thanks to private tombs showing examples of ranking titles and positions of officials in relation to the king at Thebes.

During the 12th Dynasty the permanent royal residence and administration centre of Egypt was moved by Amenemhat I to Itjtawy, near modern Lisht. The precise time of his moving is not known and it is possible that the king spent some years at Thebes before transferring the capital to the new city. Although not much has been discovered about the new capital, its palace is known thanks to poetic descriptions found in the Instructions of Amenemhat and the Tale of Sinuhe. Another royal palace would have continued to exist at Thebes, near the temple of Karnak, and it is attested by written sources with certainty since the time of Sesostris I. The 13th Dynasty, which has been excluded by the Middle Kingdom by earlier scholars and has recently been reintegrated in this chronological classification, did not mean a shift in the location of the capital that continued to be positioned at Itjtawy. From the 13th Dynasty, we have an account book, known as Papyrus Boulaq 18, listing deliveries and expenses at the palace at Thebes during visits of the royal court to it; the Theban palace was probably situated on the western side of Thebes, near Dra Abu el-Naga, where the papyrus has been found. Also the

4 Around the pyramid of Amenemhat I were found settlement remains of the 13th Dynasty which may have been the suburbs of the town. Grajetzki 2006: 30.
9 Scharff 1922: 51 ff. Mariette 1871-1876.
city of Memphis should have been the site of a royal palace from the Old Kingdom towards
the Late Period. While archaeological excavations have revealed only the palaces of the 19th
and 26th Dynasty,10 texts speak about earliest structures. A reference to a Memphite Middle
Kingdom pr-nswt for example is contained in the Instructions addressed to King Merikare
(A.III.3), dated to the First Intermediate Period.11 In addition to palaces located in the major
Middle Kingdom administrative centers, other palatial complexes existed in important
provinces of the Egyptian state. A palace dated to the 12th Dynasty has been found at
Bubastis,12 the cult centre of goddess Bastet, near modern Zagazig, and might have
belonged to the governor of this important town. Fragments of doors, jambs and
thresholds depicting royal figures and the titles of Amenemhat III on some of them indicate
that the palace was temporarily used by the king on his visits to the temple of Bastet and as
administrative centre of the eastern Delta.13 A monumental gate erected by Amenemhat I
and renewed by Sesostiris III from the northeast area of Kathana-Qantir may have belonged
to a monumental building found in the near site of Ezabet-Rushdi, a small village about 1 km
north-east of Tell el Dab-’a.14 Like the structure at Tell-Basta (PL I), it may have been used
by a local governor and provisionally occupied by the kings of the 12th Dynasty. Another 13th
Dynasty provincial royal mansion has recently been identified by the Austrian team in the
southern area F/I of Tell el-Dab’a (PL IV).15 In order to allow a comparison between the
philological study of written sources and the architectural analysis of archaeological founds,
this work will focus mainly on 12th and 13th Dynasty documents with some exceptions from
the 11th Dynasty, useful for comparisons and integrations to the main inscriptions.

The majority of the Middle Kingdom texts considered in the present study were inscribed
on stelae and other objects dedicated in or near the most important temples of this period.
During the course of the 12th and 13th Dynasty the range of people who dedicated stelae at
some sanctuary became quite widespread. The highest number of Middle Kingdom stelae

13 A lintel representing Amenemhat III who celebrates his Sed-festival points very much to a royal use
Weissl 2004.
was found in the sanctuary of Osiris at Abydos, one of the most significant religious centers of the period.\textsuperscript{16} Other Middle Kingdom centers of cult that have provided written sources used in this study are the temple of Amun at Karnak\textsuperscript{17}, that of Horus at Edfu,\textsuperscript{18} the sanctuary of Heqaib at Elephantine\textsuperscript{19} and the sanctuary of Hathor at Serabit el-Khadim in the Sinai.\textsuperscript{20} Private inscriptions were carved both on stelae and on the faces of natural cliffs at the sites of mining, quarrying and military expeditions and have been found in Sinai and Nubia, as well as in Egypt itself. Although the form and subject matter of these texts are similar in many ways to the funerary and votive inscriptions just discussed, their more inherently secular nature makes them very useful,\textsuperscript{21} the epithets in expedition-texts showing a stronger emphasis on the king than on the gods.\textsuperscript{22} Hatnub, at the east bank of the Nile, near el-Bersheh, was an important alabaster quarry during the First Intermediate Period and the Middle Kingdom;\textsuperscript{23} ranking officials involved in quarrying expeditions have left here several biographical inscriptions of considerable historical interest. The tombs of a number of these men have also been identified at el-Bersheh.\textsuperscript{24} Wadi Hammamat served both as a corridor for the Red Sea trade and as important quarry; inscriptions from here vary considerably in length and content and some of them give detailed accounts of the events of the expedition, providing titles and epithets of great importance for this study.\textsuperscript{25} Men responsible for the Wadi el Hudi\textsuperscript{26} inscriptions were officials of the central administration often holding positions associated with the treasury and the royal administration. Officials working in turquoise and copper mining expeditions in the Wadi

\textsuperscript{25} Dated inscriptions recording Middle Kingdom expeditions in the wadi begin in the reign of Mentuhotep III in the 11\textsuperscript{th} Dynasty and continue until the reign of Amenemhat III. The only texts dated to the 13\textsuperscript{th} Dynasty belong to the reigns of Neferhotep I and Sobekhotep IV. Couyat – Montet 1912. Goyon 1954. Simpson 1959: 20-37.
\textsuperscript{26} Fakhry 1952. Sadek 1980. Amethyst quarries at Wadi el-Hudi were first exploited at the end of the 11\textsuperscript{th} Dynasty under Mentuhotep IV and were extensively worked in the 12\textsuperscript{th} Dynasty. They were also quarried for at least a brief period in the 13\textsuperscript{th} Dynasty, during the reigns of Neferhotep I and Sobekhotep IV.
PART I

Maghara and Serabit el-Khadim in the Sinai²⁷ left both rock inscriptions and stelae to commemorate their success. Other Middle Kingdom private inscriptions - both stelae and graffiti - have been found at several locations in Nubia, including Semna and Kumma.²⁸

Other kinds of rock graffiti are those found at Shatt er-Rigal²⁹ in Upper Egypt and in the island of Sehel near Elephantine.³⁰

Another major source of information, especially for the early 12³¹ Dynasty, is the corpus of scarab seals, which in many cases provide only titles and names of officials because of their own nature and the limitate space for the inscriptions on them.

As a general rule for Middle Kingdom sources, self-descriptive phrases and epithets were most commonly focused on the relationship of officials with the kings or the gods, rather than on administrative duties, so that they hardly provide complete information on the palatial structures’ function.³¹

Information provided by stelae are bound by their limited space and changed overtime and by the type of the stele. Some people - especially lower officials - appear on monuments often with any title at all; at the same time there are proper biographical inscriptions and other officials have long title strings, being necessary a series of epithets to fully define the nature of a specific official. Narrative biographies³² of highly ranked officials have provided much of the known information regarding the relationship between the king and the nobility. Epithets referring to the officials dealing with the king might be expected to reflect the major institutions in the Middle Kingdom administration despite they are much less instructive than the autobiographies. Sometimes titles are not directly related to the owner; there are many stelae for examples that show familiars and servants of the inscription owner carrying their proper titles. The most serious difficulty in using information from votive monuments is their dating and the lack of recorded find spots: only a small number of stelae bears the name of the king and the original location of many monuments within the site are unknown, due to the circumstances of the early excavations.

²⁷ They are mainly from the reigns of Amenemhat III and Amenemhat IV. Gardiner - Peet – Černy 1952-5.
²⁸ Rock inscriptions dated by royal cartouches all come from the reigns of Sesosiris III and Amenemhat III. Dunham – Janssen 1960-7.
²⁹ From here is a small group of inscriptions dating to the reign of Nebhepetre-Mentuhotep. Winlock 1947: pl. 39.
³¹ Doxy 1998: 30-1.
³² For a recent summary of the development of “autobiographies” see Gnirs 1996: 191-241.
Tomb inscriptions are a first class historical source, because of the wider space for placing titles and title-strings. However, the use of tomb inscriptions for the present study is limited by both lack of secure dates and bad state of preservation of Middle Kingdom cemeteries. Remains of private tombs at el-Lisht\textsuperscript{33}, the principal royal cemetery for the city of Itjtawy, at Saqqara and el-Lahun are fragmentary, because they have not been well investigated and they are often much destroyed.

The administrative documents from the Middle Kingdom are few and they can be mainly dated to the late part of the period. They include two remarkable papyri, the royal accounts recorded on the 13\textsuperscript{th} Dynasty manuscript known as Papyrus Bulaq 18\textsuperscript{34} and the rich administrative miscellany known as Papyrus Brooklyn 35.1446.\textsuperscript{35}

References to the royal palace are contained also in several literary texts, which require a small introduction. In the actual Egyptological debate, the most important attribute that defines them is “fictional”, a term that differentiates royal and autobiographical texts with literary qualities from those works which, due to their fictional quality, correspond more closely to the modern concept of literature.\textsuperscript{36} Stephen Quirke draws an important distinction between non-literary and literary\textsuperscript{37} narrative texts, “narrative” being defined as “the account of an event and its consequence”.\textsuperscript{38} This leads to a group of non-literary narratives, which includes legal texts, autobiographies,\textsuperscript{39} royal inscriptions, liturgical texts not written for recitation in liturgy, and certain funerary texts. Useful inscriptions for the recognition of the royal palace in this study may be inserted in the definition of “narrative secular” including mainly stories and instructive texts generally labelled as “wisdom literature”.\textsuperscript{40} Narrative texts were written by literary elite\textsuperscript{41} in an official context. The protagonist and the auditors of these compositions were members of the royal family and king’s entourage, even if reading aloud potentially widened their audience. Literature’s purpose seems to have been intellectual pleasure, but most of these compositions were

\textsuperscript{33} For recent work at Lisht see Arnold 1992. For a summary of the main Middle Kingdom remains see Baines - Málek 1980: 133.
\textsuperscript{34} Scharff 1922. Mariette 1871-1876.
\textsuperscript{35} Hayes 1955.
\textsuperscript{37} For a definition of “literature” see Loprieno 1996: 41-7.
\textsuperscript{38} Quirke 1996.
\textsuperscript{39} For similarities between “autobiography” and “fictional discourse” see Loprieno 1996: 46.
\textsuperscript{40} From the present discussion are excluded narrative religious texts, including hymns to the gods, mythological and magical texts, and an extensive collection of mortuary texts.
\textsuperscript{41} Parkinson 1996: 140. Quirke 1996: 275.
also politically intended to formulate and establish the behaviour of the elite in official settings, therefore also in the palace.\textsuperscript{42} Especially the didactic literature in the form of instructive speech of a father to his son, or admonishing and prophetic speech, specifies the manner in which an official should act within his office.\textsuperscript{43} Official duties are treated more from a moral and ethical viewpoint than from a practical one, and these texts rarely refer to the activities concretely carried out in the royal buildings. Despite this limit, by the description of the proper conduct of the officers in the palace, instructions and admonitions may offer some useful information on royal palace practices.

As explained in the introduction, in the present chapter and the following ones I will comment on the collected sources on the basis of their nature, distinguishing between narrative texts – both official and private – and titles or epithets. The first type of sources is more instructive than the latter, the words for “palace” being inserted in a narrative context, formed by verbal and prepositional compounds; the second one, due to its own nature, consists of shorter expressions, sometimes merely referring to the position held by the official in the palace, but useful to integrate the other sources.

1.2 The term ’ph in official monuments and narrative inscriptions

Very few explicit statements about the role of the Pharaoh in the palace have survived from the Middle Kingdom. Official monumental inscriptions on stelae or buildings rarely refer to the activities performed by Pharaoh in the palace and are most commonly connected with his role in the temple, because of the narrowness of preserved archeological documentation from the palatial sphere, and because the majority of the commemorative inscriptions served to celebrate the ritual activities of the king rather than his secular functions. The inscriptions dealing with chief topics of royal activities such as mining expeditions, building of temples, and military actions are an exception and are the most informative of all.\textsuperscript{44} However, it is the 13\textsuperscript{th} Dynasty Papyrus Boulaq 18 that provides the most revealing evidence concerning the palace complex itself, indicating the inner divisions

\textsuperscript{42} Posener 1976: 1-20.
\textsuperscript{43} Lichtheim 1996: 245
\textsuperscript{44} Lichtheim 1973-1980, I: 113.
of this complex, the role of palace employees, daily incomes and outcomes. Another important source of information on the bureaucracy of the Middle Kingdom State is Papyrus Brooklyn 35.1446, acquired by Charles Wilbour in the last century; no provenance is recorded for this document, but its contents concern Thebes and the area administered by the city.\(^{45}\)

The Wadi Hamnamat rock stele executed by vizier Amenemhat on behalf of Mentuhotep IV, the last king of the 11th Dynasty (A.I.1), refers to god Min and Horus, the latter often identified with the first, Lord of Coptos and protector of expeditions in the eastern desert. The expression ‘\(\text{'h ntr di ‘nh}\) “god’s ‘\(\text{'h}\) endowed with life” recalls various private inscriptions and hymns, in which deities are mentioned in connection with the palace within the enumerations of their powers and attributes. The genitival relation between the deity and the building suggests the religious nature of word ‘\(\text{'h}\). The existence of a ‘\(\text{'h}\) another from the proper secular palace is suggested by the occasional necessity to specify the royal ownership of the ‘\(\text{'h}\) itself (see expression ‘\(\text{'h nswt}\) in A.I.10). The expression seems to reflect an ancient form of the ‘\(\text{'h}\) known in the Archaic Period and the Old Kingdom when the sign ‘\(\text{ntr}\) could be written inside the basic ‘\(\text{'h}\)-sign as well as other hieroglyphs such as ‘\(\text{hd}\) or ‘\(\text{htp}\).

Such additional signs reflect different forms of the ‘\(\text{'h}\), most Old Kingdom sources depicting the ‘\(\text{'h-ntr}\) in contexts that suggest that this form of ‘\(\text{'h}\) was primarily a changing area or a resting place for the king during certain ceremonies.\(^{46}\)

The so called Building Inscriptions of Sesostris I (A.I.5), survived in a hieratic copy on a leather roll made by a 18th Dynasty scribe (Papyrus Berlin 3029),\(^{47}\) should be almost certainly carved on a stele or a wall of the temple of Atum at Heliopolis.\(^{48}\) The composition treats the foundation of the temple and the intention of the king to build his residence in its neighborhood. In this text Ra-Harakte is the one who has established the king in the ‘\(\text{'h}\):

\[l. ~11] \text{imt.n.f wi r imy ‘h m wdt nn prt.i m 3hty} \]
\[rdi.[n.f n.j] 3w.f ws\(\text{h.f}\) \]

He [Ra-Harakte] fashioned me as a dweller of the ‘\(\text{'h}\) as a baby, before I came forth from the thighs. To me was given its length and its breadth

\(^{45}\) Hayes 1955: 16-17.
\(^{46}\) Goelet 1982: 400.
Between remains of the 12th and the 13th Dynasty found at Tell el-Dab’a, near Khatana, a bead in green faience in the valuable collection of the king Farouk bears two columns of inscriptions engraved opposite each other (A.I.12):

\[\text{nswt-bity Sbk-k3-R’ ‘nh dt Sbk Šdyt Hr hry-ib Šdyt nb T3-ś hry-ib ‘h mrwt}\]

King of Upper and Lower Egypt, Sbk-k3-R’, living forever, beloved of Sobek the Faiyumite, the Horus who is in the Faiyum, master of the lake-land pleasing the ‘ḥ, beloved

This document refers to a ‘ḥ-palace, property of a Middle Kingdom provincial king residing in the Faiyum. The expression Hr hry-ib ‘ḥ recalls many private inscriptions adopting the same formula. The inscription on the naos JE 47276 of Sesostris I from Karnak (A.I.6) where Horus is linked to pr-‘3 (Hr ūnty pr-‘3, “Horus who resides in the pr-‘3”) constitutes an exception in comparison with more common expressions in official and private inscriptions using word ‘ḥ in relation to Horus as personification of the living king.

The ‘ḥ is mentioned once in the context of ḯw-delivery described in Sesostris III’s inscription from Medamud (A.I.10). ‘ḥw was a source of income for the king and it was intended for his personal consumption. Several commodities were sent to the palace itself, differently named depending on the inscription; the secular nature of the building where the ḯw must be delivered is confirmed by the apposition of nswt to the word ‘ḥ (‘ḥ nswt). The association of the ḯw with the ‘ḥ is implicitly recognizable in later inscriptions

51 See paragraph below: § 1.3.
52 Gundlach 2009: 60.
53 The term is generally translated as “offering”, “tribute”, “gift” and “product” (Wb I: 91, 12-18). For a more detailed analysis of the word see Bleiberg 1984: 155 ff. The term ḯw has recently been discussed by Liverani, in Liverani 1990: 240-266.
such as that in the 19th Dynasty tomb of P3-sr, smr tp n ‘h, “companion at the head of the ‘h” with responsibility for receiving inw of the northern and southern foreign countries.\textsuperscript{54} In Middle Kingdom private inscriptions, titles and expression can refer to the owner as responsible of inw to be brought to the ‘h, also in specific occasions like the celebration of some festivity (A.II.151). In the Theban tomb no. 65, the ‘h is presented as recipient of metal-delivery by the owner ‘h3ty; here the concept of delivery is not expressed by the noun inw, but rather from verb ini, with the same root of the noun.

A main source for the philological study of the Middle Kingdom royal palaces is a monumental red granite portal found at Ezbet Helmi, Tell el Dab’a (A.I.11).\textsuperscript{55} The inscription on the stone records that Sesostris III renewed a monument of Amenemhat I.\textsuperscript{56} The importance of this monument derives by its provenance from an archeological site not so far from Ezbet Rushdi el-Saghira, a village 1 km away from Tell el-Dab’a, where a probable palace of the 12th Dynasty has been unearthed (PL. III).\textsuperscript{57} The attribution of the inscription to the palace is uncertain. It may have come from another building at Qantir, which has not been fully excavated but was composed by a brick wall, three meters thick, led off from

\textsuperscript{54} KRI III: 9, 5 ff.
\textsuperscript{55} Habachi 1954: 448-458, pl. II-IV.
\textsuperscript{56} “He (Sesostris I) made as his monument erecting a doorway to the d3d3wy of Amenemhe(t) by renewing what was made by his father the king of Upper and Lower Egypt Sehetepibre, he made for him (the ceremony) of giving life”. Habachi 1954: 451.
either side of a doorway. Limestone blocks were found in the vicinity of the portal, one of them showing Amenemhat I in a foundation ceremony together with a statue of the king. The portal, *sb3*, was part of a building called *d3d3w[y] 'h ‘ltn-m-h3t*:  

Both architectural finds and inscriptions on them may suggest that the *d3d3w[y]* was a temple or a shrine, but the ‘h-sign and the absence of the name of a deity on the doorway, would tend to support Habachi’s interpretation of the building as secular rather than as a religious one. This type of architectural structure has not yet been archaeologically identified. Its belonging to the palace can be supposed, whereas the ‘h that follows it is not considered as determinative, but as substantive to indicate a specific royal building. The *d3d3w[y]* expression, which could be intended as variation of the word *d3dw*, is often attested in the Middle Kingdom epigraphy in relation with the sacral sphere of the temple. Beside this cases, Middle Kingdom material gives information on a palatial *d3d3w[y]*: ‘h follows this word in the private title *iry-‘t n d3d3wy n ‘h St* , “keeper of the chamber in the *d3d3wy* in the ‘h, St* attested on Seal 1663 – BM 30541 (A.II.140). Other Middle Kingdom officials bore the title *iry-‘t n d3dw* without the adding of ‘h. The connection of the *d3d3w[y]/d3dw* with royal buildings is known since the Old Kingdom, when it is said to be part of a palace or royal residence called the *H’y-wrpt-S3hwrt* on a false door from Saqqara.

---

58 On the basis of archeological excavations, Dorner has recently excluded the possibility of existing of a free-standing stone construction in geological environment of Ezbet Helmi and hypothesized that optimal condition for settlement concentration were most probably in Ezbet Rushdi el-Šaghira area and in the area between Ezbet Helmi and Khatana, in Szafrański 1998 citing Bietak 1991: 19, 21.
59 Habachi 1954: 452-3, pl. 5.
63 Spencer 1984: 130.
64 Martin 1971: 127 (n. 1663), pl. 38.3.
65 Quirke 1986: 127 no. 1663, pl. 38.3.
66 A group of *iry-‘t* official were on duty in the *d3d3wy*. The title *n k3 n iry-‘t n d3d3w ippi* is attested on a Vienna Stele from Abydos, dated to the 13th Dynasty (AS 143, cols. 19-20, in Hein - Satzinger 1989: 68-74). The inscription *iry-‘t n d3d3wy Štvy is preserved on a 13th Dynasty scarab in the Ashmolean Museum*, from Jericho (Tell el-Sūltān, in Martin 1971: 42 n. 475, pl. 5.20).
68 *d3d3wy nywy H’y-wrpt-S3hwrt*, “the *d3d3wy* which belongs to the *H’y-wrpt-S3hwrt*, Sethe 1933: 38 (3-4).
Ezbet Helmi inscription does not allow a reconstruction of the function of this particular structure of the palace. Useful information can be found in the aforementioned Building Inscription of Sesostris I (pBerlin 3029 - A.I.5),\(^{69}\) in which an official session (hmst) taking place in the \(d\)3\(d\)w is described:\(^{70}\)

\[b^t\ nsnt\ m\ s\ h\ m\ t\ y\ hpr\]
\[hmst\ m\ d\)3\(d\)w\ nd\ r3\ imyw-ht.f\]
\[smrw\ nw\ spt-s3\ ’n\ h\ wd3\ snb\]
\[srw\ r\ st\ w’w\]

Appearance of the king with the double crown, a sitting took place in the \(d\)3\(d\)w. One took counsel with his suite, the companions of the spt-s3, l. p. h., the official of the private chambers.\(^{71}\)

According to this inscription, Sesostris I made his appearance in the \(d\)3\(d\)w, ordering his officials an assembly in this place to announce his intention to build a temple in Heliopolis. The \(d\)3\(d\)w is described as a room/hall of audience inside the palatial building. The counsel organized by the king is composed by \(smrw\ nw\ spt-s3\), “companions of the spt-s3”, but the place where the king appeared and the session (hmst) took place is not specified. The appearance of the king such as that described in Sesostris I’s inscription by the verb \(b^t\)’, “to appear in glory”, is often combined with word ’\(h\) (see for example JE 6307 and private inscription UC 14333). The appearance of the Majesty (hm) or the king (nswt) in the ’\(h\) may have occurred in common and repeated occasions or in occasional and specific ceremonies involving the king (king’s crowning for example is described in BM 146 [574] - A.II.45)\(^{72}\). It seems likely that the \(d\)3\(d\)3\(w\)/\(d\)3\(d\)w was the specific place of the ’\(h\) meant for the appearance of the king and that it could be used as well to mean the group of people that reunited there. If the interpretation of the \(d\)3\(d\)3\(w\) as an “audience hall”\(^{73}\) is accepted, the meaning of the ‘Ezbet Helmi fragment is as follows: “the doorway, which belongs to the audience hall of the palace of Amenemhat”.\(^{74}\)

Some connection of this monument with the 12\(^{th}\) Dynasty palace discovered at Ezbet Rushdi el-Saghira might be supposed (PL. III).\(^{75}\)

---

\(^{69}\) De Buck 1938: 49 (Col. I, 1-2), 52.
\(^{70}\) \(d\)3\(d\)w is the new form for \(d\)3\(d\)3\(w\) attested form the New Kingdom onwards. Sesostris I’s Building Inscription represents an exception to the trend of Middle Kingdom sources where the term appears with the dual form ending-wy. Wb V: 527. FCD: 319. GEG: 603.
\(^{72}\) In later sources the appearance in glory of the king is connected with the specific ceremony of the \(Sd\)-festival. See chapter 3, part II.
\(^{73}\) For the translation of the term \(d\)3\(d\)3\(w\)/\(d\)3\(d\)w as an “audience hall” in a specific place see Berlev 1968: 245.
\(^{74}\) Szafrański 1998: 104.
\(^{75}\) Bietak 1991: 64.
The most famous literary text that describes the experience of a royal audience in the palace is the Tale of Sinuhe (A.III.5). In the passage of the composition where Sinuhe eulogises Sesostis I in front of the foreign prince ‘Imn-nši, he reports king’s staying in the ‘ḥ after having taken the heritance of his father, Amenemhat:

\[B\ 46-47\) \textit{dd.kwī n.f wšb.i n.f nḫmn s3.f ‘k r ‘ḥ it.n.f iw’t nī it.f}\]

Then I spoke to him and I replied to him: indeed his son has entered into the ‘ḥ, he has taken the heritance of his father

\[B\ 50\) \textit{ntd d3r(w) ḫ3swt iw tf m.f m ḫnw ‘ḥ.f}\]

He is one suppressing the foreign lands, while his father stayed with him in his ‘ḥ

The term ‘ḥ is mentioned in Section D describing Sinuhe’s stay in Retjenu. While he is describing his present condition, he realizes how much he is missing the Egyptian residence. He states that the ‘ḥ still remembers him, probably reminding his position in the royal palace and finally realizes how desperately he wants to go back to the Egyptian ḫnw for burial.

\[B\ 155\) \textit{nfr pr.i wšḥ st.i šḥ3wy.i im ‘ḥ}\]

My estate is fine, my place is broad, memory of me is in the ‘ḥ

\[B\ 156-7\) \textit{ntb nb 33(w) w’rt tn htp.k di.k wi r ḫnw}\]

Whatever god fated this flight, be gracious and bring me back to the ḫnw

After the moment of self-realization, Sinuhe expresses his wishes to be in Egypt more clearly. He asks for king’s grace hoping to work again in the ‘ḥ for the queen and the royal children.

\[B\ 165\) \textit{ḥtp n.i nswt n Kmt ‘nh.i m ḥtp.t f nd.i ḥrt ḫnw.t ntt m ‘ḥ.f sdm.i wptw nt ḫrdw.s}\]

May the king of Egypt be content with me, may I live in his pleasure, greeting the mistress who is in his ‘ḥ and hear her children’s messages

As soon as he has expressed his desire, the king answers it and the royal children send the desired messages from the royal ‘ḥ. A royal letter is sent to Sinuhe to bring him home and is inserted in the tale. The king ensures Sinuhe that his position is still in favor and reassures his role in the original ḫnwty together with royal children in the ‘ḥ.

\[B\ 176-77\) \textit{wn in bhm.f ḫ3b.f n.i hr 3wt nt ḫrw.t s3w.ī ḫ n b3k im ẖk3 ḫ ḫ3st nbt nswt nt nswt msw m ‘ḥ.f hr rdḥt sdm.i wpwt.sn}\]

And His Majesty sent to me, with bounty of royal giving, to gladden the hearth of his humble servant, like any ruler of a country, and the king’s children who were in his ‘ḥ let me hear their business
The term ‘ḥ’ appears several times in meaningful passages of the Tale of Sinuhe, despite its interpretation as an autobiography or a fictionalizing tale is yet an open debate.\(^{76}\) The poem is concerned like an autobiography with narration of achievements which gave it the features of a tale of adventure in foreign lands. Despite its fictional and ideological aspect, this composition offers a self-conscious presentation of Egyptian culture.\(^{77}\) In replying to the royal decree allowing his return to Egypt, Sinuhe presents himself using a title that reasserts his connection with the royal palace: \(b3k\ n \ ‘ḥ’,\) “servant of the palace”. It does not refer to any specific function held by Sinuhe in the ‘ḥ’, being just an epistolary formula that expresses his loyalty to the palace and the king.

The final stanzas of the poem lead the reader swiftly to the entrance of Sinuhe in the inner part of the el-Lisht ‘ḥ’-palace through a series of courtly dwellings.

When it was dawn, very early in the morning they came and called me, ten men coming, ten men going to lead me to the ‘ḥ’. I touched the ground between the sphinxes as the royal children stood in the portal, receiving me; and the friends who usher to the Pillared Hall put me on the way to the ‘ḥnwty’ I found His Majesty on the great throne in the portal of electrum.

Then I was stretched out prostrate, unconscious of myself in his presence

At the great portal (\(\text{wmt}\)),\(^{78}\) flanked by two sphinxes (\(\text{ššpw}\)),\(^{79}\) he is introduced to the palace; here the royal children greet him. After the first entrance he crosses the audience device, passing at first through a court (\(w3ḥ\)) and then entering the audience hall (\(w3t \ ‘ḥnwty’\)) in which the king is seated on a throne (\(st \ wrt\) placed beneath a kiosk (\(wmt \ nt \ d’m\)).\(^{80}\) Here, terrified in front of the king, Sinuhe collapses. Sinuhe takes place in a

\(^{76}\) In the recent Egyptological debate concerning the prose narrative of the Tale of Sinuhe much ink has been spilled arguing over the literary versus historical methods of the account: Foster 1993, Parkinson 1997, Simpson 2003. Another current treatment (Barta 2003) joins with most others by characterizing Sinuhe as “fiction”, though extremely accurate in its background and description. Completely in favor of the inclusion of this story in the genre of private biography is Kitchen (Kitchen 1996).

\(^{77}\) Parkinson 1997.

\(^{78}\) e Spencer 1984: 186-90.

\(^{79}\) For the interpretation of the sphinxes at the entrance of the palace see Gardiner 1916: 94 f.

\(^{80}\) According to Spencer the \(wmt \ nt \ d’m\) might refer to the side-walls or panel that surrounded the throne which stood on an elevated base, see Spencer 1984: 188.
permanent residence. The rank of governor is bestowed on him and he is refurnished of foods and other facilities coming directly from the ‘h.

The description of the audience system matches its real plan as recognized in archeologically known palaces. Where it is preserved, it seems to respond to a specific architectural tripartite shape with the succession of two hypostyle rooms and a throne room at the end, smaller, roughly square and columned. Observing the gradual development of this device, not yet fully standardized in the Middle Kingdom, it develops in the axial shape of New Kingdom palaces, where the three succeeding doors of the two hypostyle halls and the throne room at the bottom are perfectly aligned each other.\textsuperscript{81}

\textsuperscript{81} In the North Palace of the 17\textsuperscript{th} Dynasty at Deir el-Ballas the reconstruction of the superstructure can be hypothesized by observing the layout of the casemate walls that have been preserved in the north-western sector of the building. This would have been composed by a latitudinal hall, a large central room, both probably with columns, and a rear larger space, rebuilt by Lacovara as a possible throne room, surrounded by several smaller rooms (Lacovara 1981: 121, fig. 2). Regarding the Thutmosid complex of Tell el-Dab’a (PL.VI), the layout of the superstructures of platform F, G and J can be reconstructed by the shape of their foundation-cells. In the central sector of platform F a longitudinal rectangular hall is perpendicular to a second square room, behind which is located a smaller rectangular space that we can hypothetically recognize as the throne room (Janosi 1996: 96-97). In platform G of the same site a monumental portico, which replaces the more common latitudinal hypostyle hall, precedes a transversal vestibule and a quadrangular throne room shifted to the south-east corner of the latter room and therefore accessible through a door not aligned with passage from the portico to the vestibule (Bietak - Forstner-Müller 2005: 86). An elaboration of this device can be observed also in complex J at Tell el-Dab’a, where the first latitudinal hall is replaced by a monumental peristyle courtyard, followed by a cross-hall; the throne room at the bottom is different from that of the building G for its rectangular shape and the arrangement perfectly axial with previous rooms (Bietak – Dorner - Janosi 2001: 89-96). Regarding the North Palace at Amarna, the recognition of the audience system has been facilitated by finding in the farthest raised room a platform leant against the bottom wall which was visible between two central columns. The area so identified is composed by a perfectly symmetrical sequence of a square hypostyle hall, a second colonnade hall with latitudinal development and a roughly square room at the bottom (Whittmore 1926: 6). A similar organization of space had already been tested in Malkata by Amenhotep III in the King’s Palace of the site. Here the tripartite device with the latitudinal vestibule, the longitudinal courtyard and the square throne room at the bottom is complicated by the addition of lateral complexes - initially interpreted as residences of the royal harim and recently reconsidered in their ceremonial use - which necessarily require lengthening the hypostyle hall in the middle. The tripartite organization of audience system is reproduced in palaces of the Ramessid Period attached to the funerary complexes of western Thebes and in the Palace of Merenptah at Memphis. The model just described is exemplified in the first phase of construction of the temple-palace at Medinet Habu, and in previous buildings like the Ramesseum of Rameses II and the Temple of Sety I at Qurna. In the palaces of Ay and Horemheb, which are missing the first hypostyle, it is possible to recognize only the transversal colonnade hall and the next square throne room (Hölsher 1939: 81-82). In the palace of Merenptah at Qurna the model of Ramesseum is reflected in a very simplified and reduced shape, and the first hypostyle is replaced by a portico with eight columns behind which there are two perfectly axial and identical shaping rooms with four square columns, the last one used as a throne room (Jaritz 1996: 112). In the complex of Rameses III at Medinet Habu, the first hypostyle room is replaced by the portico in the front of the southern side of the building on the courtyard entrance to the funerary temple. The second hypostyle was not directly accessible from the portico through a central door: this opening in fact was not really practicable since it was occupied by the Window of Appearance (Hölsher 1929: 40). The side doors that gave access to the small rooms next to the courtyard allowed an entrance on the eastern and western sides of the
Although nothing of the palace at el-Lisht is known, a Middle Kingdom palace which might be taken as example of the palatial architecture of this period is the palace at Tell-Basta.\textsuperscript{82} Gnirs has recently suggested a hypothetical reconstruction of the “way to the $\textit{hnwty}$” described in the Tale of Sinuhe applying it to the original Van Siclen’s plan of the structure (Fig. 1).\textsuperscript{83}

![Figure 1. Middle Kingdom palace at Tell Basta with Gnirs’s hypothetical reconstruction of the ‘way to the inner palace’. (Gnirs 2009: 16, fig. 1.)](image)

The palace at Tell Basta (PL. I) has a rectangular columned hall, which might be intended as the equivalent of the throne room of the New Kingdom royal palaces. This hall is entered from a larger columned space that can be equated with the central hall of later palaces. Instead of the axial vestibule of the New Kingdom royal buildings, at Tell Basta there was a courtyard itself. An entry in line with the window at the bottom of this hypostyle led to the throne room, a square room with four columns, where the king sat on a throne placed on the platform leaning against the rear wall, accessible through frontal steps. In spite of the inner circulation system not being perfectly axial as in other buildings in the New Kingdom, forcing a 90° bend before reaching the throne, the succession of the rooms seem to respond to the planimetric model of the New Kingdom royal palaces. A final break of the axial system can be noted in the second phase of construction of the building, where the entrance hall is transformed into a small transverse vestibule leading directly to the throne room, which is now simply a large room with two rows of three columns (Hölscher 1941: 44). The Palace of Merenptah at Memphis is characterized by the juxtaposition of three sectors: a peristyle court, a transversal hypostyle hall and the throne room with an elongated platform at the bottom; the only addition to this core is that of a back room with two columns shifted slightly to the north-west corner around which the royal apartments were located (Fisher 1915: 225. O’ Connor 1991: 177).

\textsuperscript{82} Van Siclen 1996: 239, fig. 1.
\textsuperscript{83} Gnirs 2009: 16, fig. 1.
PART I

long off-axis entrance composed of three different halls.\(^8\) The last throne hall, often with a raised floor above that of the previous hypostyle hall was characterized by a platform leant against the bottom wall, accessible through frontal steps.\(^8\) On this platform were set the throne and probably a removable structure, such as a kiosk or a canopy described in the Tale of Sinuhe. The passage of this composition describes the crossing of the last two rooms of the palace, the hypostyle court and the throne room of the ‘h’.\(^8\) Such description, although not accurate, corresponds with archaeological founds. Accepting the likelihood of this passage, it would be interesting to understand why the editor of the tale knew so well the inner part of the palace. The name and identity of the owner of the Berlin papyri has simply not survived, but his position in the state bureaucracy was high enough for him to build a tomb on the west bank of the Nile.\(^8\)

The just described ‘hnwty’\(^8\) is mentioned more than once in the text, in connection with the members of the royal family (specifically msw.s, mistress’ children) and the officials of the palace:

\(B\ 280\) iw.f r smr m’ He will be a friend among the officials,
\(B\ 281\) srw rdjt j m k3b šnyt he will be placed in the midst of the court,
\(B\ 282\) w∂3.tn r ‘hnwty dw3t r irt proceed to the robing ‘hnwty to attend to him

The word ‘hnwty’ is extremely common in Middle Kingdom texts and is frequently used in private titles. Bearers of the titles are mainly high officials working in some department or office probably attached to the royal building. An explicit grammatical relation between the word ‘hnwty’ and one of the terms for “palace” is very rare. Some of the inscription owners carrying the title ‘imy-r ‘hnwty, were somehow attached to the pr-nswt such as ‘Intf (BM

\(^8\) The central area of the Middle Kingdom Palace of Tell Basta is characterized by a sequence of two rectangular courtyards, the first of which is a peristyle court with two rows of columns in front of the short northern side, and the second is a hypostyle hall with six columns, both longitudinally oriented in a north-south direction. In this articulation of space the throne room at the bottom is not recognizable and could be placed in some of the side rooms next to the second hypostyle, or in the north of the building that has not been investigated. Van Siclen 1996: 239-243.

\(^8\) Throne bases have been found in situ in some audience hall of the New Kingdom royal palaces (Bietak 2005: 131-68) such as in the North Palace at Amarna (Whittmore 1926: 26) and in the temple palace within the Ramesseum (Jaritz 1996: 112). For a detailed study of the iconography and the symbolism of the royal throne see Kuhlmann 1977.

\(^8\) The description refers to the sentence before in which Sinuhe is said to be led to the ‘h.

\(^8\) The only information we have on the finding of papyri is in the sale catalogue of the man who found them, Giovanni D’Athanasi, who speaks ‘a tomb at Thebes’. Parkinson 2001.

\(^8\) Wb l: 226, 16. According to Gardiner’s analysis of the origin of the word, ‘hnwty is probably a compound consisting of the word ‘, “region”, “part” and the adjective ‘hnwty connected with word ‘hnw, “interior”, in Gardiner 1947: 44.
572 - A.II.40) or Rmny-'nḥ (CG 20571 - A.II.101).⁸⁹ The title registered in the later Onomasticon of 'lmn-m-ipt (B.I.91) imy-r ḫnwty n pr-nswt is considered by Gardiner a unique example explicitly referring to the pr-nswt -royal palace.⁹⁰ In the Tale of Sinuhe, the ḫnwty and specifically the wꜣt ḫnwty is quoted as part of the 'ḥ where courtiers were received and as private area of the palace to where Sinuhe is ushered during his royal audience. In his Notes on the Tale of Sinuhe, Gardiner has rendered the term as “Privy Chamber”⁹¹. The same rendering of the term is suggested by the evidence of Papyrus Boulâq 18 (A.I.17), where a pair of officials with the title imy-r ḫnwty n k3p are described as responsible for the interior arrangements of the private rooms of the palace and for deliveries and execution of orders concerning supplies for the residents in the private rooms of the building, the term k3p being referred to the “inner palace”.⁹² However, the frequent connection of the title imy-r ḫnwty⁹³ with departments such as the pr-hd or with the pr-nswt seems to imply more partecipation in administrative business. The Middle Kingdom titles imy-r ḫnwty wr n imy-r ḫtm, “chief interior- overseer to the treasurer” or imy-r ḫnwty n imy-r ḫtm, “interior- overseer to the treasurer” imply that at least sometimes the department under the treasurer employed several imy-r ḫnwty.⁹⁴ Among the Middle Kingdom epithets referring directly to the treasury (pr-hd), the imy-r ḫnwty (wr) n pr-hd, “(great) interior overseer to the treasury”, denotes that officials working for the treasury might be entitled imy-r ḫnwty.⁹⁵ Officials despatched outside the Nile Valley with expeditions to the sources of materials and to lead construction works often carried the title imy-r ḫnwty as base of epithets such as imy-r ḫnwty ḫrp k3(w)t, “interior- overseer director of the works”.⁹⁶ Ht-sty-wrt’s title imy-r ḫnwty n pr ḫtmw, “the overseer of the ḫnwty of the office of the house of the sealer” in stele Louvre C 5 (A.II.69) suggests an administrative function for the ḫnwty section.⁹⁷ Middle Kingdom holders of imy-r ḫnwty titles seem to have worked as king’s inspectors with the duty of supervising various departments, an expeditions to the mines or quarries or a cattle count.

Quirke is the first to have observed the chance in the functioning of the title imy-r ḫnwty towards the end of the 12th Dynasty, when the function of the title owner is most clearly

---

⁸⁹ Gardiner 1947: 45.
⁹⁰ ibid.: 45.
⁹² Quirke 2004: 27.
⁹³ For an overview of the available examples of the title see Gauthier 1918: 169 ff.
⁹⁴ Quirke 2004: 55.
⁹⁵ ibid.: 57.
⁹⁶ ibid.: 79.
⁹⁷ ibid.: 86.
specified and assigned to specific departments of administration.\textsuperscript{98} Up to that time the title stood alone without any qualifying assignments. Balanda has recently highlighted the relatively short period of this title’s importance within the Egyptian bureaucracy: the change of the nature of the title \textit{imy-r ḫnwty} would have undergone specifically during the reign of Sesostris III, the “reforming king”, when the holders of the title start to be permanently attached to specific sectors of the administration: \textit{pr-ḥd}, \textit{sdšt (ḥtmōt)}, \textit{kšp}.\textsuperscript{99}

According to the same author, the title virtually disappears from the end of the Middle Kingdom, apart from very sporadic occurrences in the New Kingdom.\textsuperscript{100}

Going back to the Tale of Sinuhe, in some passages of the text the term ‘ḥ’ is used in connection with word \underline{ḥnw}, the latter here being used with its meaning of “interior, inside”.\textsuperscript{101} This grammatical relation links these two terms in the aforementioned eulogy of Sesostris I in the Tale of Sinuhe (A.III.5) in which the king’s father (Amenemhat) is said to stay in the \underline{ḥnw} ‘ḥ:

\begin{quote}
\textit{B 50) ntd d3r(w) h3swt lw it.f m.f m ḫnw ḫ.f} \\
He is one suppressing the foreign lands, while his father stayed with him in his ‘ḥ
\end{quote}

In a passage of the Papyrus Westcar (A.II.6) the \underline{ḥnw} ‘ḥ is used in relation to the beautiful women of the ‘ḥ:

\begin{quote}
\textit{5,1-2} (…) ‘pr n.k b3w m nfrwt nbwt n ḫnw ḫ.k} \\
Fill a boat with all the beauties from inside your ‘ḥ
\end{quote}

1.3 The term ‘ḥ in titles and epithets

Crucial sources for the study of the term “palace” are non-royal monumental inscriptions composed by a series of epithets describing in laudatory tone the qualities of the person commissioning the text and the activities he carried out in the palace. The epithets are very short inscriptions, serving the basic function of identifying and characterizing the official

\textsuperscript{98} Quirke 1986: 125-27.
\textsuperscript{100} \textit{Ibid.}: 336.
\textsuperscript{101} Wb III: 368, 17; 369, 15.
owner, so that they do not provide detailed descriptions of the royal buildings. However, the indication of the activities performed in the palace, every time labeled with different terms, can help to recognize the existence of functionally different palace-words and related structures. Most of these titles are not exclusive, but rather reflect a preformed pattern, so that the same epithet can be applied to different people; a specific series of epithets may be required to define the specific position held by an official at the royal court. The recognition of the activities performed by palace officials may help to understand the function of various kinds of royal buildings where they acted.

Egyptian epithets fall into a category of formulaic expressions, which are neither strictly “historical” nor “literary”, such as the administrative private names on the Egyptian seals and plaques. These can be stamps, cylinders or scarab-beetle seals, whose surfaces were inscribed with the titles and names of officials, or stamp-seals of government departments and military forts, bearing usually the name of the office concerned. Some more narrative sections may be contained in the category of the autobiographies inscribed on the walls of private tombs, but also in independent, self-contained monuments erected in the city of Abydos, in the vicinity of the great temple of Osiris. Middle Kingdom autobiographies often took the form of verbal narratives, rather than lists of epithets and self-descriptive phrases. However, the narrative account were often replaced by a long sequence of epithets listed after a first person self-presentation (introduced by ink, “I am”) or the formal official’s titular and name, a format labeled by Gnirs with the definition of “encomiastic autobiographies”. Most of the Middle Kingdom epithets come from self-

---

102 Apart from this function, a statue, a relief or other representations, by virtue of being inscribed with the names and the characteristics of a person, was symbolically transformed from an inanimate object into the embodiment of the individual represented. Doxey 1998: 1.
104 Martin 1971: 12.
106 Most of these inscriptions have been found in the private tombs in the principal royal cemetery for the city of Itjtawy, founded by Amenemhat I at el-Lisht, in the extensive Middle Kingdom cemetery at el-Lahun, at Saqqara, between the Old Kingdom pyramids and mastabas, and at Dahshur. The principal sources of epithets from a funerary context are the rock-tombs of provincial officials in Middle and Upper Egypt: Beni Hasan is the most prolific source of texts from tombs. Meir is the burial site of the rulers of the 13th and 14th Dynasty Upper Egyptian nomes; the neighbouring sites of Assiut and Deir Rifeh house the massive tombs of the monarchs of the 13th Upper Egyptian nome; Thebes served as a capital of Egypt during the 11th Dynasty and most of the important Theban tombs of the Middle Kingdom date to the end of this Dynasty.
descriptive phrases in autobiographies of this type. During the 12th Dynasty, the officials erected their mastabas close to the royal Pyramids of Dahshur and Lisht that are today in a bad state of conservation; from there derive fragments of long autobiographies, which, if completed, would have provided interesting information about the tomb owners.

The term ‘h is often used in expressions which denote the closeness of the official to the king as personification of Horus, generally defined as nb ‘h. Several Middle Kingdom examples refer to the owners as imy-ib Hr nb ‘h, “favorite” of Horus, Lord of the ‘h” or htp-ib Hr nb ‘h, “one pleasing” Horus, Lord of the ‘h”. Variants of the same expression are represented by formula sm3y ḫr ḫry-ib ‘h, “associate of Horus who is in the ‘h” or ḫssw ḫr ḫry-ib ‘h, “favored by Horus who is in the ‘h”. The expression ḫr ḫry-ib ‘h was used referring to the king throughout much of the pharaonic history. The idea that ḫr is used in substitution of the king is suggested by the fact that Horus can be replaced by word nswt in epithets introduced by imy-ib (imy-ib nswt). The association of ‘h with the god-sphere, limited to Horus in Middle Kingdom inscription, will become more frequent and wider in later periods. From the New Kingdom onwards, several gods and goddesses can be associated with ‘h in the formula god’s/goddess’s name + nb/nbt ‘h, “name + Lord/Lady of the ‘h”. In tomb no. 1 at Assiut (A.II.31) a scene showing the vizier standing before cartouches of Sesostris I is accompanied by the epithet htp-ib n ntr nfr, “one who pleases the good god”; above the central doorway of the same tomb Df-h’py is called htp-ib ḫr nb ‘h, “one pleasing Horus, Lord of the ‘h”.

112 The expression “Horus in the palace” was used to designate the living king from the Old Kingdom onward (Hornung 1993: 142), and continues to refer to the king throughout much of the pharaonic history (Frankfort 1948: 36-37). For a recent analysis of the phrase in Egyptian texts see Gundlach 2009: 45 ff.
113 FCD: 32. The expression *imy-ib*, literally meaning “one who is in the hearth” is usually rendered as “favorite”.
114 *htp-ib*, literally meaning “one who makes the hearth content” is idiomatically rendered as “one who pleases”. Doxy 1998: 144.
115 Frankfort 1948: 36-37.

The official can be denoted as ḫw m ʾimy ’ḥ, “protector of him who is in the ’ḥ” or as ḫpr m ’ḥ, “one who grew in the ’ḥ”, generically intended to express his closeness to the king and the palace itself. In most cases the term is employed in expressions such as w’ ḫr-ḥw n ʾimy ’ḥ, “unique for one who is in the ’ḥ”, which generally describe the authority of the owner and his nearness to the king. Attributes referring to officials as ḫw or nd, “protector”, w’, “unique”, or wr, “one who is great”117 were probably borrowed by highly ranked officials from a large class of royal epithets emphasizing the role of the king as protector, warrior or provider.118

Title ḫr ḫ occurs in many Late Middle Kingdom sources and mainly in a number of Sinai inscriptions citing expedition records and private seals. The title belonging to officials related in some way to the king or his court is attested since the Early Dynastic period and enjoyed a great popularity during the Old Kingdom.119 According to Barta’s analysis of Old Kingdom occurrences of the term, the main activities of this specific office were “to take care of the personal service of the king, of his person, dress and crown, feasting, daily supplies to his palace and the like”.120 The title owners are often represented while

117 Another possible translation for wr is “the greatest” (Doxey 1998: 32). For a full list of Middle Kingdom titles introduced by wr see Doxey 1998: Appendix 2.
118 This similarity between royal and non-royal epithets is fully explained by Doxey, in Doxey 1998: 31-2.
119 Barta 1999: 1.
120 Ibid.: 16.
attending ceremonies linked to the Sed-Festival.\textsuperscript{121} Trying to explain the very high frequency of these titles during the 5\textsuperscript{th} Dynasty, Barta assumes that this increase was due to the process of gradual loss of central control and royal authority discernible several decades before the end of this Dynasty.\textsuperscript{122} K. Baer ha suggested that the introduction of the title was due to the increasing power of provincial officials.\textsuperscript{123} This assumption can also be applied to the Middle Kingdom historical framework. The function expressed by the title in this period is less discernible than in the earliest examples since it now appears mainly in seal inscriptions that are very short for their own nature and often do not contain expressions other than the title itself.

\textsuperscript{121} See Part II, chapter 4, § 4.3.  
\textsuperscript{122} Barta 1999: 17.  
\textsuperscript{123} Baer 1960: 301.
Title "íry 't n(t) 'h, “overseer of the chamber of the 'h” occurs many time in Middle Kingdom private inscriptions. The title is composed of a nisba adjective derived from the preposition r and literally meaning “one who is in relation with” and the word ‘t, generally translated as “chamber” or “department”. Word ‘t can be regularly used in expressions referring to different kinds of workshops as attested in Papyrus Boulaq 18 (A.I.17), where the term is used in relation to word pr- '3 to indicate ateliers for the preparation of food. The word 'h can be replaced by pr- '3 in the title "íry 't n pr- '3 which is commonly used during the 12th Dynasty. The purpose for which the chambers of the 'h were actually intended is not easily deducible from the context of the Middle Kingdom inscriptions. The extended version of the title in Seal 1663 "íry 't n d3d3wy n 'h, indicate that the d3d3wy discussed above was considered part of the 'h. The 'hmsn 'h, “assistant of the 'h”, Sn-pw was probably an attendant of the "íry 't n(t) 'h, “chamber-keeper of the 'h", in stele Toulouse 1181.

124 Quirke 2004: 66.
125 El-Sayed 2008: 269.
126 In other instances "íry ‘t-title occurs in connection with other architectural sections: ip3t-nswt (Ward 1982: no. 454), iwnt (?o) nswt (Ward 1982: 473), w3ty, “columned hall” (Ward 1982: 460), k3p (Ward 1982: 493), d3d3wy (Ward 1882: 496-7). Even if the term palace is not specified, all these terms are probably to be considered part of the 'h, like in the extended version in Seal 1663. Quirke 1990: 46.
\[\begin{array}{|l|l|l|l|}
\hline
iry-‘t n d3d3wy n ’h & Official in the d3d3wy of the ’h & Sth (13\textsuperscript{th} Dyn.) & Seal 1663 – BM 30541 \& A.II.140 \\
hmsn ’h & Attendant of the ’h & Sn-pw (M.K.) & Toulouse 1181 \& A.II.175 \\
\hline
\end{array}\]

‘’h can be combined with the adjective mnḥ, meaning “effective” or “efficient”,\(^{127}\) generally used in epithets describing the official in a general way. Expressions compound with mnḥ can be modified by adding adjectives, specifying the field of the official’s efficiency, or indicating the location in which he showed it. The title of Mntw-Htp recorded on the stele CG 20539 mnḥ dd ḫ3p hr sšm ’h, “efficient of the secret speech in the business of the ’h”, combines both the qualities of efficiency and eloquence generally related to Egyptian elite. Eloquence would have been another important skill required for palace officials, who had to be able to deliver administrative reports, to speak at the appropriate moment in the course of social and administrative reunions, and to relate stories in an accurate but also entertaining manner.\(^{128}\) Another epithet linking the quality of eloquence to the ‘’h-palace is contained in the same Abydene stele CG 20539: gm mdt nt ’h, “one who finds the speech of the palace”.\(^{129}\)

---

\(^{127}\) Wb II: 84-86.

\(^{128}\) Doxey 1998: 52.

\(^{129}\) Other titles contained in the same stele refer to the eloquence skills of the owner: gm ts, “one who finds the phrase” and dns mhwt, “guarded of speech”. Doxey 1998: 56. Speaking ability was commonly exalted in expedition inscriptions and Abydene stelae. It is described through the expression whm nfrt, “one who repeats what is good” (Hatnub 14, in Anthes 1928: 32-3, pl. 17) or the adjective ikr, “excellent” in the formula ikr dd, “excellent of speech” (CG 20539, in Lange-Schäfer 1902-25, II: 154-155; CG 20538, in Lange-Schäfer 1902-25, II: 145-150, pl. 40). Other titles express this attribute with phrases like “one who knows the outcome of his words”, rḥ pw n mdw.f from the tomb no. 2 of ḫmn-m-hṣṭ at Beni Hasan (Newberry 1893, I: pl. 7) and “one who knows the phrase on account of which one becomes angry”, rḥ ts n kdt.(w) hr.s from the Abydene stele of ’Inf BM 197 (581) (Simpson 1974: ANOC 56.2). Several other titles referring to eloquence are attested on ’Inf’s stele mentioned above and in some inscriptions considered in the present study: Bersheh 5 (Newberry 1893, II: pl. 34, pl. 13), Berlin 1204 (Simpson 1974: ANOC 1.1, pl. 1), MMA 57.95 (Fischer 1960: 258 ff. 1-2, pl. 7), MMA 12.184 (Sethe 1959: 79-80), CG 20538 (Lange-Schäfer 1902-25, II: 145-150, pl. 40). See: Doxey 1998: 54-56.
### Efficience and eloquence in the ‘ḥ

<table>

</tbody>
</table>

The quality of knowledge, most often expressed by a participial form of the verb ṭḥ “know” or “recognize”,\(^{130}\) occurs in a wide variety of texts throughout the Middle Kingdom and should be understood in the general sense of learning, understanding and competence skill.\(^{131}\) In one occasion this attribute is combined with the term ‘ḥ in the context of the tomb 8 at el-Bersheh where ḫḥ3 is defined as ṭḥ ssḥ n ḫ, “one who knows the business in the palace”. Several other epithets referring to officials’ ability to speak are attested on ‘Intf’s stele BM 197 [581].\(^{132}\) No one of these expressions clearly connects this faculty with one of the terms for palace, but the emphasis on his eloquence, unique among contemporary autobiographies, must be taken into account. The fact that ‘Intf exceptionally stressed his verbal skill\(^{133}\) can be probably understood in the context of other titles of the inscriptions, the one referring to the palace defining him as mty m pr-nswt ṭḥ ḍḥ dt m ḫ3 nb, “precise in the pr-nswt, one who knows what is said in every office”. The pr-nswt may have been a place where diplomatic skills were necessary while performing the administrative practices which are supposed to have taken place in the structure.\(^{134}\)

The expression ssḥ ‘ḥ, “the business of the ‘ḥ”, appears the inscription from tomb no. 8 at el-Bersheh:

\(^{130}\) Wb II: 442.  
\(^{131}\) Doxey 1998: 46.  
\(^{133}\) For a list of Middle Kingdom titles referring to eloquence as officials’ quality see: Doxey 1998: 57.  
\(^{134}\) For the analysis of pr-nswt term in private epithets see below.
Another general phraseology using the term ‘ḥ’ is that referring to the personal “friendship” of the owner with the smrw, “friends” or “companions” of the palace such as in Mntw-Htp’s inscription UC 14333 (A.II.5):

\[Mrwt.(i) m ḫt nt smrw wr ‘ḥ ḫ’w im\]

Love of me was in the body of the courtiers, the great one of the ‘ḥ’ and him who was enthroned there

In royal and religious texts the officials next to the king are often called “friends” in order to emphasize their importance in comparisons to others.\(^1\) Wrw, literary meaning “the great ones”,\(^2\) was probably a designation of rank, without any indication of specific duties.\(^3\) A distinction between two categories of smrw, some belonging to the ‘ḥ’ and others to the pr-nswt, is highlighted by inscriptions in Heqaib 2 (A.II.34) and 9 (A.II.122) stating:

\[ddw n.f īyw m pr-nswt in smrw īmyw ‘ḥ\]

One to whom it is said: “Welcome to the pr-nswt” by those who are in the ‘ḥ’

This class of nobility is most commonly related to the pr-nswt.\(^4\) Another kind of officials can be linked to the ‘ḥ, the srw,\(^5\) generally rendered as noblemen and probably defining administrators of various ranks without any specific role.\(^6\) Epithets starting with verbs such as ṭn, “to choose”/“to promote” or ṣṭp “to choose, to select” are often used by inscriptions owner to claim to have been chosen by higher officials: ṭnn srw ‘ḥ, “one whom the srw of the ‘ḥ promote” (Berlin 1199 - A.II.40). Another category of palace “entourage”,

---

\(^1\) Wb IV: 138. FCD: 229.
\(^2\) Grajetzki 2009: 123. Smr seems to have been a designation of relatively high status, since it is used referring to a limited number of officials in inscriptions such as Assiut 1, MMA 9.180.111, BM 574. For a complete list see Doxey 1998: 164-5.
\(^3\) Wb I: 328. FCD: 64.
\(^4\) Wrw are cited in several titles listed in inscription containing references to the palace itself: UC 14333, Louvre C1, CG 20539, Assiut 1, Berheh 5, BM 196 [1177], BM 572. For a complete list of Middle Kingdom epithets referring to wrw see Doxey 1998: 160.
\(^5\) See paragraph below: § 1.7.
\(^6\) Sr is generally translated as “nobleman”, “magistrate” or “official”: Wb IV: 188; FCD: 235.
\(^7\) Srw are frequently mentioned in texts referring to palace officials, such as those considered in the present study: Beni Hasan 2, Bersheh 1, Bersheh 5, Sinai 114, Deir Rifeh 1, Assiut 1, CG 20539, Leiden V 4, CG 20538, BM 196 [1177], Berlin 1199. For a complete list of epithets referring to srw see Doxey 1998: 159-9.
the šnwt,\textsuperscript{142} is described while approaching the ḫ (MMA 57.95 - A.II.2) and probably referred to a somewhat high status group of officials.\textsuperscript{143}

In one case ḫ is explicitly connected with the term m3’t, in reference to its meaning of truth, justice and rightness in action or speech:\textsuperscript{144}

| m3’t + ḫ |
|---|---|---|---|
| **s’r m3’t r ḫ** | One who raises up Ma’at to the ḫ | Mnṯw-Htp (Ses. I) | CG 20539 | A.II.32 |

Another passage of the same stele CG 20539\textsuperscript{145} refers to the concept of Ma’at as truth: rdḥ grn nn dd sw m3’t nn il hr.s, “who gave the lie not telling the truth and not coming with it”.\textsuperscript{146}

\textsuperscript{142} For the translation of šnwt as “entourage” see Wb IV: 511-12. FCD: 268.

\textsuperscript{143} Epithets referring to šnwt are frequent in inscriptions citing the royal palace, like those considered in the present study: CG 20538, CG 20539, BM 572, MMA 57.95, Beni Hasan 3, Dunham N 1935. For a complete list of these titles see Doxey 1998: 162.

\textsuperscript{145} Lange-Schäfer 1902-25, II : 152, l. 8.

\textsuperscript{146} Other monuments containing reference to the royal palace list epithets compound with the concept of Ma’at. In Assiut 1, BM 581, MMA 57.95, MMA 12.184 several epithets refer to the quality of the owner to listen and say the truth, despite these titles do not explicitly connect it to the place of the palace. For a more detailed analysis epithets compound with m3’t see Doxey 1998: 42.
PART I

The Abydene stele BM 146 [574] (A.II.45) describes the duties of Smt(y) the younger in the ‘h-palace referring to him as “one whose coming is awaited at the crowing, at the appearance of Horus, Lord of the ‘h’: s33 ḫw t m ḫb3w m sḫʾ (t) ḫr nb ‘ḥ. This epithet must be considered in connection with others describing the priestly career of Smt(y), including ḫry sšt3 n ḫkrw nswt, “master of secrets of the royal insignia” and ḫm nt m pr-nw, “servant of the red crown in the shrine of Lower Egypt”. The inscription apparently refers to the ‘ḥ as a place with ritual functions, such as the crowning (ḫb3w) and the appearance (sḫʾ (t)) of the king.

1.4 The term pr-‘ḥ3 in official monuments and narrative inscriptions

The major evidence for the organization of the palace comes from Papyrus Boulaq 18, the account papyrus recording income and expenditure for the royal court during the visit to Thebes.

The two documents generally known as Papyrus Boulaq 18 were discovered by Mariette during his 1860 season of excavations at Dra Abu el-Naga; they were found on the ground behind a coffin together with a burial equipment bearing the name of Nfrḥtp. The papyri are in two different hands, but both mention a king Sobekhotep and a vizier ‘nh w and can be assigned from the early to mid 13th Dynasty.

The Papyrus Boulaq 18 contains the daily accounts of income and expenditure at the palace in Thebes over twelve days in the 3rd year probably of Sobekhotep II. Between the last date on the recto and the first date on the verso lies a gap of eleven days. It is likely that the intact text would originally have included entries for each days of the missing eleven.

The papyrus contains separate lists of people related to the royal palace generally divided in two groups: members of the royal family (listed in S1, S18, S38, S55, S60, S72, S74) and

---

147 Ward 1982: no. 934 1037, 895.
149 Wb IV: 237.
151 Mariette 1871-1876: 6-8.
152 Quirke 1990: 11.
153 Ibid.: 17.
officials (listed in S55, S60, S74).\footnote{Ibid.: 41.} Section S11 lists separately the main people assembled in the royal palace in three columns: the functionaries listed after the vizier – srw, the members of the royal family and the servants - rmt pr mn‘wt – and the unnamed attendants.\footnote{Ibid.: 41.} According to Quirke, while the ḥnty - the “Outer palace”\footnote{According to Quirke, the word ḥnty, literally meaning “front part” (Wb III: 301) would indicate specifically the front part of the palace, in Quirke 2004: 26.} - would have been dedicated to the first group, the k3p\footnote{Wb V: 105.} – the “Inner palace” - would have been destined to the second one.

The expression in S 25, 28, 31, 41, 43, 49 and recto 58, 64 (A.I.17) - \( di\ r\ pr·3\ m\ ‘k.n\ wdpww\ ḥnty\), “delivered to the pr·3 at the arrival of the cupbearers of the Outer palace“ - define a particular category of people at the palace working as beneficiaries of palace expenditure. The ḥnty is presented as a specific section of the pr·3.

In the same sections, other entries are classified as:

- \( mnt\ nt\ šn‘\ ddt\ n\ rmt\ pr\ mn‘wt\) Fixed portion of the provisioning-quarters given to the people of the house of nurses;
- \( mnt\ nt\ šn‘\ ddt\ n\ ‘kyw\ ’š3\) Fixed portion of the provisioning-quarters given to the ordinary entrants.

For the second and third of these entries, the summary account contained in S 12 for day 26 provides variants:

- \( mnt\ nt\ šn‘\ ddt\ n\ rmt\ pr\ mn‘wt\) Fixed portion of the provisioning-quarters given to the people of the house of nurses;
- \( mnt\ nt\ ‘kyw\ ’š3\ ddw\ n.f\ m\ šn‘\) Fixed portion of the ordinary entrants regularly supplied (?) from the provisioning-quarters.

As suggested by Quirke, while the pr·3 and more specifically the ḥnty would have been the first and most official place for delivering supplies by means of intermediaries named wdpw, the rmt pr mn‘wt, “the people of the house of the nurses”, receiving mnt should have been located in the private quarters of the palace, and the ‘kyw ’š3, the “ordinary entrants” receiving mnt too should have constituted the serving staff having a restricted access to an area of the palace called šn‘.\footnote{The literal translation of ‘kyw would have been “people with access”, implying that their access was restricted to a specific area the palace, in Quirke 1990: 37.} Beyond the barrier of the šn‘, presumably, only
palace officials and *rmt pr mn*, “people of the house of nurses” would be allowed to proceed into the main palace building.\(^{159}\)

According to the text the *pr-3’s* entries would have been delivered directly to the *wdpw hnty*, “the cupbearers of the Outer Palace”,\(^{160}\) while the two other groups were supplied directly from the *šn’* or “provisions quarters”, suggesting a division of the palace building into two principal sections: “the official quarters at the front”, *hnty*, and the private quarters at the back provided with storerooms or general servicing quarters, *šn’*.\(^{161}\)

Of the specialized departments within the *šn’* “provisioning-quarters” only the *t īwf “meat chamber”* is mentioned in Section 30; it was divided into a *ḥt “stillroom”* for the *hnty* “Outer palace”, and a *ḥṭ for the *ḥ3p*, the “Inner palace”.\(^{162}\) The title *īmy-r pr n šn’, “overseer of the estate of the provisioning sector”* is common in Middle Kingdom private inscriptions, but being the word *pr* without context, it is not possible to identify the *šn’* in question, which might be that of the palace as that of any other large institution or estate which had provisioning sectors.\(^{163}\) In the context of Papyrus Bulaq, the *šn’* functioned as quarter where food for royal family and servants were prepared within the palace area.

Several sections of the papyrus (§ 6, 14, 18, 22, 26, 27, 29, 37, 46, 63, 71) recording all orders for *’kw, “special supplies”* to be given to individuals or groups of people connected to the palace, are listed after the following format in two guises:\(^{164}\)

- (\*Wpwt\*) *lt.n īmy-r ḫnwty n k3p ṅb ḫ3 lw n prt.n f ḫ lw* (The commission) upon which came the interior overseer of the inner palace, ṅb ḫ3 lw, being (the commission) upon which he had to come forth;

- (\*wpwt\*) *lt.n ss n ḫnty Snby lw n prt.n wdpw Hq3 lw* (the commission) upon which came the scribe of the Outer Palace, Snby, being (the commission) upon which the cupbearer Hq3 lw had come forth.

Considering these two variants of the same formula, the *īmy-r ḫnwty n k3p, ṅb ḫ3 lw* conveys order for food to be delivered to various officials of the palace in a specific section

\(^{159}\) *Ibid.*: 39.

\(^{160}\) For the meaning of *hnty* as “the front” of “the outer part” of the palace building see Berlev 1960: 146-8.

\(^{161}\) Wb IV: 507.

\(^{162}\) Quirke 1990: 41.

\(^{163}\) Quirke 2004: 65. In essence the *šn’* was a place where materials for meals were stored and prepared; the range of work positions regarding this sector is captured in one Abydos stele of the 13th Dynasty in Oldenburg (Franke 2003). Each commodity was stored and prepared in a specifically designed unit called *t, “chamber”* (Berlev 1978: 235-259. Grajetzki 2001: 52-54).

\(^{164}\) Quirke 1990: 102-103.
of it, the $k3p$, while the $ss n \text{ḥnty}$ is responsible of delivery in the $\text{ḥnty}$. According to Quirke, the two sectors might be identified respectively with “the Inner palace” and “the Outer palace”. While the $ss n \text{ḥnty}$ may have had no access to the place where the orders were issued and taken orders from a $wdpw$, the $\text{ḥnty}$ $\text{ḥnty}$ $k3p$ may have been able to operate in both the $k3p$ and the $\text{ḥnty}$. The $k3p$ was probably the section where the private quarters of the above mentioned $rmt$ $pr$ $mn$, “people of the house of the nurses” were located.

Officials’ title $\text{ḥnty}$ $k3p$ appears several times in Middle Kingdom private inscriptions. Other titles such as $\text{ḥnty}$ $k3p$ and $\text{ḥnty}$ $k3p$ suggest that the $k3p$ was characterized by the presence of children and magicians, that makes reasonable to regard it as the inner section of the palace. The function and the location of the $k3p$ is suggested by an elaborate variant of these title, $\text{ḥnty}$ $k3p$ $\text{ḥnty}$ $k3p$, establishing a connection between $k3p$ and $\text{ḥnty}$ $k3p$ “private quarters of the king”. Section 9 of pBoulaq 18 reports commodities destined to the queen which were sent to the $k3p$, strengthening the association between this word and the royal family. As pointed out by Quirke, if the expression $rmt$ $pr$ $mn$ ‘$\text{ḥnty}$’ $k3p$ $\text{ḥnty}$ $k3p$ perhaps means the private section of the building itself.

The connection of the $k3p$ with the royal palace is attested in private inscriptions context. $\text{ḥnty}$, the owner of stele Leiden 46 - V 105 (A.II.134) who worked as $\text{ḥnty}$ ‘$\text{ḥnty}$’, “overseer of the chamber of the ‘$\text{ḥnty}$’”, is titled in another passage as $\text{ḥnty}$ $k3p$, “$\text{ḥnty}$ official of the inner palace”. The $\text{ḥnty}$ $k3p$ was probably intended to provide the $k3p$ with books of the $\text{ḥnty}$-words, deemed necessary to the safety of the palace; he may have had the general responsibility of the health of people living in the royal building. Considering the combination of these titles in the same monument, the function expressed by $\text{ḥnty}$ $k3p$ may have taken place in the $k3p$ of the ‘$\text{ḥnty}$’, the inner section of the ‘$\text{ḥnty}$-palace.

Papyrus Boulaq mentions other architectural features of the palace:

- the w3ḥy is a “columned hall” in which groups of officials are given special provisions, according to Sections 36, 60 and 74.

‘kw m w3ḥy pr-‘3 ʾnḥ wd3 snb

Provisions to the columned hall of the pr-‘3, l. p. h.

In Sections 60 and 74 over sixty people are gathered at one time to eat in the w3ḥy, indicating a great hall of great size and importance.175 It would seem that the w3ḥy worked as audience chamber176 or meeting hall, where officials could receive their food-provisions.

---

174 Quirke 1990.
175 List contained in these sections is introduced by the formula: īmy rn srw pri r wnm t m w w3ḥy m ḫrw pn, “list of names of the officials who were admitted in order to eat in the columned forecourt on this day”. This is interesting in revealing payments of food in the palace to king’s officials. Spalinger 1985: 240.
176 Quirke 1990: 40.
• **the ′rryt** are the entranceways of the palace protected by šmsw ′rryt, “guards of the entrance” (sections 60 and 74).\(^{177}\)

• **The wʾrwt.** According to S 2, 19-20, 45, 47 and 70, regular sources for palace, such as bread, beer, dates and vegetables came from three main sources: the wʾrt tp-rs, “sector of the head of the south”, the ḫ3 n dd rmt, “bureau of people’s giving” and the pr-hd, “treasury”. In S 45\(^{178}\) and 47,\(^{179}\) these three entities are introduces as the wʾrwt, “the three sectors/branches (of state)”.\(^{180}\) Also special deliveries, such as the ḫnw, were brought by the vizier from the wʾrt tp-rs in S 10-11 and 38.\(^{181}\) However, it is not clear how these three branches provided resources and where they were located.

• A fourth state bureau mentioned in the accounts is the ḫ3 n tšty which in Section 19 receives the order for an increase in regular palace provisioning,\(^{182}\) its scribes convey messages concerning movements of foreign people at Thebes in sections 44 and 69 of the text.

The so called Papyrus Reisner II (A.I.15) is an Egyptian account papyrus of the second half of the 12\(^{th}\) Dynasty, found during the excavations conducted by Dr. George Andrew Reisner at Naga ed-Deir;\(^{183}\) the papyrus was one of four rolls discovered lying on one of the three wooden coffins in tomb no. 408. It is essentially the record of transactions of the royal dockyard workshop, wḥrt, at This during regnal years 15 through 18 of Sesostris I; the activities of the workshop (wḥrt) in this series of accounts deal generally with carpentry and the recasting of metal tools. Papyrus Reisner II includes also administrative orders addressed to the stewards of the pr-ʿ by the vizier of Sesostiris I ʿIni-tf.

The final boat determinative\(^{184}\) characterizes the workshop as a dockyard installation; the major portion of the text consists of accounts of metal tools of the carpentry and certain transactions between officials. From occurrences of wḥrt in sections reported below, the

---

\(^{177}\) They are listed among officials admitted to the w3ḥy in order to receive food (Scharff 1920: pl. XXXVII, l. 9; XcV, l. 7). The ′rryt as the entrance of the palace are known by other Middle Kingdom sources: Ward: no. 1520 and Berlev 1978: 211-12. For commentaries see: Helck 1958: 65. Spencer 1984: 152-55 and notes 89-109. Van de Boorn 1985: 6-10.

\(^{178}\) Scharff 1920: pl. 29.

\(^{179}\) Ibid.: pl. 29

\(^{180}\) Quirke 1990: 110.

\(^{181}\) Scharff 1920: 15, 26.

\(^{182}\) Quirke 1990: 117.

\(^{183}\) Simpson 1965, II: 17.

\(^{184}\) GEG: P 1.
workshop seems to have been a dependency of the pr-³, and to have worked as an agency of the palace.  

• di n.f m hrw pn m hmtty pr-³, “given to him in this day some copper of the pr-³”, pgt pr-³, “bow of the pr-³” (Sections A⁵30, A⁵37);  

• ini m r m-‘ hmtty Nḥty..pr-³, “brought from the coppersmith Nḥty..pr-³”  

• rḥt hmtty [rd]yt r ḫḥt nt pr-³, “account of copper given to the workshop of the pr-³” (Section J2);  

• ḫ’w ḫḥt nt pr-[³], “amount of the workshop of the pr-³” (Section K2).  

From these instances we can conclude that the workshop was a dependency of the pr-³ and that the particular workshop or subdivision of a larger installation was particularly concerned with the coppersmiths.

In other occurrences the pr-³ is cited in connection with the stewards and the imw-boats.

• imyw-r pr-nw pr-³ ntwy m t3-wr, “the stewards of the pr-³ who are in the Thinite nome” (Sections E2 and G1);  

• ir grt n3 n imyw-r pr nty[w] [r] ḫt imww nw ḫḥt nt pr-³, “now as for these steward who shall take the imw-boats of the hall of the pr-³” (Sections G 2-3).

The imyw-r pr are identified as the stewards of the pr-³ who are in the Thinite-nome (E2, G1). They are agents of the palace in charge of activities which include the work in royal dockyard workshops, the enrolling of laborers, and the preparation and dispatching of freight.

Papyrus Reisner III (A.I.16) is the third of four rolls found on one of the wooden coffin in tomb no. 408 at Naga ed-Deir. The great part of this papyrus is devoted to repetitive accounts of workmen employed day by day or assigned to the miscellaneous tasks specified

---

185 Simpson 1965, II: 17.  
186 ibid.: pl. 23.  
187 What was in the middle between the first expression and the term pr-³ is unknown.  
188 Simpson 1965, II: pl. 6A.  
189 ibid.: 17, pl. 12 A.  
190 ibid.: 17, pl. 14 A.  
191 Simpson 1965, II: 21, pl. 8A; 22, pl. 10A.  
192 Simpson 1965, II: 22, pl. 8A.
by the headings.\(^{193}\) In this register occupations connected with the pr-‘3 are cited as follows:

- **3tp/f3l ht m pr-‘3**, “one who carries wood in the pr-‘3”. (Section J12).\(^{194}\)
- **rht hsbw pr-‘3, 200 hsbw**, “account of hsbw, palace, 200 hsbw”. (Section D21).\(^{195}\)

Simpsons notes the frequent occurrence of terms relating to specific elements of building, particularly temple components\(^{196}\).

Both Papyrus Boulaq 18 and Papyrus Reisner II present the pr-‘3 as a wide structure comprehending several sections with different functions and connect it to administrative and economic activities.

### 1.5 The term pr-‘3 in titles and epithets

The pr-‘3, when mentioned in private epithets, is often connected with the nobles, špsw (imy-r swt špswt pr-‘3: “overseer of the noble places of the pr-‘3”).\(^{197}\) The term appears also in generic expressions such as imy m-b3h pr-‘3, “one who is in front of the pr-‘3” (Assiut 1 - A.II.31). The hry-pr n pr-‘3, “domestic servant of pr-‘3” probably carried out his function within the living quarters of the pr-‘3, in contrast with palace staff working in the provisioning sectors.\(^{198}\) In one occasion (Leiden 46 - V 105 - A.II.134) this palace domestic service is connected to ‘h in place of pr-‘3. Title šmsw pr-‘3, “servant of the pr-‘3” would have been appeared fo the first time in Middle Kingdom private inscriptions.\(^{199}\)

One of the most common epithets compound with pr-‘3 is the ǐry-‘t n pr-‘3,\(^{200}\) composed by the nisba ǐry derived from the preposition r, literary meaning “who is in relation with”, and the noun ‘t, generally translated as “room/department”.\(^{201}\) The two words form a genitival

---

\(^{194}\) *Ibid.*: pl. 17A.
\(^{195}\) *Ibid.*: pl. 9A.
\(^{196}\) *Ibid.*: 15.
\(^{197}\) Expressions such as imy m-b3h pr-‘3, “one who is in front of the pr-‘3”, or smr pr-‘3, “companion of the pr-‘3”, are not so informative to recognize the function of this structure.
\(^{198}\) Quirke 1990: 467.
\(^{199}\) According to Berlev the earliest example of the title šmsw pr-‘3, “servant of the pr-‘3” is contained in BM 175 [101] stele of Nb.i-pw-Sn-Wsr, in Berlev 1978: 212-214.
\(^{200}\) Berlev has listed forty attestations of such title. Berlev 1978: 241 and el-Sayed 2008: 270-1.
\(^{201}\) Wb I: 160.
compound which could be literally translated “the one who is in relation with the department” or “the superintendent at the department”.\textsuperscript{202} The word ‘t is commonly used to refer to different kinds of workshops such as the ‘t īwft,\textsuperscript{203} the ‘t ħnkt\textsuperscript{204} or the ‘t t\textsuperscript{205} or as section of the treasury (pr-ḥd).\textsuperscript{206}

Attestations of this title allow to state that it was used specifically in the Middle Kingdom and that it was particularly popular during the reign of Amenemhat III.\textsuperscript{207} Observing the provenance of these occurrences, it is possible to note that the majority of them have been found in monuments erected in the quarry sites of the southern Sinai. The reason for such a distribution may have been the need of the central administration to strengthen the control on provinces; agents of the pr-‘3 would have exercised a key role in the management of resources such as the mineral resources of the Sinai.\textsuperscript{208} The possibility that the department expressed by the word ‘t would have some connection with the treasury with the function of management of economic resources cannot be excluded. However, other evidence show the term linked to other architectural sections, such as the īp3t-nswt\textsuperscript{209} or the k3p,\textsuperscript{210} commonly interpreted as private areas of the palace. The ‘t may have been intended as a department different from time to time, depending on the context of the inscription, and the pr-‘3 may have comprehended several inner sections (‘t) with different functions.

\textsuperscript{206} Berlev 1978: 243. Grajek hypothesizes that these functionaries could have worked within the treasur, in Grajek 2001: 48. Quirke states that, although they probably worked as responsible of food-production in specific workshops, they surely did not have any relationship with the storage managed by other functionaries. Particularly, he supposes a hierarchical position of the īry-‘t n pr-‘3 and the “domestic/servant of the pr-‘3” - bry-pr n pr-‘3, the latter working under the first, in Quirke 2004: 66. Tallet, considering the īry-‘t n pr-‘3 responsible of the storage of products, has proposed the specific translation of the title “responsible of cellier”, in Castle - Tallet 2001: 107.

</table>

The pr-3 is presented by inscriptions as a structure composed by inner or outer different sections. Outer spaces consist of lakes (š) which are associated with this type of structure in both private and official inscriptions. It the inscription of Amenemhat II from the temple of Ptah at Memphis, for example, a lake of the pr-3 (š n pr-['3]) is cited in a passage referring to Sesostris I (A.I.8). Interior sections correspond to different administrative districts or architectural devices in most cases associated with a specific word of the five used for
“palace” in Egyptian language. Among these is the treasury (pr-hd), most commonly related to the pr-nswt.\textsuperscript{211} Term ʿhwnty appears more than once in titles compound with pr-ʿ3. Together with the word ḫnrt, the group of people employed in recreational activities for the king,\textsuperscript{212} it seems to refer to the private sections of the royal palace, for the use of the king and the royal family.\textsuperscript{213} ʿhwnty probably meant originally “interior”\textsuperscript{214} of a building and had a wide meaning in the phrase ʿmy-r ʿhwnty.\textsuperscript{215} However, the term is often used in contexts that suggest the administrative nature of its functions. The owner of stele Louvre C 5, who worked as ʿiry-ʾt n pr-ʿ3 - “overseer of the chamber of the pr-ʿ3” – is also entitled ʿmy-r ʿhwnty n ḥ3 n pr n ḫtmw – “overseer of the ʿhwnty of the house of the office of the house of the sealer”. Similarly title of NmB.sn.i.n.i(?) on his seal MMA 26.7.312, ʿmy-r ʿhwnty n pr-hd pr-ʿ3, introduces the ʿhwnty as an administrative department of the treasury of the pr-ʿ3.

\textsuperscript{211} See paragraph below: § 1.7.
\textsuperscript{212} The group of people referred to as ḫnrt could include men as well as women who are often singers and dancers represented in recreational activities for the king from the Old kingdom onwards. Whatever “harem” implications ḫnrt-scenes and inscriptions might have, it does not seem warranted to ascribe a “harem” meaning to the ḫnrt, which would mean instead a group of servants entertaining the king, in Nord 1973: 35. The word ḫnrt would come from the verb ḫnr, “restrain”, meaning all those who are in the seclusion of a place, whether it would be the palace or the temple, in Gitton 1984: 98.
\textsuperscript{213} Gardiner 1916: 67.
\textsuperscript{214} Wb I: 226, 16.
\textsuperscript{215} A number of available examples of the title ʿmy-r ʿhwnty have been collected by Gauthier 1918: 169 ff.
pr-'3 could replace the other terms for “palace” in private titles compound from time to time with more fitting terms, and specifically the *pr-nswt*.

Among the five terms for “palace”, *pr-'3* would seem to be the one with the broadest meaning, since it is found in association with architectural sections commonly used in relation to more specific terms. In this sense, *pr-'3* would be intended as structure inclusive of different palatial structures defined by other terms for “palace”. The genitival relation between term ‘ḥ and *pr-'3* in the title referred to god Osiris in stele BM 218 [243] (A.II.110) of *ḥnty-hty-m-ḥ3t* suggests a belonging relation between the two institutions, as if the ‘ḥ would be an inner section of the wider *pr-'3*:

*nb ṣḥ3 nfr ḥ pr-'3*  
Lord of good remembrance in the ‘ḥ pr-'3"

The limited use of the term in private inscriptions prevents a complete reconstruction of its meaning, which can be rather understood thanks to other types of sources. This interpretation can be supported by mention of the term in the main administrative documents of the present study (pBoulaq 18 and pReisner II), in which the *pr-'3* clearly includes several architectural sections with multiple functions.216

1.6 The term *pr-nswt* in official monuments and narrative inscriptions

The term *pr-nswt* occurs in two examples of Middle Kingdom literature, the yet cited Admonitions of Ipuwer and the Teaching of vizier Ptahotep. The Maxims of vizier Ptahotep (A.III.1) is a list of maxims spoken by the vizier of the 5th Dynasty King Iesesi to vizier Ptahotep. Being the earliest manuscripts dated to the middle of the 12th Dynasty itself, it seems that the text was composed at the beginning of that Dynasty and that was set in the

---

216 See paragraph above: § 1.4.
Old Kingdom, as example of golden age for the future. Teaching consists of thirty-seven maxims dealing with the right social behaviour of Egyptian elite. Pr-nswt citation occurs in the thirty-first maxim, which urges respect towards social superior and appeals directly to vizier Ptahotep. His title imy-r pr-nswt, “overseer of the pr-nswt”, establishes a link between the pr-nswt and the most important administrative role of the Egyptian state: the vizirate.

Reading literary texts brings to the problem of their reliability as sources to rebuild aspects of ancient Egyptian culture. As with all forms of literature, there can be many multiple reading and different interpretations of these compositions that do not let read and understand these texts in only one way. Internal interpretations should be complemented by external factors such as the usage of the composition, its reader-ship, audience and transmission. In some texts, especially tales, without a specific contextual determination and demanding a particular strategy of interpretation, a framing story provides a fictional context for a fictional narration. Although fictional, literature keeps the reflection of decorum of the period when it was written. Although not always usable to reconstruct historical events, it reflects the vision of society and culture (even exclusive) as they were perceived by protagonists and auditors of stories.

The cycle of tales conserved on the Papyrus Westcar (A.III.7) are set in the Old Kingdom, specifically at the time of the 4\textsuperscript{th} Dynasty at the court of King Cheops. This is not an historical setting, but only the occasion to narrate marvellous events happened in the past, told by the king’s sons, and to introduce the prophecy of the wondrous birth of the kings who were to found the next Dynasty. Cheops asks his princes to entertain him and they tell tales about his ancestor kings. The second narration about Snefru begins relating how one day the king went around every chamber of his palace to find ‘some relief’:

4, 24-5) \textit{dd.in n.f [hm.f] [iw dbhn.n.i ’t nbt nt pr-nswt] [’nb wg3 snb] r hh n.i st kbt n gm n.i} [His Majesty] said to him: I have [gone through all the rooms] in the pr-nswt, l. p. h., in search of a seat of health (some relief) for myself

\begin{itemize}
\item \textsuperscript{217} Parkinson 1997: 246.
\item \textsuperscript{218} Parkinson 1996: 152-155.
\item \textsuperscript{219} Assmann 1996. Quirke 1996.
\item \textsuperscript{220} Parkinson divides the ”Ancient Egyptian Poems” in three main categories: ”tales”, ”discourses” and ”teachings”. In the category of tales are included compositions as the Tale Sinuhe, The Eloquent Peasant, The Shipwrecked Sailor and the stories from the Westcar Papyrus. Parkinson 1997.
\item \textsuperscript{221} Assmann 1996: 62
\end{itemize}
PART I

The episodes are set in the palace of Memphis, the administrative centre and residence city of the 4th and 5th Dynasty. The lector priest answers Snefru to proceed to the lake of the pr-‘3 and to fill a barque with all the beautiful women of the inner section of the ‘h:

5.1-2) hw3 pr-nh wd3 ndf nfr n pr-‘3 ‘nh wd3 snb
’prn.k b3w nfrw nbwt n hw3 ‘h.k

Would that Your Majesty proceeds to the lake of pr-‘3, l. p. h.; fill a boat with all the beauties from inside your ‘h

In the same sentence the terms pr-‘3 and ‘h are both used, the first one being described as a physical place equipped with external areas such as a lake, and the other one referring to its inner section used by royal women. In another occasion pr-nswt word is used again in a passage of the same tale, describing the court making holiday. The king is said to have spent the day festing together with the pr-nswt (hn’ pr-nswt), here indicating a group of people rather than a proper place. The pr-nswt is the place where the king has rewarded the high lector priest D3d3-m-‘nh with every good thing.

6, 13-4) wrš.n hm.f hr hry nfr hn’ pr-nswt ‘nh wd3 snb mi kl.f pr.n fk3.n.f hry hbt hry-tp D3d3-m-‘nh m bw nb nfr

His Majesty spent all the day making holiday together with the entire pr-nswt, l. p. h. and so he rewarded the high lector D3d3-m-‘nh with every good thing

The entrances of the palace mentioned several times in the Admonitions of Ipuwer (A.III.8) as b3kw or g3wt are more clearly listed in section 10.3-6: the products cited here are manufactured and stored in the šn’ n nswt, “the workshop of the king”. The pr-nswt is the actual place of such workshops and the collecting point of b3kw.223 In his tomb at Beni Hasan, the nomarch ‘imn-m-h3ty recorded payments of b3kw to the pr-nswt (A.II.43). The items of revenue that should be brought to the pr-nswt are listed in pairs beginning with staple foods (barley and emmer; birds and fish) and continuing with dress and adornment (white linen and fine linen), copper and oil/fat, plants and matting. They are actually missing and the final couplet contains the lament about the pr-nswt and the lack of resources.224 The current passage resumes the theme from 3.12 where the absence of b3kw is treated in a similar way: iw pr-hd r-m m-hmt b3kw.f, “what is a treasury for without its taxes?”. According to this text, both pr-hd and šn’ may have been architectural sections of the pr-nswt palace.

---

224 For the interpretation of the last sentence of the strophe see Enmarch 2005: 164.
1.7 Titles and epithets compound with term pr-nswt

The most common designation of the palace in Middle Kingdom epithets is pr-nswt, literally “house of the king”, which appears in more inscriptions than any other terms for the palace or its components.\textsuperscript{225} Epithets and other expressions refer to the pr-nswt in some recurrent ways: \textit{iwn rsy n pr-nswt}, “southern pillar of the palace”, \textit{iwn rsy ’3 n pr-nswt}, “great southern pillar of the palace” and \textit{iwn Šm’w n pr-nswt}, “Upper Egyptian pillar of the palace” occur as epithets of vizier and other highly ranked officials connected to the central government.\textsuperscript{226}

The term pr-nswt can be linked to concepts of precision and accuracy expressed by the adjective \textit{mty}:\textsuperscript{227} \textit{mty m pr nswt}. The association of “precision” with attributes of justice and balance\textsuperscript{228} is known by other expressions, which liken the officials to deities such as Thoth embodying divine justice and accuracy.\textsuperscript{229} Both precision and justice are qualities suggesting an administrative aspect of the officials’ functions.

\]

The concept of knowledge, once used in connection with ‘\textit{h},\textsuperscript{230} is commonly compound with word \textit{pr-nswt}. Knowledge of one’s position in the social order is expressed by the phrase \textit{r\textdegree st-rdf}, “one who knows his standing”\textsuperscript{231} and it is often modified by the addition of the phrase \textit{m pr-nswt}. Knowledge, as emphasized in this type of epithets, does not refer to the intelligence or the understanding skills of the official, but to his acceptance of his social status and his role in ensuring Ma’at.\textsuperscript{232}

\]

Several common epithets emphasize the official’s dominance over his colleagues, by using the \textit{nisba}-adjective \textit{hnty} with the meaning of “foremost.”\textsuperscript{233} The epithets may specify the location of the office in which the subject was employed, ‘\textit{in-it.f} calling himself \textit{hnty i3wt m pr-nswt}, “foremost of offices in the \textit{pr-nswt}” in stele MMA 57.95 (A.II.2) and probably referring to his administrative responsibilities. The expression can be replaced by the formula \textit{hnty st m pr nswt} in \textit{Df-h’py’s} and ‘h3-n-hnt’s inscriptions (Assiut 1 - A.II.31; Bersheh 5 - A.II.13).\textsuperscript{234} The substitution of \textit{pr-nswt} with \textit{pr-3} in the inscription of \textit{Nfr-hnw}.

\textsuperscript{230} See above, § 1.3, 26.
\textsuperscript{231} Doxey 1998: 47.
\textsuperscript{232} For the concept of Ma’at see Assmann 1999b and Lichtheim 1992: 35.
\textsuperscript{233} Wb III: 304-306. FCD: 194.
\textsuperscript{234} The term \textit{pr-nswt} can be replaced by \textit{stp-s3} as in the case of \textit{Ddw-Sbk’s} stele BM 193 [S66] (A.II.11).
from Deir-Rifeh (Deir Rifeh 1 - A.II.44) can be considered an exception to the most common epithets compound with *pr-nswt*.

Being the term frequently connected to the administrative field, *pr-nswt* seems to have included offices related to different branches of the civil administration and to the justice system. The title *šš pr-nswt* establishes a connection between the *pr-nswt* and the registration role of the scribe (A.II.136) somehow linked to economic and bureaucratic affairs.

In his study on Middle Kingdom titles, Doxey has highlighted the frequent occurrence of epithets compound with *pr-nswt* in provincial administrators’ inscriptions from Assiut, Beni Hasan or Hatnub; this frequency might be explained on the basis of the intention of provincial officials to associate themselves to the central administration. Probably because of this association with the administration, the *pr-nswt* is often mentioned in epithets of provincial officials who wanted to connect themselves to the central royal government or who interacted with it in concrete terms, in the context of *pr-nswt*.

Also general expressions indicating the correct behavior of the officials can bear the term *pr-nswt*: *smr ('3) n pr-nswt*, “(great) companion in the *pr-nswt*”, *wr sn₂ m hnw pr-nswt*, “great of respect inside the *pr-nswt*”. Such titles are not exclusively of expressions compound with *pr-nswt*, which can be replaced by all the other terms for palace and especially by *ḥ*. The term *wrw* can be most frequently associated with *pr-nswt*. In particular it refers to an entourage that is introduced by the inscription owner in front of the king or is

---

236 Titles that connect the term *šš* with *pr-nswt* are more often attested in later period, especially in the New Kingdom and Ramessid Period. Gardiner 1947: 24 no. 85
greeted by the official at the gates of the pr-nswt.\textsuperscript{238} \textit{iw n.f wrw m ksw r rwty pr-nswt}, “one to whom the wrw come bowing down at the gates of the palaces”.\textsuperscript{239} According to Fisher, the rwty pr-nswt “probably refers to a gathering preliminary to a ceremonial entrance into the palace”.\textsuperscript{240} The dual form for rwty, which develops from the Middle Kingdom in reference to the entrance to the pr-nswt,\textsuperscript{241} continues to be used in the New Kingdom in relation to the same term. The text from the tomb of \textit{Rḥ-mi-R’} (B.II.33), known as The Duties of the Vizier,\textsuperscript{242} records the meeting between the vizier and the other officials at the sb3 of the rwty wrty.\textsuperscript{243} In her lexicographical study, Spencer has suggested that this specific usage of the term would show how the rwty was regarded more as an “entrance” than as “door” since it could have a door (sb3) on its own.\textsuperscript{244}

<table>

</tr>
</tbody>
</table>

In the autobiographical inscription of ʾlmn-m-ḥ3t on the jambs of the doorway to the main chamber in tomb no. 2 at Beni Hasan, the reason of his praising/favoring is explained in a passage meaningful for understanding the function of the pr-nswt. After an expedition abroad, ordered by his king, ʾlmn-m-ḥ3t has to go back to the pr-nswt to bring the gold appointed to him (nbw ʾ3.n.i) and there he is favored (*hsì*) for his service:

I. 13) iw m ḫtp in nhw.sn in n.i nbw ʾ3 n.i hsì kwì ḫr.s m pr-nswt
Returning back in peace, they had not decreased.
I brought the gold appointed to me. I was favored/praised for it in the pr-nswt

Few lines later, he is said to be favored in the pr-nswt for having assured the stock-taking (*īrw*) for which he was in charge and the b3kw-delivery²⁴⁶ he was responsible for:

hsì kwì ḫr.s m pr-nswt r ʾn w ṛnt nt īrw ḥ3l.n.i b3kw.sn nb n pr-nswt
I was favored/praised for it in the pr-nswt at each annual occasion of stock-taking (īrw) and he manages the b3kw-delivery

Apart from the b3kw, another form of taxation, the īnw,²⁴⁷ was related somehow to the pr-nswt, as suggested by the title of Ḥnṃw-ḥtp in tomb inscription Beni Hasan 3 (A.II.51): smr wʾty ‘3 ḫm n smrw ḥ3 īnw pr-nswt, “unique friend, great of favor among the courtiers, abundant īnw of the pr-nswt”.

A number of private titles introduced by expression īmy-r, “overseer”, refer to oversight-activities concerning some specific spheres of state administration. The unique occurrence

---

²⁴⁵ Goelet 1986: 96.
of the title ḫmrty r k3wt nbw n pr-nswt, “overseer of all the works in the pr-nswt” in stele CG 20538 of Stp-ib-t-r’ is flanked by more complex expressions in biographical inscriptions. According to his inscription from the Wadi Hammamat (Hammamat G 61), Whmwy ʾlmy ny had control of an army (mš’) that executed all the orders that he commanded to him about all the works (k3wt) in the pr-nswt. In the specific context of this inscription, k3wt would seem to refer to the activities performed by the army in the pr-nswt, working as centre of military operations and control of foreign missions (ipwt).²⁴⁸

| Titles compound with ḫmrty r + pr-nswt | | |
|---|---|---|---|
| ḫmrty r pr-nswt | Overseer of the pr-nswt | Nhry (Men. IV) | Hatnub 25 CG 20030 | A.II.9 A.II.169 |

Professions generally associated with the pr-nswt-palace in officials’ titles and autobiographies suggest the administrative and economic nature of the activities managed by them inside this structure. While the ḫmrty r ‘ḥw wr m pr-nswt in the inscription from tomb no. 36 at Aswan has in charge the furnishing of the treasury (spdd pr-hd), the duty of ‘ḥ3ty described in his stele from Theban Tomb no. 65 consists of revising the cattle list (inw)²⁴⁹ of the pr-nswt. Other activities involving administrative functions are those of the scribe (sš), the sealer (ḥtmw) or the treasurer (ḥtmw nb nt pr-hd) witnessed by private titles. Some officials were employed in managemet of warehouses (šn’w)²⁵⁰ in which

²⁴⁸ GEG: 553.
²⁴⁹ Literally: inw = “cattle-tax”, in FCD: 27.
provisions destined to the pr-nswt (℡kw n pr-nswt) were conveyed. Title īmy-r mrhwnt nbwt n pr-nswt, attributed to [..]Hhmw nḥt in stele CG 20518 probably refers to the duty of administrate furnitures and supplies conveyed to the royal palace. Producers of goods, the same that were managed in the pr-nswt by specialized responsables, were probably involved in the same administrative process, like for example the registration of entries. Among them the ḫry ḫryw m’3t nbt ṣpsst nt pr-nswt, “artisan in every costly stone of the pr-nswt” is linked to the pr-nswt in the graffito from Wadi Hammamat no. 40.

</tr>
</tbody>
</table>

Particularly meaningful is title ḫtmw nb nt pr-hd in connection with the pr-nswt, since it stresses a physical relation between these two institutions: the treasury, pr-hd, and the pr-nswt-palace, already observed in some narrative sections from Middle Kingdom private inscriptions.
The treasury is described by biographical inscriptions as place where different kinds of facilities were conveying: clothing (ḥbsw), cushions (šṭw), supports (šṭw), sandals (ḥwt) anointed with myrrh, bags (šrw). According to graffito Hammamat G 61, all (is necessary) for the works of every charge of the pr-nswt come from the treasury (m pr-ḥd). If collection of supplies took place in the treasury, the administration and counting (lḥ) of these resources was a pr-nswt responsibility.

The relation between the pr-nswt and the pr-ḥd is emphasized by the biographical inscriptions in Aswan tomb no. 36. Its owner S3-rnpwt, prince of Elephantine, has in charge the refurnishment of the pr-nswt with every requisite (ḥt nbt) among which ornaments (ḥkrw) and bread offerings (ḫw šwš) are listed. These items are all part of the forurnite (ḥ ṣ w) of the pr-nswt, probably arrived here in the form of b3kw from foreign countries which is reported in an earlier section of the text (Aswan tomb 36, l. 5-6). S3-rnpwt has to check that the treasury is always full of the things asked to him. The connection of the treasury-house with the pr-nswt is highlighted by the context: refurnishment of the pr-nswt ensures that the treasury can be adequately filled with requested supply.

\[ \text{(lḥ) } pr \ m h脸颊 pr-nswt} \]

\[ pr \ ḫ kw šwš m ḫt n.f nbt \]
\[ nn di g3w.ʾr ḫ dbḥt.i pr-ḥd ḫ m dbḥt.i \]

It being provided with furniture of the pr-nswt, adorned with very requisite, filled with ornaments, provided with bread-offerings, fitted out with all that was benefiting to it. I was not allowed to lack what is required, the treasury-house was (the place) whence those things were asked for me.

\[ \text{251 FCD: 16.} \]
\[ \text{252 FCD: 186.} \]
Word ʿiṣṭ/wpwt, “office” or ḥ3w, “affairs” can be linked to pr-nswt and suggests the execution of various activities in the pr-nswt without specifying their nature.

The pr-nswt seems to have been the location for delivery of reports from Egyptian provinces (pBerlin 10470 - A.II.118). It contains the petition regarding the possession of a slave girl named Snbt presented by ʿitf-f-snb, who bore the incomplete title of ḫrī n tm (master of the..). The she-slave, ownership of people from the town of Elephantine, is requested by ʿitf-f-snb’s Lord. The request is sent to the Reporter of Elephantine, bearing the name ḫḥ-ḥb, while the role exerted by vizier ʾlmn-m-ḥ3t consisted of getting a copy of the letter in his ḫ3 n ʿt3ty, “the office of the vizier”, probably connected with the pr-nswt of the previous line (I.6). According to this text, the pr-nswt seems to have worked as an administrative palatial section, where the ʿt3ty carried out his tasks, such as that of receiving and reiterating reports from provinces of Egypt. This supposed function is confirmed by a later text inscribed in the tomb of Ṿḥ-mī-R’, The Duties of the Vizier (B.II.33).

1.8 The term *hnw* in official monuments and narrative inscriptions

In the Papyrus Reisner II (A.I.15) discussed above, the royal dockyard workshops are said to be under the orders of the vizier, who is at this time resident in the North. ²⁵⁵ He, named ‘Inī-tf-kr, appears in Papyrus Reisner II as the author of three administrative orders addressed to the stewards of the pr-ʾ3 (D1, E1, G1). His title in each case is *imy-r niwt, ṭḥty, imy-r hwt ʾ3t ‘Inī-tf-kr*, “the overseer of the city, vizier, overseer of the great six chapels, ‘Inī-tf-kr’”. According to the contents of the administrative orders in the papyrus, the vizier at this time was in the North, presumably at the recently founded royal residence Itjtawy, for he orders grain to be sent downstream to the *hnw*, where he will reckon it (E3-4):

*E l. 3)* ʾr Ṛ n.tn ṛḏlt ḫʾk.tw.tn ʾ3ʾ3.tw.tn ʾ33(t).n.i n.tw.tn ṛḥʾrdl ṣḥdš swt 150 (?) ḫʾk ḡs ḫn’

See that you shave yourselves and may you prepare according to every which I ordered to you, and send downstream 150 (?) ḫk3t of wheat,

*E l. 4)* 2 (?) b3š ḫʾk ḫn’ 10.000 (?) ṛ r *hnw* ḫr ṭrʾ s’ Im.tn nb mk ḫr ṭr *hnw*

double (?) ḫk3t malt and 10.000 (?) tr-loaves to the *hnw* for each one you. I shall reckon it at the *hnw*.²⁵⁶

The sending northward of grain from This to the *hnw*, where the vizier will reckon it, implies that the latter was the newly founded Itjtawy near Memphis and the vizier resided there.²⁵⁷

²⁵⁵ Simpson 1965, II: 41.
²⁵⁶ ibid.: 21, pl. 8.
²⁵⁷ ibid., II: 22.
PART I

The sending southward of craftmen r niwt, “to the city” (in B 16)\(^{258}\) must refer to Thebes, which was presumably under the general authority of the same vizier.\(^{259}\)

The term \_hnw is mentioned in B 10, 11 and E 4 sections, in all the occurrences being accompanied by the city-sign determinative.

Section B contains a list of boat equipment received through the \_imy-r \_hnwty\(^{260}\) S3-spdw. Between these are listed:

- \_dnhw \_nfrw \_rdl \_hnw, “good quality acacia \_dnhw the \_hnw gives”. (Section B 10).\(^{261}\)
- \_s3hw \_h’w \_nfr \_hnw, “\_s3hw, amount, good quality of the \_hnw”. (Section B11).\(^{262}\)

Another important source is the Papyrus Ramesseum III verso (A.I.19),\(^{263}\) one of the Papyri from Thebes found by Quibell in 1896 under the later precincts of the Ramesseum in one of the late Middle Kingdom tombs. It consists of three columns of day-accounts concerning distribution of a variety of commodities such as oil, vegetables, leaves, flour and grain. It is not clear whether the accounts belong to a personal estate or to an official institution because among the beneficiaries of these distributions appear once the \_hnw (’kw .. dl r \_hnw, “provisions to give to the \_hnw”) and more times different households.\(^{264}\)

References to the \_hnw can be found also in some papyrus from the town of Lahun, where it is clearly referred to the town of Itjtawy. Papyrus Berlin 10021 (A.II.156) is a kind of temple journal, the priest in charge of the temple being noted each date after the day, followed by any relevant events. For year 32, month 2 of flood, day 21, the note reads as follow:\(^{265}\)

\[
\text{wd3} \_hnw n ‘nh \text{wd3 snb hft b3k sp tpy} \quad \text{Progress to the \_hnw in l. p. h. of oil one time (..)}
\]

The same expression \_wd3 \_hnw, “progress to the \_hnw” appears in the fragment Berlin 10353b verso:\(^{266}\) \_wd3 \_hnw [..]

\(^{258}\) ibid., II: 27.
\(^{259}\) ibid.: 22.
\(^{260}\) The title is extremely common in the Middle Kingdom. For a list of the available examples of the title \_imy-r \_hnwty see Gauthier 1918: 169 ff.
\(^{261}\) Simpson 1965, II: 27, pl. 54.
\(^{262}\) ibid.: 27, pl. 54.
\(^{263}\) A transcription of the verso is given by Barns 1956: pl. 24-25 and one part is reproduced in photographs in Gardiner 1955: pl. 63-4.
\(^{264}\) The strongest indication that the account relates to a private estate is the expression pr.i, “my house” contained in l. 82. Quirke 1990: 189.
\(^{265}\) Quirke 1999: 66.
\(^{266}\) ibid.: 66.
Papyrus from the Lahun Valley Temple pBerlin 10248 (A.II.196) records a despatch to the ḫnw regarding some royal victuals to be intended as by-product of festivals delivered to the ḫnw from the temple as required by the local “treasurer’s bureau”:\(^{267}\)

*c. 2) […] r ḫnw m hrw pn br*  
[Despatch] to the ḫnw on this day bearing the royal victuals […]  

‘nh nsw[t] r ḫ3 n imy r ḥmt n mnḥt  
‘lnpw tpy dw f m Ṣḥm-Snwstr rt m3’ ḫrw ḥn’ ḫnp-š  
with reference to the bureau of the Cloth-festival of Anubis upon his mountain in Ṣḥm-Snwstr true-of-voice as well as for the Sand-festival.

It is likely that all these papyri from Lahun would have recorded the journey of the king to the ḫnw as “the residence” of Itjtawy.

In S 14 of Papyrus Boulaq 18 (A.I.17) the ḫnw is mentioned once, but this occurrence is obscured by the loss of the context of its citation. According to Quirke, this mention implies a visit to or from ‘lt3w n ṣn ṭswjt Nb-sw-mnw.\(^{268}\)

Papyrus Brooklyn 35.1446 (A.I.18) contains seven texts of varying length and scope concerning Thebes and its administration. Two texts on the recto of the papyrus are a pair of copies of royal decrees addressed to the vizier ‘nh, that may be dated to the reign of Sobekhotep III;\(^{269}\) they seem from their contents to have been sent from the ḫnw of ‘lt3w to Thebes.\(^{270}\) Both the decrees concern petitions made to the king by officials at the ḫnw; the contents of the petitions are highly problematic, obscured by lacunae and indecipherable ligatures; the transcription proposed in the catalogue follows that presented by Quirke based on the works of Hayes, Posener and Helck.\(^{271}\)

The final part of the first petition (text 3 in Hayes’ publication\(^ {272}\)) records the request to bring a man, the ḫm-nswt “royal servant”, to the ḫnw for questioning. The reason of the enquiry lies in the ttk “transgression” of which the servant is said to be guilty.

The second decree (text 4, “Insertion C” in Hayes’ publication\(^ {273}\)) follows the model of the first, concerning again a petition to the king from a courtier. The petitioner seems to

\(^{267}\) *Ibid.*: 67.  
\(^{268}\) Quirke 1990: 108.  
\(^{269}\) *Ibid.*: 141.  
\(^{270}\) If the restoration of the first heading of the first decree is accepted, both documents were brought to the ḫ3 n ṣḥw n nḥw rt, “bureau of the reporter of the Southern City”: Quirke 1990: 141.  
\(^{271}\) Quirke 1990: 143.  
\(^{272}\) Hayes 1955: 16-7.
complain that he has lost people during some activity and he asks for replacements; staff of the bureau of the people’s giving seems to be responsible for a ḫw3t (ʔ?) in which the petitioner claims to have lost personnel, s3hw. The ḫnw is cited in relation to the bureau of people giving, the ḫ3 n dd rmτ.

The ‘ḳw, a word that functions as the generic term for “provisions”,274 including several produces to be brought to the palace area, can be linked to the term ḫnw. In pBM 10756 and JE 51911 the ‘ḳw are mentioned as commodities to be delivered to the ḫnw. Particularly in the 13th Dynasty stele JE 51911, the ‘ḳw takes the shape of the ʔnw, which the vizier had to deliver from his office ḫ3 ṭ3ty, “the office of the vizier”. ‘ḳw would seem to consist of provisions to be brought from Thebes, where both sources have been found and the ḫ3 ṭ3ty was probably located,275 to the ḫnw, probaly to be identified with the actual capital Itjtawy.

The term most frequently used in literary texts of the Middle Kingdom is ḫnw, which is virtually unused in the private biographies and titles.

In Papyrus Westcar (A.III.6) prince Dd.f-Hr, one of Cheops’ sons, offers a wonder performed by a contemporary commoner, Ddī, who tells the king three different tales. After having sailed northwards, Ddī and the prince arrive to the ḫnw, where Dd.f-Hr reports (dl.f) to king Cheops as follows:

8,6-7) iwt pw ir.n Ddī m-ḥd m wṣḥ nty s3 nswt Dd.f-Hr im.f br-m-bit spr.f r ḫnw ‘ḳ pw ir.n s3 nswt Dd.f-Hr r sml(t) n hm n nswt-bity ḫwʃ m3Ḥ-brw  Ddī then came northwards in the barge in which prince Dd.f-Hr was. After he had reached the ḫnw, Prince Dd.f-Hr entered into report to the majesty of king Cheops, justified

275 See pBrooklyn 35.1446 (A.I.18) where the ḫ3 ṭ3ty is located in the niwt rst, “in the Southern city”.

56
Cheops, after having asked to his son to bring him Ddi, proceeds to the “great hall” of the pr-31 p. h. (w3t n pr-3 ‘nḥ wd3 snb). After having listened to Ddi’s tales and prophecy, king Cheops proceeds to his ḫ (hm.f r ‘ẖ.f) and here he orders to assign him to the house of prince Dd.f-Hr. According to the sequence of characters’ movements, after having arrived to the ḥnw, “commoner” Ddi is received in the w3t of the pr-31. After having listened to Ddi’s speech, king Cheops goes to his ḫ. In this text ḥnw, pr-31 and ḫ are all used in really close sentences, in contexts different from time to time. The wider palatial entity would seem the ḥnw, here described as the destination of a sea-trip. The pr-31 instead is presented as a part of the ḥnw, probably to be intended as a royal building inside the ḥnw, while the ḫ might be intended as a specific section of the pr-31.

The Instructions of King Amenemhat I for his son Sesostris I (A.III.2) refer to the palace in connection with the problem of rebels’ punishment.276 In his Teaching, Amenemhat appears to his son in a dream and tells him of an attempted assassination which caused his death. The conspiracy seems to have originated in the royal harim, in the ḥnw of Itjawy, the new residence-city of Amenemhat I.277 The sentence in stanza M 2.8 in īw šdi tw ḥnw m ħnw, “are rebel took out from the ḥnw?” refers to the ḥnw as the place where the rebels acted and they would be punished.

In the Instruction to King Merikare (A.III.3) the word ḥnw is used in exceptional contexts where it expresses a group of people affiliated with its place more than the location itself. The Instructions advice a king to banish the rebels but not his dependants. The Youth, cited in a previous section of the text278 seems to be a paramilitary company suitable for this purpose. In P. 57 the king ensures that the Youth is happy to perform his military service against rioters and that the ħnw will love it (mrī tw), as if it would be a physical body.

P 57 | tsī d3mw.k mrī tw ḥnw Raise your Youths, the ħnw will love you

The injunction in P. 71/2 to deal well with the South leads to an ancestral prophecy. They who said to behave like it are the royal ancestors of the ḥnw who foretold it. Given the

276 Volten 1945: 104-128.
277 The stanza M 2.7 referring to the troops, which worked as bodyguard of the king, mentions women, suggesting that the conspiracy took place in the royal harim. Parkinson 1996: 210, note 14.
association with verb sr, “foretell”, the hnw is again presented as a group of people more than as physical place.

P 71/2) ḫw kr ṭw sr n hnw r.s

You know what hnw foretold about it

The stanza in section 101 urges the new king to protect kingdom’s northern borders and to maintain the prosperity of the ancient city of ḫswt, which protected Heracleopolis and secured access to the Delta.

P 101) ḫdsw ṭsw m ḫw ṣ(w) ṭ ḫw ṭ ḫw

The region of Memphis with 10,000 men, officials are in it since the time it was a hnw

ḫdsw ṭsw is a name for Memphis, derived from the name of the Old Kingdom pyramid near Saqqara. 279 The time of the hnw is the Old Kingdom, when Memphis was the hnw itself, intended here as the royal residence-city.

The Admonitions of Ipurer (A.III.8) consist of the speeches of a sage named Ipurer to a generic king in the presence of the royal court. Describing the chaos and disorder in which the actual Egyptian society pours, section 2,10-11 of the text states that while everything else is violently destroyed, the royal palace is not and keeps itself in safe.

2.10) ḫw-ms ṣḥw ṭḥw ḫr ṭw 3mm

2.11) ḫr ṭw pr-ḥsw ṣḥw ṭḥw ṭḥw snb mn ṭ ḫw

Portals, pillars and walls are burning; the chamber of the pr-ḥsw stands firm and enduring

While the walls (ḫr ṭw) are burning, the royal chamber (ḥsw ḫr ṭw) is unaffected: the different orthographies of the two terms and the specification of the second suggest a contrast between the two words and different meanings. Other attestations do not offer a specific translation of ḫr ṭw and ḫw, the sense of the phrase being conceivable only by the context: 280 while the private ḫr ṭw (walls) are being destroyed, together with ṣḥw ṭḥw (portals) and ṭḥw ṭḥw (pillars), 281 the royal ḫr ṭw (the royal chamber) is safe.

---

279 Ibid.: 233, note 39.
280 For a possible translation of the term as “door” or “wall” see Enmarch 2005: 79-80.
281 For ṣḥw ṭḥw as architectural terms see Spencer 1984: 168, 247.
Section 3.10-11 establishes a link between the ‘h-palace and kmw(t), this concept being identified with kmt, “the account to be delivered each day” which occurs in 13\textsuperscript{th} Dynasty palace accounts.\textsuperscript{282}

3, 10-12) iw-ms 3bw tny [sp3w]\textsubscript{t}(?) ūm\textsuperscript{w}t n b3k n [b3]yt hq w’h db’t itiw m3\textsuperscript{w} nwt št3w k3t-hmww d3[rt (?) kmw(t)-’h iw pr-hd r-m m-hmt b3kw.f

Elephantine, Thinis, the Upper Egyptian nomes have not paid tax because of the [strife]. Destroyed are grain, kohl, itri-fruit, is the profit (?) maat sticks nut sticks, shrub wood, and the work of the craftsmen, colocynt, fenugreek, and the profits of the ‘h

What is a treasury for without its taxes?

The profits of the palace are destroyed because of lack of external foreign trade and disruption of revenues after the internal strife. The ‘h is exceptionally connected to pr-hd, the economic department of the central administration cited in the next sentence.\textsuperscript{283} The pr-hd is the place arranged to receive b3kw,\textsuperscript{284} term used both for general payment or delivery and for regular taxes from within and outside Egypt.\textsuperscript{285}

In section 7.6-7 the term for palace changes again:

7.6-7) mnt hmw hr sn3 m’ g3wt nb(w).i r wd(t) Look, the hmw is fearful from want. But My Lord h3yt nn ḫṣf.i will stir up strife unopposed.

The lack of g3wt\textsuperscript{286} (“resources”) arriving at the central administration causes fearfulness (sn3) to the hmw. This is a quality that normally inspires a person\textsuperscript{287} so that the phrase presents the hmw as a group of people more than as architectural entity. According to the second verse of the phrase, the king is stirring up the strife that ultimately is causing his hmw to suffer shortage.\textsuperscript{288} The phrase ḫdw hftiw nw hmw [pf] šps, “destroy the enemies of [that] fine hmw” is preserved six times. The enemies whose destruction is ordered would be the forces spreading chaos throughout Egypt. The mention of ḫpw\textsuperscript{289} (“laws”), b3w\textsuperscript{290}

\textsuperscript{282} Enmarch 2005: 91.

\textsuperscript{284} Wb I: 91.

\textsuperscript{285} For the use of the term b3kw in Egyptian texts see Bleiberg 1981: 107 ff. and Bleiberg 1988: 157 ff. The evidence obtained by comparing the use of word b3k and lnw in the Annals of Thutmose I makes Bleiberg suggests that b3k represents goods which are part of the redistributive economy, while lnw represents the personal holdings which were never converted to rations.

\textsuperscript{286} Wb V: 153. FCD: 288.

\textsuperscript{287} sn3 is the quality that the king normally inspires in his enemies. Blumenthal 1970: 208.

\textsuperscript{288} Enmarch 2005: 132.

\textsuperscript{289} Wb II: 488. FCD: 158.

\textsuperscript{290} Wb II: 221. FCD 183.
(“offices”) and knbt\textsuperscript{291} (“court”) in this group of strophes suggests that the \textit{hnw} is here evoked generally as the central administration.\textsuperscript{292} The sbk \textit{knbt}, the “splendid\textsuperscript{293} of council”, is probably meant here in the general sense of court officials, comparable to the \textit{knbt nt hnw}, “the council of the \textit{hnw}” in the inscription of monarch ‘lmn-\textit{m-h3t} stating that he was \textit{mry kbnr nt hnw}, “beloved of the \textit{hnw}” (A.II.43). The h3w, “offices” can be intended as departments with different functions of the \textit{hnw} as central government.

Some peculiar expressions refer to different spaces such as the \textit{pryt-nswt}, “estates of the king”, and the \textit{šn’srw}, “storehouses of the officials”, which might be intended as specific sectors of a wider institution like the \textit{hnw}.

In the tale of the Shipwrecked Sailor (A.III.7),\textsuperscript{294} a high official is returning from a failed expedition for he is fearful on the reception awaiting him at court. One of his attendants exhorts him to courage and tells him a marvelous adventure that happened to him years ago as an example of how a disaster may turn into a success.\textsuperscript{295}

\begin{flushleft}
\textit{l. 167-9) ‘b\.’n dd.n.f n. i m–‘ twr spr r \textit{hnw} n 3bd 2 m.k knl.k m hrdw.k rnl.k m \textit{hnw} krs(t).k}
\end{flushleft}

He said to me: “You will reach the \textit{hnw} in two months, you will embrace your children, you will flourish at the \textit{hnw}, you will be buried.

He ensures the protagonist about his return to the \textit{hnw} where he will be buried. The theme is the same one found in Sinuhe’s homecoming below. In narrating his return, the attendant says to have sailed northwards, towards the \textit{hnw}:

\begin{flushleft}
\textit{l. 172-5) hjdl r \textit{hnw} n lty spr.n.n r \textit{hnw} hr 3bd 2 ml ddt.n.f nbt ‘b\.’n ‘k.kwi hr ‘tyrn ms.n.i n.g \textit{hnw} pn ini.n.i m \textit{hnw} n t3 pn ‘b\.’n ntr i3w.n.f n.i hyt hr knbt t3 r dr.f}
\end{flushleft}

We sailed north to the \textit{hnw} of the king. We reached the \textit{hnw} in two months, all he has said. I went in to the king. I presented him the gifts I had brought for the \textit{hnw} from that island. He praised god for me in the presence of the councilors of the whole land.

Here he was brought in front of the king, to whom he presented the \textit{lnw} collected during his journey to \textit{Pwnt}. The \textit{hnw} as a landing-place after a ship-travel is the same in Papyrus

\begin{flushright}
\textit{\textsuperscript{291} The word \textit{knbt} was used from the early Middle Kingdom to refer to a group of magistrates in a general sense and more specifically to the law court. Westcar (A.III.6), in the section describing prince ḫḥft-hr’s return to home, and the Tale of Sinuhe (A.III.5).

The Tale of Sinuhe (A.III.5) begins as a funerary autobiography listing the titles held by Sinuhe; he defines himself as a palace servant (b3k n ipt nswt, “servant of the royal chamber”) and states to have worked at ḫmnw-swt and k3-nfrw, the cultic enclosures attached to the pyramids of Sesosiris I and Amenemhat I respectively near modern el-Lisht.\textsuperscript{296} When in the second half of the stanza the ḫnw is cited, it probably refers to the place of the capital of the 12\textsuperscript{th} Dynasty, Itjtawy, near el-Lisht. Here the ḫnw is described in silence and the death of Amenemhat is marked by the closing of the great portal (rwty wrty) of the ḫnw.\textsuperscript{297}

\textit{R 8-9) īw ḫnw m sgr ībw m gmw mrw rwty rwty ṣtmw}
\textit{The ḫnw was in silence, hearts were in pain, the great double gates were sealed}

In the second stanza Sinuhe describes his escape from the court and his travel to the South. Here text refers again to the ḫnw as a place where Sinuhe did not want to approach, probably anticipating the Palestinian city that he will reach at the end of several movements over two days, ṛtnw.\textsuperscript{298}

\textit{R 29-30) īr.t smt m ḫnty n k3.i sgr r ḫnw pn}
\textit{I did my way southwards. I did not think to reach this ḫnw}

In the second part of the tale, narrative gives way to the discourse between Sinuhe and ‘imn-n-ši, king of ṛtnw, who asks why he has come by him and whether the Egyptian ḫnw is stable.

\textit{B 35) ḫn’ dd.n.f n.i ph.n.k nn hr šš īw wn ḫpr m ḫnw}
\textit{Then he said to me, “Why did you come here? Has anything happened in the ḫnw?}

‘imn-n-ši now develops his question on King Amenemhat and Sinuhe replays with an eulogy of the new king, stating that he is the equal of the old. In this case the chosen term for the royal palace changes: the ‘ḥ - and not the ḫnw - is the place where Amenemhat has entered.

\textsuperscript{296} Parkinson 1997: 43, note 1.
\textsuperscript{297} In the Middle Kingdom the term rwty starts to appear in the dual form rwty, with the addition of the dual adjective wrty to describe an important entrance to a palace or a temple. For an overview of the occurrences of the term in texts see Spencer 1984: 215 ff.
\textsuperscript{298} FCD: 154. Gardiner 1947, I: 142.
('k r 'h) and has probably been crowned. The ḫnw 'h is also the place where Sesostris was together with Amenemhat.

In section D describing Sinuhe’s permanence at Ṭṇw, the protagonist recounts his rise over a long time period, during which he retains indirect contacts with the Egyptian court: he says that every messenger who went from and to the ḫnw (Itjtawy ?) would tarry for him.

B 94-95) whyt.f wp(w)ty ḫdd ḫnty(w) r ḫnw 3b.f hr.i And any envoy on his way to or from the ḫnw, he stopped by me

He goes on contrasting his present state with the actions of other fugitives and distances himself from them. The self-celebration contains a reference to the ḫnw, in order to establish a distance between Sinuhe’s foreign dwelling place and the Egyptian residence.

B 149-150) w’r w’r(w) n h3w.f iw mtr.i m ḫnw The fugitive flees from his surrounding, but my right place is the ḫnw

This suggests the self-contradictory nature of Sinuhe’s happiness, which he gradually realizes as he proclaims it. 299

B 156-7) ntr nb 33(w) w’rt tn ḫtp.k dl.k wi r ḫnw Whatever god fated this flight, be gracious and bring me back to the ḫnw

Returning to Egypt Sinuhe will be able to see again the ḫnw, described as the place where he grew up. A reference to the rwty wrwty of the ḫnw, such as that described at the starting section of the tale, is repeated here.

B 188) ir n.k iwт r Kmt m33k ḫnw ḫpr.n.k im.f sn.k t3 r rwty wrwty Prepare your return to Egypt that you may see the ḫnw where you born, kiss the earth of the double gates

Sinuhe explicitly acknowledges that his place is the ḫnw and states that king’s power extends over the horizon.

B 233) m’wi m ḫnw m st.tn nt.k is ḫbs 3ḥt nt Whether I am in the ḫnw, whether I am in this place,
It is you who veils this horizon of mine.

At the end of the last part of the tale Sinuhe arrives at the *Ways of Horus*, the royal road leading from Egypt’s border at Sile to the north-east. The commander is the first of a series of intermediaries who carry Sinuhe in front of the king; he sends a message to the *hnw* to announce Sinuhe’s arrival.

*B 241* จว. ผว. อ.ว. บุก ยึด *m หงติ*

*B 242* หศ. จิ ประ วิต ภูณิ ญ ท่าน ผ่าน *m-s3 ปหรท*

*B 243* หศ. จิ ปท ร หงว ร ริต ร. ทว. (..)

This humble servant then came southwards, and I halted the Ways of Horus. The commander who was in charge of the garrison he sent a message to the *hnw* to inform them.

The title of an official, the *ิมย-ร สกิว*, the “overseer of foragers”, who has to bear royal giving to the Syrians who hosted Sinuhe is linked to another palace term: *ผร-นสเว*. In the Tale of Sinuhe the term *hnw* is often used referring to a place from and to where the protagonist escapes and goes back. The voyage to the *hnw* is a trip to Itytawy, the royal capital of the 12th Dynasty.

1.9 Titles and epithets compound with term *hnw*

Epithets compound with *hnw* are very rare in Middle Kingdom private inscriptions. The word is most frequently used in narrative contexts, such as private autobiographies and literary texts, which describe the arrival or return of the inscription owner at the *hnw*. Generic epithets referring to the *hnw* are those composed by simple expressions such as: *นร m หงว*, “beautiful in the *hnw*”, *สระบ ร หงว*, “companion of the *hnw*”, or *ิมย-ร หงว*, “overseer of the *hnw*”, often resulting from a wrong writing of the most common title *ิมย-ร ‘hnwty*. Inscription in the tomb of Beni Hasan no. 2 offers an interesting exception since it establishes a connection of the term *kbnt* with the *hnw*: *ผร ทบ อ ทบ ผร ผร หงว*, “beloved of the *kbnt* in the *hnw*”. The term *kbnt* was used from the Middle Kingdom onwards to refer to a group of magistrates and it is generally translated as “court”. Epithets connecting the *kbnt* to the king or the *hnw* show the relation of this court with the palace and specifically with its *hnw*-shape.

305 Callender 2000: 149 ff.
Several titles in private inscriptions refer to different sections or bureau of the administration, without indicating their recipient, which could be indifferently the palace or the temple or other wealthy estates.\footnote{Quirke 2004: 16.} Despite being related to administrative and economic functions of the state, many of these sectors might have been located within the palace itself, but a grammatical association between such terms and the words for palace are very uncommon. In order to understand which one of these sectors, the pr-\(hd\), “treasury”, the \(h3\) \(\text{\(nty\)}, \text{“the bureau of the vizier”}, \text{the } k3p, \text{“inner palace” or the } hnty, \text{“outer palace”}, \text{were physically connected to the palace-building, it might be useful an analysis of the associations between different titles in private inscriptions. Such an analysis aims to verify whether titles compound with one of the words for palace and those referring to specific administrative sections belonged to the same holder. A study like this cannot be exhausted in the present study, since it requires a separate complex study of the career of each titles owner. Those below are just few examples of the type of study which would be useful to the purpose of this work.}

- The \(imy\)-\(r\) \(\text{\(ip3\) nswt, “overseer of the private rooms of the king”}, \text{‘h3-n\(n\)ht, owner of the Tomb no. 8 at el-Bersheh, was operative in the ‘\(h\), being defined r\(h\) s\(s\)m n ‘\(h\), “one who knows the business in the ‘\(h\)” (A.II.14). ‘\(lh\), \(imy\)-\(r\) \(\text{\(ip3\) nswt, “overseer of the private rooms of the king”}, \text{is the owner of a tomb at Saqqara where several titles are listed together, some related to the political sphere and others to the religious one: several expression reconnect his activity to the pr-nswt (A.II.21).}

- Title \(imy\)-\(r\) \(\text{\(h\)(\(nty\) wr n pr-\(hd\)}, \text{“chief interior-overseer to the treasury” appears in stele Leiden S2 of s\(3\)-rrt together with \(ir\) \(y\) ‘\(n\) \(y\) pr-‘\(3\) (A.II.132).}

- In BM 146 [574] (A.II.45), the title of Semyt the younger \(imy\)-\(hnt\), “chamberlain”, appears together with the expression \(m\) \(\_\(3\)\(w\) \(m\) \(sh\) ‘\(h\), “at the crowing at the appearance of Horus, Lord of the palace.”
1.10 The term stp-s3 in official monuments and narrative inscriptions

The most significance change after the Old Kingdom307 in the usage of stp-s3 is the appearance of the pr-sign as determinative of the word from the early 12th Dynasty.308 The inclusion of the determinative in the word is attested for the first time around the beginning of the 12th Dynasty, during the reign of Amenemhat I and Sesostris I, in inscriptions such as Beni Hasan 2 (A.II.42),309 Durham N1935 (A.II.50)310 or pBerlin 3029 (A.I.5).311 Another important difference in the orthography is the addition of the phrase ‘nh wd3 snb, “life prosperity and health”312 (see pBerlin 3029 - A.I.5). According to the analysis of Old Kingdom occurrences proposed by Goelet, the question is whether the term stp-s3 as “palace” is really a post Old Kingdom development. In Goelet’s opinion, the word would have begun to indicate a specific type of building only from the Middle Kingdom onwards, with the appearance of the pr-sign and the ‘nh wd3 snb expression.313

People called smrw nswt, “companions of he king”, are connected with the stp-s3 in stele for Wadi el-Hudi Berlin 1203 (A.II.46), where they are involved together with the king in some manner of royal council where affairs of the state were discussed.

\[ii.n.(i) r hsmn n hm.f hn-. sr n smrw nswt n stp-s3 mdww n.f m t3 pn\]

I came for amethyst, on behalf of His Majesty, together with a dignitary of the companions of the king belonging to the stp-s3, who had been spoken to him in this expedition.

In stele BM 193 [566] Ddw-Sbk (A.II.111), “foremost of position of the stp-s3”, enters in the privacy of the stp-s3 to hear the words (sdm mdww) of the chiefs in the presence of the king.

\[ph.f w^w^t hnt st m stp-s3 hrw m sdm mdw w^ hryw m b3h nb t3wy\]

He enters in the privacy, foremost of position in the stp-s3, during the day to hear the unique word of the chiefs in the presence of the Lord of the two lands.

---

308 ibid.: 95.
309 Newberry 1983: pl. 8
310 el-Sayed 1977: 171, pl. 16
312 Wb I 196: 10-7.
An official counsel, which took place in the stp-s3, was described in the Berlin Leather Roll pBerlin 3029 (A.1.5):

\[d3dw\ \text{ndnd} \ \text{imyw-hj} \ f \ \text{smrw} \ nw \ \text{stp-s3} \ ‘nh \ \text{wd3} \ \text{snb}\]

A session took place in the \(d3dw\). One took counsel with his followers, the companions of the \(stp-s3\), l. p. h.

According to this text, Sesostiris I ordered the companions of the \(stp-s3\) to assemble to announce his decision to build a temple.

The vizier ‘Intf-ikr records on a stele at the port of Wadi Gawasis that Sesostiris I commanded him to build boats to be sent to \(Pwnt\) and he states that he “completed his task” (literally: “I acted magnificently) according to what had been commanded to him in the “majesty of the \(stp-s3\)”, \(^{314}\) \(wdt \ n.f \ m \ hm \ n \ stp-s3\). \(^{315}\)

The unique example of \(stp-s3\) in the Tale of Sinuhe (A.III.5) is in the passage containing Sinuhe’s reply to the king.\(^{316}\) In this section of the text Sinuhe praises the king and speaks of his return to Egypt. The king uses his perception to have knowledge of Sinuhe’s exile and his desire to return.

\[B \ 214) \ (.) \ nb \ si3 \ si3(w) \ rh(y)t \ si3.f\]
\[B \ 215) \ m \ hm \ n \ stp-s3 \ ‘nh \ \text{wd3} \ \text{snb} \ wnt \ b3k \ im \ \text{snd}(w) \ dd \ (.)\]

The Lord of discernment, who perceives the people, discerned in the majesty of the \(stp-s3\), l. p. h., what the servant who I am was afraid to say.

1.11 The term \(stp-s3\) in titles and epithets

The use of \(stp-s3\) in Middle Kingdom texts is preponderant in epithets rather than in narrative texts. Particularly recurrent are those expressions in which \(stp-s3\) is connected in some manner with verb \(hsj\), “to praise”. Similar expressions are those involving \(mrwt\), “love” that define the inscription owner as “beloved”, in the \(stp-s3\). All such epithetical phrase can trace their origin back to the Old Kingdom.\(^{317}\) Middle Kingdom examples suggest that the “praising”/“favoring” and the “loving” were done by the king \(lf \ hst \ nt \ hr \ nswt \ mrwt.f \ m \ stp-s3\), “according to the favor of the king [and] his love in the \(stp-s3\)” (in Beni Hasan 3 -

\(^{314}\) For this translation see: Sayed 1977: 169.
\(^{315}\) Shaw 2010: 181.
\(^{317}\) Goelet 1986: 96.
A.II.51). The bestowal of king’s approval may have occurred on specific occasions and have
taken place before an audience consisting of the royal family and high officials.\textsuperscript{318}

If the association with verb ḫṣī, “to praise/favor” suggests that the word stp-s3 involved
aspect of the palace that were ceremonial in the broadest sense of the word, later
occurrences of the word exhibit a close connection with the decision making-progress.\textsuperscript{320}
The association between stp-s3 and royal decision-making is emphasized by

\textsuperscript{318} Ibid.: 96.  
\textsuperscript{319} Shaw 2010: 181.  
\textsuperscript{320} Goelet 1986: 97.
contemporary\textsuperscript{321} and later expressions in narrative passages employing variants of the expressions \textit{wdt} \textit{m stp-s3}, “what was ordered in the \textit{stp-s3}” or \textit{ddt} \textit{m stp-s3}, “what was said in the \textit{stp-s3}”.\textsuperscript{322}

1.12 Ijtawy and Thebes.

According to written sources the residence city of the 12\textsuperscript{th} Dynasty was established by Amenemhat I\textsuperscript{323} (1895-1956 BC) at ‘\textit{lt}-t3wy,\textsuperscript{324} probably north of the Faiyum near the modern Lisht.\textsuperscript{325} No site has been recovered in archaeology and the proper location of the city remains unknown. Poetic descriptions of the structure and form of its palace at the time of Sesostris I are contained in the Tale of Sinuhe (A.III.5).\textsuperscript{326} The 19\textsuperscript{th} Dynasty Turin Canon refers twice to the pharaohs of the 12\textsuperscript{th} Dynasty as “kings of the \textit{hnw ‘lt}-t3wy”, with word \textit{hnw} used as apposition of the new residence-city.\textsuperscript{327}

A significant element of the designation of ‘\textit{lt}-t3wy is the enclosure-wall hieroglyphic sign in which it is written, this “fortress” being a regular element of the name in Middle kingdom and later hieroglyphic writing.\textsuperscript{328} The need to strengthen the region with a defensive system is stressed in the Prophecy of Neferty, a text which may have been composed at the beginning of the 12\textsuperscript{th} Dynasty, referring to Amenemhat as “one who will build the Walls of the Prince to repel the Asians”.\textsuperscript{329}

\textsuperscript{321} See paragraph above: § 1.10.
\textsuperscript{322} See paragraph below: § 2.10.
\textsuperscript{323} Private inscriptions on 12\textsuperscript{th} Dynasty monuments report the name of the town composed with that of Amenemhat as subject of the verb \textit{lt} in sentences like ‘\textit{lnn-m-h3t-lt-t3wy or ‘lnn-m-h3t-‘nh-gt-lt-t3}, “Amenemhat - the seizer of - the two lands” or “in Amenemhat – alive forever - the seizer of - the two lands”. See Simpson 1963: pl. 1 referring to stele CG 20516 of year 30 of Amenemhat and year 10 of Sesostris I; Cairo CG 20515, stele of year 10 of Sesostris I; stele Los Angeles County Museum A5141.50-876 of Sesostris I’s reign (in Faulkner 1952: pl. I); false door of the mastaba of ‘\textit{lt} at Saqara, probably dated to the reign of Amenemhat III.
\textsuperscript{324} A list of occurrences of the term in the Middle Kingdom is provided in Gauthier 1925-31: I, 124; II, 167; III, 145; V, 224. Simpson 1963: 53. Wb I: 150, 6.
\textsuperscript{326} \textit{i3w sbb(w) ‘tb(w) tp-m3’.l pht.i dmn n ‘ltw hh.d n rf dw3 sp 2 iwb iwb(w) i3’s n.i 10 (n) s m iw 10 (n) s m smt hr st3.i r ‘h dh.n.i t3 imy(y)lt(w) sspw, “The beer was filtered and kneaded at my side and I reached the town of ‘ltw. When the earth became light the second morning came to call me 10 men, 10 men came to accompany me later to the ‘h. (There) I touched the ground between the sphinx”.
\textsuperscript{327} ‘ltw is used in the text as \textit{lt}-t3wy, in Guillox 2005: 67, note 101.
\textsuperscript{328} Hayes 1953: 37. Gardiner 1959: V, 19; VI, 3.
\textsuperscript{329} The sign appears like the cartouche which encloses the royal name, in Simpson 1963: 58.
PART I

The identification suggested by Griffith\(^{330}\) and Scharff\(^{331}\) of 13\(^{th}\) Dynasty royal buildings near Dahshur, Lahun and Khaun\(^{332}\) as residence cities is doubtful;\(^{333}\) it is likely that these town were settlements for officials, priests and workmen connected with the construction and service of the king’s tombs.\(^{334}\) The acropolis of the pyramid town of Illahun, the unique such community of the Middle Kingdom to have been excavated, is dominated by a large and spacious civil area and storage areas, which could easily have accommodated the king’s household, court and administration for a period.\(^{335}\)

From the time of Sesostris I a ritual palace named \(hpr\)-\(k3-R^\prime\)-\(ptry\)-\(k3\) \(ww\) may have located at Karnak.\(^{336}\) The existence of a royal residence at Thebes during the late Middle Kingdom is suggested by the 13\(^{th}\) dynasty Papyrus Boulaq 18,\(^{337}\) an account text detailing deliveries and expenses incurred by the royal court on a trip away from its ordinary place of residence for a period of at least twenty-three days.\(^{338}\) The text is the piece of evidence most frequently cited in favor of Thebes as a 13\(^{th}\) Dynasty capital of Egypt.\(^{339}\) In this papyrus the specific word used for “palace” is pr-‘\(3\) and Thebes is mentioned with the name of \(Niwt\) \(Rst,\) “Southern city.”\(^{340}\) The presence of the court in the South City would have covered a period of not much more than a month and could be related to a specific occasion, like the festival of the great Montu, which fall within the period covered by the papyrus (XXXV, 1-2).\(^{341}\) If a royal residence existed at Thebes during the 13\(^{th}\) Dynasty it could have worked to host the king during his visits to Thebes and Karnak for ceremonial and religious occasions.\(^{342}\)

\(^{330}\) Griffith 1898: 90.
\(^{331}\) Scharff 1924a: 51 ff. Gunn 1945: 106 ff. The ‘\(h\) sign appears in two seal impressions from the Pyramid complex of Khaun, in Petrie 1891: Pl. 9, 10, 18.
\(^{332}\) Petrie 1891: Pl. 14.
\(^{333}\) The existence of royal residences near the 12\(^{th}\) Dynasty pyramids has been supposed on the basis of written sources reporting names identical to those of the pyramid complexes but without the pyramid determinative, replaced by the city sign, in Griffith 1898: 88-90.
\(^{335}\) Stadelmann 2001: 14.
\(^{336}\) Kees 1958a: 195. Hirsch 2009: 69 ff. Especially Otto (Otto 1952: 21), Kees (Kees 1958a: 195) and Nims (Nims 1955: 110-23) and most recently Stadelmann (Stadelmann 1996: 226) stated that \(hpr\)-\(k3-R^\prime\)-\(ptry\)-\(k3\) \(ww\) worked as ritual palace at the Temple of Amun.
\(^{340}\) Mariette 1871-76, II: Pl. 29, 5; 43, 2-1.
\(^{341}\) Hayes 1953: 36.
\(^{342}\) According to Hayes, the proper royal residence and the seat of the pharaonic government stood at ‘\(t\)-\(t\)\(^{3}\)\(wy\) during the 13\(^{th}\) Dynasty, in Hayes 1953: 31 ff.
this papyrus was found in Dra Abu el-Naga on the western side of Thebes, the palace was probably situated there, on the hillside in front of Dra Abu el-Naga or Taref.\textsuperscript{343}

Occurrences of ‘It-tꜣwய with references to worships, officials and bureau, glean some evidence of the fact that the city worked both as royal residence and the seat of the administration and the government.\textsuperscript{344} One of the main considerations is the extent to which the city has to be intended as the unique residence city or - using a modern concept - as “capital” in order to clarify the use of the term $hnw$ in the Middle Kingdom. The just cited 13\textsuperscript{th} dynasty Papyrus Boulaq and later documents such as the Tempest stele of Ahmose (B.I.2)\textsuperscript{345} and inscriptions recording the participation of Thutmose III and his successors to the Opet Feast in Thebes (B.I.4) show that pharaohs travelled extensively through the country with their entourage on tours of inspections or to officiate in various cultic ceremonies. The main Residence city or “capital” may have been from time to time the place where the king and high officials made their more-or-less permanent headquarters, necessitating an extensive complex of palaces, administrative buildings and storehouses.\textsuperscript{346} Instances in which the term $hnw$ is used as specification of ‘It-tꜣwய\textsuperscript{347} and those in which the name city is totally replaced by the term $hnw$,\textsuperscript{348} help in defining the meaning of $hnw$ as “residence-city”. And it was probably in those cases where the place name itself would be necessary for the identification of a specific “residence” that it was used.\textsuperscript{349}

1.12 Conclusions

Despite the attempt to restrict the analysis on Middle Kingdom sources, in order to understand the usage of terms for “palace” in this specific period, comparisons with later periods are unavoidable in order to plug the gaps in documentation.

\textsuperscript{349} Simpson 1963: 57.
Collected data have revealed that one of the major features of the 'h was its association with ceremonial occasions. The block with part of the Horus name of the king Amenemhat I from the palace of Tell Basta (A.I.2) may be considered the first example of connection of term 'h with the Hb-sd festival among sources considered in the present study.\textsuperscript{350} This block, carrying the expression nswt 'h is part of other stones with scenes in relief representing Amenemhat III at his jubilee festival. Below the sky-sign, the king is shown sitting on his throne in a kiosk, wearing jubilee robes and the crown of Upper and Lower Egypt. Horus and Seth are shown with human hands offering him symbols possibly signifying countless years of rule. Beneath the double kiosk there is a horizontal row of enigmatic signs. Above, outside the kiosk, there are the standards of Wepwawet of the North and South and below, on the right and left, god 'lwn-mwt-f is depicted wearing a leopard skin and bringing offerings and wishes for life, stability and welfare to the king. Two similar vertical lines of inscriptions recording the king’s first Sed-festival occupy the right and left borders of the block. Old-Kingdom Hb-sd reliefs showed that the 'h was one of the most important construction to be built just before the performance of the ceremony.\textsuperscript{351}

Scenes from the first Sed-festival of Amenhotep III occurring in the 18\textsuperscript{th} Dynasty Temple at Soleb\textsuperscript{352} (B.I.17) refer to the 'h as one of the structures used during the celebration of the ceremonies, from and to where the King moves after having offered to different deities.\textsuperscript{353}

The scenes of Amenhotep III’s first Sed-festival in the south portico of Hrw.f’s tomb are an abbreviated illustration of the parts of the festival, probably restricted to those moments in which Hrw.f had an active role (B.II.80). Among the moments depicted in the tomb, there is the scene of the procession of the queen and king from “his 'h in the House of Rejoicing” ('h.f n pr-'h'y), where Hrw.f appears amongst the accompanying officials.\textsuperscript{354} For a detailed analysis of such scenes and the connection between the 'h and the Hb-sd, I refer to a dedicated chapter of the present work.\textsuperscript{355}

The ceremonial functions of the 'h are rather broad in nature. They could consist of crowning (\textit{dwb3w})\textsuperscript{356} and enthroning (\textit{h'w})\textsuperscript{357} ceremonies (BM 146 [574] - A.II.45; UC 14333 - A.II.5) probably taking place on specific occasions, or appearances of the king probably

related to most common situations. The royal appearance (ḫꜣ, “to appear in glory”) is often combined with word ʿḥ. It seems likely that the ḫꜣꜣw or ḫꜣw was the specific place of the ʿḥ meant for the appearance of the king that may have occurred on frequent and rare occasions. According to the Building inscription of Sesostris I in Papyrus Berlin 3029 (A.I.5), the king made his appearance in the ḫꜣw, ordering his officials an assembly (hmst) in this place to announce his intention to build a temple in Heliopolis. The ḫꜣꜣw or ḫꜣw might be described as a room/hall of audience within the ʿḥ-palace with supposed ceremonial functions.

The ceremonial nature of term ʿḥ is also highlighted by the frequent connection of god figures with this institution. When the Pharaoh is mentioned within it, he often takes the divine form of Horus, being entitled ḫr nb ʿḥ. References to the living king as personification of Horus can be found also in common private titles referring to the owner as ȋmy-ib ḫr nb ʿḥ, “favorite of Horus, Lord of the ʿḥ”. The association of other gods with the ʿḥ, released by Pharaoh’s personification, is a later phenomenon. The possible apposition of word nṯr to the ʿḥ (ʿḥ (n) nṯr/w) explains the occasional necessity to specify the royal ownership of the ʿḥ when the term is referred to a more secular building (inscription of Sesostris III at Medamud - A.I.10: ʿḥ nswt bity, “ʿḥ of the king of Upper and Lower Egypt”; inscribed block from the palace of Tell Basta - A.I.2: nswt ʿḥ, “King of the ʿḥ”). The expression ʿḥ (n) nṯr/w could be considered a later development of Archaic Period and Old Kingdom hieroglyph with the nṯr-sign placed inside the ʿḥ itself. This form seems to be one of the complex elaborations of the basic ʿḥ together with those composed of hieroglyphs ḫd and htp (ʿḥ-ḥd and ʿḥ-ḥtp). Each of these additional signs seem to reflect a different form of the ʿḥ. Specifically, the ʿḥ-nṯr would have served as changing area or resting place for the king during certain ceremonies. Since such a place would also be connected to divinities like Nekhbet, Horus, Seth and Apis, perhaps it could serve as a shrine or temple for a god’s statue as well. It is the predominantly religious character that sets the word ʿḥ apart from other terms for palace.

Ceremonies of secular nature that would seem to have taken place in the ʿḥ, are those consisting of ḫnw-delivery. Dispensation of this royal tax can be found also in other contexts where the ḫnw is the final destination. We can assume that the occasion of delivery was different. ḫnwt would have been the place where the ḫnw was generally destined to be

---

359 Ibid.: 400.
360 Ibid.: 401.
received by the king in his residence-city, and the ‘ḥ would have been the place where it was delivered on the occasion of official ceremonies.

The Tale of Sinuhe (A.III.5) refers to the presence of the queen (ḥnwtdown) and the royal children (nswt msw) in the ‘ḥ-palace in those passages where Sinuhe expresses his wishes to go back to Egypt and his expectation to work again for them. The presence of women in the ‘ḥ is mentioned even in Papyrus Westcar (A.III.6) in those sections where the lector-priest answers Snemru to proceed to the lake ( unregister) of the pr-‘ḥ and to fill a barque with all the beautiful women of the inner section of the ‘ḥ (ḥnw ‘ḥ).

The final stanzas of the Tale of Sinuhe (A.III.5) are the most informative at all since they describe the entrance of Sinuhe in the inner part of the el-Lisht ‘ḥ-palace. At the great portal (wmt) flanked by two sphinxes, he is introduced (st3) into the palace, where the royal children greet him. After having passed the first gateway, he crosses the audience device composed of a first court (w3ḥy), an audience hall (‘ḥnwty) in which the king is seated on a throne (st wrt). Such description of the throne-room complex has correspondence in the real plan of royal palaces, as recognized in archaeologically known buildings. Where it is preserved in fact, it shows a specific tripartite shape with the succession of two hypostyle halls and a throne-room at the end. This architectural model, although not fully standardized in Middle Kingdom palaces, develops in the axial shape of New Kingdom palaces, where the three rooms are perfectly aligned each other.

According to Goelet’s analysis of the term stp-s3 in the earliest period, stp-s3 as “palace” can be definitively encountered in written texts starting from the Middle Kingdom onwards with the appearance of the pr-sign and the ‘ḥ nwḥ snb expression after the word. In Old Kingdom inscriptions it appears as an element of verbal phrases expressing a concept of protection offered to the king.361 When the term is used in narrative passages and private titles, the recipient of stp-s3 can be not only the king, but also other persons beside the king himself.362 In narrative sections it seems to denote both a place and an activity in which more people – the king and other officials (snrw nswt) - could participate and issue statements in a sort of royal council.363 In biographical texts, as well as in private titles, the term stp-s3 has a clear connection with the decision-making process, “an aspect of the stp-

362 At this time courtiers could be described as “beloved in the stp-s3” or “favored in the stp-s3”. A courtier inter alia could also be “foremost of position in the stp-s3”. See paragraph above: § 1.12.
363 Shaw 2010: 181.
s3 which underscores its consultative nature and its relationship to persons other than the king”. The possibility that the term may refer to either the place and the group of people gathered in this place raises the question of its interpretation as a proper palace or royal building. Against Goelet’s interpretation of the development of the term, the Middle Kingdom use of the word seems to retain aspects that go back to the Old Kingdom. Considering the usage of the term in private titles, particularly common are those epithets that refer to the owners as “beloved” (mry) or “favored/praised” (hsy) in the stp-s3. Middle Kingdom examples suggest that “praising”/“favoring” and “loving” were granted by the king. The bestowal of king’s approval may have occurred on specific occasions and have taken place before an audience consisting of the royal family and high officials.

The function of the pr-nswt as place for collecting a range of facilities (b3kw) can be reconstructed thanks to various expressions in literary texts. In both private and royal inscriptions pr-nswt appears as the source of goods to be brought to or taken from a person or another institution. In the Admonitions of Ipuwer (A.III.8) the incomes of the pr-nswt palace are recorded as b3kw or g3wt. The products mentioned in the text are manufactured and stored in the šn’ n nswt, the workshop of the king located in the pr-nswt. In the inscription from his tomb at Beni Hasan (A.II.43), ‘lmn-m-h3t recorded payment of b3kw consisting of staple foods, dresses and adornments, copper and plants addressed to the pr-nswt.

The pr-nswt is a structure that appears often in relation with other institutions with a clear administrative nature: the treasury, pr-hd, and warehouses, šn’. The format of many private inscriptions indicates that the royal treasury was the place where palatial entries were physically stored, and the pr-nswt was the centre where incomes and outcomes were administered. Another role of the pr-nswt consisted in receiving reports from Egyptian provinces to update the government on happenings in outlying areas of the state. Judging from the titles compound with pr-nswt, official activities referred to it involved the receiving of reports, the assessment of inventories (cattle-lists) or the opening of sealed-doorways. The mention of similar activities and departments reflects an actual administrative practice in economic and civil affairs. Other offices involving administrative functions are those of the “scribe” (sš), the “sealer” (hmtw) and the “treasurer” (hmtw n pr-

---

hd). Inter alia, the title sš (n) pr-nswt evokes another branch of the central administration, that of the registration of economic and bureaucratic business. The types of sources that employ the word pr-nswt also reflect the word’s institutional character. Many private inscriptions referring to the pr-nswt come from peripheral sites of mining, quarrying and military expeditions as well as from provinces such as Assiut or Beni Hasan, and belong to courtiers sent abroad for officials’ missions, who had to report their results to the pr-nswt itself. The frequent mention of the pr-nswt in epithets of provincial officials is likewise linked to their intention to link themselves to the central administration. Differently from other words, the pr-nswt does not refer to any specific king or the concept of Majesty as other terms. Instead it was probably a term for a type of property under ruler’s control intended for administrative and economic functions.

The term hnw often appears in narrative texts in prepositional phrases. The most common phrases have the preposition m, “in” or “from”, and r, “to”, which are usually closely associated with a main verb of motion. The expression r hnw, “to the hnw” arises in passages involving journeys and other activities commissioned by the king. The purpose of the trip is not always stated so that we do not even know what followed the king’s arrival to the hnw. Of the five major terms for “palace”, hnw is most commonly used in narrative contexts rather than in private titles. Examples of the phrase r hnw, “to the hnw” are often compound with motion verbs such as spr, “arrive” or ‘k, “enter”. Private inscriptions involve foreign expeditions carried out by the owner, after which he has to go back to the hnw through a trip or sailing. In narrative compositions the hnw is the final destination of journeys of the protagonists. In Papyrus Westcar (A.III.6) Ddi, the commoner called in front of Cheops to perform a wonder for the king, arrives to the hnw after having sailed northwards. In the Tale of the Shipwrecked Sailor (A.III.7) a high official returning from a failed expedition ensures the protagonist about his return to the hnw where he will be buried. In the Tale of Sinuhe (A.III.5) the protagonist, during his permanence in Rtnw, expresses his wish to go back to the hnw, described as place where he grew up. Things and people were often said to come from and in the hnw also in a number of papyri of this period. Contexts of use of term hnw suggest that we are dealing with an extensive place sometimes identified with the residence city Itjtawy. In addition to its aspect of “royal residence” the hnw should have had a special administrative function, most probably as the seat of government where people had to report their economic transactions or quarrying expeditions. Papyrus Reisner II (A.I.15) mentions the sending northwards of grain from This
to the ḫnw, where the vizier will reckon it. The ḫnw must be probably identified with the newly founded Itjtawy near Memphis, where the vizier resided. In contrast to This, the sending southwards of craftsmen ṣ nîwt, “to the city”, must refer to Thebes. The ḫnw appears as destination of deliveries consisting of various commodities as well as despatches regarding some products for festival in a number of papyri from Thebes (Papyrus Ramesseum III - A.I.19) and from Lahun (pBerlin 10021 - A.II.156). The commodities to be brought to the ḫnw can be mentioned as ‘kw, a word that functions as generic term for “provisions”, or take the shape of ḫnw (pBM 10756 - A.I.19; JE 51911 - A.I.14). The lack of resources (g3wt) arriving at the central administration causes fearfulness (sng) to the ḫnw in the context of the Admonitions of Ipuwer. The word ḫnw is exceptionally used in the Instructions to king Merikare (A.III.3) where it expresses a group of people affiliated with its place, more than the location itself, being the word used with verbs such as mrt, “love” or sr, “foretell”. A figurative usage of the word ḫnw can be found in the Tale of Sinuhe (A.III.5), where the ḫnw is described in silence (m sgr) in the passage marking the death of Amenemhat by the metaphor of the closing of the great double gates (rwty rwty) of the ḫnw itself. In the Admonitions of Ipuwer (A.III.8), the mention of laws (hpw) and offices (ḥ3w) and knbt-court in the group of strophes referring to the ḫnw suggests that the ḫnw is here evoked as central administration in general. In the Tale of Sinuhe, the ḫnw is the sending and receiving place of messages that allow communication between the officials and the central administration: at the end (A.III.5) of the tale, the return of Sinuhe to Egypt is announced by a message sent to the ḫnw. A passage of the Instructions to King Merikare (A.III.3) mentions the ḫnw in a context referring to Memphis as Wddw swt. Specifically, the text speaks of the time of the ḫnw to be intended as the Old Kingdom Memphis, when Memphis was the ḫnw itself, and to be translated as “residence city”.

In the aforementioned Papyrus Westcar (A.III.6) different terms for the royal palace and specifically ḫnw, pr-‘3, and ‘ḥ are all used in really close sentences in contexts different from time to time. According to the sequence of characters’ movement in the section describing Ddi’s audience before King Cheops, it is possible to reconstruct the relationship among these different structures. The first passage to be described is Ddi’s navigation northwards and his arrival to the ḫnw. Cheops, after having asked to his son Dd.f-Hr to bring him Ddi, proceeds to the w3ḥy, the “great hall” of the pr-‘3, l. p. h. It is only after having listened to Ddi’s tales and prophecy that king Cheops proceeds to his ‘ḥ (hm.f r ‘h.f). Here he orders to assign Ddi to the house of prince Dd.f-Hr. The ḫnw would seem to be the widest institution of the three mentioned in the text and is the final destination of the sea-trip of Ddi. The pr-
'3 is presented as part of the "hnw and must be probably interpreted as a part of the "hnw as “residence-city”, while the 'h might be intended as a specific section of the wider pr-‘3.

The most informative document regarding the usage of the term pr-‘3 during the Middle Kingdom is Papyrus Boulaq 18 (A.I.17) containing daily accounts of income and expenditure at the palace of Thebes over twelve days during the 13th Dynasty. The papyrus, listing different categories of people employed in the royal palace, allows to distinguish among different sections of the pr-‘3: the k3p, described as “inner palace” and consisting of private quarters of the building, and the ḫnty, “the outer palace” or the official quarter at the front. According to this text, some of the entries would have been supplied directly from the śn’, or “provision quarters”, among which the ‘t īwf, “the meat chamber”, is mentioned once in Section 30: in the context of Papyrus Boulaq 18, the śn’ would have functioned as quarter where the food for the royal family and servants was prepared within the palace area. Among the outer architectural features of the palace it must be mentioned the w3ḥy or “columned hall”, the ‘rryt, or “entranceway” of the palace, the wʾrwt or “sectors” of the pr-‘3 and the pr-ḥd or “treasury”. The w3ḥy can be also found in relation to the ḫ-palace, as for example in the Tale of Sinuhe, where it is described as columned hall crossed by Sinuhe during his royal audience. Similarly, the pr-ḥd is a term often used in narrative expressions and titles compound with word pr-nswt. The ‘rryt would have been an important component of temple and palace which functioned as a sort of “porch”. In the context of the stele of Wp-w3wt-‘3 (GL WAF 35 - A.II.41) the term is used in connection with pr-nswt, where the sealbearers and the people at the ‘rryt see owner’s admittance to the pr-nswt.

Focusing on the more specific terms used to define inner sections of departments of the royal palace, they would seem to be indiscriminately used in connection with the different terms for “palace”, depending on the context of the inscription. To confirm this, as highlighted by Spencer in her lexicographical study on the Ancient Egyptian temple, many of these terms are the same used to define specific sections of the religious architecture.

Another important source for understanding the usage of word pr-‘3 is the so-called Papyrus Reisner II (A.I.15) listing the transactions of the royal dockyard workshop (wḥrt) at This during the 15th regnal year of Sesostris I. These workshops deal mainly with carpentry

---

366 Ibid.
and recasting of metal tools, and seem to have been a dependency of the pr-3 and to have worked as agencies of the palace. Pr-3 is generally used as a wide institution consisting of several sections and used for different functions, economic and administrative.
PART I

PART I. LEXICOGRAPHICAL STUDY OF THE ANCIENT EGYPTIAN ROYAL PALACE

Chapter 2. New Kingdom textual sources

2.1 Introduction

New Kingdom documentation is crucial in the attempt to reconstruct the royal palace institution and its functions. Although an architectural analysis of the palace is possible from the Middle Kingdom, only in the New Kingdom is the archaeology reach enough to offer substantial examples of royal palaces, especially thanks to the knowledge of two sites which were permanent royal cities and centers of residence and administration in the 18th Dynasty: Malkata,\(^{367}\) the city palace of Amenhotep III, and Amarna,\(^{368}\) the capital of Amenhotep IV. Despite the peculiarity of Amarna, which was undoubtedly innovative and non-traditional in many aspects, it represents a crucial source of knowledge for royal architecture in the New Kingdom. Its palaces are uniquely well documented, both archeologically and pictorially,\(^{369}\) so that the specific functions of each of them can be discussed in great detail together with their connection with the topographical layout of the entire city. A number of royal palaces should have existed at Memphis, the most ancient by far of the New Kingdom royal cities. Unfortunately all these palaces are still unknown, excepting for a single excavated example, the palace of Merenptah, which is especially important for understanding the function of the palace\(^{370}\) thanks to its exceptionally well-preserved status.\(^{371}\)

\(^{370}\) O’Connor 1995: 271.

Thebes\textsuperscript{372} was another royal city which, according to written sources, hosted several palaces from the Middle Kingdom onwards. Together with the capital of the 19\textsuperscript{th} Dynasty, Piramesse in the Eastern Delta,\textsuperscript{373} Thebes contained palaces that can be known only thanks to occurrences in texts. A specific section of the work will be dedicated to those New Kingdom palaces that are not archeologically documented in sites such as Thebes or Piramesse,\textsuperscript{374} for which the philological study can make up for the want of archeological data.\textsuperscript{375} However, palaces were not confined to the royal city: palatial structures have been excavated at Deir el-Ballas\textsuperscript{376} (PL. X-XI) and a “Harim”-palace has been unearthed at Medinet Gurob (PL. XII).\textsuperscript{377} These peripheral buildings offer an important instrument of comparison and integration in understanding the functions of Egyptian royal palaces. The site of Tell el-Dab’a has revealed a Tuthmosid palatial complex, probably built with defensive aims after the Hyksos period consisting of three huge palaces on platforms around an artificial lake.\textsuperscript{378}

A type of royal palace that is typical of the 19\textsuperscript{th} Dynasty\textsuperscript{379} architecture is the “temple-palace”,\textsuperscript{380} built of mud-brick at the southern side of the courtyards of royal mortuary temples made of stone. The prototype of these temple-palaces has been found within the courtyard of the mortuary temple of Sety I at Qurna.\textsuperscript{381} Its dimension and size were exactly reproduced in the palace of Rameses II in the Ramesseum\textsuperscript{382} and the first palace of Rameses III at Medinet Habu.\textsuperscript{383} Other similar buildings have been discovered in the

\begin{footnotesize}

  \item \textsuperscript{372} Otto 1952. Nims 1955: 110 ff.
  \item \textsuperscript{373} Bietak 1986.
  \item \textsuperscript{374} Inlayes of faience and glazed tiles from door frames, throne pedestal and decorated windows are the only examples for the palace of this site. Hayes 1937.
  \item \textsuperscript{375} A number of scholars discussed the exact location of the Theban palace neighbouring the temple of Karnak. Despite these studies have been useful as starting point for my research, my own work varies from them as to its aim at identifying the palace-word that was generally associated with the Theban palace itself.
  \item \textsuperscript{376} Lacovara 1980; 1981; 1985; 1990; 1993; 1996.
  \item \textsuperscript{377} Thomas 1981. Kemp 1978b.
  \item \textsuperscript{379} According to Stadelmann, the root of these temple palaces could be traced back to the beginning of the Old Kingdom. “The so-called temple T or pavilion in the mortuary precinct of Djoser already displays the features and the function of a temple-palace, as well as being positioned to the south of the so-called Hb-sd court, which is the royal court in the later mortuary temples”. Stadelmann 1996: 229.
  \item \textsuperscript{380} Stadelmann 1973: 221 ff.
  \item \textsuperscript{382} Stadelmann 1973: 233-36.
  \item \textsuperscript{383} Hölscher 1941.
\end{itemize}
\end{footnotesize}
funerary complexes of Ay, Horemheb\textsuperscript{384} and Merenptah,\textsuperscript{385} confirming the idea that this kind of palaces were inaugurated and came into use at the beginning of the 19\textsuperscript{th} Dynasty, when kings had definitely abandoned Thebes to live and reside permanently in the northern city of Piramesses.\textsuperscript{386} It has been supposed that they could have served as temporary residences by 19\textsuperscript{th} Dynasty kings during their short visit to the southern city, Thebes, in occasion of feasts and specific ceremonies.\textsuperscript{387} However, a close architectural examination of these palaces reveals that they were too small to have been actually used, even for a short stay.\textsuperscript{388} They exhibit small-scale versions of the main features of New Kingdom royal palaces and specifically of “ceremonial palaces”\textsuperscript{389} such the palace of Merenptah at Memphis: a first courtyard, which corresponds to the entrance court of the temple, a second columned hall and a throne room with a throne pedestal. A large Window of Appearance with its outside face towards the first temple court was a recurrent feature of these structures.\textsuperscript{390} These buildings were probably intended for the use of the king in the afterworld; as suggested by Stadelmann, “They were probably inhabited by portable statues of deified kings which appeared in the “Window of Appearance” and were carried in the processions and feasts of the necropolis.”\textsuperscript{391}

In order to define the original meaning of the words ‘\textit{h}, pr-‘3, pr-\textit{nswt}, \textit{hnw} and \textit{stp-s3} discussed in this study, the huge literary production of the New Kingdom offers a series of examples of their usage in different contexts. The primary sources for the nature of the words under consideration are narrative texts - civil and religious, official and private - since they tend to be the most informative at all. These texts are particularly instructive because of their nature: here the terms for “palace” are inserted in prepositional sentences whose meaning is suggested by the general context of the composition. In this group are included New Kingdom private autobiographies, whose main source can be considered the text known as \textit{Duties of the Vizier},\textsuperscript{392} which sets out the obligations of the highest official of the

palace, the royal monumental inscriptions consisting of building inscriptions and annals, 393 hymns to the gods and prayers found in great quantity both in monumental contexts and on papyri. 394 The genre of the “Instructions” is represented by the Late New Kingdom Instructions of ‘Imn-n-ipt, 395 while that of the “tales and stories” is preserved on papyrus rolls containing a variety of compositions among which the only one containing reference to the royal building (pr-nswt) is the Tale of the Doomed Prince. 396

Belonging to the genre of the royal decree, Horemheb’s inscription on the stele in front of the 10th pylon at Karnak, 397 together with the Instructions to the vizier Rh-mi-r’s tomb, 398 is one of the key-documents for the reconstruction of the administrative system of ancient Egypt and contains several references to the royal palace and the king.

Several titles concerning employees in the palace remain in a collection of texts known as the Tomb Robberies Papyri concerning the profanation of tombs of the late Ramessid Period (Rameses IX and Rameses X) and recording trials and inspections of such tombs to determine the extent of the crime. 399 Being essentially political texts, they can be used in the process of reconstruction of the main offices connected to the administrative system of the royal palace.

New Kingdom titles and epithets compound with words for palace, mainly from burial private inscriptions and private stelae, develop with the increase of New Kingdom autobiographical inscriptions. 400 This kind of citations exhibits difficulties of interpretations, because of its greatest deficiency, which is the lack of context in which each title usually occurs, but they are useful if compared with the kind of context available in narrative texts. 401 Meaningful for the interpretation of the term is also the comparison of forms of a given title with other compound with different terms for the royal palace and the analysis.

---

393 New Kingdom monumental inscriptions enlarge upon earliest prototypes with such texts as the Annals of Thutmose III, the Poetical Stele of Thutmose III, the Sphinx Stele of Amenhotep II, the Boundary Stele of Amenhotep IV at El Amarna, the Dedication Inscription of Sety I or the Qadesh Battle Inscription of Rameses II, in: Lichtheim 1973-1980, II: 5.
395 The entire loyalist teaching genre survives only in manuscripts from the New Kingdom which are copies of the original Middle Kingdom works; the Instruction of ‘Imn-n-ipt is a proper New Kingdom compilation. Simpson 1972: 241.
397 Kruchten 1981.
of their relationship with other offices within which the official may have operated. Despite the virtual intent of this work to examine every example of the term “palace”, it will be not possible to present every single quotation of some of the private titles in the New Kingdom sources because of their repetitive character and consequently frequent occurrence.

The importance of New Kingdom written sources in the study of the ancient Egyptian royal palace lies in the fact that to this period of the Egyptian history belongs the majority of royal buildings that have been archaeologically investigated. The final attempt of this study will be to reconnect the functional differences observed in the architectural analysis of these structures with semantic variations among the palace-terms. The main difficulty in reconnecting the two sources, the archaeological and philological one, consists in the nature and provenance of the available inscriptions; except for rare inscriptions from the site of Malkata, Memphis or Medinet Habu, almost all the expressions and titles do not come from the same sites hosting palatial complexes, but are conserved in independent monuments. Since most of the terms for palace are not explicitly located in a specific site in available written sources, it is difficult to determine to which one of the archeologically known palaces these words refer.

2.2 The term ‘ḥ’ in official monuments and narrative inscriptions

The word ‘ḥ’ occurs most often in narrative contexts and prepositional phrases in expressions such as r ‘ḥ’, “to the ‘ḥ’” and m ‘ḥ’, “in the ‘ḥ’”. The phrase r ‘ḥ’ arises in passage of official narrative texts involving journeys and other activities connected with the king, or commissioned by him.

The Coronation Text inscribed on the blocks of the Red Chapel of Karnak (Karnak 6 – B.I.9; Deir el-Bahari 1 - B.I.10) describes the arrival of the Queen Hatshepsut r sbḥwy n ‘ḥ nswt, “to the double gate of the royal ‘ḥ’” and r ḫnt ‘ḥ’, “to the front of the ‘ḥ’”. The action of motion is expressed by verbs like spr, “to arrive”, or ḥ, “to enter”, and is aimed to the making of an oracle in front of the royal building (ḥr bīḥy). Text refers to a ritual situation

402 Hayes 1951:35 ff.; 82 ff.; 156 ff.; 231 ff.
405 GEG: 589.
406 GEG: 558.
connected with the enthronement of the Queen in the 'ḥ on the occasion of the oracular procession of Amun in the temple of Karnak. This text particularly refers to the palace of Karnak and is a key source of information about a royal complex, which is not archeologically known.407

The expression īw r 'ḥ “to come to the ‘ḥ” occurs once in Bet-Shean stele of Rameses II (B.I.39) where it is used in a descriptive caption referring to Asiatic enemies arriving to the 'ḥ of Piramesses with bowed heads:

īw.sn twt m w3ḥ tp r 'ḥ.f 'nh w3ṣ pr R‘-mssw ‘3 ḫtw

They come to him all together with bowed head to his ‘ḥ of life and dominion, Piramesses, Great of Victories

</tbody>
</table>

407 See paragraph below: § 2.12.
Phrases similar to those just cited mention a private person’s entrance into the ‘ḥ (r ‘ḥ). In biographical inscriptions the identical terminology of the royal monuments seems to be frequently used in expressions compound with with verb ‘k, “enter”: 

<table>
<thead>
<tr>
<th>Prepositional phrase: movement verb (spr, ‘k, iw) + r ‘ḥ</th>
</tr>
</thead>
<tbody>
<tr>
<td>‘k r ‘ḥ pri hr hswt</td>

</tr>
<tr>
<td>‘k. i r ‘ḥ</td>
</tr>
<tr>
<td>‘k hsi [pri] [dl] tryt n imy ‘ḥ</td>
</tr>
</tbody>
</table>

In private inscriptions the purpose of the entering in the ‘ḥ is rarely stated. Is not always known what followed the king’s or the official’s arrival at the ‘ḥ, since the expressions often end with the word ‘ḥ itself. In the inscription from his tomb a Thebes (TT 188 - B.II.90), P3-rn-nfr is described while entering in the ‘ḥ and coming out with favors, without any more detailed specification:

*iryr-p’t ḫ3ty-‘ w’(ty) n nswt gs st w’ty ‘k ‘ḥ pr hr hswt imy-r k3wt nb(w)t nswt m pr-‘ltn*  
The hereditary prince and count, the sole attendant of the king in private place, one who entered the palace and came out with favor, the overseer of all the king’s work projects in the House of Aten

Passages in official inscriptions may refer to some ritual occasion, such in the case of the Hatshepsut’s Coronation text, where the Queen arrives to the head of the river ḫr bi3yt ʿ3t wrt r sb3wy n ‘ḥ nswt, “making a big oracle in front of the double gate of the ‘ḥ” (B.I.10) and in the instance of Bet-Shean stele, where the arrival of the Asiatic to the ‘ḥ (r ‘ḥ) takes place on the occasion of their submission to the Egyptian king (B.I.39). Other ceremonial activities practiced m ‘ḥ, “in the ‘ḥ”, are those suggested by the rare compounds di 3wt, “to give prayers” and ir hswt “to make prayers”, respectively used in the stele of ‘ln-it.f from his
tomb at Dra Abu el-Naga (B.II.10) and in the tomb of Sw-m-nwt at Thebes West no. 92 (B.II.31).

</tr>
</tbody>
</table>

The offerings made in the ‘ḥ might have been in some cases royal gifts to come forth at the king’s behest according to the expression contained in the tomb of R-‘ms(w) in Thebes West (B.II.84): hnk.s=f r ‘ḥ n nb.s=f, “she offers to the ‘ḥ of his Lord”.

In the North Stele C.21 from the Great Temple of Abu Simbel (B.I.42) the phrase r ‘ḥ occurs in connection with the delivery to the ‘ḥ of a proper tribute, the inw,\(^{408}\) by the chiefs of rebellious: srw gr ini nw inw.sn r ‘ḥ.f, “their chief bear their tribute to his ‘ḥ”. The association between the concept of inw and the ‘ḥ is also suggested by the context of the inscription in the Ramessid tomb of P3-sr (TT 106 - B.II.128). The biographical text from the Broad Hall of his tomb states as follows:

iw wd nb.i tsw b3k ḫmr tp n ‘ḥ dhn.n.f sw r imy-r3 k3w hm nṯr tp n wrt ḫk3 ḫw.n.f rḏīt.f r imy-r3 niwt wpt-m3ṯ diw m ḫr.f r šsp inw ḫ3st rsyt mḥtt r pr-hd n nswt

My Lord commanded his servant be raised to first friend of the ‘ḥ, he having appointed him as overseer of the cattle, first prophet of ḫk3; he continued by appointing (him) as major of the city and justice, giving him responsibility for receiving the inw of the northern and southern foreign lands to the treasury of the king.

In this passage the same official is presented as smr tp n ‘ḥ and responsible of the withdrawal of the inw. An inscription from the temple of Luxor (B.I.45) listing royal personnel at the time of Rameses II records the “the overseer of the city, the vizier, the royal companions, the sealer of the ‘ḥ (...) who come in obeisance, bearing their tribute”, imy-r niwt t3ty smrw nswt ḫtmw ‘ḥ (...) iw m w3ḥ ḫr inw. These instances are too few to state with certainty that the inw was concretely delivered to the ‘ḥ, but highlight some connection of this structure with the ceremony of reception and distribution of gifts.

between the king and his officials. The entering of the *inw* in the royal palace is confirmed by several hieratic docketts recovered from the palace of Amenhotep III at Malkata, which provide an excellent idea of what kind of foodstuffs were stored in a royal building: several commodities such as wine, other drinks, ‘fat, fowl and oil are registered under the rubric *inw*. Malkata hieratic docketts do not define where *inw* was located and do not specify any eventual division of goods between temple and palace, but their nature of administrative documents and their provenience from the palatial area let assume that the *inw* commodities were sent to the palace itself.

The expression *m ‘h* obviously appears in sentences which expresses the being or the staying of the Majesty in his *‘h (m ‘h)*.

---

409 Most of the inscriptions related to the concept of *inw*, do not specifically define the structure where it was delivered, but connect the word with the Pharaoh, stressing the destination of the *inw* for the king’s privy purse: Bleiberg 1984: 156-7.

<th>Your Majesty stands firm in his ∋</th>
<th>Ram. II-III</th>
<th>Decree of blessing Ptah</th>
<th>B.I.54</th>
</tr>
</thead>
</table>

Hatshepsut is said to have been in the ∋ when she decided to erect the obelisk for the temple of Amun at Karnak (B.I.13): \( \text{ink pw sdm m } \text{∋ } \text{sš3.n.i w δ3 km3w.l.} \), “It was who enjoyed myself in the ∋, I was remembered by my creates”. The Restoration decree of Tutankhamun (B.I.23) describes the king as staying in the ∋ which was before the estate of Thutmose I: \( \text{hm.f m } \text{∋ } \text{imyt-pr } \text{nḫ-hpr-k3-R} \), “estate of ∋-hpr-k3-R”. His permanence in the royal building is compared to that of Ra in the \( \text{hnw} \) of the sky \( \text{(mī } \text{R’ } \text{m } \text{hnw pt).} \) In all these examples, when the word for “king” occurs, it is expressed by the term ∋ translated generally as “Majesty” and strictly connected with the term ∋.

The expression \( \text{iw m } \text{∋} \) “to be in the ∋” occurs also in the Ramessid royal inscriptions, for example in those sections of the Battle of Qadesh, where the return of Rameses II at Piramesse is described (B.I.38): in one case the verb \( \text{iw} \), “to be” is replaced by \( \text{hṭp} \, “to rest” \) in the phrase \( \text{hṭp m } \text{∋ } \text{f } \text{nḫ w3s mī } \text{R’ } \text{imy 3ḥt} \), “resting in his ∋ of life and dominion like Ra who is in the Horizon” which recalls the similar expression of Tutankhamun’s decree (CG 41565 – B.I.23). A similar sentence, suggesting the permanence of the king in the ∋, appears in a private late New Kingdom inscription, the lintel Berlin 8172 of \( \text{Īwny} \) containing a hymn to Amun (B.II.127): \( \text{p3 nb 3bdw hṭp m } \text{∋ } \text{f } \), “when the Lord of Abydos rests in his ∋”.

The compound \( \text{mn m } \text{∋} \), “to stay firm in the ∋”, which could be considered of the same kind of the previous, refers more to a specific royal quality of the king than to his effective presence in the building: \( \text{hm.k mn m } \text{∋ } \text{f} \) “Your Majesty stands firm in his ∋” (Decree of Blessing Ptah - B.I.54).

Again the permanence of the king in the ∋ can be related to specific ceremonial occasions such as the celebration of the \( \text{Sed}- \)festival at the time of Amenhotep III,\(^{412}\) described on the walls of the Temple of Soleb in Nubia\(^{413}\) (B.I.17):

\begin{align*}
\text{A.} & \hspace{1cm} \text{hṭp m } \text{∋ } \text{īī hr īrt īrwṭ nb n } \text{Hb-(sd)} \hspace{1cm} \text{Resting in the ∋ when coming to perform all the} \\
\text{B.} & \hspace{1cm} \text{hṭp m } \text{∋ in n[sw] hft līt hr ṭnt3t [m hrw 3 n] Hb-} \hspace{1cm} \text{Resting in the ∋ when coming from the dais [on}
\end{align*}

\(^{412}\) See the dedicated chapter below for the interpretation of the function of the ceremonial palace and its connection with the celebration of the \( \text{Hb-(sd)} \) festival.

(sd) day 3 of the Sed-festival

C. htp m 'h in nsw hft iht hr tntzt m [hrw 13] n Hb-
(sd) Resting in the 'h when coming from the dais [on
day 13] of the Sed-festival

Term 'h can often be found in verbal compounds using verb h't, literally “to appear in
glory”. This verb is often used in contexts that describe the coronation and the
enthronement of the king, suggesting a more specific meaning than the mere “appearance”
of the king. The Coronation text carved on the middle colonnade of the temple at Deir el-
Bahari (B.I.11) is presented in the form of a speech made by Thutmose I, in order to
formally declare Hatshepsut heir to the throne:

l. 4) m33.t tp-rt.t t m 'h iht k3w špsw šps.t s'h
shmy t3ht m hkh3w.t You see your rules in the 'h, your k3w made
noble, receiving your dignity, your double crown
shining in your magic virtue

l. 6) h't.t t m 'h hkr h3t.t m shmy You appear in glory (you are enthroned) in the 'h
and your head is adorned with the double crown.

Inscription of Queen Hatshepsut at Deir el-Bahari recording the expedition to Pwnt (B.I.12)
refers to her appearance m hnw dsrw nw 'h.f, “in the holy hnw of his 'h”:

l. 1) rnpt 9 ḫpr hmst t d3dw b't(t) nswt m shmy
hr st wrt nt d'm hnw dsrw nw 'h.f In the 9th year the Queen was in the d3dw;
appearance of the king in the double crown on
the great throne of gold in the holy hnw of his 'h

In a private inscription from tomb TT 192 (B.II.79) the h't-action was clearly performed by
Ḥr(l)w.f at the king’s behest:

h't(t) t m 'h in nsw Appearing in the 'h in relation to the king

In the tomb no. 25 at Amarna (B.II.99), 'y enjoys the beauty of the Pharaoh at his
appearance in the ‘h, in front of officials and companions of the king:

p3-hw ḫr wnmi nswt smr '3 n 3bḥ n.f ib nswt sš
m3'.f nfr iṭf 'y wḥm 'nḥ dd.f nw.kw1 m3' n nswt n

PART I

Lord of the Two Lands, effective for his Lord; one who saw his beauty when he appeared in his ‘ḥ, while I was in front of the officials and companions of the king, (being) the first of his Lord-followers.

The king is “magnified”, (literally “made great” - īr īw ʿ3w) in his ‘ḥ by P3- nḥsy, first servant of Aten, in P3- nḥsy’s inscription from his tomb no. 6 at Amarna (B.I.94):

l. 1-7) īw.f (nswt?) ʿ3w m ‘ḥ in b3k tpy nʿltn m pr-ʿltn m 3ḥn-ʿltn [P3-nḥsy m3ʿ-brw] (The king?) is magnified in the ‘ḥ by the first servant of the Aten in the House of 3ḥn-ʿltn [P3-nḥsy justified]

The so-called Coronation Text of Horemheb (B.I.25) contains an explicit reference to the establishing of the crown (smn ḫʾw.f ḫry-tp.f) at the hand of Amun upon the head of the King:

l. 17) (...) ‘lmn wi s3.f hr h3t.f r ‘ḥ r smn ḫʾw.f bry-tp.f r sk3(l) ḫʾw.f mi-ḥd.f (...) Amun is come, his son in front of him, to the ‘ḥ in order to establish his crown upon his head and in order to prolong his period like to himself.

A similar format was used in another Horemheb’s monument, a quartzite stele from the Temple of Ptah at Memphis (B.I.30):

l. 6) ‘lmn m-ʿn ḫʾw.f hr h3t.f r ‘ḥ r smnt ḫʾw.f hr tp.f r sk3.f ḫʾw.f Amun, behold Amun comes, with his son in front of him, to the ‘ḥ, to establish the crowns over his head, and making long the period of his life.

The “appearance in glory” (ḥʾḥ) of the king is mentioned in Ramessid inscriptions in contexts of ceremonial nature and with some religious overtones, where this happening is compared to the manifestation of god Ra in the sky. Inscriptions from the palace of Merenptah (B.I.49), on the columns of the main hall mention twice the appearance of the king in the ‘ḥ:

l. 5) ḫʾḥ(t) nswt m ḫʾḥ(t) nswt m ʿḥ n 3ḥt Appearance of the king like Ra in the ‘ḥ
l. 1-2) ḫʾḥ(t) nswt m ‘ḥ stp ḫʾḥ(t) nswt m ʿḥ n 3ḥt Appearance of the king in the ‘ḥ, would that he protects life, like Ra

According to the inscriptions from the temple-palace of Rameses III at Medinet Habu (B.I.56), the king’s appearance may be explicitly linked to a religious occasion. On the doorjambs of the two entrances to the palace, the king “appears” (ḥʾḥ) at “his ‘ḥ of his noble
temple” (‘h n hwt.f špsi) in order to join the god Amun during the feast of Opet\footnote{The New Kingdom festival of Opet was a rite expressly connected with the Pharaoh and his father Amun(-Ra), during which the Pharaoh traveled to the temple of Luxor at Thebes. Here Amun gave to the king the powers of kingship as living Horus. Murnane 1982: 574-9. Lanny 1985; 1986. Spalinger 2000: 521.} and the Feast of the Valley.\footnote{During the Feast of the Valley the statues of Amun, his consort Mut and their son Khonsu, were carried across the Nile to Deir el-Bahari in the western bank. Spalinger 2000: 521. For a more detailed analysis of the main Egyptian royal festivals see Breasted 1972.}

\begin{itemize}
\item[a)] h‘i(t) nswt mī R‘m ‘h n hwt.f špsi r ṣḥ‘i ‘lt.f ‘mn m hḥ.f n ṣnb
\item[b)] ḫk3 ‘m n prī.f m nswt-bity m ḫ‘w.f m ḥrt ḫrty-tp sb3yt m ‘ḥ śpsī nty mī ḥḥt n R‘
\end{itemize}

Appearance of the king like Ra in his ‘ḥ of his noble temple to make his father appear, Amun, in his Feast of the Valley

Beautiful ruler in his going like king of Upper and Lower Egypt in his appearance in heaven upon the doors of the noble ‘ḥ like Ra in the horizon.

According to these evidence, ‘ḥ would seem the term specifically used during the 19th Dynasty referring to the institution of the “temple-palace”. The connection of the term with a structure for which is supposed a ceremonial function, rather than an actual residential use,\footnote{Stadelmann 1996: 225 ff.} suggests the ceremonial nature of the term.

Among the ceremonies that would have taken place in the ‘ḥ text mentions the appointment and the promotion of high officials by the king. In his tomb TT 192 (B.II.79) P3-sr tells to have been appointed first companion of the ‘ḥ by the king:

\begin{verbatim}
iw wd nb.i ṭsw b3k īm r smr tp n ḥ dhn.n.f sw r imy-r边界 k3w ḥm ntr tp n wrt ḫk3
\end{verbatim}

My Lord commanded his servant be raised to first friend of the ‘ḥ, he having appointed him as overseer of the cattle, first prophet of ḫk3

\begin{verbatim}
Mn-ḥpr-r‘-snb(w) (B.II.5), ḫḥwty (B.II.24) and Mn-ḥpr-R‘-Snḥ (B.II.117) are defined in their respective tombs as ṣḥn[t]y (n.f) st.f m ‘ḥ, “one whose position/status was promoted in the ‘ḥ” most likely referring to a promotion gained up thanks to a king’s decision.
\end{verbatim}

Some expressions suggest an image of the ‘ḥ as place of real decisions made by the king himself in the presence of his officials. In his decree carved on the walls of the temple of
Karnak (B.I.26), Horemheb states to have given orders (tp-rd)\textsuperscript{418} and laws (hpw)\textsuperscript{419} to his officials in the 'ḥ:

\textit{I gave orders to them and laws in their days in the ['ḥ]}

\textit{mdww}, "words" spoken by the king (\textit{nb}) in the 'ḥ are mentioned in some private inscriptions:

2.3 The term 'ḥ in titles and epithets

The term 'ḥ appears frequently in epithets referring to gods and goddesses in royal inscriptions as well as in private material. The epithets under question are the simplest \textit{nb} 'ḥ, "Lord of the 'ḥ", generally referred to the king in the form of Horus,\textsuperscript{420} and \textit{nbt} 'ḥ, "lady of the 'ḥ", used for female deities such as \textit{Wrt-Ḥkt3w}, Nekhbet, Sekhmet, Mut and Hathor. Epithets used for goddesses show two main variants, \textit{nbt} 'ḥ, "lady of the 'ḥ", being interchangeable with \textit{Ḥnwtnw} 'ḥ, "mistress of the 'ḥ". Such epithets prove that divine cults could be associated with some form of the 'ḥ.\textsuperscript{421} The 'ḥ reported by these expressions do not relate to the 'ḥ as "palace" under consideration in the present study; it must be probably identified with the 'ḥ-\textit{nɪt} of the earlier periods, which comes to loose its specification in later inscriptions.\textsuperscript{422} This specific building would have functioned more as a shrine or a religious building rather than as secular structure. The decision to include this form of the 'ḥ in the present study aims to show the multivalent nature of the term, which

\textsuperscript{418} GEG: 599. Wb V: 288.
\textsuperscript{419} GEG: 579. Wb II: 488.
\textsuperscript{420} For an overview of the expression “Horus in the Palace” in ancient Egyptian texts see Gundlach 2009: 45 ff.
\textsuperscript{421} Goelet 1982: 380.
\textsuperscript{422} For a detailed study of the different forms of 'ḥ in the Old Kingdom and the 'ḥ-\textit{nɪt} hieroglyph see Goelet 1982.
could be used to identify even a kind of sanctuary or shrine for the divine images from the Old Kingdom onwards.

The male gods who are most often associated with the 'h are Horus, Ra and Amun-Ra, all considered divine manifestations of the living-king. Demarcation between the divine image of the kingship and the political-cultural reality of the living-king has been always weak on the course of the Egyptian history, so that it can be complicated to distinguish between the two entities. It follows that the distinction between secular and religious buildings should not be so clear. Palaces, and above all 'h-palaces were holy localities, since the Egyptian king – living or dead – is the holder of religious power. It is quite clear that when Pharaoh is cited or described as Horus-king, he is always associated with the 'h-palace, which was probably considered the most appropriate form of the palace for the divine manifestation of the king.

423 The relationship between the sun-god Horus and the king in his aspect of Horus can be traced back to the 1st Dynasty, in: Gundlach 2009: 46.
424 Gundlach 2009: 60.
Explicit references to the 'ḥ as religious building rather than as secular royal structure are those expressions that reconnect a specific deity or many gods (ntrw) to the palace ('ḥ): such as that in Papyrus pTuir CGT 54051: Ntrw m 'ḥ, "the gods in the 'ḥ". The possibility that the same term could refer to either a divine sanctuary or the royal palace might provide an explanation of the need to specify the royal ownership of the 'ḥ in some expression, where the term is connected to words for king: nb, ḫm or nswt.

425 Many of these titles have been collected and listed by Christian Leitz in a sort of Dictionary of Egyptian deities and divine designations (Lexikon der ägyptischen Götter und Götterbezeichnungen): Leitz 2002.
The word ‘ḥ’ is a component of titles which formed part of the titling of several important New Kingdom officials. The most common is ḫrp ‘ḥ’426, “controller of the ‘ḥ’” developed during the Old Kingdom427 and definitively used only with the 18th Dynasty.428 It seems to have been one of the most important functions of a man’s career, since it will be always occupying a significant spot among his titles.429 When it appears in individual titles, it is never alone but it is used in combination with one or more epithets and it seems an office strictly connected with the king, as suggested by expressions such as ḫrp ‘ḥ nb t3wy, “controller of the ‘ḥ’ of the Lord of the two lands” and ḫrp ‘ḥ nswt, “controller of the ‘ḥ’ of the king”.

<table>
<thead>
<tr>
<th>ḫrp ‘ḥ’</th>
<th>At the head/controller of the ‘ḥ’</th>
<th>Sn-n-Mwt (Hatsh.)</th>
<th>Thebes 3</th>
<th>B. II.45</th>
</tr>
</thead>
<tbody>
<tr>
<td>ḫrp ‘ḥ nb t3wy</td>
<td>At the head/controller of the ‘ḥ’ of the Lord of the two lands</td>
<td>ḫr(ī)w.f (Am. III – IV)</td>
<td>Bubastis</td>
<td>B.II.81</td>
</tr>
<tr>
<td>smr ḫrp ‘ḥ nswt</td>
<td>Companion at the head/controller of the ‘ḥ’ of the king</td>
<td>Sn-n-Mwt (Hatsh.)</td>
<td>CG 579</td>
<td>B.II.47</td>
</tr>
</tbody>
</table>

In Old Kingdom evidence the title is strictly linked to the celebration of the ḫb-sd; men with this office participated to the ḫb-sd ceremony, suggesting the association of the ‘ḥ’ with this royal rite. Studies of this position indicate that the ḫrp ‘ḥ’s duties most probably involved the dressing of the king’s person.430 The New Kingdom instance of the great granite stele of vizier (P)R‘-ḥtp JE 48845 (B.II.136) seems to confirm the ‘ḥ’s connection with the celebration of the Sed-festival, even in more recent periods:431

_imy-r imyw ḥnt ‘3 n nb t3wy m ‘ḥ ḫb-sd_ Overseer of the imyw ḥnt (priestly title), great of the Lord of the Two Lands in the ‘ḥ of the ḫb-sd432

---

427 Examples of the title are known in the inscriptions of Niuserra: Kees 1923-28, III: 9-18. In Old Kingdom evidence the title is strictly connected with the ḫb-sd; men with this office participated to ḫb-sd ceremony, suggesting the link of the ‘ḥ to this royal rite. Studies of this position indicate that the ḫrp ‘ḥ’s duties most probably involved the dressing of the king’s person. Goelet 1986: 381.
429 ibid.: 349.
430 ibid.: 381.
431 Helck 1958: 454.
432 ibid.: 454.
In this regard the connection of the 'ḥ with the celebration of the Sed-festival is also suggested by title in stele Leiden 3.1.1.37 (B.II.120) 'ḥ as *imy-r k3wt m ḫwt ḫb(w)-sd m 'ḥ n pr-nswt, “overseer of the works in the temple of Sed-festivals in the 'ḥ (and in the) pr-nswt”, where the word pr-nswt is exceptionally connected to the ḫb-sd together with the 'ḥ.

In two Ramessid occurrences the title may appear in the extended compound “pr ḫrp 'ḥ” suggesting the existence of a separate residence specifically destined to the ḫrp 'ḥ in titles referring to Horus within the building: Ḥr m pr ḫrp 'ḥ, “Horus in the pr ḫrp 'ḥ” (offering table Turin 22053 - B.II.175); Inscriptions from the Gallery of the Kings of the temple of Sety I at Abydos (Abydos 3 - B.I.34).

The majority of titles containing the term ‘ḥ are not so illustrative of the functions performed by its officials such as:

- those compound with the word *imy/ *imy-r

</tbody>
</table>

Other titles simply underline the connection of the ’h with the king mentioned as *hm*, “Majesty”, *nswt*, “king” or *nb*, “Lord”:
PART I

• those containing causative verbs such as shr, špr:

| s3.n nb t3wy m ‘h | One whom the Lord of the Two Lands caused to be great in the ‘h | Hk3-r-nb (Thut. IV) | TT 64 | B.II.56 |
| shri hm.f m ‘h | One who contented His Majesty in the ‘h | R’-htp (Ram. II) | JE 48845 | B.II.136 |
| špr.n.f m hnw ‘h.f | Made in life by him in the hnw of his ‘h | Hr(l)w.f (Am. III) | Bubastis | B.II.81 |

• titles such as msdrwy/‘nhwy n nswt m ‘h.f, “ears of the King in his ‘h” and variations:

| ‘nhwy Hr m ‘h.f | Ears of the Horus in his ‘h | ‘Imn-m-ipt (Thut. III – Am. II) | TT 96 | B.II.26 |
| irty.f pw ïw nswt m ‘h.f | One who was his eyes when the king was in the ‘h | Kn’-imn (Am. II) | TT 93 | B.II.52 |

• other expressions that show the connection of the title owner with the king.

| im3hy ḫr nswt m ‘h | Revered one before the king in the ‘h | ‘Imn-m-ipt (Thut. III – Am. II) | TT 96 | B.II.26 |
| ink t3wy n nb ‘h | One who unites the Two Lands for the Lord of the ‘h | Sn(l)-nfr (Hatsh.) | TT 99 | B.II.48 |
| wbn[w] tpy nswt n imy-‘h | First royal herald of the one who is in the ‘h | Hr(l)w.f (Am. III-IV) | TT 192 | B.II.79 |
| mty m3’ m b3h nb.f ir 3h n nb ‘h(t) n-‘3-n mnḥ.f n nswt | Truly precise one in the presence of his Lord who did what is useful from the Lord of the ‘h(t) as much as he was efficient for the king | ‘Imn-m-ipt (Thut. III – Am. II) | TT 96 | B.II.26 |
| kn rs-tp n nb ‘h | Brave, vigilant for the Lord of the ‘h | Nhy (Thut. III) | Various | B.II.19 |
The term ‘ḥ’ appears also in conjunction with the concepts of justice (m3’t)\textsuperscript{434} and respect of laws (hpw)\textsuperscript{435} in the following prepositional passages:

| \textit{ir hpw n imy-r ‘ḥ} | Respecting the laws of the overseer of the ‘ḥ’ | ‘\textit{Imn-ḥtp} (Am. III) | CG 583 | B.II.73 |
| \textit{‘k m hpw n imy ‘ḥ} | One who obeys the laws of the one who is in the ‘ḥ’ | ‘\textit{Imn-ḥ-hḥ} (Thut. III – Am. II) | TT 85 | B.II.34 |
| \textit{wp m3’t m hr-t hnw ḫnk sy r ‘ḥ n nb.s} | Dispenser of justice daily and who presents it to the ‘ḥ’ of its Lord | ‘\textit{R-ḥṣ’l-jw} (Am. III-IV) | TT 55 | B.II.84 |
| \textit{s’r m3’t r ‘ḥ} | One who presents truth/acts rightfully towards the ‘ḥ’ | ‘\textit{Kn-‘Imn} (Am. II) | TT 93 | B.II.52 |

The picture of the ‘ḥ’ as place of promulgation of laws and orders can also be found in official documents and especially in Horemheb’s decree (B.I.26), where the king says to have given orders (\textit{tp-rd}) and laws (hpw) in the ‘ḥ’:

\textit{II, 4) di.n.i tp-rd m hr.sn hpw m hrwytn.sn imy [‘ḥ] I gave orders to them and laws in their days in the [‘ḥ]}

Titles connected with administrative functions like \textit{nswt sš m ‘ḥ n nswy}, “royal scribe in the ‘ḥ of the king” and \textit{ḥtmw ‘ḥ}, “sealer of the ‘ḥ” are very rare and like those sounding \textit{ḥry-sšt3 stw ‘ḥ/sšt3 hr m ḫnw ‘ḥ}, “keeper of secrets in the ‘ḥ/ the ḫnw of the ‘ḥ” and the variant (\textit{ḥt}) \textit{hr šḥrw ‘ḥ}, “who keeps silence about the affair of the ‘ḥ” are most frequently compound with the term \textit{pr-nswt}.\textsuperscript{436}

| Administrative titles compound with ‘ḥ’ |
|---|---|---|---|
| \textit{sš wdbh m ‘ḥ n [nswt]} | Scribe of the table of offerings in the ‘ḥ of the [king] | \textit{Nfr-sr-hrw} (19\textsuperscript{th} Dyn.) | Zawiet Sultan | B.II.175 |
| \textit{sš nswt m ‘ḥ nswt} | Scribe of the royal ‘ḥ | \textit{Nfr-sr-hrw} (Sety I) | Kom el-Ahmar | B.II.124 |
| \textit{sš nswt ‘bw-r m ‘ḥ n nswt} | Royal scribe of the breakfast in the ‘ḥ of the king | \textit{Nfr-sr-hrw} (19\textsuperscript{th} Dyn.) | Zawiet Sultan | B.II.175 |
| \textit{ḥry-sšt3 ‘ḥ šps} | Keeper of secrets of the august ‘ḥ | \textit{Sbk-ḥtp} (Ram. IX) | Sinai 302 | B.II.165 |

\textsuperscript{435} GEG: 579. Wb II: 488.
\textsuperscript{436} See paragraph below: § 2.7.
When an official is described as “favored”, the term used is ḥṣi,\(^{437}\) “to praise”, “to favor”, occurring primarily with reference to the king as nswt, ḫmy-ḥ or nb t3wy.

### 2.4 The term \( pr-3' \) in official monuments and narrative inscriptions

As suggested by a number of New Kingdom inscriptions, the middle of the 18\(^{\text{th}}\) Dynasty witnessed the transition of \( pr-3' \) (from the 12\(^{\text{th}}\) dynasty regularly provided with the formula ‘nh wd3 sbn)\(^{438}\) as “Great House” or “palace” to \( pr-3' \) as “Pharaoh”.\(^{439}\) Considering the transformation of the meaning of the term from “palace” to “Pharaoh” and its high recurrence in texts, expressions and titles compound with this word have been selected

\(^{437}\) GEG: 579. Wb III: 159.  
\(^{438}\) See paragraph above: § 1.10.  
basing on their popularity and their significance in order to show this change in general terms. This section is not intended to be exhaustive regarding the use of term as “Pharaoh”, which exceeds the limits of this study.

In a Thutmose ostraca from Deir el-Bahari\(^\text{440}\) the term pr-‘3 is written without the formula ‘nh wd3 snb. The hieroglyphic group of the pr-sign and the ‘3-column is preceded by the p3-bird, the word p3 pr-‘3 traditionally interpreted as “Pharaoh”.\(^\text{441}\) The potsherd found within the tomb of Sn-n-Mwt, contains a list recording monthly contributions of workmen, materials or supplies for the preparation of the tomb. The contributors were the treasurer, Sn-n-Mwt himself, the estate of Queen Hatshepsut and the latter’s coregent, Thutmose III, here referred to as “Pharaoh”.\(^\text{442}\)

In the Tempest Stele of Ahmose (B.I.2) from Karnak, the term still keeps its meaning of physical place to where the king - here described as incarnation of god Amun (hm.f) - sailed downstream (II. 5-6). The identification of pr-‘3 with a royal building is confirmed by lines 12-14 describing the arrival of the king to Thebes (hnw W3st) and his resting in the hnw pr-‘3, “the interior of the pr-‘3”, term hnw here meaning “interior/inside”. This text contains an explicit reference to the palace of Thebes here defined as a pr-‘3-palace.

The expression Kmt idbw pr-‘3 ‘nh wd3 snb, “Egypt, the soil of the pr-‘3, l. p. h.”, in Thutmose III’s text inscribed on the walls of his Festival Hall at Karnak (B.I.5), in which the king manifests his gratitude to Amun for the great victory accorded to him at Megiddo, is one of the earliest example of pr-‘3 as designation of the king.\(^\text{443}\)

The final transformation of the term pr-‘3 as “Pharaoh” can be recognized in some sources of the Amarna period, where the term is used as apposition of the dual word pryt-, the complete expression pryt-pr-‘3 anticipating the pr (n) pr-‘3, “estate of the Pharaoh” fully developed in demotic texts of the Late Period.\(^\text{444}\) The compound is used in the earlier

---

\(^\text{440}\) Hayes 1960: 41, Pl. XI A (n° 14, 8 and 16).
\(^\text{441}\) Wb I: 516.
\(^\text{442}\) Hayes 1960: 42.
\(^\text{443}\) “My [Mayesty commanded] to institute new offerings to my father Amun-Ra..of the best of Egypt, the soil of the Pharaoh, into the granary of divine offerings.” In this case the term pr-‘3 is written in its traditional form with the following ‘nh wd3 snb but has to be translated as “Pharaoh”, in Gardiner 1952: 17, no. 1.
\(^\text{444}\) See paragraph below: § 2.4.
proclamation on the boundary stelae from the site of Tell el-Amarna (stele X, M and K)\(^{445}\) regarding the foundation of the new city of Akhetaten (B.I.19):

1. 16) n t3 n ‘ltn p3 nbw m 3ḥt-‘ltn m t3 st ir.i pr-
h’y n p3 ‘ltn

In the Island of Aten, whose jubilees are distinguished at 3ḥt-‘ltn in this place shall I make the House of Rejoicing for the Aten, my father.

1. 17) m 3ḥt-‘ltn ir.i n.i pryt pr-‘3’nḥ wd3 snb ir.i pryt n t3 ḫmt nswt

(And) at 3ḥt-‘ltn in this place shall I make for myself the pryt of Pharaoh, l. p. h. (and) I shall make the pryt of the King’s Chief Wife”.

A similar expression is given in the letter from the steward of Memphis ‘īpy to the king Amenhotep IV from Gurob (B.II.89), which contains also a probable reference to a d[mi pr-
‘j], “qu[arter of the Pha]raoh” suggesting the unique translation of “Pharaoh” for the word pr-‘3:

l. 9-11) [pw n nb.i ‘nḥ wd3 snb r rdi] rṭ tw [r nty] p3 r pr n ttī.k Ptb nswt nb.f nb ‘nḥ-t3w[y ‘dʌ w]d3 p3 pr pr-‘3 ‘nḥ wd3 snb, m šš n p3 n pryt pr-‘3 ‘nḥ wd3 snb m šš p3 d[mi pr-‘j] ‘nḥ wd3 snb snb m šsw snbw (…)

This is (a communication?) to My Lord, l. p. h. to let One (the King) know that the temple of you father Ptah, South of His Wall, the Lord of ‘nḥ-t3wy, is prosperous and flour[i]shing; that the house of Pharaoh, l. p. h. is in good order; that the p3 n pryt of the Pharaoh, l. p. h. is in good order; and that the qu[arter of the Pha]raoh, l. p. h. is in good order and security (…)

In an ostraca from Amarna (B.II.91), the prepositional compound r pr-‘3 after the verb ḏi, “to give”, introduces a list of goods delivered to the king by the hand of the servitor ḫr-nḥt (ẖ3t ṣdm-‘5 ḫr-nḥt):

\[
\begin{align*}
\text{ḏi r pr-‘3 } & \text{‘nḥ wd3 snb ḫ3t ṣdm-‘5 ḫr-nḥt irp nfr} \\
& \text{hr 3” mn-krht 4 […] ms-h3r1 t3-nbt1 šš m […] ms-} \\
& \text{h3r}
\end{align*}
\]

Given to the pr-‘3, l. p. h., by the hand of the servitor ḫr-nḥt, very good wine in jars, 4 mn-vessels, of the capacity of (?), mn-vessels (…) together with 1 ms-basket, 1 t3-container with (? ms-basket

The interpretation of the term in this specific context is ambiguous since it could be referred both to the person of the “Pharaoh” as well as to a physical place where goods were delivered.

In Horemheb’s decree (B.I.26) the term pr-‘3 means “Pharaoh” in more than one occasion, in contexts where it follows verbs such as šms, “to follow/serve/accompany”\(^{446}\) that expect

\(^{446}\) GEG: 595. Wb IV: 482-3.
a person as “direct object”. In the first section of the text, the *nmḥyt*-people\(^{447}\) are called to build a boat to be able to serve Pharaoh:

I, §1, 13) *ir iry n f p3 nmḥy w’ n ‘h’w hr t3y.f trnft r ṭh Šms pr-‘3 ‘nḥ [wd3 snb] […] sd[m] 3 [n ’ṭ bnkt n pr-‘3 ‘nḥ wd3 snb]* The private persons build for him a boat on his tent to be able to serve the pr-‘3, I. [p. h.] (…) serving (hearing the calling) [in the storehouse of the offerings of the pr-‘3, I. p. h.]

Two other instances show the same usage of the word few lines later in the text:

I, §2, 17) wnn.f hr Šm[ṣ pr-‘3 ‘nḥ wd3 snb] He is on to accompany [the pr-‘3, I. p. h.]
I, §2, 20) *ir.f [Šms pr-‘3 ‘nḥ wd3 snb]* He makes [to accompany the pr-‘3, I. p. h.]

In the section of the same text regarding the abolition of the contribution for supplying the royal docks introduced by Thutmose III, pr-‘3 is the direct object of another verb *mki*, “to guard”,\(^{448}\) which allows again the unique translation of pr-‘3 as “Pharaoh” in this specific context (CAT: I, §5, 29):

I, §5, 29) *lmm tw p3 nkt n t3 wdyt wsf[w] hr mki pr-‘3 hr irt t3 wdyt n ḫb ḫpt tw nrt nw n(n) wsf tw.tw hr grg r-h3t pr-‘3* Therefore give the contribution to the expedition, not paid, to guard the pr-‘3 to make the journey of the Opet Festival, every years, without his missing, to prepare in anticipation of the arrival of the pr-‘3.\(^{449}\)

The association of the term pr-‘3 with the motion expression *r h3t*, “in front of”\(^{450}\) confirms the “Pharaoh” rendering. The setting is the Opet Festival during which the Pharaoh traveled to the temple of Luxor at Thebes: here his father Amun gave him the powers of kingship as the living Horus.\(^{451}\) Similarly the expression *ssnb pr-‘3 ‘nḥ wd3 snb*, “one who makes be healthy the pr-‘3, I. p. h.” from the private inscription of *R*-ms(w)s’ tomb TT 55 (B.II.84), where pr-‘3 is the object of the causative verb *ssnb*, “to make be healthy”, suggests the translation “Pharaoh” for the term.

In another passage of the first section of Horemheb’s decree (B.I.26) the term pr-‘3 is again linked to the word ‘h’w, “boats”, which are said to be provided for the *W*bwt *swt* pr-‘3:

\(^{447}\) For the translation of *nmḥyt* as “personne privée” see Kruchten 1981: 31-32.
\(^{448}\) GEG: 570. Wb II: 160.
\(^{449}\) Translation in Kruchten 1981: 98.
\(^{450}\) GEG: 580; §178.
\(^{451}\) Spalinger 2000: 521.
PART I

I, §1, 15) ird’h[w] nb nty htr r n3 n W’bwt swt pr-3 ’nh wd3 snb  As for any boat that is put to work for the benefit of W’bwt of the pr-3, l. p. h.452

As pointed out by Kruchter, the term W’btl453 indicates a place to perform several activities and therefore difficult to define with a specific translation; according to the author, it was an area annexed to the temple or the palace for all the physical operations of preparation of food generally intended for ritual aims.454 In this case pr-3 ’nh wd3 snb could refer to the royal building where the W’bwt was physically located.

According to Kruchten, in the repeated expression wnn n3 n sd[m] [’s] n ’t hnkt pr-3, “those who are to serve455 in the storehouse of the offerings of the pr-3” (B.I.26: l, §1, 13; l, §2, 17, 19; l, §3, 21; l, §4, 25), the ’t hnkt456 pr-3 would indicate a place where the offerings had to be presented in name of the Pharaoh or a store located in the palace.457 In this case the term pr-3 would indicate both the recipient of the hnkt, fitting the meaning “Pharaoh”, and the place where offerings were delivered, suggesting a “palace” rendering.

The title wnn p3 imy-r3 lh w n pr-3 is repeated twice in the text (B.I.26: l, §4, 25-26)458 referring to people carrying on the inspection (irdw) of the cattle of the complete country:

I, §4, 26) wnn p3 imy-r lh w n pr-3 ’nh wd3 snb hr  The overseer of the herds of the pr-3, l. p. h.,
  smt r irdw m t3 r-dr.f  arrive to make the inspection in the whole

The lh w n pr-3 would be the herds belonging to the palace as personal property of the king.460

In the section of the composition (B.I.26) regarding the abolition of the tax on fodder for the benefit of W’bwt of the pr-3, the term pr-3 is again connected to this institution:461

I, §6, 31) m-miltt n3 n t3 smw n n3 n W’bwt swt  Those who collect the fodder for the W’bwt of
[pr-3 ’nh wd3 snb]  the [pr-3, l. p. h.]

I, §6, 32) lh.w r p3 b3k n pr-3 ’nh wd3 snb  It (the fodder) will be for the tax of the [pr-3], l. p. h.

452 Translation in Kruchten 1981: 98.
453 Wb I: 284.
454 Kruchten 1981: 42-44.
455 Literally “those who hear the calling”: for the translation of the expression n3 n sd[m] [’s] see Kruchten 1981: 62, A.
456 According to Kruchten, the term hnkt is generally employed to express the offerings destined to the god or the Pharaoh, in Kruchten 1981: 62.
457 Ibid.: 62, B.
458 URK IV: 2148, 8; 2149, 1.
460 The title has been translated by Kruchten “the overseer of the herds of the Pharaoh”, in Ibid.: 82.
461 Ibid.: 118.
All this section refers to the production of fodder as an activity connected to the \( W'bwt \) swt \( pr^-3 \) where the term \( pr^-3 \) might be intended as the physical place where the \( W'bwt \) was located. The delivery of the \( b3k\)\(^{462} \) could be destined to \( pr^-3 \) as both the actual royal building and the king’s person.

Section R5 of \( R\-mi^-r\)'s inscription (B.II.33) describes the entering of the vizier in the \( pr^-3 \) to greet the king, here referred to as “Lord” (\( nb \)):

\[
R5, (\ldots) 'k.f grt r ng-hrt nb 'n\^h wd3 snb lw sm\( n(i)w(\) w.ty m w\( \)m m p3 sb3 n rwty wrty \( \_h \)
\]

Now he shall enter to greet the Lord, l. p. h., each day when the affairs of the Two Lands have been reported to him in his residence. He shall enter the \( pr^-3 \) when the overseer of the treasury has drawn up his position at the northern flagstaff. Then the vizier shall move (in) from the east in the doorway of the great double-gate.

Van de Boorn has interpreted this passage locating the \( pr^-3 \) at the back of the \( pr^-nswt \): according to this author, the entering of the vizier in the \( pr^-3 \) to meet the king happens only after him having received report on the condition of the \( pr^-nswt \) in the \( pr^-nswt \) itself. This sequence of facts suggests the author to explain the \( pr^-3 \) as royal living quarters or private residence, as distinct from \( pr^-nswt \), the official royal residence at large.\(^{463} \) The \( pr^-3 \) itself is described by Van de Boorn as a complex equipped with a “doorway of the great double gates” (\( sb3 n rwty wrty \))\(^{464} \) with two flagstaffs in front of it.\(^{465} \) In his review of Van de Boorn’s interpretation of The Duties, Lorton states that the context of this session “actually cannot indicate an immediate entry in the \( pr^-3 \)” after the report to the vizier “since it is followed by a conversation between the vizier and the treasury”.\(^{466} \) He stresses “the lack of

\(^{463} \) Van de Boorn 1989: 59.

\(^{464} \) According to Van de Boorn’s interpretation, text refers that the vizier exchanges the last up-dated reports and information at the doorway of the \( rwty wrty \) of the \( pr^-3 \) before entering it to pay his respect to the king. \textit{Ibid.}: 66.

\(^{465} \) “We take the \textit{snt mhitt} here as belonging to the \( pr^-3 \), the building which the vizier enters when the overseer of the treasury has drawn up his position at the northern flagstaff”, in \textit{Ibid.}: 63.

\(^{466} \) Lorton 1991: 291.
temporary sequence”, suggesting its correspondence to “a lack of spatial sequence”. It is only after having entered the pr-‘3 that the vizier moves to the sb3 n rwty wrty, which could be taken as the door of the pr-nswt. Against Van de Boorn’s interpretation, the direction of the vizier’s movement should be interpreted from the pr-nswt to the pr-‘3, rather than from the pr-‘3 to the pr-nswt. According to this re-interpretation of the passage, the pr-‘3 cannot longer be intended as inner section of the pr-nswt, being more likely the opposite. The pr-‘3 is the building to where the vizier moves for his audience in front of the king, and is mentioned only in this passage of the text. The occasion of the mention would seem to suggest the connection, in the Egyptians’ mind, between the pr-‘3 as physical place and the king as person.

The usage of the original meaning of pr-‘3 as royal building is attested until the Ramessid Period, when the term is interchangeable with ‘h. In the inscriptions from the Osiris Suite of the temple of Sety I at Abydos (B.I.32), for example, the same expression can be compound with both pr-‘3 and ‘h:

irt n.f pr-‘3 īr n.f s3 R‘-Mri n-Pth

The making for him of a pr-‘3 made for him by the son of Ra, Sety I Merenptah

or

irt n.f ‘h īr n.f s3 R‘Mri n-Pth

The making for him of a ‘h made for him by the son of Ra, Sety I Merenptah

In this context, both pr-‘3 and ‘h refer to palaces for gods, being used repeatedly as synonymous of the term ḫwt, and being located respectively r sb3 dw3t nṯr, “at the portal of the Netherworld of the gods” (B.I.32: Column 5, 165,12) and ḫr st ‘ḥt n ĝḏt, “in a place glorious forever” (B.I.32: Column 8, 165, 6). The ‘h is described as being constructed of white limestone (m inr ḫd nfr), a material specifically used for religious buildings in Egypt, unlike mud-brick, used exclusively for civil architecture.

One feature of the term pr-‘3 is its rarity in narrative texts, unless it is part of an official title; there are in fact only few instances in which the word is used as an independent word in narrative inscriptions such as the Horemheb’s decree and the Duties of the Vizier, so that

467 See paragraph below: § 2.6.
these citations have a great significance in any attempt at understanding the meaning of the term.\textsuperscript{468}

Variability in interpretation and translation of the word in different contexts is a meaningful factor to understand the nature of the term \textit{pr-3}. The possibility that the same word can refer both to the figure of the king as to the royal palace suggests alone the nature and meaning of \textit{pr-3}, perhaps intended to indicate the royal building in its most generic and widest sense and its strict relationship with the king. Its intrinsic association with the figure of the king may be the reason that would have got the term to the mean the “Pharaoh” himself on the course of time.

2.5 The term \textit{pr-3} in titles and epithets

There are several examples of titles compound with \textit{pr-3} in both official and private texts. They mostly refer to specific offices held by the owner in departments of the \textit{pr-3} such as the \textit{šnwt pr-3}, “the granary of the \textit{pr-3}” or the \textit{pr-hd} \textit{pr-3}, “the treasury"\textsuperscript{469} of the \textit{pr-3}”. This group of titles, which includes a series of Late New Kingdom examples from the reign of Amenhotep III to the Ramessid Period, refers to the \textit{pr-3} as a type of administrative entity. Other institutions such as the ‘t, “chamber or storeroom”\textsuperscript{470} and the \textit{p3 ḫpš}, “armory”\textsuperscript{471} can be related to the \textit{pr-3} in \textit{imy}-\textit{r}-compound titles.

The majority of these titles are mentioned in administrative papyri concerning the tomb-robberies of the late Ramessid Period at Thebes.\textsuperscript{473} The occupations listed above were held by officials who would have been primarily employed in the service of the private person of the king as well as in a physical building, being uncertain whether the \textit{pr-3} would represent some kind of palace or the king’s person. It is possible to observe a kind of inflation in official titles modified with the word \textit{pr-3}. In the New Kingdom inscriptions, the aim would seem to claim some form of generic attachment of the title owner to the palace and the king’s person. In his study on Old Kingdom terminology for “palace”, Goelet had observed a similar process in titles dated from the 6\textsuperscript{th} Dynasty, when “the terms \textit{pr-3} arises in a significant percentage of titling to such an extent, that the word seems to have lost much of its validity”.\textsuperscript{474}

Although the term \textit{pr-3} is primarily used in titles pertaining to civil matters, there are few \textit{pr-3}-compounds that may be related to functions that were of ritual nature and were involved with escort and other service to the person of the king. This kind of titles is often connected with the mortuary temple of the king (\textit{n ḫḥ n rnpwt n pr-3}).\textsuperscript{475} Priesthood, escorts and other ritual positions were related to the \textit{pr-3} since the Old Kingdom onwards.\textsuperscript{476} In this titles the term \textit{pr-3} would seem to be a circumlocution for the king himself.

The expression  سبحانه m p3 š n pr-3 in the stele of ʼiwyn BM 1332 (B.I.108) might be referred to a specific aspect of the goddess Sekhmet, although it is unclear whether the lake is or not an actual body of water used during a specific ceremony, this passage is an evidence that pr-3 was occasionally associated with a š477 with religious connotation.478 The compound hwt n pr-3 makes suppose a connection of a temple or a shrine with pr-3, probably referring here to the Pharaoh as a person. The expression in the same monument hwt n pr-3 ‘nh wd3 snb m 3bdw (B.II.108) might refer to the mortuary temple of the king, the term pr-3 apparently having a distinct religious aspect since the earliest phase of the

478 The phrase š pr-3 occurs in an epithet of the god Ra on a stone vessel found at Byblos bearing the name of the 5th Dynasty monarch Unas: “The king of Upper and Lower Egypt Unas, living forever, beloved of Ra upon the lake of the pr-3” and in the biography of the 5th Dynasty official Pth-w35, where recurs the same form of the god, “Ra upon the lake of the pr-3”. Goelot 1982: 545-546.
Egyptian History.⁴⁷⁹ Explicit references to the “Necropolis of Million Years of the Pharaoh” (pr ḫr ‘3 ṣps ḫḥ ṛnpwt n pr-‘3) are contained in Papyrus Turin (B.I.61), Papyrus Bibl. Nat. 196 (B.I.90), Papyrus Griffith (B.I.87), Papyrus Abbott (B.I.76) and Papyrus Leopold II (B.I.77), all mentioning some of the officials working within it: sš n pr ḫr ‘3 ṣps ḫḥ ṛnpwt n pr-‘3, “the scribe of the great and noble Necropolis of Million Years of the Pharaoh”, ḫry md3 w’3 n p3 ḫr ‘3 ṣpsy n ḫḥ n ṛnpwt n pr-‘3, “the great chief of police of the great and noble Necropolis of Millions of Years of the Pharaoh” and ḫry n pr ḫr ‘3 ṣps n pr-‘3, “the guardian of the great and noble Necropolis of the Pharaoh”.

Most generic titles and expressions such as s3w n/r pr-‘3 ṣnh ḫḏ3 snb, “men of rank in/for the pr-‘3, i. p. h.” in Sn(w)-ims’s stele CG 27815 (B.II.7) probably had an honorary function, without expressing any specific office connected to the royal palace.

The transformation of the meaning of the term culminates in the adoption of a specific compound to indicate the royal building, as distinct from the single word pr-‘3: pr pr-‘3/ pr n pr-‘3, literally translated “estate of the pr-‘3”, where pr-‘3 must be intended here as “Pharaoh”:

normal expression for “palace” in demotic texts, being used in a wide range of contexts, referring to the concept of “royal court” or, in other cases, to the royal building itself.\footnote{For the use of pr n pr-‘3 as normal expression for “palace” in demotic texts see paragraph below: \S 3.3.}

2.6 The term \textit{pr-nswt} in official monuments and narrative inscriptions

The term \textit{pr-nswt} is one of the most common of the five words for “palace” and it appears in a wide range of contexts. It occurs frequently as an independent word in narrative and administrative texts, such as the aforementioned inscription from \textit{Rḫ-mi-r”s} tomb, \textit{the Duties of the Vizier} (B.II.33), one of the most informative text in this respect.

One of the most meaningful sections of the text are the 2\textsuperscript{nd} and the 3\textsuperscript{rd}, describing the exchange of reports between the treasurer (\textit{imy-r htm}) and the vizier (\textit{t3ty}).

\textit{R3, smi.tw n.f htm htmw r nw wn.st r nw smi.t(w) n.f hrt mnnww rs(w) mh[t(w)} To him (the vizier) one reports the closing of the enclosures on time and their opening on time. To him is reported the condition of the southern and northern guard posts.

As specified in part R3 of the text, the vizier receives his report on “the closing of the enclosure on time”, \textit{htm htmw r nw}. Commenting the Duties, Van de Boorn suggests that the term \textit{htmw} – basically meaning “something that is closed/sealed” - is used here “in the wider sense of enclosure, covering all types of rooms, houses and spaces that ought to be locked and opened on time”.\footnote{Van de Boorn 1989: 44-5.} In R7 of the same section the phrase \textit{htm htmw r nw} appears again in a report to the vizier on \textit{pr-nswt} and \textit{hnw} matters. In Van the Boorn’s discussions of \textit{The Duties}, the author locates these enclosures within the \textit{pr-nswt}: considering the vizier as the “managing director of the \textit{pr-nswt}”, he assumes that “report on the closing and the opening of the \textit{htmw} to the vizier can be explained satisfactorily when the latter are located in the \textit{pr-nswt}”.\footnote{\textit{Ibid.:} 45.} Actually the passage does not allow to set the exact location of these “enclosures”, since the context of R3 is set by vizier’s and treasurer’s operation and action in both the \textit{pr-nswt} and the \textit{hnw}. The \textit{htmw} may be intended as the gates of the \textit{hnw}, since the doors of the \textit{pr-nswt} are defined below (R8) as \textit{sb3 nb n pr-nswt}, “all the gates of the \textit{pr-nswt}”. Whether they belonged to the \textit{pr-nswt} or to
the _hnw_, these entrances were closed and reopened to allow traffic enter and exit for security reasons.\(^{483}\) Expression in R7 (B.II.33) _smi.(w) n.f ḫrst mnw nw rs(w) mht(w), “to him is reported the condition of the southern and northern guard-posts”, refers to another vizier’s office. The term _mnw_ is usually considered to be a sort of “fortress”,\(^{484}\) so that the text would refer to a southern and a northern post-guards or fortresses. Van de Boorn locates the _mnw_ in the _pr-nswt_: “The clauses on ḫtw and _mnw_ constitute a pair in section 2. This suggests a similar environment for both the structures, the _pr-nswt_. The fact that the dealings of the _mnw_ have to be reported to the vizier personally (as managing director of the _pr-nswt_) suggests that these structures both belong to the _pr-nswt_.\(^{485}\) According to this interpretation, the author provides an architectural description of the _pr-nswt_ as “provided with girdle wall and gates”.\(^{486}\) As for the _ḥtw_, text does not specify the location of the _mnw_, which may therefore belong to the _hnw_ rather than to the _pr-nswt_ itself. An allocation of “guard-posts” to the _hnw_ seems much more reasonable, assuming its function and its meaning of city-residence.\(^{487}\) Wherever these facilities would have been actually located, the management of their condition (_ḥrt)_\(^{488}\) dealt with the _pr-nswt_ itself.

According to passage R3-4 of _The Duties_, everything that enters and leaves the _pr-nswt_ and the _hnw_ is reported to the vizier:

\begin{verbatim}
R3, (.) pr prtt nbt
R4, m pr-nswt smi(w) n.f ‘k ḫt nbt r pr-nswt
   smi(w) n.f ir grt ḫt nbt prrt nbt r s3tw n _hnw_ ‘k.sn
   pri.sn in wpwty.f didi ḫk pri
\end{verbatim}

(….) when everything that has to leave the _pr-nswt_ leaves, (that) is reported to him. When everything that has to enter the _pr-nswt_ enters, (that) is reported to him. As for everything that has to enter or leave the area of the _hnw_ it (lit. they) will leave and enter: it is his messenger who sees it that it leaves and enters.

Basing on the information in Section 2, Van de Boorn concludes that while the vizier was in charge of the _pr-nswt_, the treasurer was responsible for the _hnw_. The reason for this statement is that traffic connected to the _hnw_ was dealt by a vizier’s messenger (_wpwty.f_), whereas everything living and entering the _pr-nswt_ had to be reported directly to the

\(^{487}\) See paragraph above: § 2.8.

\(^{488}\) Wb III: 318-9.
vizier. Later in text, section 3 provides the following sequence of actions: after the vizier has moved to the doorway (m p3 sb3) of the double gates (rwty wrty), the treasurer reports to the vizier that the affairs of the pr-nswt are in order, and the vizier reports to the treasurer that the affairs of the hnw are in order too. As asserted by Lorton in his discussion on Van de Boorn’s interpretation of The Duties, “it can be noted here that the vizier’s report concerning the Residence was not occasioned by the treasurer’s responsibility”.

Against the identification of the vizier as “manager director” of the pr-nswt proposed by Van de Boorn, Lorton lists a number of compelling reasons – first of all the treasurer’s responsibility on reports concerning the pr-nswt - to support the idea that the pr-nswt was administered by the treasurer and that it was “an entity separate from the administrative apparatus of the vizier”.

Another passage referring to the cooperation between the vizier and the overseer of the treasury is section R30 containing the statement that they jointly opened the pr-nbw (lit. “the gold house”), intended as a complex of royal workshops and storehouses.

R30, (..) ntf wn pr-nbw hnn‘ imy-r htm (..) It is he (the vizier) who opens the Gold House together with the overseer of the treasury

Despite this passage is inserted in the context of the vizier’s responsibilities in relation to the pr-nswt, the text does not establish the actual position of the pr-nbw within the pr-nswt. The pr-nbw may have been a separate structure, whose management was somehow connected to the pr-nswt.

Determining whether it was the treasurer or the vizier in charge of the direct administration of the pr-nswt is not the primary purpose of this work. Even if the vizier seems to have operated in the pr-nswt according to orders (ddt m pr-nswt in R23 and R24) and reports of other authorities (the king and the treasurer), he certainly took an active role in the offices performed in the pr-nswt. The study of the vizier’s duties aims at understanding the nature of pr-nswt and its real meaning.

The treasurer and the vizier exchange their reports outside the pr-nswt, at the sb3 n rwty wrty, which could be taken as the sb3 of the pr-nswt in R8 (sb3 nb n pr-nswt). It is only

489 Ibid.: 203 ff.
491 Ibid.: 309.

118
after the exchange of reports that doors (sb3) were opened for the free flow of traffic into and out of the pr-nswt.

R7, (. ) ḫr-ir-m-hṭ sml w’ n w’ m 5p sr 2 ḫr ḫ3ty h(3)b.f

(. ) Now after both officials have reported to each other, the vizier shall send out to open every doorway of the pr-nswt so as to ensure that everything which has to enter enters and likewise everything which has to leave (leaves). It is his messenger who sees it that (it) happens by means of a writing (. )

The pr-nswt appears as the source for supplies and the destination of external deliveries.

Other sections of the text clearly refer to the pr-nswt listing the activities performed by the vizier within it:

a) R21, ntf sbb wpwty nb n pr-nswt h(3)b n ḫ3tyw-. bk3w-hwmt ntf sbb phrty nb wdty nbt nt pr-nswt

It is he who dispatches every messenger of the pr-nswt sent to the mayors and the settlement-leaders; is he who dispatches everyone who will circulate all messages of the pr-nswt.

b) R23, ntf ḫr ḫr-’ ḫm nb niw ḫw nb nb ḫm nt ḫr ḫr-’ ḫm niw m ḫm nb rst m ḫm nb ḫt ḫt m pr-nswt

It is who makes the total of the army contingent that escorts the Lord when [sailing downstream] and upstream. It is he who organizes the remainder of the army that stays behind in the Southern City and in the ḫm according to what has been said in the pr-nswt.

c) R24, ntf sbb r sw3 nhw ḫtf ḫt m pr-nswt ntf sbb knbtyw

It is he who dispatches to cut down sycamores according to what has been said in the pr-nswt, it is he who dispatches the councillors.

d) R25, (. ) ntf ḫr ḫy-r ḫn m ḫ3 n pr-nswt

It is he (the vizier) who appoints the overseer of policemen in the bureau of the pr-nswt.

e) R27, ntf ṣdm ‘n nb m [. ] ntf ḫh ḫhw nb ḫm s ḫm ḫm m ḫh ḫh ḫh ḫt m pr-nswt ntf sbb ṣdm wdt nb(t)

It is he who hears any complaint [. ] when a man goes to law with his colleague. It is he who appoints anyone to be appointed to the ‘ḥyt. It is to him (the vizier) that anyone who has to be interrogated in the pr-nswt has to come; it is he who hears every decree (of the king).

f) R34, ntf ṣ3’ ‘h’w r ṣ3’w nb n f ḫw n tf sbb wpwty(w) nb n pr-nswt r [. ] ḫt wnn nb m ṣm’ (. )

It is he who assigns ships to everyone to whom a ship needs to be assigned. It is he who dispatches every messenger of the pr-nswt to [. ] when the Lord is on expedition.

493 The term ṭw starts to appear in the dual form ṭwty from the Middle Kingdom onwards, with the addition of the dual adjective ṭwrty to describe an important entrance to a palace or a temple. For an overall view of the occurrences of the term in texts see Spencer 1984: 215 ff.
PART I

It is he who seals every written decree of [..] dog of the guardsman of dogs dispatches on a mission of the pr-nswt

a) The expression ntf sbb wpwty nb n pr-nswt, “It is he who dispatches every messenger of the pr-nswt” appears two times in the text (in sections R24\textsuperscript{495} and R34\textsuperscript{496}) and introduces the figure of the wpwty n pr-nswt, “the messenger of the pr-nswt”, a royal agent under the responsibility of the vizier. The pr-nswt is presented as a place for exchange of messages and missives among the mayors (h3tyw-) and the settlement leaders (hk3w-hwwt) probably regarding local business, procedures, politics and “court” matter. The following phrase ntf sbb phrty nb wpwty nb t pr-nswt, “it is he who dispatches everyone who will circulate all messages of the pr-nswt”\textsuperscript{497} confirms the role of the vizier as intermediary in transmitting messages (wpwty) in the pr-nswt. These communications would have probably included king's instructions to different local levels of administration.\textsuperscript{498}

b) In the aforementioned column R23 the pr-nswt appears not only as place of civil organization of the state but also as centre for the coordination of enterprises involving royal journeys. The second part of the sentence informs that it is the vizier who organizes a part (hr-) of the army (mš), executing royal instructions originating from the pr-nswt.\textsuperscript{499} It is explained here that he is not issuing orders on his own account but just passes on orders received from other authorities, since the whole operation is initiated by the pr-nswt (hft ddt m pr-nswt).\textsuperscript{500} The pr-nswt in such a context is presented as place of origin of decisions and orders.

c) Another activity which can be considered an internal affair of the pr-nswt is that expressed by the phrase in section R24: ntf sbb r sw3 nhwt htf ddt m pr-nswt, “it is he who dispatches to cut down sycamores according to what has been said in the pr-nswt”.\textsuperscript{501} The sentence is phrased once again as the execution of an instruction of the pr-nswt (.. htf ddt m

\textsuperscript{495} Van de Boorn 1989: 202, R21.
\textsuperscript{496} Ibid.: 288, R34.
\textsuperscript{497} Ibid.: 202, R22. The term phrty derives from the verb phr, “to turn around, to circulate”: Wb 1: 544-7. FCD: 93. For all the possible translations of the sentence see Van de Boorn 1989: 204-207.
\textsuperscript{498} Ibid.: 204.
\textsuperscript{499} In the preceding sentence the vizier is said to be the one who assembles also the army contingent that will escort the Lord. Van de Boorn 1989: 218, R23.
\textsuperscript{500} Van de Boorn 1989: 227.
\textsuperscript{501} Ibid.: 234, R24.
pr-nswt) by the vizier, who has to take care of its execution.\textsuperscript{502} The cut of nhwt, “sycamores”, is presented as an organized activity connected with the pr-nswt. The inspection of the wood-supply by the vizier is mentioned also in the 19\textsuperscript{th} Dynasty tomb of P3-sr (TT 106, B.II.128).\textsuperscript{503} As pointed out by Van de Boorn, wood and wood-supply seem to have been a subject of special interest to various central institutions.\textsuperscript{504} A fragmentary passage in the Middle Kingdom Admonitions of Ipuwer (Papyrus Leiden 344: A.III.8) makes reference to a centralized wood supply listed among the profits of the ‘h (kmw(t)-‘h).\textsuperscript{505} The Gebel Barkal Stele of Thutmose III (MFA 23.733 - B.I.8) refers to the supply of different kinds of imported wood to the stp-s3 and finally addressed to the \textit{hnw}:

\textit{l. 30} mdh n.i [m D3hy] tww rnt pt m ‘$ m3’ n Rmnn nww r stp-s3 ‘nh wd3 snb iw n.i [hwrd t Kmt shtnw [...] m3[‘] n Ng3w m stp n T3-ntr swd st m3[‘] mi $s r sprt r \textit{hnw}

There is hewn for me in D3hy each and every year consisting of real ‘$-wood of Lebanon, (it) is brought to the stp-s3, l. p. h. Precious wood comes for me to Egypt, brought south, [...] real [...] from Ng3w, [m3‘-wood] like alabaster for supply to the \textit{hnw}

Apart from the present passage, other sources refer to the vizier in connection with the management of wood-supply. Among its different uses, wood was also used in the manufacture of luxury goods at the palace workshops (wght nt pr-‘$): one of the administrative orders in the Middle Kingdom Papyrus Reisner II is a copy of a letter of the vizier ‘Intf-lkr giving instructions relating to deliveries of timber to the dockyard workshop of the pr-‘$ in the Thinite Nome.\textsuperscript{506} Section B of the same text contains a list of boat equipment received through the chamberlain Sl-Spwd among which acacia-wood provided by the \textit{hnw} is mentioned: \textit{dnhw nfrw rdi \textit{hnw}}, “good quality acacia \textit{dnhw} the \textit{hnw} gives”.\textsuperscript{507} There are numbers of evidence suggesting that various central institutions, including the palace, had their own supply of wood, organized by their own personnel or provided through corvée.\textsuperscript{508} The sentence in Rḥ-mi-‘r’s tomb could refer to the wood-supply for the pr-nswt itself and its dependencies or to the production of wood as a centrally organized activity in the provinces.\textsuperscript{509}

\textsuperscript{502} The same expression is contained in section R23. \textit{Ibid.}: 218, 223.
\textsuperscript{503} Helck 1958: 47 no. 8.
\textsuperscript{504} Van de Boorn 1989: 234 ff.
\textsuperscript{505} Gardiner 1909: 3, 11-12.
\textsuperscript{507} \textit{Ibid.}, II: 27, pl. 27.
\textsuperscript{508} Van de Boorn 1989: 237.
\textsuperscript{509} \textit{Ibid.}: 235.
d) As pointed out by Van de Boorn in his commentary to *The Duties*, the meanings and functions of the titles *imyw-r šnt* and *imyw-r šntw*⁵¹⁰ are far from clear.⁵¹¹ Basing on the analysis of several discussions of the titles, the author proposes their interpretation as “overseer of police, chief sheriff”.⁵¹² The *imyw-r šnt*, “overseer of the police”, the *šntw*, “policemen” and the *imyw-r w*, “the overseer of the district” also appear in another passage of the text (R4), where they are said in charge to report their affairs to the vizier:

*R24, smi n.f imyw-r šnt šntw imyw-r w ḫrt.sn* The overseers of the policemen, the policemen and the overseers of the district report to him their affairs

That these officials functioned in the area of the *pr-nswt* is suggested by context of R25 of the same inscription.⁵¹³ The appointment of the overseer of the police by the vizier takes place in a specific section of the *pr-nswt*, the ḫ3 n *pr-nswt*:

*ntf îrr imyw-r šnt m ḫ3 n pr-nswt* It is he (the vizier) who appoints the overseer of policemen in the bureau of the *pr-nswt*⁵¹⁴

The function of all these officials was probably to survey the incoming and outgoing traffic of the *pr-nswt*⁵¹⁵ and to report to the vizier on the police-work involved (ḫrt.sn, “their affairs”).⁵¹⁶ The passage continues reporting: “He is he who carries out the hearing of the mayors and settlement-leaders who go out in his name (hr rr.f) to Upper and Lower Egypt. All matters (ndwt nb) are reported to him. It is to him that the affairs of the fortress of Upper Egypt have to be reported (as well as) every arrest of (any) one who is involved in plundering. […] It is he who assigns the spoil (of war) to each town district. It is he who judges him (the plunderer)”.⁵¹⁷ The mention of the meeting between the vizier and the overseer of the police has probably to be connected with the specific matters envisaged in this section.⁵¹⁸ The *pr-nswt* is described as the *scenario* of the “hearing” of the urban authorities by the vizier and the reporting of matters (ndwt) and affairs (ḫrt) concerning the “fortress of the South”.

⁵¹⁵ *Ibid.*: 52.
⁵¹⁶ *Ibid.*: 42, R4-5.
PART I

e) The concept of ‘ryt’ is mentioned several times in the text. In parts R8-R9 cited above, the ‘ryt’ is presented as the area where the vizier will execute the punishment (ḥṣf) of convicted officials:

R8, (…) ird hpr sk r
R9, w m n3 n srw imy ḫ3. f ḫr. f di. f in. t(w) r [’] ryt:
[l] n ṭ3ṭy ḫṣf n. f r-gradation lw. f

When a severe accusation is leveled at one of the officials in his bureau, he (the chief official) will see to it, that he (the subordinate official) is taken to the ‘ryt’. It is the vizier who will punish him according to his offence.

The ‘ryt’ seems to have been a department with its own personnel under the supervision of the vizier who used it to investigate and judge officials. The question arises as to where the ‘ryt’ was located. Parts R27-28 under discussion states that the vizier was charged with the appointment of personnel to the ‘ryt’:

R27-28, (…) nṯfw ḏhn ḏḥnw nb r ‘ryt

It is he who appoints everyone who has to be appointed to the ‘ryt’.

The next sentence would seem to suggest a location of the ‘ryt’ within pr-nswt:

R2, iw n. f ṣnw nb m pr-nswt nṯf ṣḏm wḏt nb(t)

It is to him (the vizier) that anyone who has to be interrogated in the pr-nswt has to come; it is he who hears every decree (of the king).

The ‘ryt’ is used here in its meaning of “place of justice”, because it is referred to interrogations of pr-nswt personnel about juridical cases. The following phrase nṯf ṣḏm wḏt nb(t), “it is he who hears every decree (of the king)”, relates to the vizier’s responsibilities in the ‘ryt’ and his task of “chief justice to officials”.

The connection between the ‘ryt’ and the pr-nswt can be assumed also on the basis of an earlier monument, such as the Middle Kingdom stele of Wp-w3wt-3 (GL WAF 35 - A.II.41):

ḥtmw ntyw m pr-nswt ‘nhw nṯ r ‘rryt m33 st3. r
pr-nswt

The sealers who are in the pr-nswt and the persons at the ‘ryt’ see my admittance to the pr-nswt.

---

519 For a complete discussion of every section of the text citing the ‘ryt’ see Van de Boorn 1989: 82-3.  
522 ibid.: 83.  
523 ibid.: 83-4.  
524 For a different meaning of the ‘ryt’ as the meeting place between the pr-nswt and the outside world see Van de Boorn 1989: 24 no. 110  
525 ibid.: 280.
Confirmation of the link between the concept of justice expressed by term ‘ryt’ and the pr-nswt can be found also in another New Kingdom example, the Horemheb’s Decree. In this text (B.I.26), Horhemheb refers to men chosen by him to rule the country as follows:

\[ \text{nfrw bit rhw wd’ imy(w)-ht sdmyw mdt pr-nswt hpw nw ‘ryt} \]

With a correct temper, able to fathom the thoughts, obedient to the injunctions of the pr-nswt and the laws of the ‘ryt’

Analyzing the various sections referring to the ‘ryt’ in the tomb of Ṛḫ-mi-r’, Van de Boorn claims to determine the exact position of the ‘ryt’, “being a king of building erected on the front area of the pr-nswt”. As sources under discussion suggest a connection between the functions performed in the ‘ryt’ and the activities in the pr-nswt, they do not establish with certainty the physical connection of the two structures, although the location of the “court” near or within the pr-nswt seems likely. Expressions in the Middle Kingdom stele of Wp-w3wt-3 and the Decree of Horemheb suggest that the two institutions would have had each its own bureaucracy (mdt pr-nswt hpw nw ‘ryt, “the injunctions of the pr-nswt and the laws of the ‘ryt’”) and its own staff (ḥtmw ntyw m pr-nswt ṅḥw nt r ‘ryt, “the sealers who are in the pr-nswt and the persons at the ‘ryt’”) and that they were somehow related. It is likely that the control of the activities within the ‘ryt’ would be included among the administrative functions of the pr-nswt.

f) The mention of “every messenger of the pr-nswt” has already been analyzed with regard to section R21 (see letter a). Again in R34 the vizier is said to be responsible in dispatching messengers of the pr-nswt, in this case also in occasion of king’s expeditions (_mtime), “we might think in terms of his provisioning them or arranging for their travel”.

g) Interpretation of the activities carried out by the vizier in the pr-nswt as described in part R35 is doubtful. Term ṭṣm makes suppose an activity concerning the delivery of letters with royal orders (wdw) and the preservation by sealing (ḥtm) of the missive.

Throughout his study of The Duties, Van de Boorn refers to the pr-nswt as an architectural complex provided with a girdle wall, gateways (sb3w) and guard posts (mnnw), and housing a number of distinct units, some of them known by specific names: “enclosures” (ḥtmw),

---

527 Van de Boorn 1989: 84. His claim is based on the interpretation of part R8 of the text, where the appointment of the personnel to the ‘ryt is preceded by the fact that the vizier controls the sb3 nb n pr-swt, “every doorway of the pr-nswt”.
528 Lorton 1991: 300.
the “hall of the pr-nswt” (ḥ3 n pr-nswt), the “house of gold” (pr-nbw), the “bureau of the vizier” (ḥ3 n tꜣty). The lengthy discussion above has shown that in many cases the physical location of the institutions mentioned from time to time in the text has been assumed on the basis of the context rather than on an actual grammatical relationship between the terms. That the pr-nswt was equipped with sb3-doors, is confirmed by expression in R8 reporting the vizier’s opening of every doorway of the pr-nswt (sb3 nb n pr-nswt), probably to be identified with the sb3 n rwty-rwty to which the vizier moves to meet the overseer of the treasury in R5. Unlike the sb3w, the enclosures (ḥtmw) and the guard posts (mnnw) in R3 may have equally belonged to the ḥnw as to the pr-nswt. An explicit reference to a “hall/office” of the pr-nswt (ḥ3 n pr-nswt) is made in R 25, where it is described as the place to where the vizier appoints the overseer of the police (imyw-r ṣnwτ). Most likely it is in the same ḥ3 that the vizier hears “the mayors and settlement leaders who have gone out in his name to Upper and Lower Egypt”, “every matter has reported to him” and “the affairs of the fortress of Upper Egypt have to be reported (as well as) every arrest of (any) one who is involved in plundering”. Thus, accepting the interpretation adopted by Van de Boorn, the ḥ3 n pr-nswt would have operate as a type of reception-hall where the vizier received people from different areas of Upper and Lower Egypt in order to take care of order and security of the country. Unlike Van de Boorn argues in his discussion on The Duties, text does not indicate a close relationship between the ḥ3 n tꜣty and the pr-nswt. The location of the “office of vizier”, as well as the house of the vizier (pr.f in R5) within the pr-nswτ, is based on the author’s assessment that the vizier was its “managing director” and not on explicit expressions of the text. Similarly, the section R30 of text that refers to the responsibility of the vizier to open the pr-nbw together with the treasurer, does not assert the actual position of the “house of gold” within the pr-nswτ. Finally, the ‘ṛyt that Van de Boorn positioned at the entrance area

---

530 Ibid.: 311.
531 Ibid.: 55, 73.
534 Ibid.: 12-3, 46.
537 Ibid.: 252.
538 Ibid.: 22.
539 According to Lorton “if the vizier’s house had been located within the pr-nswτ, a report to him on the latter’s condition would have been superfuous”, in Lorton 1991: 292.
540 Van de Boorn 1989: 22, 58.
541 Ibid.: 285.
of the pr-nswt\textsuperscript{542} may have been a separate complex, even if connected somehow to the pr-nswt. With regard to the personnel working in the pr-nswt, the vizier and the messengers (wpwty n pr-nswt) of the pr-nswt in R21-22\textsuperscript{543} and R34\textsuperscript{544} are to be surely connected with this institution. The overseer of the treasury, who has to report on the condition of the pr-nswt to the vizier in R6,\textsuperscript{545} surely had a management role in the pr-nswt itself.\textsuperscript{546} Other officials, probably acting in other administrations and not specifically in the pr-nswt, could interact with this institution, such as the vizier’s messengers in R3\textsuperscript{547} and R8\textsuperscript{548} (wpwty.f=t), responsible functionaries in R6 (\textit{iry nb sšm}),\textsuperscript{549} the overseer of the police in R25 (\textit{imyw-r šnt})\textsuperscript{550} and the ‘ryt personnel.

Functions of the pr-nswt can be reconstructed on the basis of the vizier’s duties that the text explicitly links to this structure:

- Vizier’s responsibility for the physical security of the pr-nswt;
- Vizier’s authority in dispatching its messengers beyond the pr-nswt to communicate messages and any decision of the pr-nswt to authorities and local provinces, also in occasion of royal missions;
- Vizier’s juridical function to review activities of pr-nswt personnel presumably in instances of incompetence and wrongdoing;
- Vizier’s role in hearing all the matters (mdwt nb) and the affairs (htf) that are reported to him by urban authorities and royal agents, such as the overseer of the police;
- Vizier’s duty in dealing with royal journey within Egypt and organizing armed personnel;
- Vizier’s task of managing the wood-supply;
- Vizier’s responsibility of dispatching royal decree and missives.

\textsuperscript{544} Ibid.: 288-9.
\textsuperscript{545} Ibid.: 55, 66.
\textsuperscript{546} Lorton has recognized in the figure of the “overseer of the treasury” the real management-director of the pr-nswt, in Lorton 1991: 309-9.
\textsuperscript{547} Van de Boon 1989: 13.
\textsuperscript{548} Ibid.: 54.
\textsuperscript{549} Ibid.: 54, 70-2.
\textsuperscript{550} Ibid.: 50 ff., 250.
Section of The Duties describing the exchange of reports between the vizier and the overseer of the treasury presents the pr-nswt as place where entries and outflows were recorded. It was also the place where royal commands (ddt m pr-nswt), according to which the vizier had to fulfill his duties, originated. The picture of the pr-nswt that emerges from such a text analysis is that of a centre of royal government and administration.

As well as in the inscription in TT 100, the pr-nswt is presented in various inscriptions as place of origin and destination of supplies. The Tale of the Doomed Prince in the verso of Papyrus Harris 500 (B.III.1) describes the pr-nswt as place of origin of people and supplies for the building of a king’s estate in the desert:

4,5-4,6) \[ wn \text{ in } \text{ htm.} \text{ f } \text{nḥ wd3 snb hr dl kd tw n.f w’ } \text{ pr } n \text{ inr br smt iu.f } \text{ pr } m \text{ ṭnw m ḫt nbf nw pr-nswt } \text{nḥ wd3 snb } \]

His Majesty had [a house] of stone built [for him] upon the desert, supplied with people and with every good thing of the pr-nswt l. p. h.

From the pr-nswt came the provisions which would have enriched the house of ’Inny (TT 81 – B.II.6):

18) (…) s’j.n.s (hmt.s) wi mh.n.s i3m.i m ḫd nbw m šsr nb nfr n pr-nswt

She (Hatshepsut ?) (Her Majesty) enriched me with possessions, she made me great and filled my estate with silver, gold, and every good thing of the pr-nswt

A mutilated expression from verso of Papyrus Anastasi III (pBM 10246b - B.I.68) records the delivery of a tribute from the pr-nswt to a steward (imy-r) in the form of īnw:\footnote{\textsuperscript{551}}

1,1) šsp m i3yt m [..] pr-nswt ḫr-pr nḥ wd3 snb m īnw n imy-r

Receiving what was brought from (?) [..] the pr-nswt l. p. h. as a tribute of the steward

Some private titles refer to the owner as one who fills the pr-nswt (mh pr-nswt) with different kinds of supplies ranging from food provisions (hw df3w) to precious stones, silver (ḥd) and gold (nbw):

| hrt.ḥrw m bw nb nfr | | | |

A peculiar expression in a number of Amarna tomb inscriptions (tombs of Mʿy at el-Amarna - AT 14; B.II.97, of P3-ḥhsy - AT 6; B.II.94 and of P3-rn-nfr - AT 7; B.II.95), consisting of the ritual formula ḫtp di nswt, “a boon which the king gives”, introduces the same concept of the pr-nswt as place of entry and exit of supplies:

di.f r [ʾk] prt m pr-nswt  May he grant entry and exit in the pr-nswt

2.7 The term pr-nswt in epithets and titles

The prominent administrative function of the pr-nswt seems to be confirmed by non-narrative sources as well. It is suggested for example by the frequent association of the term with the scribal profession, to which was delegated the registration of all the economic and bureaucratic operations of the palace. The link between the terms sš and pr-nswt, already attested in the Middle Kingdom texts, continues to be used in Ramessid titles, such as the sš nsw m ḫnw pr-nswt, “the royal scribe of the ḫnw of the pr-nswt” mentioned in the Onomasticon of ʿimn-n-ḥpt (B.1.39). A scribe of the pr-nswt was also the author of the Tale of the two Brothers contained in the 19th Papyrus Chester Beatty II, as inferred by the colophon of the text where he is defined sš ʿimn nt pr-nswt, “the scribe of Amun of the pr-nswt” (B.3.5). Other administrative offices are the ḫtmw, “the sealer” dealing with the sealing of precious things (ḥpsw) in the pr-nswt and the ḫtmw, “the sealer of the pr-nswt”.

It must be noticed a fairly close association between pr-nswt compounds and titles with pr-‘ḥ since the administrative titles formed with pr-nswt are frequently contrasted in titling with offices attached to the pr-‘ḥ. However, the pr-‘ḥ compounds vastly outnumber their counterparts with pr-nswt, being the term pr-‘ḥ used in a broader spectrum of aspects of the king’s life.

Starting from the New Kingdom, the epithet ḥry-sšt3 is one of the Egyptian titles most frequently compound with pr-nswt, generally translated as “in charge of secrets” or “he, who is upon secrets” in the pr-nswt or similar. The epithet is attested since the Old Kingdom, when it is one of the most recurrent titles in private inscriptions used for officials who were associated with the king’s person and involved in the central or provincial government. Especially in the Old Kingdom the title could exist also standing alone without any qualifying job description, while there seems little indication at that time

---

553 See paragraph above: § 2.4.
555 In the Old Kingdom the title ḥry-sšt3 can be qualified by the adjunct of pr-‘ḥ, referred to the royal estate. The ḥry-sšt3 n pr-‘ḥ also sometimes claimed the title ḫmr ‘ḥ, both the titles seemingly linking such functionaries to the king’s very close entourage in the palace, in Balanda 2009: 328.
556 Old Kingdom occurrences provide a strong indication that officials were appointed to the rank or office (išt) of ḥry-sšt3 without any job description additions. According to Stanley, Z. Balanda, in these insances the ḥry-sšt3 would have formed a “colleague” from which officials were assigned to perform functions specific to such “colleague”, in ibid.: 322. One of the most notable examples reported by Balanda of this title alone is that of the 18th Dynasty vizier Ṙḥ-mi-R ‘ḥ, who claims to have
showing direct connection of this title with the religious sphere. In New Kingdom titles instead, the usage of the causative form sśt3 of word śt3, “secret” is frequently attested with reference to temples and gods, in contexts where these secrets could concern ceremonies or the mysteries of the religious worship. Apart from the connection of the title with the temple administration, the New Kingdom hry-sśt3 n pr-nswt was clearly associated with state bureaucracy since the title is often referred to viziers or people strictly close to the king. In such administrative context, the “secrets” for which the officer was responsible would relate to legal and administrative matters. In order to provide a translation more directly understandable in the modern idiom, Stanley Balanda has recently suggested to render the title as “expert in the procedures in the government enclosure”. An office which may have some connection with the hry sśt3 n pr-nswt is that recorded in ’innī’s biography where he is described as h3p r3 hr ḫrt pr-nswt, “one who keeps silent about the affairs of the pr-nswt” (B.II.6). In one example pr-nswt is replaced by ‘ḥ in the title hry-sśt3 m swt ḥ, which was held by P3-nḥṣy, a high official under Rameses II (B.II.139).

Together with hry-sśt3, even hry-tp ʿ3, “great chief”, and imy-r, “overseer”, can be frequently compound with the word pr-nswt.

been “receiving carob beans and honey in the treasury of the temple and sealing all valuable things in the pr-ʾimn in virtue of his office (ḥṭ) of hry-sśt3” (URK IV: 1140, 15-17), in Ibid.: 321.

557 Ibid.: 328.

558 The progressive connection of the title hry-sśt3 with the realm of divine offices starts in the Middle Kingdom and seems completed in the New Kingdom. As suggested by Balanda, this process “may well indicate a dissolution of the collegiate nature of this title at a certain point coupled with permanent attachments to specific functions”, in Ibid.: 322.

559 These officials had to be associated in some way with priestly or semi-priestly duties, see: Ibid.: 327-8.

560 Ibid.: 340, no. 61.

561 The title imy-r pr-nswt is known since the Old Kingdom to indicate offices connected with some royal ceremony or ritual. Goelet 1982: 508-9.

New Kingdom private titles may mention the official’s responsibility for some kind of works (k3wt) that in one occasion pertains the celebration of the Sed-festival in a dedicated temple (ḥwt ḫbw-sd). Some of the civil posts associated with the pr-nswt since the Old
Kingdom documentation appear to have been carpenters’ titles charged with construction on king’s behalf.\textsuperscript{562}

Documentation of private titles has a counterpart in the narrative expression in stele Louvre C 26 (B.II.10) where $\text{‘ln}$-$\text{it}$-$f$ states as follows:

\begin{itemize}
  \item $i3wt$.i $\text{pw}$ $m$ $\text{pr}$-nswt $\text{‘nh}$ $\text{w}\text{d3}$ $\text{snb}$ wnwt.i $\text{pw}$ $m$ stp-s3 $\text{‘nh}$ $\text{w}\text{d3}$ $\text{snb}$ This was my office in the $\text{pr}$-nswt, l. p. h.; this was my duty in the stp-s3, l. p. h.
\end{itemize}

\textsuperscript{562} Goel 1982: 527.  
\textsuperscript{563} GEG: O 44, 550.
There are also generic titles stating the prominent position of the owner in the *pr-nswt* using adjectives such as *w*’, “unique”, *wr*, “great”, and the synonymous *‘3, “magnate”*. They all were designations of rank without any associated administrative office or duties. Some epithets refer to both the inscription owner and his officials as *sr*, “official”, *h3ty-‘*, “leader”, or part of the *šnwt*, “entourage” of the *pr-nswt*. An official may be described as “great” (*wr*) or “firm” (*mn*) of love (*mrwt*) in the *pr-nswt*, presumably to emphasize the approval given to him by the king or the other officials.

Some peculiar expressions stress the freedom of movement of the official within the pr-nswt:

<table>
<thead>
<tr>
<th>Nmtt m pr-nswt</th>
</tr>
</thead>
<tbody>
<tr>
<td>wstn nmtt m pr-nswt ’nh wd3 snb</td>
</tr>
<tr>
<td>hri nmtt m pr-nswt</td>
</tr>
</tbody>
</table>
Epithets may refer to the pr-nswt by stating that the official is favored in it, using a form of the verb ḫsī, “to praise”, “to favor”:\(^{566}\)

<table>
<thead>
<tr>
<th>Titles compound with verb ḫsī + pr-nswt</th>
</tr>
</thead>
<tbody>
<tr>
<td>wr hswt m pr-nswt ‘nḫ wd3 snb</td>
</tr>
<tr>
<td>ḫsw(t).i mn m pr-nswt</td>
</tr>
</tbody>
</table>

To these last groups must be reconnected the expression recorded on the funerary statue of Mwt-nfrt from Amarna (B.II.88):

\(l.\ 1-3\) Nswt dt ḫtp Ḥnnw nb-br Wrṭ nṭr ‘3 nb r pt dt.f ‘k ḫsy pr mrrw hsw(t).f mn pr-nswt n k3 n s3.st s‘nḫ rr.n s h3ty‘.‘ Mʾw n Nfrwsy

A boon which the king gives of Khnum of Wrṭ, the great god, Lord of the heaven, as he gives (the means of) entering favored and departing beloved, (as) one whose praises are established in the pr-nswt: for the k3 of her son who causes her name to live, the major Mʾw of Nfrw-sy.

2.8 The term ḫnw in official monuments and narrative inscriptions

The term ḫnw is broadly used in a wide variety of contexts suggesting two main different meanings of the word. It has the peculiarity of being derived from the triliteral stem ḫnw, whose base meaning is “interior, inside”.\(^{567}\) In some contexts the word seems to keep that meaning, especially when used in genitival phrases in narrative texts where it is combined with other words for palace. In other occasions, ḫnw appears in prepositional phrases compound with r or m where it is usually closely associated with a verb of motion presenting the ḫnw as last destination of the transfer.

The most meaningful genitival phrases in both official and private narrative texts are those where ḫnw is connected with ‘ḥ through a genitive direct relation (ḥnw ‘ḥ) or by means of the genitival adjective ni/nw (ḥnw nw ‘ḥ).

One example of this usage of the term appears in the inscription of the 9\(^{th}\) year of Queen Hatshepsut regarding the expedition to Pwnt at Deir el-Bahari (B.I.12):

---

\(^{566}\) SEG: 579. Wb III: 159.
The Lord of the Two Lands (came) from inside the sacred place of his ‘ḥ

The same relationship between the two terms is attested in the private inscriptions on the statue of ‘Imn-ḥtp from Karnak reporting the expression mdww prt m ḫnḫw ‘ḥ, “words spoken in the ḫnḫw ‘ḥ” (CG 583 - B.II.73) and on the statue of Hr(3)w.f from Bubastis with the phrase ṣḥpr.n.f m ḫnḫw ‘ḥ.f, “put in life by him in his ḫnḫw ‘ḥ” (Bubastis - B.II.81).

The prepositional phrase m ḫnḫw, “in the ḫnḫw” appears in two narrative passages which refer to the ḫnḫw as a place where to eat and drink: ḥtmw bity swr(r)i ḫnḫw ‘ḥ, “sealer of Upper and Lower Egypt who drinks in the ḫnḫw” in the biographical text from the tomb of Sw-m-nwt in Thebes West no. 92 (TT 92 - B.II.31) and ḥr wnm.f ḥr swr.f n ḫnḫw, “when he eats and drinks in the ḫnḫw” in the Instruction of ‘Imn-n-iḥpt (CAT - B.III.4).

The ḫnḫw in these expressions seems to be used with its base meaning of “inside”,568 as an inner space of the royal building where private activities could take place. The compound ḫnḫw ‘ḥ seems to refer to the ḫnḫw as a specific inner section of a biggest structure, the ‘ḥ. Its connection with word ḏsrw569 in Hatshepsut’s Inscription from Deir el-Bahari suggests that the ḫnḫw may indicate a restricted section of the ‘ḥ, whose access was limited to few people. The same use of the term recurs in Horemheb’s decree (B.I.26) in that passage where the king commemorates to have re-established the justice in Egypt:

rḥn.n.i kb.f r 3w.f s3ḥ.n.i ḏr-.m ḫnḫw.f (...) I know his interior entirely (because) I reach the deep of his ḫnḫw

The “interior” meaning of the ḫnḫw is suggested by the context and its association with the term ḏr-. “end, deep”.570

The term ḫnḫw seems also to be connected to the concept of wpt, “justice”, as suggested in a passage of Horemheb’s decree (B.I.26) where it is described as a place where every prince (ḥ3ty-) and priest (ḥm ntr) is set r šrt wpt(t) m ḫnḫw t3 knbt rdlt r wpt(t), “to render justice in the ḫnḫw of magistrates made to judge”.

The prepositional phrase r ḫnḫw is closely associated with a verb of motion – spr, “to arrive” – in the Ahmose’s Tempest Stele (B.I.2). The first fragmentary section of the monument

---

568 Wb III: 368, 17; 369, 15.
569 For the interpretation of the ḏsrw as a sacred room within the palace connected to the celebration of festivals, see Hirsch 2009: 75-6.
570 GEG: 205, 3; 604.
describes an offering-ceremony probably consisting of a procession of the image of Amun and other Theban gods. The final lacuna of this passage of the stele mentions the king’s return to Thebes and his encounter with Amun’s image. Term hnw is used here with reference to the city of Thebes in the formula hnw n W3st:

l. 12) spr pw ir.n hm.f r hnw n W3st nbw hs m [nbw] ss.m pn ssp.f 3b(t).n.f
What His Majesty did was to arrive at Thebes and gold encountered the gold of his processional image, so that he received what he has desired.

In other passages of the same text the word hnw appears again in the genitival phrase hnw pr-‘3, “the hnw of the pr-‘3”, where it must be understood as the "inside" of the pr-‘3-palace.

l. 5) (...) [wn.in hm.f h r hnw
l. 6) pr-‘3 ‘nb (w)d3 snb ist grt ntr] pn ‘3 hr 3byt [n]w hm.f [hr-f
iw] ntrw hr šnt hnw.sn n [nbw]
Then His Majesty sailed downstream to the hnw pr-‘3, l. p. h. but this great god] was desiring that His Incarnation [returns to him], while the gods were asking for [all] their cult services.

l. 14) snm pw ir.n hm.f m hnw pr-‘3
What His Majesty did was to rest in the hnw pr-‘3, l. p. h.

However, we must consider here the ambiguity of the term pr-‘3 from the New Kingdom onwards, when it came to mean definitely the person of the “Pharaoh”, so that the hnw pr-‘3 could be also interpreted as the hnw of Thebes mentioned in line 12 belonging to the Pharaoh (pr-‘3).

Crucial sources for the reconstruction of the royal palace function are New Kingdom texts relating to the vizier, whose office was inevitably connected to the royal building. These documents consist mainly of inscriptions on the walls of the tombs of these officers in the form of King’s instructions to the vizier; they provide information on the role of the vizier profession, the chief civil function in the Egyptian state, but also more general advices on the administrative organization of Egypt in the New Kingdom. One of the most important versions of these texts is preserved in the 18th Dynasty Rḥ-mi-r”s tomb (TT 100 - B.II.33), and has been designated by the American scholar as the Duties of the Vizier.571 Parallel versions of the same text have been found in the 18th Dynasty tombs of ‘Imn-wsr(w) (TT 131)572 and ‘Imn-m-ipt (TT 29)573 and the 19th Dynasty tomb of P3-sr (TT 106).574

The starting expression of the instruction n the tomb of Ṛḫ-mi-rı contains the title īmy-r n niwt t3tı n niwt rst n ḫnw m ḥ3 n t3tı, “the overseer of the city, the vizier of the Southern City and of the ḫnw in the bureau of the vizier”. Reading The Duties, Van de Boorn examines the possibility of a double interpretation of the phrase. In the expression t3tı n niwt rst n ḫnw m ḥ3 n t3tı, 576 word ḫnw would have been used as a qualification of niwt rst, the whole sentence meaning “vizier of the southern city, in the bureau of the vizier”. 577 A second possibility of interpretation, according to which ḫnw would not equal Niwt rst, suggests the existence of two centers as residences of two vizier or one vizier connected to two towns. 578 The vizierate was divided into an Upper-Egyptian and a Lower Egyptian office in the New kingdom, no later than during the reign of Tuthmosis III. 579 The use of the term ḫnw to indicate a whole residence-city starts in the Middle Kingdom 580 when it often refers to Iṣjtawy in contrast with Niwt rst, used to define Thebes. 581 According to Van de Boorn, “in a 18th Dynasty context if niwt rst can only refer to Thebes, ḫnw only to Memphis”. 582 Van de Boorn considers the fact that Thebes is cited along with Memphis as a possible indication of the paramount position held by Thebes in the earliest part of the 18th Dynasty in comparison with its status in the late 18th-20th Dynasties. 583 There is an ample evidence pointing out that kings of the 18th Dynasty owned estates and palaces in Memphis. 584 According to Van de Boorn, 585 the picture emerging from this documentation is that, while Thebes held its strong foremost position, Memphis gradually became the second

572 PM I, 1: 45-46.
574 The texts starts with the expression tp-rd n īmy-r niwt t3tı n niwt rst n ḫnw m ḥ3 n t3tı, “Instructions for the session of the governor of the city, the vizier of the Southern and of the ḫnw in the bureau of the vizier”, in Van de Boorn 1989: 13, R1.
575 ibid.: 12, R1.
576 ibid.: 18.
577 Van de Boorn supports the hypothesis of two viziers reciprocally connected to the two major New Kingdom political centres: Thebes and Memphis. ibid.: 20.
578 Raven 2009: 157. According to more recent Egyptological research, it is likely that the division of the vizierate into a northern and a southern office may date back to the Middle Kingdom, in Raedler 2004: 284-5.
583 LÅ, IV: 28. Tuthmosis I moved his court to Memphis, where the palace he built was used 150 years later, in Redford 1967: 79. In the Restoration Decree of Tutankhamun carved on stele CG 34183 from Karnak, the king is said to be in pr-3.f imyt-pr ḫpr-k3-R, “his pr-3, estate of Thutmose I”: URK IV: 2028, 7, 2031, 15. Helck 1958: 5. Bennet 1939: 9. This palace and estate are later mentioned on a donation stele of Ay: hr 3ht pr ḫpr-k3-R, “in the field of the house of Thutmose I”, URK IV: 2109, 17.
administrative centre of Egypt between Thutmose and Hatshepsut/Thutmose III.\textsuperscript{586} The existence of a royal palace at Thebes is confirmed by written sources from the Middle Kingdom onwards.\textsuperscript{587}

The fragmentary inscription from the tomb of P3-sr at the time of Sety I may have reported the same opposition between the two terms, if integrated on the basis of Rḥ-mī-r’s Duties: [nt.f ir..nb] m niwt rswt [m hnw], [it is he who..every] in Thebes [and in the hnw] (B.11.33).

The same opposition between Nīwt rst and hnw is expressed in part R18 of the text where the petition to the vizier concerning “the fields” (ḥwkt) is recorded. The expression shows the opposition of two different locations of the fields, denoting the existence of two governmental centers.\textsuperscript{588}

R18, (.) ir swt ḫwkt.f nty tkn n niwt rst [n hnw]
ir.f wdf r.f hr hrw 3 m

R19, nṭt ṣ ḫp

But as for his fields that borders on the Southern City and the hnw, he makes to him a delay of (only) three days, according to the law.

The contrast between the two terms appears also in that section of the composition (R 23) referring to the army, mšr, which is described as staying behind the Southern City and in the hnw:

ntf iv r ḫr- m Ṣn Ṣn niwt rst m hnw ḫt ḫt m pr-

It is he who organizes the remainder of the army that stays behind in the Southern City and in the hnw according to what has been said in the pr-

It seems that the army was structurally divided in two groups, the term ḫr.\textsuperscript{589} indicating “the remaining part” of it. One section of this group stayed back in the Southern City and another one in the hnw, perhaps as a sort of urban garrison.\textsuperscript{590}

The usage of the term hnw to indicate not a specific royal building but the site of the royal residence itself can be noticed in Ramessid inscriptions where it serves as specification of the new city-palace Piramessu.

\textsuperscript{586} Memphis became the new centre of administration and military power under Thutmosis I, in Beckerath 1971: 36. It has been suggested that Thutmosis III spent most of the time in the North of Egypt, in Memphis, in Helck 1958: 5 and Helck 1960: 310.

\textsuperscript{587} See paragraph above: § 1.13.

\textsuperscript{588} For a different interpretation of the passage see Van de Boorn 1989: 162-163.

\textsuperscript{589} Wb III: 134, 8.

\textsuperscript{590} Van de Boorn 1989: 219.
In the decree of blessing Ptah upon Rameses II and III (B.I.54) the ḫnw is presented as settlement and governmental centre built to consolidate the borders of Lower Egypt.

\[
\text{ir.n.f ḫnw '3 špsī r nḥt t3š T3-mṛt pr R'-msw} \]

He had made an august ḫnw to strengthen the borders of Egypt: Piramesse

In a graffito of the royal messenger Nfr-ḥr from Abu Simbel (B.II.146), ḫnw is repeated twice, at first to indicate the position of the owner as scribe of the royal building, and then as specification of Piramesse:

\[
\text{ими-r ṣw m ḫnw n t3 ḫwt-R'-'ms-sw-mṛt-'lmn} \]

Overseer of the scribes in the ḫnw in the land of ḫnw

Turning our attention back to the starting expression in the tomb of ḫḥ-mūt-', the ḫ3 n t3ty, “the bureau of the vizier”\(^{591}\) at the end of the title t3ty n niwt rst n ḫnw,\(^{592}\) indicates a close relationship between the ḫ3 n t3ty and the ḫnw.\(^{593}\) Scenes in the tomb of ḫḥ-mūt-’ TT 100) and in the tomb of ’lmn-m-ipt (TT 29) represent a room which can be interpreted as the ḫ3 n t3ty.\(^{594}\) Considering the details of the scene in TT 29,\(^{595}\) it appears to have been a building with several rooms and a main reception or session hall. The office had its own personnel and it was used as a meeting-place between vizier and subordinate officials for receiving information, issuing instructions and dispatching officials,\(^{596}\) and as a store of vizier’s archives.\(^{597}\) The text does not provide any information about the specific location of the bureau of the vizier, which may have been located somewhere in the ḫnw or the pr-nswt. Departments explicitly related to the ḫnw are mentioned in parts R6 and R7 recording the vizier’s responsibility to report about the condition of the ḫnw:

\[
\text{R6, t3ty smi.f n imy-r ḫtm r dd} \]

Then the vizier shall report to the overseer of the treasury saying

\[
\text{R7, h3w.k nb 'd wd3 st nbt n ḫnw 'd [wd3} \]

“all your affairs are sound and prosperous, every department of the ḫnw is sound and prosperous.”

---

\(^{591}\) the noun ḫ3 is regularly used in the Middle and New Kingdom to denote the office of an official. FCD: 183. Wb III: 221-22.

\(^{592}\) Van de Boorn 1989: 12, R1.

\(^{593}\) Van de Boorn focuses on the relation of the ḫ3 n t3ty with the pr-nswt, in Van de Boorn 1989: 20.

\(^{594}\) The episode depicted on the east wall of the tomb illustrates the official functions of the vizier. The southernmost of these sections show the sitting of the vizier in a construction supported by two columns. In the ganway and outside this hall ushers are dealing with appellants or defaulting taxpayers, in Davies 1941: Pl. 24-5. Newberry 1900: 23.

\(^{595}\) “In Tomb 29 there is a considerable space behind the columned hall, enclosed by a wall, and here numbers of men are seated (…) This seems to imply that the hall had reception rooms behind it’, in Davies 1941: 32 n. 76

\(^{596}\) Van de Boorn 1989: R1, R9, R14, R24 and R36.

\(^{597}\) Ibid.: R27.
In his commentary to The Duties, Van de Boorn has stressed the variety of meanings that term st\textsuperscript{598} may acquire depending on the context from its generic sense of “throne, place”.\textsuperscript{599} In this particular passage it could be referred to some kind of service or department in charge of undefined governmental tasks, the st nbt n ħnw being translated by the author as “every department of the ħnw”.

Section from R3 to R8 of Rh-\textit{mi-r}’s tomb inscription describes the exchange of reports on the condition of the pr-nswt and the ħnw.

\textit{R3}, smi.tw n.f htm htmw r nw wn.st r nw smi.t(w) n.f hrt mnnww rs(w) mht(w) pr prrt nbt

To him one reports the closing of the enclosures on time and their opening on time. To him is reported the condition of the southern and northern guard posts. When everything that has to leave the pr-nswt leaves, (that) is reported to him. When everything that has to enter the pr-nswt enters, (that) is reported to him. As for everything that has to enter or leave the area of the ħnw it (lit. they) will leave and enter: it is his messenger who sees it that it leaves and enters.

Basing on information from R3-4, Van de Boorn assigns the responsibility of the pr-nswt to the vizier, while the treasurer would have been in charge of the ħnw.\textsuperscript{600} He notes that the traffic connected to the ħnw was dealt by a vizier’s messenger, whereas everything living and entering the pr-nswt was reported directly to the vizier without intermediaries.

However, the next passage of the text shows another sequence of events:

\textit{R5}, t3ty m wbn m p3 sb3 n rwty wrty ḫr

\textit{R6}, imy-r ḫtm ii.f m hs.f hnh’ smi.n.f r dd h3w.k nb ‘d w3d3 smi.n.i ḫr nb sšm r dd h3w.k nb ‘d w3d3 pr-nswt ‘d w3d3 ḫr t3ty smi.f n imy-r ḫtm r dd

Then the vizier shall move (in) from the east in the doorway of the great double-gate. The overseer of the treasury shall come to meet him and he shall report to him saying: all your affairs are sound and prosperous. Every responsible functionary has reported to me saying: all your affairs are sound and prosperous, pr-nswt is sound and prosperous. Then the vizier shall report to the overseer of the treasury saying “all your affairs are sound and prosperous, every department of the ħnw is sound and prosperous”.

---

\textsuperscript{598} GEG: Q1, 500.
\textsuperscript{599} Van de Boorn 1989: 69.
\textsuperscript{600} ibid.: 69.
At the door of the double gate (m p3 sb3) of the double gateway (rwty wrty) the treasurer reports to the vizier that the affairs of the pr-nswt are in order and the vizier reports to the treasurer that the affairs of the hnw are in order. As asserted by Lorton, “it can be noted that the vizier’s report concerning the Residence was not occasioned by the treasurer’s responsibility”. 601 The vizier’s responsibility on the hnw, more specifically on the organization of the remainder of the army that stays in it (hr-† wnn .. m hnw), seems confirmed by the aforementioned passage in R23.

Beyond the discussion about who was actually the “managing director” of the pr-nswt and the hnw, it is clear that both the treasurer and the vizier, one directly and the other indirectly, were in charge of both these institutions.

Considering those expressions where hnw is used in contrast with Niwst rst, Thebes, possibly referring to Memphis, or those where it is used as specification of Thebes itself or Piramesse, the term hnw would seem to refer to all the residence-cities rather than to a specific royal building. In some passages of the Rh-mi-r”s tomb, the hnw is depicted also as a physical complex whose incoming and outgoing traffic was indirectly controlled by the vizier. He had to organize the army that stayed in the Southern City and receive a daily report on st nbt n hnw, “every affair of the hnw”, according to what decided in the pr-nswt (B.II.33). From the previous discussion of the use of the term hnw in The Duties, the pr-nswt should be considered part of a wider institution, the hnw itself, comprehensive of it and other administrative departments. The membership of the pr-nswt to the hnw would seem to be contradicted by the compound hnw pr-nswt used in some private titles, such as the ss nswt m hnw pr-nswt, “scribe of the hnw of the pr-nswt” (B.I.91) mentioned in the Onomasticon of ‘Imn-m-ipt. The two terms can be linked by the n preposition and once by the nisba imy, “being in”. In this occasion the common translation of “interior”, “inside”602 for hnw seems to be the most appropriate, referring to the inner section of the pr-nswt itself.

Interpretation of word hnw as city-residence would help to clarify the expression in Hatshepsut’s inscription from Deir el-Bahari mentioning the expedition to Pwnt, where the Queen states as follows (B.I.12):

l. 14) smnt.n.f Pwnt m hnw.f She made Pwnt established in his hnw

602 GEG: §178. The hnw as “interior” is also used to create the compound preposition m hnw (n), “ in the interior of”. 
With the use of the causative verb *smt* in this passage, Hatshepsut seems to allude to the annexation of *Pwnt* to the Egyptian administration and consequently to the *hnw* as an administrative entity in the broadest sense of the word.

2.9 The term *hnw* in titles and epithets

The private titles compounds with *hnw* are rare with some exceptions such as *imy-r hnw* in the titling of *Sn-n-Mwt* (TT 71 – B.II.41) and few others. The scarcity of such titles is probably not due to accidents of preservations, but rather to the nature of the word *hnw*. We have encountered above the concept that *hnw* was not an architectural unity with specific functions, but rather seems to have been a widest institution coinciding with the residential or the administrative city.

The aforementioned *imy-r hnw* is the sole title, which seems to be linked to the administration of the *hnw*, even if it does not recall any specific responsibility of the owner. It is not known what the actual function of this position was, or to what extent it was merely honorary.

In some New Kingdom private title the *hnw* appears in connection with administrative roles and economic operations. Its use as an element in scribal titles shows that it may have been closely linked to the central administration. As already noted above, vizier *Rḫ-mi-r‘* claims the office of *t3ty n niwt rst n hnw*, “vizier of the Southern City and of the *hnw*”, the *hnw* meaning another city as opposed to Thebes (*niwt rst*), probably to be identified with Memphis.

2.10 The term *stp-s3* in official monuments and narrative inscriptions

The compound *stp-s3* is unique among the five words used for “palace” because it can be used both as verbal expression and noun.607 When used in verbal compounds in New Kingdom texts, it is written without the *pr*-determinative and it usually means “to protect”, “to escort”, 608 recalling the most frequent usage of the term in the Old Kingdom.609

The term *stp-s3*, enriched with the adding of the *pr*-sign as determinative from the early 12th Dynasty onwards, is object of another important change starting from the New Kingdom: the expression ‘*nh wd3 snb*’610 is frequently added after the word with the beginning of the 18th Dynasty.611

A number of instances of the term *stp-s3* in narrative passages in official and private inscriptions involves the prepositional phrase *m stp-s3* in conjunction with such verbs as *dd*, “to speak” and *wd*, “to order” in expressions which suppose the king’s decision-making process:612

---

608 Examples of the term *pr-*‘3 with verbal meaning have not been included in the catalog. For instances of this kind of usage of the word see Goelet 1982: notes 60-61.
609 ibid.: 443-444.
610 A general discussion of the use of this expression and its close relation to the king can be found in GEG: 239, § 313.
611 Goelet 1986: 95.
612 ibid.: 97.

The donation stele of Queen Ahmose Nefertari (B.I.3) records her appointment as Second Priest of Amun during the reign of king Ahmose. The opening section describes the decision-making process to give the office of Second Priest of Amun to Nefertari according
to “what was said m ḫm stp-s3 on this day”, ḏḏḏ t ḫm n stp-s3 ‘nḫ ḏḏ3 snb m ḫrw, “in the presence of the councillors of the territory of Thebes and the temple priesthood of Amun”, m-ḇ3ḥ [knbtwyw] nw s3tw niwṭ wnt nw s3tw niwṭ wnt hwt-nṯr nt ‘lmn.

Text referring to the expedition to Pwnt on the middle colonnade of the southern wall of the Temple of Deir el-Bahari (B.I.12) describes the ceremony commissioned by Hatshepsut in honour of Amun, during which all the goods from Pwnt would have been brought before the god. In this section Hatshepsut asks the consult of Amun, who speaks to the Queen as if it was before the expedition had taken place:

\[spr \ ḫm \ n \ stp-s3 \ ‘nḫ \ ḏḏ3 \ snb \ r \ rwd \ n \ nb \ nṯrw \ sḏm \ ḏḏ m \ st-wrt \ nḏwt-r3 \ nt \ nṯr \ ds \ f \ ḏr \ w3wt \ r \ Pwnt\]

Petition of the Majesty of the stp-s3, l. p. h. to the stairs of the Lord of the gods and instructions were heard from the great throne, an oracle from the god himself: “explore the routes to Pwnt (…)”

In the following section, after having presented the goods of Pwnt to Amun, a royal audience which took place to announce the succession of the mission to Pwnt to the courtiers is described:

\[rnpt \ 9 \ ḫpr \ hmst \ m \ ḏḏ3w \ ḫ(t) \ nswt \ m \ sḏmty \ hr \ st \ wrt \ nt \ ḏ’m \ ḫnw \ ḏsrw \ nw \ ‘ḫ.f \ stp-s3 \ srw \ smrw \ nw \ stp-s3 \ r \ sḏm \ sḏm \ n \ ḏḏ\]

In the 9\textsuperscript{th} year the Queen was in the audience hall; appearance of the king in the double crown on the great throne of gold in the holy ḫnw of his ‘ḥ; walk of officials and courtiers of the stp-s3 to hear the guide of the command.

In the same section there are representations of three men who were present at a sort of meeting in which palace business was discussed and organized.\(^{613}\) Two men have the same inscription above them (nswt špsw srw nw stp-s3 ‘nḫ ḏḏ3 snb, “Dignitaries and officials of the stp-s3, l. p. h.”), while the caption accompanying a third man makes reference to the royal command n stp-s3, l. p. h. to send army to Pwnt:

\[ist \ ḏḏ \ nt(w) \ m \ ḫm \ n \ stp-s3 \ ‘nḫ \ ḏḏ3 \ snb \ n \ r^p-‘t \ ḫ3ty-T \ nswt \ ḫtmw \ smrw \ w’ty \ imy-r \ ḫtmw \ Nḥsy \ r \ sḏl(t) \ mš3 \ [r] \ Pwnt\]

Command of the Majesty in the stp-s3, l. p. h. to the Hereditary prince, Mayor, sealer of the king, sole companion and sealer Nḥsy to send army to Pwnt

\(^{613}\) Shaw 2010: 186.
Shaw states that “in this case it would seem right to consider the entire audience taking place as stp-s3 – a meeting in which palace business as royal service was discussed and organized”.

An inscription from Semna (A.I.8), on the exterior face of the east wall of the temple of Ddwn, dated to the second regnal year of Thutmose III, records the royal order to the Overseer of the Southern Land (Nubia) to guarantee offerings to all the gods of the temple. The titling of the king is followed immediately by the expression ddt m hm n stp-s3 ‘nh wd3 snb, “what was said m hm n stp-s3, l. p. h.”

In the section of the Annals of Thutmose III (B.I.6) where the stop of the army at the town of Yehem is described, a consultation (ngwt-r) took place between the king and his “victorious army” in order to discuss which road to take to the city. The final decision is introduced by the formula “what was said m hm n stp-s3” and consisted in proceeding to the Aruna road. Using the example of Thutmose III’s use of term stp-s3 in the Annals, Goelet has suggested that the stp-s3 may mean a temporary residence and that it could refer to a movable royal building, such as a “council tent”, since this event occurred beyond the borders of Egypt.

The stp-s3 is again presented in relation to a royal decision in the Nauri Decree of Sety I (B.I.33), reporting a series of regulations concerning the king’s temple at Abydos. The contents of the decree begin with a variation of the aforementioned most common expression and it is addressed to all the officials and high authorities of the royal sphere:

\[ \text{ddt w3d(t) 3wy.tw m hm n stp-s3 ‘nh wd3 snb m} \]

A decree (which was) issued m hm n stp-s3, l. p. hrw pn h. on this day

A text found at Elephantine (B.I.58) and dated back to the reign of Rameses III follows a pattern similar to that of Sety I’s Nauri decree and is presented again as a command that was issued (3wy.tw) m hm n stp-s3, l. p. h. It is likely that the text would contain regulations made for the temple of Khnum at Elephantine.

Another Ramessid example is represented by stele MMA 54.185 from the reign of Rameses II recording endowments for the Ramesseum (B.I.46). A long list of items is followed by the

---

614 Ibid.: 186.
615 URK IV: 651, 1-6.
617 Shaw 2010: 188.
expression *ddwt m hm stp-s3 m hrw pn*, “what was said before the Majesty of the *stp-s3* on this day” referring to the royal command of bringing offerings from the temple of Amun-Ra.

During a royal audience, the courtiers tell to Thutmose III “how perfect is this speech that was said before us, which we have heard in the *stp-s3*, l. p. h.” (B.I.4), suggesting that the orders were not only drawn up in the *stp-s3*, but they were also approved by the high officials in the presence of the king; this makes suppose that some kind of consultative function was involved in the *stp-s3* itself.\(^618\)

According to Goelet, being the king involved in this decision-process - as suggested by the expression *m hm n stp-s3* - these passages could refer to some kind of royal council were affairs of state were discussed.\(^619\) In a recent article, Garry J. Shaw has discussed the proper meaning of the phrase *m hm n stp-s3* by comparing all the examples I have listed before, proposing a re-reading of the expression. He assumes that the *hm* element does not refer to the physical person of the king because “although the king is explicitly cited as the source of some speeches and commands made *m hm n stp-s3*, it would appear that acts could be performed *m hm n stp-s3* on the primary authority of courtiers. (...) It would thus appear that commands and directives could be issued by official performing *stp-s3* in order to realize royal desire, and that the king might only be consulted for permission”.\(^620\) The focus of the discussion is whether the meaning of *stp-s3* would have truly evolved to mean a physical palace during the Middle Kingdom and afterwards, or whether it should be considered a type of activity, specifically a *stp-s3* “service” in Shaw’s definition.\(^621\) It must be noted that in most New Kingdom examples the use of term *stp-s3* suggests the meaning of some form of body court, committee, or royal meeting. Such a meeting between the king and the courtiers must have taken place in a physical location giving origin to the *stp-s3* as place with a *pr*-determinative. The most significant examples from which a “palace”-meaning can be assumed are those implying a physical movement of persons and things, such as in the context of gift-giving and exchange of products from foreign countries. In the section of Gebel Barkal stele of Thutmose III (B.I.8) describing the delivery of Nubian taxes it is stated as follows:

\(^619\) Goelet 1986: 97.
\(^620\) Shaw 2010: 189.
\(^621\) *Ibid.*: 189.
There were built there for stp-s3, l. p. h., each and every day ḥmtyw-ships and many ḫ’w-ships, more then there are crews of sailors in addition to the tributes […] the bedouin of Asia in ivory and ebony.

The passage of the same text referring to D3ḥy in the Levant describes the delivery of Lebanese wood and other precious goods to the stp-s3.

There is hewn for me in D3ḥy each and every year consisting of real ‘ṣ-wood of Lebanon

All the princes of Lebanon […] the royal ships, to travel south therein, to fetch all kinds of precious goods […] the southern land, to stp-s3 (l. p. h.).

Hatshepsut’s inscription from Deir el-Bahari (B.I.12) mentions the royal order to offer gifts m stp-s3 ‘nut wnd3 snb to the chiefs and gods of Pwnt:

Arrival by the envoy of the king in the God’s Land together with the expedition who was accompanying him before the princes of Pwnt. Bringing of every good thing from the stp-s3 (l. p. h.) to Hathor, mistress of Pwnt, for the life, prosperity and health of Her Majesty.

2.11 The term stp-s3 in titles and epithets

As far as the usage of the term stp-s3 in epithets is concerned, the word becomes frequently used in expressions connected in some manner with verb ḥsi, “to praise/to favor”, 622 as shown by the following phrases:

| stp-s3 in verbal compounds with verb ḥsi, “to praise/to favor” |
|-----------------|---------------------|-----------------|-----------------|
| pr(w) (m) ḥsi/ḥsw m stp-s3 ‘nut wnd3 snb | One who comes forth praises/favors from the stp-s3, l. p. h. | P3-nw-ny (Thut. III) | Turin (a) | B.II.12 |

Since the Middle Kingdom onwards people could be described as “beloved m stp-s3” or “favored m stp-s3”. All these expressions show the stp-s3 as a place or a group of people

---

624 See paragraph above: § 1.12.
from which the title owner had to get approval. Whether a ceremonial bestowal would take place on specific occasions before the king and an audience of high officials is not clear.\footnote{Goelet 1986: 96.}

The interpretation of the stp-s3 as a councilor body rather than as a physical place is suggested by the causative verb shri, “to make content” in the expression r3 shri m stp-s3, “mouth that made stp-s3 content” on the statue of Mr pr wr ‘lmn-ḥtp from Memphis (B.II.168).\footnote{GEG: 579. Wb II: 496-7.}

People called smrw, “companions”, w’, “the only one” or wrw, “great ones” are connected with the stp-s3 in titles such as the following:

<table>
<thead>
<tr>
<th>smrw, “companions”/wrw, “great ones” + stp-s3</th>
</tr>
</thead>
<tbody>
<tr>
<td>iw.f wty n stp-s3 ‘nh wd3 snb</td>

Examples referring to the decision-making process are known even in private inscriptions employing variants of the expressions wddt m stp-s3, “what was ordered in the stp-s3” or dddt m stp-s3, “what was said in the stp-s3” already mentioned as regards narrative texts.\(^{631}\) In his statue CG 579 from the temple of Mut (B.II.47) Sn-n-Mwt reminds to have completed some kind of works (k3wt), clearly related to temples construction, “in accord with what was commanded stp-s3, l. p. h.”

l. 8) s3w smnhw
l. 9) k3wt sn sh hr m i wgt m stp-s3 nh wd3 snb
w.d.n.f wnn [hr s.]
l. 10) n ‘3t mnfb f hr-hb hpr n m(l) wdt ‘k3w mnf m i rt m l ib n t bm.f r.s

One who makes the works great and excellent.
(I’m) not deaf to what was commanded in the stp-s3, l. p. h. It was commanded to me to be [on account]
of the greatness of his excellent in the heart. One excellent in acting in accord with the desire of His Majesty over it.

A reference to a command made in the stp-s3, this time by Sn-n-Mwt himself, comes from the inscription on the south wall of the axial corridor in his Theban tomb no. 71 (B.II.41):

---

\(^{629}\) Hoffmeier has argued that term d5rw could be intended as a throne room, see Hoffmeier 1985: 177 ff. For a recent interpretation of the term see Hirsh 2009: 75-6.

\(^{630}\) Also the Queen Hatshepsut is described while approaching to the stp-s3 in her inscription from Deir el-Bahari on the expedition to Pwnt (B.I.12). See paragraph above: § 2.10.

\(^{631}\) Goelet 1986: 97.
What is in the heart is spoken to me, what is [hidden] is revealed to me. I commanded in the stp-s3, l. p. h., planning the desire of her Majesty to build.

This passage offers an example of a private individual taking responsibility for commands made in the stp-s3, l. p. h. and it is probably due to Sn-n-Mwt’s exceptional position under Hatshepsut. 632

A kneeling statue dated to the reign of Thutmose III records the return of its owner Nfr-prt-r’ from Syria (CG 42121 - B.II.12), from where he brought away several goods in order to offer them to the mortuary temple of Thutmose III. The text records the decision made m ḫm n stp-s3 allowing Nfr-prt-r’ to continue tending his herd after the expedition abroad:

l. 14) ’ḳ hr.s ʾmy-r rwty Nb-sny ʾl ḫr.s sš nswt
The overseer of the gateway Nb-sny entered concerning it; and the royal scribe
l. 15) ’lmn-ms ddāt m ḫm n stp-s3 ’lmn-ms came concerning it. What was said before the Majesty of the stp-s3
l. 16) ’nḥ wd3 snb ʾlw.sn r ḫt.k m hrw.k
l. 17) n ’nḥ ir m ḫt l3w.n.k
l. 18) ʾlw.sn m s3 n s3 ʾlw’
I. p. h. “They shall be under your authority through your days of life. As for after you have attained old age, they shall be from son to son, heir
to heir. Do not give them to the ḫnw, (that is) the overseer of the cattle.
As for anyone who shall come to claim, do not allow them to be heard in any office of the king.

As regards this text, Garry J. Shaw has recently stressed that the decision m ḫm n stp-s3 is recorded without any explicit reference to an action made by the king in the text and has used this inscription as example to support his re-interpretation of the expression m ḫm n stp-s3: according to him, the term ḫm would not refer to the king, but rather to “an act of stp-s3 “service” performed by officials in order to realize royal desire. 633 The statement recorded in the text would seem to have been made before two officials: the overseer of the gateway (ʾmy-r rwty) Nb-sny and the royal scribe (sš nswt) ’lmn-ms. However, the context of the text does not allow to determine whether the case of Nfr-prt-r’ was brought before the king himself or not. 634

632 Shaw 2010: 182.
633 ibid.: 188.
634 The idea that a royal proclamation had been issued is firmly supported by Redford 2003: 166 no. 9, 167.
In tomb TT 90 (B.II.58) Nb-‘Immn’s promotion to Chief of Police is presented as “a command issued (w3d(t)-3w) m hm n stp-s3, l. p. h.”:

Year 6.
A command issued in the Majesty of the stp-s3 l. p. h. on this day to the mayor, commander of the fleet of southern and northern Egypt. The command as said: “My Majesty, l. p. h., has commanded the receiving of a good old age in favors [before] the king, in order to settle the affairs of the Standard-bearer Nb[-‘Immn] of the king’s boats Beloved of [Amun]”. He reached the old age, he is on following the pr-‘3, l. p. h. (and) his rectitude.

Considering the available sources from a chronological point of view, it is possible to observe a progressive decrease in the frequency of usage of the term starting from the Ramessid Period onwards.

2.12 The palaces at Karnak, Memphis and Piramesse

References to a palace of Karnak, frequently named as ‘h n ‘lpt-Swt, are really common in the texts of the New Kingdom and the Late Period. These documents can be divided in two groups: those referring to the palace as royal residence, used to host the king visiting the western side of Thebes for a short or long stay-term, which are mainly dated back to the reign of Hatshepsut; and those mentioning the palace as a religious building, a temple or a chapel, used as place for ceremonies of the royal ritual.

Textual evidence from the time of Hatshepsut and Thutmose III clearly locates the official Theban palace on the western bank of the Nile, across from Karnak, in the hillside of Dra Abu el-Naga and Taref. Thutmose III was crowned at Thebes (h’?) and a d3dw n imy wrt, an “audience” taking place “in the West”, is attested at the time of Thutmose III and

---

636 In Horemheb’s decree Amun is said to have placed the crown on Horemheb’s head in the ‘h of Thebes; “it is clear that a temple, not a dwelling-place of an earthly king was the scene of the actual coronation”, in Gardner 1953: 25.
637 Stadelmann 2001: 15.
Hatshepsut in inscriptions from the Festival Hall of Karnak\(^{638}\) (B.I.5) and Deir-el-Bahari (B.I.11), in the last one explicitly connected to the term ‘\(h\).\(^{639}\) Similarly, Amenhotep III ordered an expedition to Sinai while he was in the southern city in his palace of Thebes (\(W3st\)): \(n\ niwt\ rst\ [m\ ‘h\ fr\ itmy]\ wrt\ n\ W3st\).\(^{640}\)

The frequent location of the palace \(n\ itmy\ wrt\), “on the west” has been used by Egyptological literature as the strongest argument for locating the royal building on the west bank of the Nile.\(^{641}\) However, this is not the only possible interpretation of the phrase, which could instead simply mean that the palace was located west of the Karnak temple.\(^{642}\) Other scholars in fact prefer an east location for the Theban palace, near the principal temple of Amun-Ra at Karnak.\(^{643}\)

The Coronation Text of Hatshepsut (B.I.9), carved on the blocks of the Red Chapel found in the third pylon of the temple of Karnak, cites many times the ‘\(h\ nswt\, “the palace of the king” with the name \(nn\ w3l\-rf\). This document has a parallel in the more ruined inscription of Deir el-Bahari (B.I.10).\(^{644}\) The lost beginning of the Coronation Text was probably about the oracular exit of the Amun’s boat introducing in the context of a ceremonial event.\(^{645}\)

The following part of the text mentions the ‘\(h\)-palace:

\[
\text{spr}\ hmf\ r\ tp\ itrw\ hr\ by3y.t\ ‘3t\ wrt\ r\ sb3wy}\ n\ ‘h\ nswt\ nty\ hr\ gs\ n\ hrt\ wdbw
\]

His Majesty arrives to the head of the river for a very big oracle to the double gates of the ‘\(h\ of the king which is on the side of the road of the offerings.\(^{646}\)

According to Gitton, the expression “head of the river” (\(tp\ itrw\)) refers to the T-shaped basin, which served to moor the god’s boat and should have been aligned with the temple

---

\(^{638}\) Inscription on blocks from the Festival Hall at Karnak reporting acknowledgements of Thutmose III to Amun for the great victory accorded to him at Megiddo. The date (“Regnal Year after 23, first month of Summer, day 2”) is followed by the words: \(hpr\ hmsn\ nswt\ m\ d3dw\ [n\ itmy]\ wrt\), “there occurred a sitting of the king in the audience hall of the West”. Gardiner 1952a: 9, Pl. II. See also the inscriptions from the tomb no. 131 of the vizier Wsr in URK IV: 1380, 15.

\(^{639}\) \(hpr\ hmsn\ nswt\ sdnM\ d3dw\ n\ itmy\ wrt\), “there occurred a sitting of the king in the audience hall of the West” (B.I.12, ll. 8-9), in URK IV: 256, 17; 349, 10.

\(^{640}\) URK IV: 1891, 6.

\(^{642}\) Redford 1973: 89. See also O’Connor’s discussion on meaning of \(n\ itmy\ wrt\) in O’Connor 1995: 275.

\(^{644}\) Lacau - Chevrier 1977-79: §162-163.

\(^{646}\) See the French translation: “Sa Majesté (le dieu) arrive à la «Tête-du-Canal», en rendant un très grand oracle en direction de la double porte du palais royal qui est sur le bord de la route des offrandes”, in Gitton 1974: 64.
of Amun. The “road of the offerings” should have been the way crossing from the quay to the temple entrance.

A second mention of the palace is contained in another passage of the text with reference to Hatshepsut making oracles at the entrance of the 'h:

\[ \text{wn in hm nb r dgr sbd n.br.f r l3bt hr by3.t r sb3wy imnt 'h n wsFt nt nn w3t r.f nty hr m3' n tp itrw in rs nbt t3wy m hnw dsrw nw 'h.s} \]

The Majesty of the Lord of the Universe had his head inclined to the east making an oracle to the western double gate of the 'h in the hall nt nn w3t r.f nty hr m3' which is on the bank of the head of the river. The Lady of the Two Lands came from inside the splendors of her 'h.

This section cites a second double gate other than the one hr gs n hrt wdhw, “on the side of the road of the offerings” mentioned above and locates it hr m3’ n tp itrw, “on the bank of a river”. The nbt t3wy, a title quite certainly referred to Hatshepsut, is described while coming from the private interior of her 'h. It is likely that the dsrw of the palace was a specific room within the building where the bark of Amun stationed during its procession. The same expression dsrw hnw 'h can be found in another text of the Queen recording the expedition to Pwn in her 9th year of reign, where the appearance of the king with the Atef-crown on the throne of electrum within the dsrt of the palace is described (B.I.12). The expression ‘h (n) wsFt.f, indicating “the hall of the palace”, should be referred to a particular section of the ‘h which could be compared to the ‘ht n wsFt in the palace of Medinet Habu (B.I.56), probably referring to the court of the temple which served as place of king’s apparitions.

After a long passage a third section refers again to the palace as follows:

\[ \text{spr hm.f r hgd sps rwtw wrty n nbt t3wy st is nswt sms r hwt nt 'imn 'k hm.f r hnt(y) 'h n nn w3i-r.f pr 'imn} \]

His Majesty arrives to the venerable chapel, and (?) the double great gate of the Lady of the Two Lands for the establishment of the royal escort to the temple of Amun. His Majesty (the god) enters into the front of the palace named nn w3i-r.f,

---

647 The original T-shaped basin must have been aligned with the Amun temple as that preserved which was built later by Sheshonq II. Gitton 1974: 64.
648 Ibid.: 66.
649 Ibid.: 68.
650 The same expression is used also in another text of the same period and from the same site: m hnw (without the pr-determinative) dsrw 'h.f, in URK IV: 349, 12. See Gitton 1974: 69.
651 Hirsch 2009:75.
652 URK IV: 349, 12.
According to Gitton, there is no doubt that the double great gate of the Lady of the Two Lands is the gate to the ‘ḥ (rwty wnty n nbt t3wy) through which the ending procession reenters to the palace. The specification pr ‘lmn lets assume that the ‘ḥ was intended more as religious or ceremonial building rather than as a “secular” one.

That described in the text seems a building owned by the Queen before taking power, probably inherited from his father; the name does not make allusion to any king and it only marks the closeness the ‘ḥ to the temple of Amun. The structure built within the enclosure of Amun, m pr-‘lmn, in front of the temple, along the access road, and was equipped with a court (wsḥt). A first entry was located in the axial path connecting the door of the IV pylon to the T-shaped basin, where the Amun boat arrived; it was the so called “double gate of the Lady of the Two Lands” and was probably located on the northern side of the dromos. A second access to the building was oriented to the river. Considering its position on the left side of the access of the Temple, the palace of Karnak should have been very similar to the so-called Million-Years Palaces of the 19th Dynasty. The exact location of the building and its dimensions are unknown, but they could be reconstructed on the basis of a comparison with other structures of this kind.

From a chronological point of view, Hatshepsut’s building would have fallen into disuse at the end of the 18th Dynasty, when Amenhotep III began the construction of the 3rd Pylon, which would have hindered the entry to the structure.

Regarding the function of this building, its connection with the procession of the Amun boat lets suppose a ritual use on occasion of specific ceremonies, during which it could have served to host the king as temporary residence.

The existence of a ‘ḥ n ‘lpt-Swt at the time of Amenhotep II is certified by a pink granite stele found by Maurice Pillet in 1924 in front of the 8th Pylon of Karnak offered by

---

654 The term “gate” is here expressed by the term rwty and not sb3wy, which suggests a monumental access to the ‘ḥ. Ibid.: 70.
655 The expression Nn w3i l.r.f is determined by the god image.
656 For the interpretation of the function of the wsḥt in ancient Egyptian temple architecture see Spencer 1987: 77-8.
657 We cannot rebuild if the access to the palace was in the northern or the southern side of the dromos, but the first possibility is the most probable, in Gitton 1976: 71.
659 See below the chapter dedicated to the archaeological recognition of the ‘ḥ-palace.
Amenhotep II to Amun and restored by Sety I (B.I.14).\textsuperscript{660} The inscription of the lower register refers to Amun as \textit{nfr R' mity t\={t}} \textit{\=sr nb ntrw nsys R' m 'ipt-Swt}: “good god like Ra, holy image of all the gods...the kingship of Ra in the ‘h of Karnak”\textsuperscript{661}

A passage of the Knossos stele reporting Thutmose IV’s Nubian campaign tells about the staying of the king “in the City of the South (Thebes) at the town of Karnak”: \textit{ist \=hm.f m niwt rst r dmi n ‘ipt-Swt}.\textsuperscript{662}

The palace of Amenhotep III in southwestern Thebes was called \textit{Pr-Nb-m3't-R'\\=Thn(w)-'Itn}, “House of \textit{Nb-m3't-R'R'-is}-the-Splendor-of-Aten”,\textsuperscript{663} generally shortened to \textit{Pr-\\=Thn(w)-'Itn}, “House of Splendor of Aten”\textsuperscript{664} or simply to \textit{\\=Thn(w)-'Itn}, “Splendor of Aten”.\textsuperscript{665} It is usually suggested that this palace was the one found at Malkata, on the west bank of the Nile.\textsuperscript{666} However, a new name for the Theban palace, \textit{Pr-h'y}, “The House of Rejoicing”, appears since the regnal year 30 of the king.\textsuperscript{667} This is the title given to the Malkata palace as shown by numerous stamped bricks discovered in the palace area. Since no such bricks occurred \textit{in situ} bringing the name \textit{Pr-Nb-m3't-R'R'\\=Thn(w)-'Itn} it is likely that the latter palace was another royal building located just north-west of Karnak.\textsuperscript{668} Immediately following Amenhotep III’s death, the name of his Karnak-palace seems to have been changed by his son to \textit{P3-B\\=hn-h'y-m-\\=bht}, “(Akhenaten) rejoices in the Horizon of the Sun-disk”.\textsuperscript{669} The palace near Karnak continued to be used by Akhenaten in his first year of reign,\textsuperscript{670} according to Hayes, the king was residing here when he received the first of a series of

\textsuperscript{660} Piller 1924: 78-79.
\textsuperscript{661} Lefebvre 1924: 143, line 2.
\textsuperscript{662} URK IV: 1545, 7.
\textsuperscript{663} Hayes 1951: 178. See the title of \textit{Nfr-shrw: imy-r m Pr-Nb-m3't-R'R'\\=Thn(w)-'Itn}, in Wolf 1924: 110-11. Gauthier: 1925-31; 92. A variant of the name is contained in a jar label from the palace itself giving the name \textit{\=pr-\\=imn-htp-\\=Thn(w)-'Itn}, in Hayes 1951: fig. 6, type 45.
\textsuperscript{665} Hayes 1951: 178. Le grain 1903a: 145, nos. 12, 14; inscription on a jar topping and an ostracon from Tell el-Amarna in Peet – Wolley 1923-1951, II: Pl. 57 F, 58 15; inscriptions on jar labels from the palace area in Hayes 1951, fig. 5, type 21, fig. 9, type 108 and jar-sealing in Hayes 1951: fig. 27, type HH. In one instance the element \textit{pr}, “house”, is replaced by \textit{niwt}, “town (of)”, in Le grain 1903a: 145, no. 10.
\textsuperscript{667} It is not possible to state whether \textit{\\=Thn(w)-'Itn} was abandoned in favor of the new \textit{Pr-h'y} or whether the two names existed together, Hayes 1951: 179.
\textsuperscript{668} The identification of the \textit{Pr-Nb-m3't-R'R'\\=Thn(w)-'Itn} with a Theban palace other than the Malkata complex and its location at the north-western side of Karnak temple has been suggested by O’Connor (O’Connor 1980: 1175. O’Connor 1991. O’Connor 1995: 276).
\textsuperscript{670} According to O’Connor, Amenhotep IV would have continued to use his father’s palace near Karnak and not the one at Malkata. See O’Connor 1995: 277.
letters written to him by the King Tushratta of Mitanni. Like Hatshepsut’s palace, the royal complex of Amenhoptep III at Karnak would have been used by the king and his son as the primary focus for royal ceremonies somehow related to the Karnak temple. The other royal building at Malkata would have had a clearly residential function for long-term staying of the king at Thebes, but it also included large-scale ceremonial areas. It was certainly the setting for some aspect of the Sed-festival ceremony that Amenhoptep III celebrated three times during his last years of rule. According to this interpretation, Amenhoptep III may have had a palace at Karnak and another at Malkata and it is possible that more palaces other than the main one located near Karnak were in use at Thebes before and after his reign.

A Theban palace should have been the set of Horemheb’s coronation described in the inscription at the back of the king’s statue in the Turin Museum (B.I.26). This text describes the proceeding of Amun and Horemheb to the pr-nswt (II. 15-17), until they came to the pr-wr of Amun’s daughter, the Great of Magic who, having greeted the king, established herself on his forehead. After this passage Amun is mentioned while placing the crown on Horemheb’s head in the ‘ḥ (I. 17). Again it is from the pr-nswt that Amun issued forth (II. 19-20) when religious ceremonies were at an end probably to reenter into the temple of Luxor (the event is not explicitly described, it can be supposed by the Opet festival setting). A royal building called repeatedly pr-nswt and once ‘ḥ (B.I.25, I. 17), was the place of the actual coronation and was located in Thebes; whether it was physically connected to the temple of Karnak or to the temple of Luxor is uncertain but it was surely used at the annual ‘ḫpt festival which consisted of the procession of Amun-Ra and the king, respectively from the temple and the palace of Karnak, to Luxor. Horemheb’s decree (B.I.26), another

---

673 O’Connor 1995: 279.

674 The city is cited in relation to the festival of Southern Opet: Gardiner 1953: pl. 2, l. 13-14, 22.

676 According to Gardiner the probabilities point to the temple of Luxor. As the purpose of the Opet Festival was to conduct Amun-Ra to his Southern Harim, that of Luxor could be part of the palace, the pr-nswt or the ‘ḥ, cited in the text, in Gardiner 1953: 25. However, in the palace mentioned in his Coronation text, Horemheb undergoes essentially the same ceremonies as those performed by Hatshepsut in her Karnak palace. Basing on such considerations, O’Connor assumes that the palace
official document of the king, makes reference to a similar ceremonial occasion: the 5th paragraph of the text, dedicated to the abolition of the contribution to the supply of royal docks introduced by Thutmose III on the occasion of the Sed-festival, informs us about royal visits of the kings to Thebes for ceremonial purposes.\textsuperscript{677}

Visits of the kings to Thebes for religious reasons are known since the beginning of the 18th Dynasty. The fragmentary text on a stele erected by Pharaoh Ahmose in the temple of Karnak records a trip of the king to Thebes and perhaps more specifically to the Temple of Karnak in his 1\textsuperscript{st} regnal year, shortly after his coronation.\textsuperscript{678} Detailing the king’s activities in Thebes, the stele (B.I.2) mentions an offering-ceremony and the reentry of the processional image of Amun into the temple,\textsuperscript{679} suggesting that the occasion of the king’s visit was a procession of the divine image and perhaps also other simulacra of other Theban gods. The content of the final section is uncertain, but it probably involved mention of the Pharaoh’s return from Thebes to his residence.\textsuperscript{680} The second section is dedicated to the description of a rainstorm that hit the country, after which the king returned to Thebes to order restoration of all the monuments fallen into ruin at the presence of Amun.\textsuperscript{681} The final passage of the text begins with the king’s return to the \textit{h}nw pr-‘3 (B.I.2).

of Horemheb would have been the palace at Karnak, to where Amun-Ra and the king re-enter leaving the palace at the end of the festival, in O’Connor 1995: 278.

\textsuperscript{677} Kruchten 1981: 109-114.

For though his incarnation had settled in the harbor town of “Provisioner of the Two Lands” of the South, [Amun-Ra, Lord of the thrones of the Two Lands] was in Thebes’. Wiener – Allen 1998: 17.

\textsuperscript{679} I.l. 3-5) [wn.in hm.f \textit{hnt} r [d\textit{it} n.f …] w\textit{b} h\textit{r} m h\textit{t} t3 ‘3[bt. s\textit{n} h\textit{r} di.t\textit{w} h\textit{r} m[.] pn ist grt s\textit{s}m […] h\textit{w}.f h\textit{nm} m r-pr pn “His Incarnation sailed upstream [to give him] a pure offering. After this offer[ing-ceremony .th]em, and they were put on the […] this [nome], while the processional image […] his body united with his temple, his limbs in joy”. These clauses evidently refer to the procession of the “processional image” (s\textit{s}m) of Amun. The clause \textit{h’w}.f h\textit{nm} m r-pr pn, “his body united with his temple” probably describes the god’s entry into Karnak, in Wiener – Allen 1998: 8.

\textsuperscript{680} The expression (I. 5) ‘\textit{w’t}.f h\textit{r} r\textit{swt} wn.in hm.f h\textit{r} h\textit{nw} pr-‘3 ‘n\textit{h} (\textit{wld}3 s\textit{nb}), “[Then his incarnation sailed downstream to the \textit{h}nw pr-‘3, l. p. h.]” is a restoration suggested by Wiener – Allen 1998: 8-9. The first section of the text (I.l. 1-3) with the mention of the king’s designation in 1.2 suggests that Ahmose had been crowned outside, “south of Dendera” (\textit{rsw int}), perhaps in one of the palaces at Basse, in Vandersleyen 1967: 151-153.

\textsuperscript{681} I.l. 10-14) h\textit{3t} pw ir.n hm.f r lw\textit{w}.f qn\textit{bt} f m \textit{h’t}.f m\textit{s}’.[f] hr i3\textit{Btt} hr imn\textit{tt} hr h3\textit{pw} nn hb\textit{sw} hr.s m \textit{h’t} \textit{hpr} b3\textit{w} ntr spr pw ir.n hm.f r \textit{h’t} n w\textit{3t}, “What His Incarnation did was to go down to his launch, with his council behind him and [his] army on the east and on the west (banks) providing cover, there being no covering on them after the occurrence of the god’s impressive manifestation. What His Incarnation did was to arrive at the interior of Thebes”, in Wiener – Allen 1998: 13-14.
\end{footnotesize}
Several evidences attest the royal trip to the residence of Thebes for this festival occasion. The papyrus in the Bibliothèque Nationale of Paris no. 206\(^{682}\) registers the travelling of Sety I to Thebes in his 2\(^{nd}\) regnal year and the great dedicatory inscription of Abydos refers to the presence of Rameses II at Karnak at the end of the 'ipt Feast.\(^{683}\) It is likely that one of the palaces of Thebes used during the 18\(^{th}\) Dynasty, most probably one of the Malkata palace of Amenhotep III, could still have been used by Sety I and his successors up to the end of the 19\(^{th}\) and the beginning of the 20\(^{th}\) Dynasty.\(^{684}\) As suggested by Stadelmann in his study on the 19\(^{th}\) Dynasty Mortuary Temples, during the reign of Rameses III the old palaces were too tumbled down to be used by the king and this would have been the reason why Rameses III decided to build a new residential quarter around his own.\(^{685}\) This area has been identified in the architectural section of the High Gate\(^{686}\) of the temple at Medinet Habu and not in the temple-palace itself that could never have served as a residential palace.\(^{687}\)

At the same time, also the northern Memphis was place of residence for the kings of the 18\(^{th}\) Dynasty.\(^{688}\) Tutankhamun’s Restoration Decree (B.I.23), inscribed on a stele erected against the pylon face of the Karnak Temple,\(^{689}\) records the stay of the king in a pr-'3-building previously belonging to Thutmose I:\(^{690}\)

\[
hm.f \text{ m pr-'3.f} \ imy(t) \ pr-'3-hpr-k3-R'ml \ R' \ m \ hnw pt
\]

His Majesty is in his pr-'3, estate of '3-hpr-k3-R’ (Thutmose I) like Ra in the hnw of the sky

\[

\]

on this day I was in the goodly ‘h, which is the estate of '3-hpr-k3-R’ justified

---

\(^{683}\) The great dedicatory inscription of Rameses II carved on the walls of his father’s temple at Abydos relates how Rameses, after tarrying in Thebes in order to restore the monuments of his father Sety I, left the Southern City, in Gauthier 1911: 55. Another source which describes the trip of the king to the Southern City (niwt-rsy) on the occasion of the 'ipt Feast is the inscription in the tomb of the priest of Amun Nb-wnn-f, in Sethe 1907-08: 30 ff.
\(^{684}\) According to Stadelmann, these old Theban palaces started to be too tumbledown to be used by kings from the reign of Rameses III onwards. “This may has been the reason why Rameses III made up his mind to construct a new residential quarter around his mortuary temple. For the royal palace he chose the architectural form of the high gate obviously common in the delta residence Piramessè”, in Stadelmann 1994: 314.
\(^{685}\) Stadelmann 1996: 229.
\(^{687}\) Stadelmann 1996: 228.
\(^{688}\) Helck 1958: 5.
\(^{689}\) The third pylon built by Amenhotep III, against which the stele has been found, formed the front of the Great Temple in the reign of Tutankhamun. Bennett 1939: 8, note 2.
\(^{690}\) URK IV: 2028, 7;
Whether the text would relate to a palace located in Thebes\textsuperscript{691} or Memphis\textsuperscript{692} is not clear. The same estate of ‘3-ḥpr-k3-R’ is mentioned even in the stele of the 3\textsuperscript{rd} regnal year of Ay,\textsuperscript{693} where it is located at Memphis\textsuperscript{694} together with the estate of Mn-ḥprw-R’ (Thutmose IV).\textsuperscript{695} The royal account book of the Rollin papyri suggests that in the 2\textsuperscript{nd} and 3\textsuperscript{rd} year of Sety I’s reign the court dwelled primarily in Memphis in the pr-‘3-ḥpr-k3-R’, while paying occasional visits to Heliopolis.\textsuperscript{696}

The available sources do not allow to state if there was only one royal building re-used from time to time by the kings of the 18\textsuperscript{th} and 19\textsuperscript{th} Dynasty, or if the palace was built ex-novo by each of them. Nor it is possible to state with certainty the real function of this building, although Hatshepsut’s Coronation Text suggests a ceremonial function of the ‘ḥ as support for the king to practice the worship of Amun.

We can assume the contemporary existence of different places served as royal residences and seats of administration from the Middle Kingdom to the New Kingdom, from and to where the king travelled, together with the bureaucratic hierarchy and the high priests. Each of these buildings may have served for different aims: to allow the king showing himself to all people, ideologically strengthening his role all over the country, making inspections in different regions, or officiating in various cultic acts near the major temples and shrines. These customs may have generated the need of duplicates royal buildings in many Egyptian settlements. From time to time one of these places could have taken the role of main Residence city, being the place where the king and his courtiers made their more-or-less permanent headquarters, necessitating an extensive complexes of palaces, administrative buildings and storehouses. It is likely that, as the administrative structure became more complex throughout the New Kingdom, those complexes which were previously duplicated in many Egyptian cities came to be concentrated in one site so as to

\textsuperscript{691} Maspero states that the stele was composed at Thebes. Davies – Maspero 1912: 116.
\textsuperscript{692} Considering the importance given to Ptah and the mention of Ankhawen on the stele, Bennet sustains the hypothesis that the inscription originated in Memphis. Bennet 1939: 12, note 25.
\textsuperscript{694} The juridical operation described in the stele consisting in the transfer of lands of the royal domain in favor of a functionary of Memphis was made by the king when he was in Memphis (iw.tw n Mn-nfr). See Zivie-Coche 1976: 273-74.
\textsuperscript{695} Ay’s stele refers the foundation of a dominion called “Hills of Hittites” at Memphis: the topographical indications of this stele allows to reconstruct the position of the Pr-‘3-ḥpr-k3-R’ hñ’ Pr Mn-ḥprw-R’, “the residence of Thutmose IV and the residence of Thutmose I”: Daressy 1894: 123, CVIII, i, 5-6.
\textsuperscript{696} Spiegelberg 1869: 4 f. They consist of documents from the administration of the Memphite palace bread supply, in Kemp 1991: 289.
increase the architectural complexity of the main residence city. Amarna and Malkata are the most significant examples of this architectural change.

In the attempt to define a “main Residence city” in the New Kingdom most historians who have written on the history of Egypt have assumed that Thebes was the administrative centre for much of the 18th Dynasty. Prosopographical evidence covering the earliest part of the 18th Dynasty have shown that most of the officials who had tombs in Thebes held titles suggesting that their administrative responsibilities were concerned in the Theban area.\(^697\) In the meanwhile, Memphis had a prominent role\(^698\) as seat of the high priesthood of Ptah and - from the reign of Thutmose III, when a dual vizierate was introduced\(^699\) - as headquarter of the vizier of Lower Egypt. Recent studies have demonstrated the administrative role of Memphis from the beginning of the 18th Dynasty to the Amarna Period. Thanks to these researches on the administrative titles in the private inscriptions of the Memphite area\(^700\) it is possible to state that major administrators were functioning from Memphis, at least from the reign of Thutmose III until the Amarna age:\(^701\) Memphis may have worked as administrative capital during the 18th Dynasty, Thebes and Amarna functioning as major sacerdotal centre as the seat of the royal cemeteries and the temples of the major deities of the country. Titles of office-holders from Amarna\(^702\) hint the predominantly religious role supposed for Akhetaten.\(^703\)

Texts of the 19th and the 20th Dynasty often refer to a town named \(Pr-R\text{'}mssw-\text{mri-}l\text{mn}\), “House of Rameses beloved of Amun” which has to be recognized as the royal Residence in the Delta throughout that period.\(^704\) The cartouche name of the city appears in several different forms but the permanent nucleus of the name contains the characteristic epithet, \(\text{mri-}l\text{mn}\), “beloved of Amun”. The cartouche is usually followed by the honorific abbreviation \(n\text{'}h\text{ }w\text{d3 snb}\), “living, prospering, in health”, and preceded by the prefixed word \(pr\)- or its equivalent.\(^705\) The original name of the city in its complete form was \(Pr-R\text{'}mssw-mri-}l\text{mn-}3-\text{nhtw}\), “House of Rameses beloved of Amun Great of Victories where

698 Badawy 1948.
701 Martin has recently considered the presence of a Northern Vizirate at Thebes during the reign of Akhenaten as proof that Memphis continued to exercise a very significant role until in the Amarna period, in Martin 2000: 115-20. See also Zivie 1990.
702 Hari 1976a.
703 Hari 1976a.
704 See the Papyrus Anastasi III (B.I.67), Papyrus Anastasi V, 23, 7-25, 2 (B.I.70), Papyrus Anastasi VI (B.I.71) the Decree of Blessing Ptah (B.I.54), and other examples in Gardiner 1918: 132-134.
the epithet “Great of Victories” was a regular component of the Horus of Gold name of Rameses II.\textsuperscript{706} Sometimes the name \textit{Pr-R’\textsuperscript{m}ssw-mrt-\textsuperscript{l}mn \textquoteright nh wd3 snb} can be followed by the word \textit{hnw} (see the example of Louvre C 96, pAnastasi IV, pBologna 1094, pSallier I). The use of word \textit{hnw} as apposition of the name of the new capital city suggests its interpretation as “residence-city”. The 19\textsuperscript{th} and 20\textsuperscript{th} Dynasty would show a return to a fixed single place, reproducing an experience of centralization similar to that at Amarna, but with the emphasis on Lower Egypt: the residence of Rameses II at Piramset at Qantir and the palace of Rameses III at Tell el-Yahudiya in the orbit of Heliopolis/Iunu.

\subsection*{2.13 The case of Amarna}

The main source for the study of the royal buildings of Akhetaten and the identification of their names with the structures that have been properly excavated are the lists of Akhenaten’s buildings contained in the Boundary Stele K and \(X\textsuperscript{707}\), the inscriptions from the tombs at Amarna, the hieroglyphic and hieratic jar-inscriptions from the excavations.

Even if proper nouns of many buildings of official nature which are clearly associated with members of the royal family are known, it is impossible to assign an exact position to most of them; it is also likely that they simply were alternative names of parts of the same palace.\textsuperscript{708} These names are generally composed by the expression \textit{pr-}, “house” or the rarest \textit{hw\textsuperscript{t}}, “estate”, followed by names or epithets of the king\textsuperscript{709} and members of the royal family.\textsuperscript{710} The major difficulty is to identify the buildings which are archaeologically known with the occurrences of such names as \textit{pr-nswt}, \textit{pr-\textsuperscript{3}} or \textit{h} in the tombs of officials at Thebes or Amarna.

A particular building recurring in Amarna sources is the \textit{pryt}\textsuperscript{711} \textit{pr-\textsuperscript{3}}, “the houses of the Pharaoh”, which is mentioned in stele K and X (B.I.19) and in a letter from the Steward of Memphis Apy to Amenhotep IV found at Gurob (B.II.89). The \textit{pryt pr-\textsuperscript{3}} has been

\begin{itemize}
\item \textsuperscript{706} \textit{Ibid.}: 136.
\item \textsuperscript{707} The starting point for the knowledge of the royal buildings in the Central City at Amarna is given by the Boundary Stelae. The complete list of the royal buildings is contained in lines 14-17 of stele K and 17-19 of stele X. For the complete text of stele K see Davies 1903-5, S: pls. 29-30, 37, 38; for the complete text of X see Davies 1903-5, S: pls. 31-2.
\item \textsuperscript{708} Fairman 1951: 198.
\item \textsuperscript{709} \textit{Ibid.}: 198.
\item \textsuperscript{710} \textit{Ibid.}: 199.
\item \textsuperscript{711} GEG: 565. Wb I: 518.
\end{itemize}
interpreted as the name given to the private portion of one of the buildings discovered in
the site of Amarna and specifically the North Riverside Palace at the northern end of the
site.\(^{712}\) Whatever this expression would refer to, it must be considered together with
compounds such as \(pr\ pr-\ Vì/pr\ n\ pr-\ Vì\) used in late New Kingdom titles referring to an
“estate of the Pharaoh”.\(^{713}\) In these expressions the word definitely comes to mean “the
Pharaoh” as the owner of the building or part of a wider structure referred to as \(pr\ y\) or \(pr\).

Among the archaeologically known palaces at Amarna, the Great Palace\(^{714}\) should be
identified with \(Pr\-h\-y\), “House of Rejoicing”, known from written sources. The name of the
building, in its fullest version being \(Pr\-h\-y\ n\ p3\ ‘lt\ m\ pr\ ‘lt\ m\ 3h\-‘lt\), “House of Rejoicing in
the House of the Aten in Akhetaten” occurs on hieroglyphic inscriptions\(^{715}\) and jar
sealings\(^{716}\) from the site and stone blocks from the Great Palace.\(^{717}\) The problem in the
attempt to identify this structure is that the Boundary Stelae list two fundations with the
same name \(Pr\-h\-y\), both located in what was called “the island of Aten distinguished in
jubilees”, \(iw\ ‘lt\ ū nb\-Sd\),\(^{718}\) one to be probably identified with the columned courtyard
in the first section of the Great Temple of Aten and the other corresponding to the entire
Great Palace.\(^{719}\) A number of inscribed blocks from the Great Palace often record certain
subdivisions of the building itself, such as the \(Wbn\-‘lt\), “the Aten shrines”\(^{720}\) and the \(Wsh\-lt\)
, “the Broad Hall of the Aten”\(^{721}\) which are said to be in the \(Pr\-h\-y\).\(^{722}\) Of the fifteen
instances recording the name \(Wbn\-‘lt\ n 3h\-‘lt\), fourteen blocks came from the building
to the north-west of the Northern Harim and one from the harim area, so that the \(Wbn\-‘lt\)
has been identified with the huge structure at the north-west corner of the Great Palace\(^{723}\)
which was part of the palace itself. The central part of this palace has been identified as the

\(^{712}\) Fairman 1951: 198. Murnane 1995: 105, note no. 7. Other possible candidates are the King’s
House or the Harim within the Great Palace, see Gohary 1992: 172-4.

\(^{718}\) ibid.: fig. 26, ll. 15-16.

\(^{719}\) ibid.: 30, 45, 47, 195.

\(^{720}\) ibid.: pls. 101, 2-3, 7, 15-16; 102, 21, 27-28, 33-34.

\(^{721}\) ibid.: pls. 101, 9, 11: 102, 31-2; 103, 41.

\(^{722}\) From the Pillared Hall at the south end of the palace came a number of scattered bricks bearing
the name \([pr]\) ‘nb-hpr-R’ […] ‘lt\ Pr-h-y’, “[the House of] ‘nb-hpr-R’ (=Smenkhkare), the House of
Rejoicing of the Aten”. The archaeological evidence shows that this was the last part of the palace to
be built (Pendlebury 1951: 60, 150). The fragment of the base of an Amarna statue in the British
Museum (BM 1000) mentions another building called “the sunshade of the Princess Meritaten”
which is said to be “in the House of Rejoicing of the Aten in Akhetaten”, in Sandman 1938: 159 and
HTBM 8: 27-8, pl. 24.

\(^{723}\) Pendlebury 1951: 50-51.
king’s harim and divided into a “Northern Harim” and a “Southern Harim”. The recognition of the harim-functions has been based on a stone fragment giving only a part of the whole expression, which has been integrated in favor of its interpretation as “Harim”. 724

The pryt hmt nswt, “the houses of the royal wife” cited in the Boundary Stelae (B.I.19)726 are generally ascribed to the pr-‘3, and can be improbably identified with one of the palaces in situ or with one their inner sections, candidates being in the King’s House, the harim-component in the Great Palace or the North Great Riverside Palace in the norther sector of the site. 727 As I have discussed above, one the Houses of Rejoicing mentioned in the foundation stelae could then be identified with the Great Palace, equating the Pr-h’y-palace of Akhenaten’s father, the palace of Amenophis III at Malkata. 728 I refer to a dedicated chapter for the interpretation of the Pr-h’y at Amarna and the possible identification of the so-called Northern Harim of the Great Palace with a ‘h-palace within the Pr-h’y used on specific ceremonial occasions, such as the celebration of the Hb-Sd. 729 The interpretation of the Northern Harim as “ceremonial”-palace used during specific ceremonial occasions does not preclude the possibility of women’s presence in such palace. In his analysys of the King’s House at Malkata and the purpose of the royal harim, O’Connor has recently stressed the ritual functions of the harim “which provided the king with recreation and support during royal ceremonies”. 730 Some of the expressions from Amarna inscriptions establish a connection between the term ‘h and the figure of the royal wife (hmt nswt):

724 Ibid.: 193-4 (d), pl. 83.
725 “It is a sore temptation to equate the “apartments of the queen (pryt hmt-nswt) of the Boundary Stele with the harim, but it must be done with the greatest caution, for this equation depends on the translation of pryt as “apartments” and at the present is only a guess”, in Fairman 1951: 194.
726 Ibid.: 190, fig. 26, l. 17.
728 Hayes 1951: 177-81.
729 See chapter 4 below.
730 In his essay O’Connor supports the earlier interpretation of the suites of the royal harim in the King’s House of Amenhotep III at Malkata as intended for the use of members of the royal harim after Dorothea Arnold’s new theory about the use of palatial complex at Malkata for the celebration
• The inscription on the statuette of Nefertiti (B.I.20):

The hereditary princess, great of favor, lady of charm, sweet of love, who fills the ‘ḥ with her beauty, mistress of Upper and Lower Egypt, the king’s chief wife, his beloved, lady of the Two Lands Tyy

---

2.14 Conclusions

The use of the term ‘ḥ’ seems to have remained fairly constant from the Middle Kingdom throughout the early and late New Kingdom, so that is possible to speak of a continuity rather than a development of the terminology of the ‘ḥ’. It is broadly used and mentioned in several kinds of texts: biographical narrative inscriptions, titles, captions in royal reliefs and narrative religious material.

The term ‘ḥ’ occurs in several narrative passages in prepositional phrases – in expressions such as r ‘ḥ, “to the ‘ḥ” or m ‘ḥ, “in the ‘ḥ” – in contexts describing journeys or the permanence of the king within the building. The phrase r ‘ḥ is often compound with motion verbs like spr, “to arrive” or k, “to enter” and arises in passages describing ceremonial occasions connected for example with the enthronement of the king or the horacular procession of Amun in the temple of Karnak (as in the Coronation Text carved on the Blocks of the Red Chapel at Karnak - B.I.10) or the presentation of enemies in front of the Pharaoh (Bet Shean stele of Rameses II - B.I.39). In private inscriptions instead, the purpose of the entering in the ‘ḥ is rarely stated. Ritual activities performed by private people m ‘ḥ are those suggested by compounds like di 3wt, “to give offerings” and ir ḫswt, “to make praises”. Among the ceremonies taking place within the ‘ḥ, texts refer to the delivery of gifts or tributes, registered under the term ḫnw, to the king himself (see for example the North Stele C 12 from the Great Temple of Abu Simbel - B.I.42 and the Ramessid tomb of P3-sr - B.II.128). Such ḫnw would have been delivered during specific ceremonies such as royal audiences of foreign princes and high officials. The prepositional compound m ‘ḥ, “in the ‘ḥ” occurs in sentences mentioning the king staying within this structure. The relationship between the king and the ‘ḥ is not clear, but this latter does not seem to be primarily the king’s residence.

When the monarch and the ‘ḥ are most closely connected it is not to describe a specific king in his daily life, but it is only to mention his permanence within the ‘ḥ. Sometimes the occasion of this stay is that of festivals and religious rituals, such as the celebration of the Sed-festival at the time of Amenhotep III, described on the walls of the Temple of Soleb in Nubia (B.I.17). The ‘ḥ functioned as the Sed-Festival palace from and to which the king had to process in specific moments of the feast. The word ‘ḥ can be often found in verbal compounds using verb ḫ’i, literally “to appear in glory”, in narrative passages describing
the coronation or the enthronement of the king\textsuperscript{731} as well as any state appearance of the monarch. Texts from Horemheb’s reign contain an explicit reference to the establishing of

\textsuperscript{731} As already highlighted by Gardiner, the major difficulty in the knowledge of the coronation rite arises from the fact that the verb \textit{ḥr}, literally meaning “to arise” or “to appear in glory” can be also used in reference to any public and state appearance of the king (Gardiner 1953: 23). The coronation ceremony seems to have been a proper daily feast, likewise celebrated annually (Kemp 1991: 206), during which the king went in procession to be crowned and enthroned. The most detailed accounts of an Egyptian coronation occurs in the Coronation Inscriptions of Horemheb and Hatshepsut, which illustrate a process that involved both the temple, where the king is elected by divine decree, and the palace (Kemp 1991: 206-8. O’Connor 1995: 277-8). The earlier text of Hatshepsut (Kemp 1991: 206-8. O’Connor 1995: 277-8) describes several moments of the royal investiture as follows: the divine image of Amun-Ra, carried out from the Karnak temple, summons the Queen from her palace, located near Karnak, and takes her into the temple, where the god assigns the kingship to her. After this declaration of intent, a procession follows, and Amun-Ra and Hatshepsut enter in the palace. It is in the ‘ḫ’-palace that the god formally enthrones her. The god and the Queen then leave the palace and re-enter Karnak temple (Gitton 1974: 65, fig. 1). The difficulties of such interpretation of the text, which provides a series of useless and meaningless acts that force the god and the Queen to repeat the same path, have been discussed by O’Connor (1995: 277-8). According to the interpretation of the Horemheb’s Coronation Text, the inscription describes Horemheb being escorted to the Karnak temple at the time of the Opet Festival (during the Opet Festival both the king and the god (Amun-Ra) respectively issued forth from Karnak temple and palace, joined in procession to Luxor and returned again to Karnak. Murnane 1982: 574-579). Of particular interest is the fact that Horus is described as embracing Horemheb in order to induct him into the presence Amun for coronation (Gardiner 1953: 15). Amun-Ra receives him in the temple and takes him to Luxor temple (the event is not specifically described, but it is implied by the Opet Festival setting): it is here that the god identifies Horemheb as new pharaoh. Then they go together to a \textit{pr-nswt}, which probably refers to a palace at Karnak, for in it Horemheb undergoes the same ceremonies as those hold by Hatshepsut in her ‘ḫ’-palace at Karnak. The god and the king return to Karnak after the coronation rites (Gardiner 1953: 21-28). Then the god and presumably also the king, as just as Hatshepsut, leave the palace and re-enter in the temple (Lacau – Chevrier 1977: 144-133). In both the texts, the setting for the coronation ceremony was the Opet Festival, one of whose purpose was to renew the king’s royal \textit{ka} and reconfirm his right rule (Bell 1985: 251 ff.). On such occasion specific rituals took place at Luxor, as the temple of the royal \textit{ka}, and enthronement ceremonies occurred in the palace: at his coronation, the king would have received the royal \textit{ka}, the same possessed by all the previous kings of Egypt, that rendered the king divine. Apart from the coronation linked to the Opet Festival, and the renewal of the coronation celebrated during the \textit{Sed}-festival, also normal coronations would have taken place. The description of the coronation ceremony in these texts certainly does not exhaust the range of all the rites that have taken place: some of the opening ceremonies are omitted, since the Hatshepsut’s and Horemheb’s coronations had to be fitted in the regular programme of the Opet Festival, and are known by some representations (for a detailed description of a normal coronation see Moret 1902: chapter 3). The opening ceremonies would have expected the purificatory aspersion of the king by the gods of the cardinal points, the circumambulation of the walls to symbolize the taking possession of the kingdom ad the write of the name on a sacred tree at Heliopolis (Gardiner 1953: 24). The King’s induction (\textit{bs-nswt}, in: B.I.25, l. 14) described in Horemheb’s Coronation Text was attended by officers, priests and magistrates of the land: a jubilant crowd of both populace and priesthood would have came to witness the appearance of the king and of Amun (\textit{Ibid.: 24}). After that, Amun proceeded to the \textit{pr-nswt}, with Horemheb in front of him, until they came to the \textit{Pr-wr} of Amun’s daughter, the Great of Magic, who greeted the new sovereign and “established herself on his forehead” (B.I.25, ll. 15-16). The \textit{Pr-wr} was one of the temple-rooms or sections in the Theban temple used for purification rites and as place where the king received the uraeus (Gardiner 1953: 25). The palace, referred to as \textit{pr-nswt} (B.I.25, l. 17) and once as ‘ḫ (B.I.25, l.17), is the actual place were the coronation took place. One of the last moments of the coronation ceremonial was the formulation and conferring of the royal names and titles, which are often recorded in full at the beginning of the royal texts. In the Coronation
the crown (smn ḫʾw) at the hand of Amun upon the head of the King within the ‘ḫ’ (Coronation text of Horemheb - B.I.25 - and stele from the Temple of Ptah at Memphis - B.I.27). In the Ramessid Period the “appearance” of the king can be equated to the manifestation of god Ra in the sky, in inscriptions such as those from the palace of Merenptah (B.I.49) and those from the temple-palace of Rameses III at Medinet Habu (B.II.163). The ceremonial nature of the term ‘ḫ’ seems confirmed by the usage of the term with reference to a specific “ritual-palace”, the temple-palace attached to the Mortuary Temples of the 19th and 20th Dynasty. On the doorjambs of the two entrances to the palace of Medinet Habu, Rameses II is mentioned while entering and leaving the ‘ḫ hwt.f špsḥ’, “the palace of his noble temple” in order to join Amun during the Feast of Opet and the Feast of the Valley.732 The aforementioned inscriptions from the palace of Merenptah represent an exceptional source when we try to verify a possible correspondence between philological sources and archaeological evidence, since they come from a palatial site of the 19th Dynasty. These texts allow to recognize in the building of Merenptah ‘ḫ’-palace with ceremonial function. The similarity of its tripartite plan with that of the temple-palace at Medinet Habu can not be accidental and should be probably understood as specific and recurrent feature of the ‘ḫ’-palace. I refer here to a chapter entirely dedicated to the recognition of the ceremonial palace in archaeological evidence, given the complexity and the breadth of the topic.733 Among the ceremonies that would have taken place within the ‘ḫ’, New Kingdom sources mention even the king appointing and promoting high officials as well as the king giving orders (tp-rd) and establishing laws (ḥpw) to his entourage.

The word occurs in compounds for both “royal palace”, ‘ḫ nswt, and “palace of the god”, ‘ḫ nṯr.734 This last form of the ‘ḫ’ must be probably identified with the ‘ḫ nṯr of Predynastic and Old Kingdom texts with the nṯr hieroglyph written inside the ‘ḫ-sign referring to a sort of sanctuary or shrine for divine images. The expression ‘ḫ nṯr must be taken under

---

Inscription of Horemheb, for example, after having received the crown by Amun in the palace, the king is entitled with the five elements of the king’s formal titling: a Horus name, which represents the king as the earthly embodiment of the sky-god Horus; a “Two Ladies” name, the two ladies being Nekhbet and Wadjit, the two protective goddesses of Upper and Lower Egypt the goddesses; the Golden Horus name, whose exact significance is still uncertain; the throne name, which was preceded by the title “King of Upper and Lower Egypt”; and the birth name compounded with the title “son of Ra” (Gardiner 1953: 15). Other details of the coronation can be inferred from the same text: the ḫʾw, “crown”, is here described by the khepresh or blue wing-like headgear (Ibid.: 15) and the Nine Bows, as representation of the king’s enemies, are beneath his feet (Ibid.: 15). There were a number of other crowns, which could be used, as for the example the ṣḥmty, “Double Crown”, described in the Coronation Text of Hatshepsut (B.II.11, l. 4-6).

733 See below, chapter 4.
consideration together with epithets referring to gods or goddesses in relation to the ‘ḥ.
Such titles span from the simplest nb ‘ḥ, “Lord of the ‘ḥ”, generally referred to the king in
the form of Horus, and nbt or hnwt ‘ḥ, “lady” or “mistress” of the ‘ḥ used for female deities
such as Wrt-ḥk3w, Nekhbet, Sekhmet, Mut or Hathor. The ‘ḥ mentioned in this kind of
expressions must be probably intended as a structure other from the royal ‘ḥ, with a more
secular nature, despite its ceremonial functions. Since it would go far beyond the aim of the
present study, I refer to an index volume with the epithets and designations of the Egyptian
deities edited by C. Lietz during 2002 and 2003 for a complete overview of the divine titles
compound with ‘ḥ. The male gods who are most frequently linked to the ‘ḥ are Horus, Ra
and Amun-Ra, all intended as divine manifestations of the living king. The most common
titles of the sovereign are Hr nb ‘ḥ, “Horus, Lord of the ‘ḥ” or Hr m ‘ḥ.f, “Horus in his ‘ḥ”.
The seat of the Horus-king is always referred to as a ‘ḥ-palace. This palace must be intended
as holy locality because the king appears within it as the holder of magical powers.735 In this
sense the ‘ḥ parallels other holy localities such as the temples of the gods and the temple-
palaces of the deceased king. These classes of ceremonial places are similarly structured on
the basis of their analogue function.736 The ‘ḥ-palace seems to have functioned as “ritual
palace” and, more specifically, as “coronation palace”, “temple-palace” (in the case of the
19th and 20th Dynasty Mortuary Temples)737 or “Sed-festival palace”. The ‘ḥ, even when not
strictly related to gods, appears to be generally connected with rituals like the practices of
sb3wy, “oracles”, 3wt, “prayers”, and ḫswt, “offerings”.

Most of the private titles compound with ‘ḥ does not provide any additional information to
that given by narrative passages. One of the most common epithets occupying a significant
spot among titularies of the 18th Dynasty high officials, ḫrp-‘ḥ, was originally closely
connected to the celebration of the Sed-Festival, according to a number of Old Kingdom
evidence.738 In this regard the link between the ‘ḥ and the celebration of the Sed-Festival
seems confirmed by the title preserved in the stele Leiden 3.1.1.37 (B.II.120) referring to
the owner as ḫmr k3wt m ḫb-sd m ‘ḥ n pr-ḥswt, “overseer of the works in the temple
of the Sed-Festival in the ‘ḥ and in the pr-ḥswt”. Other titles simply stress the connection

736 See below, chapter 4.
737 Palaces attached to the Ramessid funerary temples were probably never used for ceremonies,
housing rather a statue of the king. Stadelmann 1979: 312, no. 68. They were replicas of the real
palaces, meant only for the use of the deceased king, as well as each funerary temple, at least in the
Ramessid times, was essentially a replica of the Karnak temple, housing the deceased Amun-Ra.
O’Connor 1989: 81.
between the title owner and the king, such as those compound with different form of the verb *hši*, describing an official as “favored” by the king himself.

The term **pr-‡3**, literally translated as “the great house”, only rarely seems to be a word for the king himself before the New Kingdom. This use of *pr-‡3* with reference to the king begins in the middle of the 18th Dynasty, and is the origin of the word “Pharaoh” that appears in the Hebrew Bible. The term does not undergo any graphical variation and continues to be composed of the noun -pr and its ideographic sign, often doubled in the inscriptions. One aspect of the usage of the term is its rarity in narrative passages, unless the word is part of an official title. There are few instances of the term *pr-‡3* used as an independent word in narrative inscriptions such as the Horemheb’s Decree (B.I.26) or *The Duties of the Vizier* (B.I.33), so that these texts have an important role in an attempt to understand the meaning of the term and the function of the structure to which is referred. Among the official inscriptions in fact, the text that most explicitly marks the transition from *pr-‡3* as royal building to *pr-‡3* as “Pharaoh” is the Horemheb’s Decree, where the word becomes the direct object of the verb *šmsi*, “to accompany, to serve”, *mk*, “to guard”, and *ḥši*, “to arrive”.

The term keeps its original meaning of royal building in those narrative passages where it is used in the prepositional compound *r pr-‡3*, “to the *pr-‡3*” after motion verbs. In the *Duties of the Vizier* from the tomb of Rḥ-mi-R’, the sentence ‘k.f r pr-‡3, “he enters in the *pr-‡3*” (B.II.33), is inserted in a context which describes the vizier entering into the *pr-‡3* to greet the king. It is obvious here that the term *pr-‡3* must denote a physical place where the vizier could pay his respect to the king. Paying particular attention to this text, the *pr-‡3* is the building to where the vizier moves for his audience in front of the king from the *pr-nswt*. The direction of the vizier’s movement from the *pr-nswt* to the *pr-‡3* lets assume that the *pr-nswt* was an inner section of the *pr-‡3* as wider royal institution. At the same time the occasion of the vizier’s audience suggests the association between the *pr-‡3* as physical place and the person of the king. The Tempest Stele of Ahmose (B.I.1) explicitely refers to the palace of Thebes defining it as a *pr-‡3*-palace. The *pr-‡3* is mentioned in the text as physical place to where the king sailed downstream (*ḥdl*).

---

Goelet 1982: 539.
The architectural complexity of the *pr-3* is shown in Horemheb’s decree (B.I.26) by the connection of this term with other several architectural sections such as the ‘t *bnkt*, “room of the offerings”, the *pr-hd*, “treasury”, or *šnwt*, “granary”. According to the same text, another specific palatial area which is linked to the *pr-3* is the *w’bt*, a place used for all the physical operations of preparation of foods and other kinds of services.

One aspect that distinguishes *pr-3* from other terms in this study is the quantity of offices in which the word *pr-3* is present. Focusing on the “secular” duties implied in several groups of titles modified with the term, they are specific offices, and not merely honorific titles, covering a wide range of occupations.

Occurrences of *pr-3* in official titles confirm the wide range of activities which were related to that term. Some titles such as *šš n pr-3* ‘nḫ *wd3* snb, “scribe of the *pr-3*, l. p. h.”, *imy-r pr-hd pr-3* ‘nḫ *wd3* snb, “overseer of the treasury of the *pr-3*, l. p. h.”, *idnw n3 n ḫmntyw pr-hd n pr-3*, “deputy of the western treasury of the *pr-3*” or *imy-r *šnwt n pr-3* ‘nḫ *wd3* snb, “overseer of the granaries of the *pr-3*, l. p. h.”, ascribe certain administrative and economic activities to the *pr-3* itself, performed by the title owner in departments such as the *šnwt n pr-3*, “the granary of the *pr-3*” or the *pr-hd n pr-3*, “the treasury of the *pr-3*”.\(^740\) Other institutions like the ‘t, “chamber/department/storeroom” and the *p3-* ḫpš, “the armoury” can be linked to the *pr-3* in titles compound with *imy-r*, “overseer of”.

The use of *pr-3* in private titles provides support for relating *pr-3* to the affairs concerning the living king as well as to the activities connected with his funerary estate. After a careful analysis of the usage of the word *pr-3* in Old Kingdom inscriptions, Goelet concludes stating: “*pr-3* has a such close link with the living king, that it already shows a tendency towards becoming a word for the ruler himself, the “Pharaoh” of Egyptian texts from the 18th Dynasty onwards”.\(^741\) A number of titles simply refers to officials dealing with activities concerning the living king: the “overseer of the herds” (*imy-r ḫḥw*), “the overseer of the bowmen” (*imy-r *ḥtḥw*), the “cultivators” (*ḥtḥwty*), the “butler” (*wb3*), the “sailor” (*w’hw*), the “door-opener” (*wn-*3*), the “herald” (*ḥtḥw*), the “stable-master” (*ḥḥy-*ḥḥw*), the “sealer” (*ḥtm*), the “washerman” (*ḥḥtyw*), the “butler” (*ḥḥwty*), the “skipper” (*ḥḥwty*), the “scribe” (*ṣš*), the “servant” (*ṣḥm *š*) or the fan-bearer (*ḥw*). Whether the *pr-3* would refer to a physical place or the king’s person is uncertain in many cases: word *pr-3* in a number of the aforementioned titles could mean that the owner worked for the king’s service or in a

\(^740\) Goelet 1982: 613-614.
\(^741\) Goelet 1982: 631.
place called pr-’3 as well. The general aim of such titles would seem to stress some sort of
generic attachment of the title owner to the royal palace and the king’s person. The titles
examined in the present study are various and they reflect such an extensive organization
so as to lead to the conclusion that pr-’3, if intended as physical place, would have referred
to a large multifunctional institution. The pr-’3 seems to have been a word used to refer to
the royal building in a generic sense, as a place somehow connected to the king since the
earliest period of the Egyptian history.

Regarding the usage of term in religious context, pr-’3 appears in several titles as well as in
expressions with ritual nature. The word pr-’3 is frequently associated with the concept of
$hwt$ in expressions such as $imy-r \ p r \ n \ t 3 \ hwt \ pr-’3$, “overseer of the house of the $hwt$ of the
pr-’3” (B.II.77) and $hry \ k3wt \ n \ t 3 \ hwt \ n \ pr-’3$, “one who is over the workmen of the $hwt$ of
the pr-’3” (B.II.59; B.II.60), generally referring to the mortuary estate of the Pharaoh. The
term $hwt$, with its different meanings of “temple”, “house”, “castle” or “tomb”, could
indicate a secular section of the royal building such as a religious one. All these expressions
occur in context where a form of royally-connected worship may be involved and word pr-
’3 is clearly used in its later “Pharaoh” meaning.

Expressions such as $imy-r \ p r \ n \ t \ pr-’3$, “overseer of the house of the room of the pr-’3”
(B.II.57) or $imy-r \ gs \ p r \ n \ pr-’3$, “overseer of the side of the house of the pr-’3” (B.II.75) mark
the transition to the “Pharaoh”-rendering of the word which will be definitive from the Late
New Kingdom onwards, with the elaboration of the compound $pr \ n \ pr-’3$, “house of the
Pharaoh” to refer to the royal residence. In some written sources from Amarna, the word
pr-’3 is used as apposition of the dual form $–pryt \ pr-’3$ recalling the expression $pr \ (n) \ pr-’3$,
“estate of the Pharaoh”, fully developed in demotic texts of the Late Period.

Despite some of the “bureaucratic” titles mentioned above would suggest an
administrative nature of the pr-’3-palace, the word pr-’3 has virtually no use in economic or
legal contexts outside its employment in titles. Official New Kingdom documents never
mention the pr-’3 as an administrative or economic entity in its own right. Offices in titles
compound with the term pr-’3 are concerned in areas in which the term pr-nswt is more
often involved: economic and administrative departments, such as the treasury, the
granary, and offices for the scribal profession. I am assuming here that the word pr-’3
replaces pr-nswt when there is need to stress a more direct relationship of the inscription
owner with the king. Pr-’3 might be considered a large multi-functional institution including

---

742 GEG: 0.6.
PART I

several structures with specific functions and generally intended as royal property: its close link with the ruler and the ambiguity of its meaning in different contexts would explain its transformation from word meaning “palace” to a term for “Pharaoh”.

Summarizing the terminology of the word pr-nswt, narrative texts are the most informative in this respect and they will be the starting point of the discussion. The inscriptions from ḫn-ꜥḥ’s tomb refer to the pr-nswt as a main centre of royal government where the vizier (ṯ3ty) together with the treasures performed a series of activities, such as controlling the incoming and outgoing related to it, guaranteeing the security and the justice, inspecting the personnel of the structure and organizing the army within it. This composition refers to a number of institutions that were part of the pr-nswt or operated alongside it such as the ḫ3 n pr-nswt, “the office of the pr-nswt”, and the ṑryt, the “court” of the palace. The pr-nswt palace may have been largely concerned with the distribution and collection of goods and most likely reflects an actual administrative practice in civil affairs; the pr-nswt apparently had bureaucratic departments and properties in its name. The term is often cited in parallel with other branches of the government; in particular the ḫnw appears to be mentioned frequently in contrast with the term pr-nswt. Sections that are administered by the pr-nswt are the ḫtmw, basically meaning “something that is closed or sealed” and in The Duties seem to be used in the wider sense of “enclosure” or “gates”, whose closing was recorded by the vizier. The mnnw, as a sort of “fortresses”, constitute a pair with the ḫtmw in section 2 of the composition. As for the ḫtmw, text does not specify the actual location of the mnnw, which may therefore belong to the ḫnw rather than to the pr-nswt itself. Wherever these facilities would have been actually located, the management of their conditions dealt certainly with the pr-nswt.

Specific architectural sections that are ascribed as attached to the pr-nswt are doors, sb3w, (B.II.33, R7-8) that are opened for the free flow of traffic into and out of the pr-nswt after the vizier and the treasurer have exchanged their reports outside this institution. Several other compositions refer to the pr-nswt as place where entries and outflows were recorded and physically stored. In TT 81 for example, the pr-nswt is the place of origin of provisions which would have enriched the house of a private person, ḫlny, and is the destination of the ḫnw-delivery (pAnastasi III - B.I.67). A number of New Kingdom private titles refer to the owner as one who fills (mh) the pr-nswt with different kinds of supplies that range from food-provisions to precious stones.
Titles compound with the term add a little more knowledge of the *pr-nswt*’s function and the activities of its employees. The nature of the offices connected with such designations as *imy-r*, “overseer”, *hr.t sš3*, “keeper of secrets” or *hr.t tp*, “at the head” are not always clear, but they seem to be mainly administrative and civil posts. The recurring association of the term with the profession of *sš*, “scribe” (B.II.16; B.II.22; B.II.173; B.I.91), seems to confirm the prominent administrative function of the *pr-nswt*: the *sš n pr-nswt* was entitled to the registration of all the economic and bureaucratic operations of this specific palace or section of a wider structure called *pr-nswt*. Private titles may even mention the responsibility of some kind of works (*k3wt*) of possible carpenters charged with constructions of different nature on king’s behalf.

In most cases it is not possible to assert whether the term *hnw* would mean a building in its own right, the section of a wider institution, or even a whole residence-city. The *hnw* can be connected to the ‘*h*’ and sometimes to the *pr-nswt* by a genitival relation probably indicating the inner section of a wider structure, conserving its original meaning of “interior”. One feature that sets this term apart from other words for “palace” is in fact its etymological origin from the trilateral *hnw*, whose base-meaning is “interior/inside”. In an inscription from Hatshepsut’s Red Chapel (B.I.9), the Queen is described while entering in the *hnw ḫsrw* ‘*h*’, translated as “the holy interior of the ‘*h*’”.⁷⁴³ The connection of *hnw* with word ḫsrw suggests that *hnw* may indicate a restricted section of the ‘*h*’, whose access was limited to few people.

Passages from *The Duties* in *Rḥ-mi-r*’s tomb (B.II.33) show the usage of the term as opposed to Thebes, referred to as *Nw.t-rst*, “Southern City”. The starting expression of *The Duties* reporting *Rḥ-mi-r*’s titulary as *imy-r n nṯr ḫḥt n ḫwr m ḫ3 n ḫḥt*, “the overseer of the city, the vizier of the Southern City and of the *hnw* in the bureau of the vizier” seems to suggest the existence of two centres as separate residence cities. The use of the term to indicate a whole city-palace is attested since the Middle Kingdom, when *hnw* often refers to ḫṯawy in contrast with *Nw.t-rst*.⁷⁴⁴ In a 18th Dynasty context, such as that of the *Rḥ-mi-r*’s *Duties*, the city opposed to Thebes is Memphis, the second important administrative centre of Egypt alongside with Thebes from Hatshepsut’s and Thutmose III’s reign. Other sections of the same composition refer to distinctions between different

---

⁷⁴³ Lacau-Chevrier: 99 ff.
⁷⁴⁴ See above.
locations of fields and the army that could be positioned within the Southern city or the ḥnw (B.II.33, R17-19; R23).

In narrative texts and captions as well as in titulatures the ḥnw appears as place under which several institutions operated. Examples of expressions containing prepositional compounds like m ḥnw, “in the ḥnw” or n ḥnw, “of the ḥnw” are from contexts associated with ḥnw’s economic activity and registration of income such as those suggested by the title sš nswt nrt i fr ’k rht m ’t ḫrw n ḥnw, “royal scribe mainly concerning the wine department of the ḥnw” (B.II.141) or from context remanding to the administration of justice, ḫwt. The expression st nb n ḥnw “every department of the ḥnw” recorded in a section (B.II.33, R7) of ḫḫ-mi-r’s Duties might be referred to some kind of department in charge of undefined governmental tasks. In the same composition the ḥnw is presented as place of arrival and departure of goods of various kinds, by stating that its traffic was dealt by a vizier’s messenger (R 3-4). The Duties text describes the vizier’s responsibility on the ḥnw, more specifically on reporting affairs of the ḥnw and organizing the remainder of the army that stays within it (hr-’ wnn .. m ḥnw) (B.II.33, R 23).

Summarizing, the use of the term with reference to Memphis as opposed to Ḫw-rtst or as specification of Thebes suggests the meaning of ḥnw as “Residence city”. This rendering seems confirmed by a number of Ramessid inscriptions where the word is used as apposition to the name of the new residential city, Piramesse. The translation “residence” for the word ḥnw seems appropriate when used in the sense of “unique place of kingship.” Since a ruler might have had many “residences”, intended as living-places, the word ḥnw seems to be used with reference to the main residence functioning as centre of kingship or administration in a specific period. While in a 12th and 13th Dynasty context the word ḥnw might identify the residence city Ḥjtawy, during the 18th Dynasty the word comes to refer to both Thebes and Memphis, working as main governmental centre depending on the contexts. The 19th Dynasty ḥnw instead corresponds to the new capital city Piramesse founded by Rameses II, whose location is to be identified with archaeological remains at Tell el-Dab’a and Qantir in the eastern Delta.

New Kingdom private titles compound with ḥnw such as sš nswt, “royal scribe” or ḥtmw bity, “sealer of Upper and Lower Egypt” confirm the connection of economic and administrative activities within this institution, like the registration of income and outcome mentioned in other narrative passages. An epithet that begins to be part of the private

---

745 Quirke 2009: 112.
titling of many officials during the 19th Dynasty is *hry-iḥw (n)* *ḥnw*, “Stable-master of the *ḥnw*” seems to refer to the management of a specific property (*lnw*) of the residence city (*ḥnw*).

In early New Kingdom materials the phrases containing the term *stp-s3* had a marked association with “praising” or “favoring” in which only the members of the royal entourage and the king’s family were involved. Particularly common are those titles compound in some manner with verb ḫṣi, “to praise/favor”: *prw ḫṣy m stp-s3*, “one who emerged praised/favored from the stp-s3” and *mn ḫsw m stp-s3*, “firm of praises/favors in the stp-s3” and variants.746 The “praising” or the “favoring” of the title owner was done by the king or other royal officials, perhaps on occasions of specific ceremonies where the king’s approval was formally expressed. We can imagine that a ceremonial bestowal of the king’s and the royal entourage’s approval would have taken place before an audience, composed by the royal family and high officials.747 According to these considerations, Goelet argues that the term *stp-s3* often involved aspects of the royal residence that were “ceremonial” in the broadest sense of the word.748 He further argues that the usage of the word in conjunction with such verbs as ḏd, “to speak”, and ṯḏ, “to order” in narrative expressions in both private and official inscriptions suggests that the *stp-s3* was also connected with the making-decision process made by the king:749 “since the king was involved in this process, such passages probably referred to some manner of royal council where affairs of the state were discussed”.750 The interpretation of *stp-s3* as a form of councilor body composed by a group of court-officials is suggested by expressions like *smrw* (“companions”) or *srw* (“officials”) *m/n stp-s3*. Royal orders might consist in bestowing an office on a member of the royal family, as suggested by the donation stele of Queen Ahmose Nefertari (B.I.3), or entrusting officials with the task of guaranteeing offerings to local temples as in an inscription from Senma (B.I.5), the Nauri Decree (B.I.33) and the Inscription of Rameses II from Elephantine (B.I.58). Using the passage from Thutmose III’s Annals where the king reports “what was said in the Majesty of the *stp-s3*, l. p. h.” (*ddwt m ḥm m stp-s3*) to the council of his generals and retainers before the Battle of Megiddo, far beyond the borders of Egypt, he states that the *stp-s3* could also be used to indicate “a

748 Ibid.: 97.  
749 Ibid.: 97.  
750 Ibid.: 97.
non-permanent or movable royal residence which the king used during his travelling about Egypt or foreign lands”.\textsuperscript{751} Some kind of consultative function was involved in the stp-s3’s activities, as suggested by the speech of the courtiers to Thutmose III in the inscription of Karnak (B.I.4) expressing their approval to the king’s orders. Garry J. Shaw has recently discussed the real meaning of the expression \textit{m hm n stp-s3}, usually translated “in the Majesty of the stp-s3”, which appears in this kind of expression:\textsuperscript{752} \textit{wdtt m hm n stp-s3}, “what was ordered in the Majesty of the stp-s3” and \textit{ddtt m hm n stp-s3}, “what was said in the Majesty of the stp-s3”. He states that the expression \textit{m hm n stp-s3} does not necessarily mean the presence of the king in the decision-making process, since it is used in contexts in which both the king and other persons could participate.\textsuperscript{753} The main issue we have already discussed in the Middle Kingdom chapter, is still whether the term \textit{stp-s3} does mean a physical palace, starting from the Middle Kingdom, or whether it should be regarded as a type of activity, rendered by Shaw as “doing stp-s3-service”.\textsuperscript{754} Commands and directives could be issued by the king and the officials as well, in the last case being the king consulted for permission. New Kingdom examples provide the meaning “committee” or some form of court body for the \textit{stp-s3} which can be intended in contexts both as the location where the king and the officials met and as the group of people involved. As rightly stressed by Shaw, “there is no need to see the \textit{stp-s3} as a reference to a physical building (..) Such a meeting had to occur in a physical location, and, as such, \textit{stp-s3} can be shown with or without a pr-sign determinative. The meeting between those involved must take place somewhere, but not necessarily always in the same place”.\textsuperscript{755}

PART I

PART I. LEXICOGRAPHICAL STUDY. THE ROYAL PALACE IN ANCIENT EGYPTIAN TEXTS.

Chapter 3. Late Period textual sources

3.1 Introduction

Given the chronological breadth of what Egyptologists call the Late Period (664-332 B.C.),756 the time span of this section of the present research must be well defined. Since the philological analysis of written sources is strictly related to the architectural study of archaeological evidence, this chapter will focus on the restricted phase of the Saite Dynasty (664-525 B.C.), the archaeologically known palaces belonging all to this period. A 26th Dynasty platform has been discovered at Memphis by Petrie757 and is known to have served as foundation for a palace of Apries (589-570 B.C.), whose name appeared on portions of inscribed columns of the structure.758 The raised palace of Apries parallels the platform called El-Kasr el-Bint el-Yehudi at Tell Defenna759 in the eastern Delta, dated by foundation deposits to the reign of Psamtek I. Another example of casemate platform has been discovered at Tell el-Balamun, probably of the same period.760 For the great enclosure containing a large casemate building at Naukratis761 instead, Muhs has argued a Ptolemaic date.762 At Sais, the ancestral seat of the 26th Dynasty and one of its main centres of power, the EES has identified the so-called Northern Enclosure, in which traces of massive mud brick walls have been recognized and interpreted as “the Citadel or Royal Palace of the 26th Dynasty kings”.763 A 26th Dynasty casemate mud-bricks building with probable palatial functions has been unearthed in Buto by the German Archaeological Institute in 2006.764 Using A. J. Spencer’s definition, all these structures were “secure citadels with a function

758 Kemp 1977a: 108.
761 Petrie 1886: 24-6, 32-4, pls. 42-3.
762 Muhs 1994: 93-113. The suggestion for a Ptolemaic date is based on the materials of that age found by Petrie in the compartments of the platform, in Petrie 1886: 32-3.
764 Hartung 2007; http://www.dainst.org/buto
which combined an administrative role with the need for security.” 765 Their similarity with
the palace of Apries at Memphis does not allow to state with certainty their royal nature,
since they might similarly be intended for local administration. As suggested by Spencer,
the interpretation of these platforms as governorate buildings would make perfect sense
in the unstable conditions affecting Egypt of the early 26th Dynasty. 766

While taking the Palace of Apries at Memphis as a point of departure for general
considerations on Late Period residences, the textual analysis will be primarily focused on
texts of the 26th Dynasty. However, the catalogue will also consider earlier documents from
the 21st to the 25th Dynasty in order to allow comparisons for functional interpretation.
Written sources of the 8th to 5th centuries B.C. will be likewise examined when they might
provide information about the nature and location of royal residential sites. The Third
Intermediate Period (1069-664 B.C.) 767 texts, although coming from a
completely different geographical and cultural context, will be useful for comparisons with
the Saite sources and for the study of the chronological development of the ancient
Egyptian terminology for “palace”. While analyzing texts from such a chronological span,
we have to consider the complex historical context of this section, characterized by
significant changes in Egypt’s political organization. Most of the Third Intermediate
Period 768 was in fact an era of political decentralization in the Nile Valley, during which the
centre of power was moved from one place to another, depending on the origin of the
ruling Dynasty. The interpretation of the function of the palace in texts is highly conditioned
by the difficulty in identifying the precise geographical location of the central
administration in a period during which the central government was replaced by political

765 Spencer 1999: 299.
766 Spencer 1999: 300.
767 Shaw 2000.
768 The 400-year period, comprising the 21st to the 25th Dynasty is characterized by significant
changes in Egypt’s political organization, society and culture. A main aspect connected to the royal
palace is the frequent changing of the centers of power, depending on the origin of the
various Dynasties. The 21st Dynasty was founded by Smendes (1069-1043 B.C.) in the north, with his
power base at the eastern Delta site of Tanis, a new city whose main monuments were built largely
of reused materials brought from Piramesse and other northern cities. During the 22nd Dynasty, in
particular during the reign of Sheshonq III (825-773 B.C.) and that of his successors, Thebes was
recognized again as the location of the power base, in preference to the rule of Tanis. According to
some scholars, the so-called 23rd Dynasty is composed by several virtually autonomous rulers in the
Delta, but it remains unclear if instead it was composed by the successors of the 22nd Dynasty kings.
The 24th Dynasty was a short-lived rival Dynasty located in the western Delta, with only two
Pharaohs ruling from 727 to 715 B.C.). The 25th Dynasty, known as the Nubian Dynasty, was a line of
rulers originating in the Kingdom of Kush who reigned in Egypt from 744 to 656 B.C. El Kurru may
have been the original power base of these rulers, since a settlement with defensive wall has been
identified there, but by the late 8th century, their political and religious focus had shifted to Napata,
close to the great rocky outcrop of Gebel Barkal.
fragmentation. The problem of locating the royal residence in Late Period Egypt has been
deeply discussed by Claus Jurman in his MPhil thesis submitted to the University of
Birmingham. In the section of his work dedicated to the interpretation of the 26th Dynasty
sources, he has suggested an ambulatory kingship based on the two cities of Sais and
Memphis.\textsuperscript{769} As I have argued elsewhere, the sources under consideration in the present
thesis have been analyzed with regard to the information they might provide about the
nature and function of palatial ancient Egyptian terminology, referring to other studies for
identifying royal residential sites and specifically to Jurman’s study for the Late Period.

3.2 Term ‘\textit{h} in royal and narrative texts

In royal inscriptions the term ‘\textit{h} is often found in connection with the ceremonial
appearance of the king. In the 25th Dynasty triumphal Stele of Piankhy, following the
account of the booty seized in Hermopolis, Piankhy is described while making his
appearance in his ‘\textit{h} in order to proceed to the temple of Thoth. According to the context of
the text, the term should indicate a non-permanent building, such as a pavilion, used by the
king during his visit in Hermopolis\textsuperscript{770} (C.I.5):

\begin{quote}
[bm.f] ‘\textit{h} n s\textit{h}’f m ‘b.f

His Majesty arises in glory in his ‘\textit{h}
\end{quote}

An earlier monument of the time of Takeloth II describes ‘\textit{Imn-m-int} as one introduced in
the ‘\textit{h} at the appearance (\textit{h’l}) of the king (CG 42230 - C.II.5):

\begin{quote}
bs ink r ‘\textit{h}(t) m \textit{h’l}(t) nswt gr ‘nḥ nb n Wsr

I was introduced into the ‘\textit{h}(t) at the appearance
of the king with a bouquet of the Lord of Thebes
\end{quote}

A few line above Nimlot addresses Piankhy as \textit{Hr nb ‘h}, the use of the term ‘\textit{h} in association
with god’s epithets continuing to be attested in Late Period Texts. In another monument of
Piankhy, the stele no. 26 from Gebel Barkal, the king is defined as \textit{s3 R’ nb ‘h}, “son of Ra,
Lord of the ‘\textit{h}” (C.I.4).

\textsuperscript{769} Jurman 2006: 122.
\textsuperscript{770} Breasted considers this building as a “tent”, in: Breasted 1906-7, 4: 420.
The connection between Horus and the ‘ḥ’ is known since the Old Kingdom\textsuperscript{771} and continues to be used during the Late Period as confirmed by some expressions and titles in private inscriptions of the 21\textsuperscript{th} and 22\textsuperscript{nd} Dynasty:

<table>
<thead>
<tr>
<th>Expressions compound with ḫr + ‘ḥ’</th>
</tr>
</thead>
<tbody>
<tr>
<td>\textsf{ir.,isi ,hr ,m ,‘ḥ,f}</td>
</tr>
<tr>
<td>\textsf{irtw nswt-bīṭy ‘nhwy n \textit{imy-ib n hr nb ‘ḥ}}</td>
</tr>
<tr>
<td>\textsf{wḥm ,ḥswt ,m ,ḥrw m ‘ḥ hry(t)n.i}</td>
</tr>
<tr>
<td>\textit{mh-ib ,hr ,nb ‘ḥ}</td>
</tr>
</tbody>
</table>

The use of the ‘ḥ’ on ceremonial occasions is evoked by a passage in the Shellal stela of Psamtek II (C.I.10) in which he is presented while making offerings (‘3bwt or \textit{wdnw}), to all the gods of Egypt:

\textit{ll. 10-12) rdlt n \textit{hm.f} m3 ‘3bwt ‘3t m \textit{iw3w \,wngw n nṭrw nbw Šm’w T3-mhw \textit{wdnw n nṭrw sp-t3 m ‘ḥt}}

His Majesty has given great offerings consisting of long- and short-horned cattle for all the gods of Upper and Lower Egypt, (and) reversion offerings for the gods of the royal presence in the ‘ḥt

Again in the Piankhy stela no. 25 (C.I.5), the term ‘ḥ’ is mentioned in the context of an offering ceremony, this time made by common people in the palace:

\textit{§25, 146-147) imt n 3bt t3w btpw hry-ib hr ḥt.sn n snq.f hr rdlt km3 ḥt.sn r bw \textit{hm.f} m3 ndsw nt ‘ḥt}

The West and the East and the lands of the centre are flat-belly for fear of it, making offerings of their goods in the place of His Majesty as the poor men of the ‘ḥ(t)

\textsuperscript{771} Gundlach 2009: 60 ff.
Narration of the Elephantine Stele of Amasis (Cairo 13.6.24.1 - C.I.14) begins with year 1, when Amasis is said to hold council at his Saite palace, despite the interpretation of hieroglyph ‘ḥ’ is uncertain.\(^{772}\)

Accepting Posener’s rendering of the passage,\(^{773}\) the ‘ḥ.f \textit{Nīt(y)}’ may refer to a royal residence situated somewhere within the Saite nome:

\textit{l. 2-3) wnn \textit{hm.f m ḥ.f \textit{Nīt(y)} hr nd šhr n t3 r ḏr.f} }\hspace{1cm} \text{His Majesty was in his ‘ḥ’ of \textit{Nīt(y)} to protect the fortune of the whole Land}

The question whether ’’ḥ’,f \textit{Nīt(y)} is to be considered as a palace in the capital Sais or just a royal residence situated somewhere within the Saite nome remains open.\(^{774}\)

In the inscription on his naophorous statue Louvre A 93, \textit{P3f-t3w(-m)-‘w-Nt} (C.II.37), who held among the other offices the position of superintendent of the central treasury (\textit{imy-r prwy bd/nbw})\(^{775}\) and chief steward (\textit{imy-r pr-wr}) during the reign of Apries and Amasis, describes the measures he has taken in order to restore the architectural institutional and economic framework of the cults of Osiris at Abydos.\(^{776}\) This is said to have been carried out by royal command, after \textit{P3f-t3w(-m)-‘w-Nt} had reported “the affairs of Abydos” to the king at his ‘ḥ’-palace:

\textit{l. 2) ḫw s’n(y) mdt 3bdw r-hn ‘ḥ r sdìm hm.f} \hspace{1cm} \text{He refers the affairs of Abydos at the ‘ḥ’ for the knowledge of the king}

Several 21\textsuperscript{th} and 22\textsuperscript{nd} Dynasty biographies describe the entering of the inscription owner in the \textit{dsrw},\(^{777}\) literally meaning the “sacred places” of the ‘ḥ’. The connection between \textit{dsrw} and ‘ḥ’ is known since the New Kingdom in both official and private inscriptions. In the Coronation Text of Hatshepsut, carved on the blocks of the Red Chapel at Karnak (B.I.9), there is a description of the procession of the bark of the god Amun leaving the temple area and entering the royal palace. Text describes the Queen and the bark moving from the

---

\(^{772}\) Daressy translates the passage as “Sa Majesté était au Conseil, à s’occuper des destinées de la terre entière” looking the sign following the preposition \textit{m} as an approximation of the term \textit{ifd}, “diwan” (Daressy 1900b: 3 f.). Edel, author of a new collection of the text rendered it as “Als sich Seine Majestät in seinem Palast im saitischen Gau befand, indem er das Geschick des ganzen Landes besprach” (Edel 1978: 19). Posener confirms Edel’s rendering of the passage (Posener 1934: 148).

\(^{774}\) Jurman 2006: 56-57, note no. 196.

\(^{775}\) Piehl 1893: 88.

\(^{777}\) \textit{GEG}: D 45, 604. Wb V: 612.
interior (ḥnw) of a place called ḏsrw nw ‘ḥ.s, “the sacred places”\textsuperscript{778} of her ‘ḥ’.\textsuperscript{779} Eilen Hirsch has recently suggested that word ḏsrw specifies a “sanctuary room” within the palace, being the place where the sacred bark stationed before the procession, and more specifically a “sacred room connected with festivals and containing sacred room”.\textsuperscript{780} The occasion during which this area of the ‘ḥ was used may also be of more secular nature, such as the appearance of the Queen in the double crown at the presence of her courtiers described in the inscription of the 9\textsuperscript{th} year of Hatshepsut’s reign recording the expedition to \textit{Pwnt} at Deir el-Bahari (B.I.12):

\textit{rnp t ḫpr hmst m ḏ3dw nswt ḏ(f)t m šḥmty hr st wrt nt ḏ’m ḏnw ḏsrw nw ḏ.f s’t3 srw smrw nw stp-s3 r ṣḏm ṣḥm n wdt}

In the 9\textsuperscript{th} year the Queen was in the ḏ3dw; appearance of the king in the double crown on the great throne of gold in the sacred ḏnw of his ‘ḥ; walk of officials and courtiers of the stp-s3 to hear the guide of the command.

Therefore ḏsrw could be interpreted as a space with ritual connotation involved in the procession of gods\textsuperscript{781} and the appearance of the king and we can imagine that the access to this area was limited to a restricted number of people, as suggested by inscription on the cube statue Berlin 17272 (C.II.18) of the time of Osorkon III:

\textit{bs hr nswt m w‘w m33 ḏ h m ḏsrw.s}

The unique one who is introduced the king, overseer of the ‘ḥ of its sacred places

\textsuperscript{779} URK IV: 349, 10-12.

\textsuperscript{780} Hirsch 2009: 76.

\textsuperscript{781} A room similar to the ḏsrw is mentioned in the building inscription of Sesostiris I, which would have been placed in the “White Chapel” of Sesostiris I. An inscription on a pillar shows the god “Amon at the front of the ḏsrwt”. Eileen Hirsch has suggested that the building mentioned in the same inscription, called ḫpr-k3-R’ ṣṭry-k3w, was a ritual palace involved in the procession of the god, who paused perhaps in a ḏsr room. Hirsch 2009: 76.

3.3 Term pr-'3 in royal and narrative texts

Starting from the New Kingdom,\(^{782}\) the term pr-'3 definitely became a common designation of the king in the Late Period,\(^{783}\) when its use for referring to the royal place must be considered a rare archaism.\(^{784}\)

The passage of the 25\(^{th}\) Dynasty Stele of Plankhy (C.I.5) recording the submission of Herakleopolis does not necessarily speak in favor of the interpretation of pr-'3 as Pharaoh:

\[\text{§14, 70-71) i\text{i pw irpi.} \text{n hki3 n Nni-nswt }\ (\text{Pf-t3w-}.\text{wi-B3st}) \text{ brinwr pr-'3 nbw hdi3 nb.t(t)} \text{(.)} \]

The Royal Prince Infant Pf-t3w-'.wi-B3st came, charged of tributes, to the pr-'3, of gold, silver and all the stones (.)\(^{785}\)

In this specific context the pr-'3 receiving the inw-tribute might be intended as physical place as well as the king’s person.

The traditional meaning of pr-'3 as royal building seems maintained in the context of two nai of Amasis (570-526 B.C.) respectively in the collections of the Louvre (C.I.15) and the Rijksmuseum van Oudhoden Leiden (C.I.16). In the upper part of the front of these monuments the king is referred to by the epithets nfr nfr ḫnty pr-'3 in Louvre D 29\(^{786}\) and

\(^{782}\) See above.

\(^{784}\) Jurman 2006: 19.

\(^{785}\) Grimal 1981: 76 f., pl. 24, l. 70 f.

\(^{786}\) Plankoff 1933: 162, fig. 1.
The use of the term **pr-'3** as apposition as royal names continues to be attested during the 26th Dynasty. In the Petiton of **P3-di-3st** (C.I.17) the word **pr-'3** is specified by the name of Psamtek: **pr-'3** 'nh wd3 snb Psmtk. In the same stele, phrases introduced by the formula **hpr h3t-sp N**’ **pr-'3** 'nh wd3 snb Psmtk refer to specific regnal years of Psamtek: “in the tor year of the Pharaoh, l. p. h. Psamtek I”. In other passages **pr-'3** is the subject of speeches introduced by expressions such as **dd pr-'3** 'nh wd3 snb, “speech of the Pharaoh, l. p. h.” or **dd.n.f. pr-'3** 'nh wd3 snb, “the Pharaoh l. p. h. said”.

The Petition of **P3-di-3st** (C.I.17) offers valuable information for reconstructing the administrative structure and the social background of the Saite Dynasty and the early Persian Egypt, although the discussion on its documentary character is still open among Egyptian scholars. In the 4th year of Psamtek’s reign, the shipmaster **P3-di-3st** is said to have been brought to the **pr pr-'3** and before the Pharaoh, **m b3h pr-'3**, where he received gifts.

\begin{quote}
\textit{V(3)} \textit{inw P3-di-3st s3 ‘irtw-(w) m-b3h pr-'3 ‘nhwd3 snb P3-di-3st, son of ‘irtw-(w), was brought to the presence of the Pharaoh, l. p. h., and he said to the Pharaoh, l. p. h. (..)}
\end{quote}

---

787 Boeser 1905-32, VII: pl. 2, fig. 1b.
789 This stele in the Ashmolean Museum in Oxford was found in the Dakhla Oasis in 1894 and belonged to the prince of the Oasis, overseer of plantations W3y-hst, in Gardiner 1933: 23, pl. V-VII.
791 Vittmann 1998: pls. IX-XIV.
792 Many scholars consider the text as a purely legal document, an official petition and a non-fictional account of events even if furnished with dramatic effects by the narrator (Griffith 1909: 25: 60 f. Roeder 1926: 250). In more recent years Papyrus Rylands IX has often been treated as “on the margin of literature” (Quack 2005: 162-166), or “miscellaneous” (Depauw 1997: 102. See also: Wessetzkx 1977: 499-502. Chauveau 1996: 233 f.). Other scholars point out its main literary aim, given the fact that its author has employed a certain amount of literary taste and artistic license when retelling the facts happened to the protagonists (Quack 2005: 166). Vittmann asserts that the papyrus is a copy of a draft for a petition intended to be really brought (Vittmann 1998, 2: 685 f.).
After the death of the shipmaster P3-di-3st, the Pharaoh bestows his power onto his son, P3-di-3st I, who suggests that Sm3-t3wy-t3y.f nḥttj, the late shipmaster’s son, should succeed his father. He is referred to as a man belonging to the household of the Pharaoh (pr n pr-’3):

**X,4** (P3-di-3st) rmt ḫs pr n pr-’3 ‘nḥ ḳwḏ3 snb (P3-di-3st) man belonging to the pr n pr-’3

The proper name for “palace” used in the Petition of P3-di-3st has become pr n pr-’3 ‘nḥ ḳwḏ3 snb, literally meaning “house/estate of the Pharaoh, l. p. h.”, an expression going back to the 19th Dynasty.\(^{793}\)

**V,16** (P3-di-3st) ḫnt fr ṭ3 pr pr-’3 ‘nḥ ḳwḏ3 snb He (P3-di-3st) have been brought to the pr pr-’3

**X,4** (P3-di-3st) rmt ḫs pr n pr-’3 ‘nḥ ḳwḏ3 snb (P3-di-3st) man belonging to the pr n pr-’3

**XVI,14** pd ṭ3 w’bw ṭ mḥd ṭ ṭ3 ṭ3 pr pr-’3 Then the priest hurried to the north to the pr pr-’3

Following his return from the Asiatic expedition of Psamtek II, P3-di-3st II travels from Taudjoi northwards to the pr n pr-’3. The lack of more geographical precision does not allow to localize the exact position of the palace:

**XV,8** P3-di-3st mḥd ṭ ṭ3 ṭ3 pr n pr-’3 ‘nḥ ḳwḏ3 P3-di-3st travelled northwards to the pr n pr-’3, l. snb p. h.

In his pr pr-’3 the king is surrounded by courtiers defined as rmt ṭ3 ḫn ṭ3 pr pr-’3. Hr-ḥnsw, one of Pharaoh’s closest courtiers, is described as a man allowed to enter the king’s private quarters or an intimate part of the palace:

**XVI,16** rmt lw.f ṭwt ṭ pr-’3 ṭ t3 knḥ ṭ3 A man who pleases the Pharaoh even in the bedchamber

The Demotic papyrus Berlin 13615 (C.I.18) found in Elephantine and dated to year 41 of Amasis contains a list of the military personnel accompanying the king; among the mentioned men there are a scribe of the House of Life, sš pr-’nḥ, and a physician, swnw,

\(^{793}\) See above.
both classified as \textit{rmt lw.f 'h' m-b3h pr-'3},\textsuperscript{794} “men standing in front of the Pharaoh”, the expression \textit{m-b3h pr-'3} recalling the aforementioned passage of the Petition of \textit{P3-di-3st} (C.I.17).

The recto of the 26\textsuperscript{th} Dynasty Demotic papyrus Cairo CG 31167 (C.II.54) contains a letter of a certain Teos, son of \textit{P3-di-3st}, addressed to his \textit{hri} likewise named \textit{P3-di-3st}; lines 26 ff. contain reference to the \textit{pr-'3} as direct object of verb \textit{ph}, “to follow”, suggesting a “Pharaoh” translation:

\textit{ḥpr bn pw.i di ph pr-'3}

It happen that I could not reach the Pharaoh

The use of demotic literature in the present work raises the question of its documentary character and to what extent it can reflect contemporary social practices or institutions and may be analyzed in order to gain historical knowledge.\textsuperscript{795} Assumed the ambiguities of a “fictionally”\textsuperscript{796} text which can be written with precise aims involving a specific audience, a story must have been composed upon the experienced daily reality of the common cultural sense, in order to achieve convincingness and fulfill the “fictional contract”\textsuperscript{797} between the author and the audience. Being a text embedded in its contemporary culture, it necessarily incorporates implicit historical information, which will be used considering the context of text production.\textsuperscript{798}

Some literary Late Period texts confirm the change of the meaning of \textit{pr-'3} as Pharaoh and provides other proofs of the usage of the new term \textit{pr pr-'3} to indicate a royal building (\textit{pr}) belonging to the Pharaoh: \textit{pr-'3} is used as subject in expressions recording situations happened within the \textit{pr pr-'3} itself. In the narrative introduction to the Instructions of \textit{ḥḥ-Ššny} (C.III.1),\textsuperscript{799} the circumstances that led to the composition of the maxims are described.\textsuperscript{800} A priest of Ra at Heliopolis, \textit{ḥḥ-Ššny}, has come to visit his friend \textit{Ḥr-s3-'1st} at Memphis recently appointed chief royal physician by the king. \textit{Ḥr-s3-'1st} confides to him that he and other courtiers are plotting to kill the Pharaoh and \textit{ḥḥ-Ššny} tries

\textsuperscript{794} Zauzich 1992: 362, 2.

\textsuperscript{797} Moers 1999: 39.

\textsuperscript{798} Jurman 2006: 67.

\textsuperscript{799} Considering the final transformation of the term \textit{pr-'3}, definitely used throughout the text in its meaning of Pharaoh, I have chosen to select only those sections referring to the \textit{pr-pr3} in order to analyze the use of this new expression for “palace”.

unsuccessfully to dissuade his friend from the plot reminding him what the king has recently done for him and the agreement he had among the other courtiers:

2,11) ṣ r n k pr-3 mdt nfrt 33y [ .. ] pr pr-3 drw irw ṣ r pr pr-3 mtwk nkt n p3 t3

Pharaoh has done for you many good things [more than] for all [the great men] of the pr pr-3. You were brought to the pr pr-3 when you had no property on the earth.

2,15) n3 s3wtw n3 ḳm-r mš’w n3 rmtw 3w pr pr-3 mtr r.s drw [ r ] ṣr.s

The guards, the generals and all the great men of the pr pr-3 are all agreed upon it to do it.

The conversation between Ḥr-s3-ḥst and ʿnh-ššnky is overheard by a servant who reports it to the king. Ḥr-s3-ḥst and the others are invited to the palace (pr pr-3) and are executed thanks to a pyre prepared at its door:

3,10-11) dd.n.f pr-3 Ḥr-s3-ḥst s3 R’-ms ḳm ṣ r pr-3 lw mn mtwk nkt n p3 t3

Pharaoh said to him: Ḥr-s3-ḥst, son of R’-ms, it was when you had no property that you where brought to the pr pr-3

4,3-4) dil pr-3 qdw w’t ḫw3t 3st hr r3 pr pr-3 di.f diw Ḥr-s3-ḥst s3 R’-ms (n) p3 ḫḥ hmt ḳm ḳmr nb nt mth ḳmr ḳmr nb ḳmr p3 ‘š-hn bn pr-3

Pharaoh caused an altar of earth to be built at the door of the pr pr-3. He caused Ḥr-s3-ḥst son of R’-ms to be brought with all his people and every man who has conspired against Pharaoh.

ʿnh-ššnky is sent to prison for having failed to inform the king and here he receives regularly food from the pr pr-3:

4,7) ṛ.f ḥpr.f ḳw ṣr ḳmr t3i.f ḥr.r [-bnr n] pr pr-3

His food used to be brought in from the pr pr-3 daily

In the Instructions of ʿnh-ššnky the term pr pr-3 refers to the physical place where the Pharaoh and the courtiers (“guards”, s3wtw, “generals”, ḳm-r mš’w, and “great men”, rmtw 3w) operate. The pr pr-3 of the text is located in Memphis (col. 3,8). Despite the 26th Dynasty setting appears so convincing that the text must either have been composed during that period, the exact date of this composition is still debated among scholars.

---

802 The fact that the introduction is set in the Saite Period provides a terminus post quem for its date of composition. Generally, however a much later date is preferred, in Ryholt 2000: 119.
Even the pr pr-3 cited in the Saqqara Demotic Papyri text 1/1a (C.I.19) should be located in Memphis, since the city is mentioned in col. XIII, 23 and is described as the location of the court in col. XIV, 6 f.:803

6,6) 33w3w n3 m-r33w n3 rmtw '3 n pr-pr-3

The guards, the generals and the great men of the pr pr-3

13,24-14,10) sm pr-3 r pr pr-3

Depart of the Pharaoh to the pr pr-3

3.4 Term pr-nswt in royal and narrative texts

In the 25th Dynasty Gebel Barkal stele (C.I.5) Piankhry enters in the palace of Nimlot, after having made his visit to the local temple in Hermopolis:

§13, 62] wd3 pw iri.n b.m.f r pr-nswt (Nmit)
šm.n.f 't nbt nt pr-nswt pr-hd.f wd3w.f

His Majesty proceeded to the pr-nswt of Nimlot.

He strode through every chamber of the pr-nswt, its treasury and its storeroom

The pr-nswt of Nimlot is perceived as an architectural entity with a treasury (pr-hd), chambers ('t), and storage facilities (wd3w). Another passage of the Piankhry stele is dedicated to the description of the rules to be observed before entering the pr-nswt, consisting in a previous purification (wn m w/b, “being in quality of pure”) and diet restrictions: kk rmw, “not eating fish”, and wn 'm'w, “being circumcised” is considered an abomination for the pr-nswt, bwt pw nt pr-nswt.804

§26,151-152] nn 'k.n.sn r pr-nswt dr ntt wnn.sn 'm'w bn' kk rmw bwt pw nt pr-nswt 'ls nswt Nmrt k.f r pr-nswt dr ntt wn.n fm w/b nn kk.f rmw'h'n hm3 3rdw.sn w'm 'k pr-nswt

They do not enter in the pr-nswt since they have been circumcised and eat fish, this is an abomination for the pr-nswt. The king Nmrt enters in the pr-nswt since he has been pure and he didn’t eat fish, three were out and one went into the pr-nswt.

In the Adoption stele of Nitocris from Karnak (C.I.11), lines 7-10 of the text describe Nitocris’ voyage from the ipt nswt805 to Thebes. The location of the ipt nswt, “the royal

803 Smith – Tait 1983.
804 The taboo of eating fish is well known in the ancient Egyptian culture, but here it is applied to the royal palace. See Grimal 1981: note no. 530.
apartments is not made explicit, even if the context of the king giving away his daughter suggests that it was situated within the royal residence; whether this was located in Memphis or Sais is not understandable from the context. Being accompanied by her retainers (šmsw.s) and attendants (šn’w) Nitocris’s daughter takes the road to the tp-š, quay/lake, in order to embark on the river journey to the South. The pr-nswt is cited as place where is stored everything necessary (ḥt nb nfr.t pr-nswt) for the fitting of the ships, ‘h’w, and the crew, išw, used in the procession to bring Princess Nitocris into the college of priestesses at Karnak during Psamtek I’s reign:

l. 8) ṣṣp w3t nfr.t r tp-š r rdīt ḫr m ḫnt r W3st ‘h’w ḫr.s m nbw 3ḥt išw m nbt-’w 3tp r ḫw r ḫw irw m ḫnt nb nfr.t pr-nswt

They took the road happily to the quay/lake, in order to head south of the Theban nome, ships about her in great numbers, crews consisting of strong-armed men, laden up to the gunwales thereof with every good thing of the pr-nswt

3.5 Term ħnw in royal and narrative texts

References to the ħnw as “residence city” are known since the Middle Kingdom and become more explicit in the New Kingdom and specifically in the Ramessid Period. This use continues to be attested during the 26th Dynasty. In the Piankhay stele (C.I.5) the king addresses Memphis and its inhabitants, invoking the city as ħnw Šw m sp tpi, “palace of Šw in the beginning”. According to Jurman, the whole point of this comparison seems to lie in Memphis’ mythological role as the god’s “official” residence city.

During the 21th Dynasty, according to the rock stele near Gebelein (C.I.1), King Smendes was dwelling in his residence of Memphis when he learnt that flood waters had damaged temples at Luxor:

---

806 The term may also be translated as “royal harim” as in the Piankhay stele where it is written with the female determinative: Grimal 1981: 52 f.; 63, n. 145.
807 Caminos 1964: 81.
808 Der Manuellian 1994: 300.
809 As pointed out by Jurman (Jurman 2006: 30), this is perhaps best illustrated by the judicial inscription from the tomb of Mēs, in which, at one point, the vizier prompts a scribe to go to PiRaemesse and retrieve legal documents from the Treasury of Pharaoh there, since he would belong to the residence at any rate. See Gardiner 1905: 8 f., 47 f. For the use of the word ħnw as apposition of the city of PiRaemesse see also the Decree of Ptah recorded on several stelae of Rameses II and III: KRI II: 269-9-11.

810 Jurman 2006: 32.

194
istorpy n dmi Hw.t-k3-Pth hnw.f ḥps n knt nbṭ mi His Majesty stayed in the town of Memphis, his
R`
hnw, noble of force and victorious as Ra

Since hnw.f follows Hw.t-k3-Pth as a specification of it, its meaning must come close to
“residential city” as referred to Memphis.\textsuperscript{811}

On the Gebel el-Silsilah stele no. 100 (C.I.2), a monument set up in the name of Sheshonq I,
one reads that the king is residing in the hnw of a place called pr 3st P3-k3-‘3-R’-Hrw-3ḥ.ty
(lit. Pr-3st, “The Great Soul of Ra-Harakhte”). The royal residence mentioned in the text is
unknown elsewhere and its precise location cannot be ascertained; it could be positioned in
some place in Lower Egypt where Sheshonq I and his successor seem to have regularly
resided.\textsuperscript{812} In this case the term hnw seems to denote a building or a place connected with
a bigger topographical unit that may be linked hypothetically to a major settlement in the
Delta. Considering the usage of the epithet “The Great soul of Ra-Harakhte” referring to
Piramesse\textsuperscript{813} in earlier sources, a connection with the old Ramessid capital may be
supposed.\textsuperscript{814}

In the Chronicle of Prince Osorkon (C.I.3), the term hnw is qualified by the place-name T3-
dhn.t-n-t-‘lmn-‘3-hmhm.t, an uncommon name of Taudjoii/el-Hibeh.\textsuperscript{815} It was the fortified
place opposite the island of el-Hibeh, on the east bank of the Nile, around 150 km south of
Cairo, presumably founded in the 21\textsuperscript{th} Dynasty and became particularly prominent under
the Libyan Pharaohs.\textsuperscript{816} The term hnw is clearly used in the text to designate an official
residence.

In several Kushite inscriptions the hnw is linked to the place-name Memphis, its meaning
coming close to “residential city”. In a passage of the 25\textsuperscript{th} Dynasty Kawa stele IV of Taharqa
(690-664 B.C.) (C.I.7), the king tells how he dispatched his army, several groups of workmen
and artisans to Kawa in order to refurbish the local temple of Amun.\textsuperscript{817} Taharqa is referred
to as residing in Memphis at the time the building efforts were undertaken:

\begin{center}
\textit{hm.f m ḫnw ‘lnb-bḥd ‘h’.n kd.w ḫw.t-nṛ ṭn} His Majesty was in the hnw (of) Memphis (at that
time) this temple was constructed
\end{center}

\textsuperscript{811} \textit{ibid.}: 30.
\textsuperscript{812} Caminos 1952: 55.
\textsuperscript{813} Gardiner 1918: 136 f.; 269.
\textsuperscript{814} Caminos 1952: 55.
\textsuperscript{815} Caminos 1958: 17-19, §§ 28; 30.
\textsuperscript{816} \textit{ibid.}: § 30.
The question here is whether \_hnw\_ denotes a specific topographical entity or whether it forms part of a bigger topographical unit. Kawa stele V, as well as stele IV dating to the 6th year of Taharqa’s reign, presents Memphis as the place of Taharqa’s coronation and as his principal residence where the king moved at the age of twenty.\textsuperscript{818}

The Memphite donation stele JE 38861 (C.I.6) refers to “every superintendent of works of his \_hnw\_ and every craftsmen of His Majesty” who shall refurbish the ruined temple of Amun at Memphis. Meeks has suggested that the term \_hnw\_ should be intended as the whole Memphis, where the residence of Taharqa was located according to several monuments which underline the connection of the king with Memphis.\textsuperscript{819}

In Taharqa’s stele from the Dahshur Desert Road (C.I.8), the passage following the royal titles refers to the occasion of the commission of the stele itself, to be erected on the western side of the \_hnw\_:  

\begin{equation}
2, 2-3) \text{wd hm.f smnt [wdj] [hr] s3 h3st imntt hr imy-wrt nt \_hnw\_}
\end{equation}

His Majesty commissioned to set up [a stele] behind the (edge of the) western desert on the western side of the \_hnw\_

In the section recounting the virtues of the Kushite army during a twelve hour running crossing from the Memphite desert to the Faiyum and back, the word \_hnw\_ and Memphis are used in different phrases as synonymous:  

\begin{equation}
2,13) \text{phr.n.f hn.sn hr s3 h3st \_lnb-hd m wwnwt Shtpsns ph.sn [W\textsuperscript{3}gj]wr m wwnwt wbn 'nn.sn r \_hnw\_ m wwnwt mkt-[nb] s}
\end{equation}

He went with them from the desert of Memphis in the 9th hour of the night. They reached the Great Green (the Faiyum) in the 1st hour of the day and returned to the \_hnw\_ in the 3rd hour of the day.

As rightly pointed out by Jurman,\textsuperscript{820} the cuneiform evidence of Esarhaddon who directed his second Egyptian campaign in 671 B.C. against Taharqa at his ál šarrûtišu Mempi, “his residence city, Memphis” seems to confirm this interpretation.\textsuperscript{821}

The Saite royal inscriptions tend to be less explicit regarding the location of the royal residence than the Kushite counterparts.

\textsuperscript{818} In Kawa stele V of Taharqa the king says: šsp.n.i ʰ’w ḳ’ ‘lnb-hd m ḳ’t ḫry bik r pt, “I received the crown in Memphis, after the Falcon had ascended to the heaven”. Macadam 1949: vol. I, 28; vol. II, pl. 10.

\textsuperscript{819} Meeks 1987: 324, no. 8.

\textsuperscript{820} Jurman 2006: 39.

\textsuperscript{821} Onasch 1994: vol. 1, 18, IV, 26; p. 24; vol. II, 2; 17.
The Serapeum Stele of Psamtek I (664-610 B.C.) (C.I.13) lists the provisions undertaken for the burial of the Apis bull among which there were coffins made of costly wood from foreign countries. One passage of the stele contains a reference to the rulers of these countries stating:

\[ htrw \ b3kw.sn \ r \ hnw \ m\bar{i} \ T3-mri \]

Their tributes were directed to the \( hnw \) as (if they had come from) Egypt

The text presents the \( hnw \) as place where the central tax administration for Egypt is located and any imported commodities are assessed.\textsuperscript{822}

In the Tanis stele JE 67095 (C.I.9) dated to the 3\textsuperscript{rd} year of Psamtek II’s reign (593 B.C.), the king dispatches his army with senior officials (\( srw \)) forth to subdue the rebel Nubian forces. The term \( hnw \) does occur in the stele in the passage where it is said that these officials reached the \( hnw \), here apparently used in the sense of “capital”.\textsuperscript{823}

\[ \text{His Majesty sent the army to the land of \( \hat{s}s \), the high officials being with him from the \( hnw(\tau)y \). They reached \( \ldots \)-r-[\( \gamma \)]-b3 the \( hnw \) of the king being located there, along with the town by the name of \( T3-dhn \)} \]

In the stelophorous statue of Bentehor (Louvre A 83 – C.II.27)\textsuperscript{824} the inscription relates the efforts undertaken by Necho II in the restoration of Theban buildings during his first regnal year. It locates the king’s residence from where he decrees to refurbish ruined temples in the Saite nome, \( m \ hnw \ N\dot{\iota} \). The text suggests that Necho II resided in Sais during his first regnal year or wanted at least to present himself as a “Saite” king.\textsuperscript{825} What makes the stele interesting in this context is that it confirms the association of the term \( hnw \) with a place-name just observed in the official inscriptions.

3.6 “Palace”-words in epithets and private inscriptions

Although private monuments provide additional information to what gathered from royal inscriptions and literary texts, they pose their own limit when they questioned in regards to

\textsuperscript{822} Jurman 2006: 53.
\textsuperscript{824} Yoyotte 1960: col. 368-370, fig. 609. Perdu 1986: 24-26, fig. 1.
\textsuperscript{825} Jurman 2006: 54.
the location of the “palace”, “residence” or “central administration” cited in the text. The epithets and titles refer to the role played by privates in a generic royal structure without specific geographical connotation.

The name of the 26th Dynasty officials is often preceded by a list of titles and epithets the most common one, ḫtmw bity, smr wʾty), frequently encountered at the head of titling in combination with ʾiry-pʾt, ḥṣtyʾ-ʾ, seem to have lost in this period much of their significance and are commonly held to underline an affiliation of the owner with the court and the king. Pressl points out that, unlike during the New Kingdom, there is not an indication of hierarchically differentiated court offices in the 26th Dynasty. The most common designation, ḫpr-ʾḥ, seems not to mark a specific function in the courtly hierarchy; instead it should be regarded as a more general expression of royal trust to convey a rank or an honor to the title owner. On his naophoric statue in the Vatican, Wd3-hr-r-sn-nt is invested with the ḫpr-ʾḥ title directly by Cambyses, suggesting that, even if used as a general title, it could express the holder’s right to get into direct contact with the king. ṭ remains the most common expression for “palace” in formulaic inscriptions and features prominently among the stock phrases of late Egyptian autobiographies.

The title sʾnr(y) ḫt(w).sn r-hnw ʾḥ, “one who introduces their goods inside the ʾḥ”, appears in two documents of the time, the BM EA 83 statue of Pf-ʾ(w)-Ntʾs (C.II.35) and the Statue of P3f-t3w(-m)-ʾw-Nt from Mit-Rahinah (C.II.36).

According to some 21st and 22nd Dynasty autobiographical inscriptions, officials can be appointed as ʾmy-ib n nswt m ʾḥ, “Intimate of the king in the ʾḥ” by the king himself:

<table>
<thead>
<tr>
<th>ʾmy-ib n nswt m ʾḥ</th>

</tbody>
</table>

In the Saqqara stele Cairo SR 241 (C.I.12) mentioning the Libyan campaign in the 11th year of Psamtek I’s reign, column 8 describes how the Pharaoh summons his armies to embark against the rebellious Libyan tribes. Among the listed personnel the title tsw nb n mš‘ nb n ḫnw, “every commander of every military unit of the ḫnw” implies that the ḫnw was associated with a military presence, as already suggested by the earlier inscription in the tomb of Rḥ-mi-R’ (B.II.33). Ḫnw is rarely used in Late Period titles and epithets, with some exception such as the title of Ḥk3-m-s3.f in his tomb at Saqqara (C.II.50) ḫm-r prwy ḫd nbw n(l) ḫnw, “overseer of the treasuries of the ḫnw”, confirming the physical link of the pr-nswt to an administrative institution like the treasury, as already observed in narrative inscriptions.

3.7 Conclusions

The word ‘ḥ’ continues to be used as the most common term for “palace” in generic expressions and titles of late Egyptian autobiographies. In official inscriptions the term is found in connection with the appearing in glory (ḥ ‘l) of the king and ceremonies involving offerings (km3w, wdnw) made by the king himself or common people in the ‘ḥ’. The term incorporates ceremonial connotations also in those contexts where it is associated with Ra or Horus “Lord of the ‘ḥ’”, as divine manifestation of the king.

831 Jurman 2006: 51. The term mš‘ does not necessarily refer to a troop contingent in the scale of an army; see Wb II: 155, no. 13; 15.
832 See also the epithets and titles among the stock phrases of the 22nd and the 23rd Dynasty in Jansen-Winkeln 1985: 317-19.
The term pr-‘3 is quite definitely used as common designation for the king by the Late Period onwards. The effective transformation seems to be confirmed by the use of the word as apposition of the royal name already during the 22rd and definitely with the 26th Dynasty.

The term pr-pr-‘333 becomes the normal expression for “palace” in demotic texts of the Late Period as well documented by the Instructions of ‘nh-Śšnky. It does not show any specific connotation, so that it seems to indicate the palace in a generic sense, as the physical place where the king is.

The term pr-nswt appears to be rather rare in both official and private late Egyptian texts. When used it seems to be perceived as architectural entity comprehending the treasury and storage facilities, such as in the Piankh hy stele and the Adoption stele of Nitocris. The pr-nswt seems to maintain its nature of administrative institution, used for the management of entries and exits of different kinds of facilities.

First millennium attestations of hnw show that the most common usage of the word was in the sense of “official residence”, the hnw being presented as place where the king would reside and govern for longer or shorter periods of time. In these cases the word is followed by the name of a city, as apposition of hnw, which can be identified from time to time with Memphis (named Hwt-k3-R’ in the rock stele of King Smendes near Gebelein – C.I.1, hnw Św m sp tpy in the Piankh hy stele – C.I.5, or ‘Inb-ḥd in the Kawa stele IV from Taharqa – C.I.7), Piramesse (called pr st P3-k3-‘3-R’-Hrw-ḥty in the Gebel el-Silsilah stele no. 100 – C.I.2) or Taudjo/El Hibe (qualified by the uncommon place-name of T3-dhnt-nt-‘lmn-‘3-hmḥmt in the Chronicle of Prince Osorkon – C.I.3).

While Memphis seems to have worked as a permanent residential city or hnw during the Libyan, Kushite and Saite rules, other hnw such as the residence-city of Piramesse cited in the Gebel el-Silsilah stele no. 100 (C.I.2) should have been used by king Sheshonq I for a certain period of time, being the passage in question a commemoration of local quarry work carried out for the king’s building project in Karnak.

333 The terms goes back to the 18th Dynasty. See paragraph above: § 2.4.
Private inscriptions such as the stelophorous statue of Bentehor (Louvre A 83 – C.II.35) confirms this usage of ḫnw, locating the residence of Necho II, from where the king decreed to refurbish ruined Theban temples, in the Saite nome: m ḫnw Nit. If the text is considered an “original” royal document, 834 it may be asserted that Necho II resided at Sais during his first regnal year or wanted to underline the connection of his Dynasty with its prototypical residence. 835

As it has been stressed above, the 26th Dynasty available written sources are generally not well suited for identifying the “palace” mentioned in them with the archaeological evidence. The problem in locating the royal residence in Late Period Egypt has been fully highlighted by Jurman, who has supposed a gradual shift of political power from Sais to Memphis, which becomes particularly tangible in the reign of Amasis. 836 It is impossible to state with certainty whether the palatial site of Apries at Memphis was the main palace of the final period of the Dynasty or one of two major royal buildings built in the two cities of Sais and Memphis. Other palatial buildings could be built in sites that were geographically close to focal points of foreign policy (like Tell Defenneh, in the eastern Delta) and could have served as governorate palaces.

834 According to Perdu, although the text is part of a private monument, its phraseology and general layout suggested that it copied an official royal steak or was intended to emulate such a monument, in: Perdu 1986.

Chapter 4. Recognition of the 'h-palace in archaeological evidence.

4.1 Introduction

Egyptian royal palaces have received comparatively slight attention by scholars in comparison with Egyptian temples, in large part because of archaeological reasons, being palaces – as any other civil buildings for earthly life - built in mud-brick, a material surviving much less well than the durable stone. Moreover, of the small number of excavated palaces, some remain largely unpublished. Middle Kingdom royal buildings in the sites of Tell Basta (P. I) and Ezbet Rushdi (P. III) offer the first evidence sufficiently preserved to allow an architectural analysis of the structures. However, nearly all the available archaeological record is confined to the New Kingdom, especially thanks to the knowledge of two cities became headquarters of administration and residence during the 18th Dynasty, Malkata (P. XIII) the city-palace of Amenhotep III and Amarna (P. XVII), the capital of Amenhotep IV, which, extensively investigated, have revealed many palatial buildings and allowed the observation of their relationship with the topographical layout of the entire city. For the Late Period the well-preserved Saite palace of Apries at Memphis (P. XXXV) offers another important source for the analysis of Egyptian palaces. Archaeologically known Egyptian royal palaces differ for extension, plan and internal organization, their planimetric variety suggesting several functional destinations. The

---

839 Another Middle Kingdom palace has been excavated at Tell el-Dab’a and dated back to the 13th Dynasty. Eigner 1985: 19 ff. Eigner 1996: 73 ff.
analysis of these architectural differences let recognize similar features recurring in palaces with the same function. As a result, palaces have been reconnected to residual, ceremonial, administrative and defensive classifications by Egyptological literature.  

By comparing the plans of New Kingdom palaces, O’Connor has divided them into “governmental” and “ceremonial” examples. Particularly he has suggested that the palace of Malkata (PL. XIV) would be the sole surviving example of a residential palace, while the Palace of Merenptah (PL. XXVII), the North Harim within the Great Palace at Amarna (PL. XXIII) and the North Palace (PL. XVIII) in the same site would have worked as “ceremonial palaces”. The “administrative palace” typology is recognized by the author in the presumed 18th Dynasty palace near the temple of Karnak, also termed “governmental palace” or “Regierungspalast.” The King’s House at Amarna is inserted in this group and considered a replica of the governmental palace at Karnak. A particular type of ceremonial or “symbolic” palace is the so-called “temple-palace” attached to the Mortuary Temples of the 19th and 20th Dynasty (PLS. XXIX-XXXIII), all characterized by a façade dominated by a centrally placed “Window of Appearance”. Using O’Connor’s nomenclature, Lacovara comes to classify differently “ceremonial” and “residential” palaces. Particularly he sees the King’s House as the private residence of the king rather than as a “governmental palace” in O’Connor’s definition. Considering the development and evolution of the “residential palace”, Lacovara has identified certain affinities with the New Kingdom royal residential palaces in few surviving palaces dating from the

---

844 Helck 1954. O’Connor 1989: 73 ff. O’Connor 1991: 167-197. Lacovara 1977. The identification of function of each royal palace that has been archeologically investigated varies from an author to another, so that the same building has been recognized as “residential” or “ceremonial” by Egyptological literature.

845 O’Connor 1991: 167-90. The author has analyzed several architectural features that could be considered indicative of a specific type of “palace”. O’Connor 1995: 270-4.

846 Particularly he defines the palace of Merenptah as a “non residential-ceremonial palace”, in O’Connor 1997: 178.

848 Stadelmann 1973: 221 ff.

849 Lacovara 1997: 24-41.

850 Lacovara has tried to demonstrate that ancient Egyptian palaces would subscribe to a basic architectural formula based on both planimetrical and decorative recurrent elements, in Lacovara 1997: 35-36.

851 Apart from the palace of Makata, the “residential” function has been supposed by Lacovara for the Great Palace and the King’s House at Amarna. Lacovara 1977: 30. Kemp has suggested that it was the North Riverside Palace to serve as the main residential quarter of the city of Amarna, while the Great Palace in the Central City served as official or ceremonial palace. Kemp’s interpretation of the Amarna palaces is based on a visible distinction between the residential and the governmental or ceremonial area, the second one he was expected to carry out in the Central City. While the king and
Middle Kingdom at Ezibet Rushdi (Pl. II),\(^{853}\) Tell Basta (Pl. I)\(^{854}\) and Tell el-Dab’a (Pl. VII).\(^{855}\) To the classification of the “harim” palaces he recollects palatial structures that “do not conform with the layout of the king’s house, whether residential, as at Malkata, ceremonial, as in the Merenptah palace at Memphis, or symbolic, as in the temple palaces”.\(^{856}\) According to Lacovara, the clearest examples for this kind of palaces would be the palace at Gurob (Pl. XII)\(^{857}\) and the North Palace at Malkata (Pl. XIII).\(^{858}\) A defensive function has been suggested for those buildings erected on platforms, such as the palace built near Ballas at the end of the 17\(^{th}\) Dynasty by the Upper Egyptian rivals of the Hyksos (Pl. III-IV).\(^{859}\) Three New Kingdom palaces were erected on the top of mud brick platforms, more than 7 m high, accessible by ramps at Tell el-Dab’a.\(^{860}\) This type of palace was resumed during the 26\(^{th}\) Dynasty in the palace of Apries at Memphis.\(^{861}\) Even if reasonable, the distinction of the different functions of the royal palaces on the basis of the occurrence of architectural features cannot be understood so rigidly separated. Assuming the multifunctional nature of the ancient Egyptian royal palace, it is rather difficult to understand how the different functions, whether “ceremonial”, “residential” or “administrative”, might have been actually combined in the same building “or even whether there was a clear cut-architectural distinction between the three”.\(^{862}\) Despite each of the individual known palaces seems predominantly to belong to one or the other of the types just listed, a juxtaposition of more sections with different functions was possible in a same building. As I would exemplified, the Great Palace in the Central City of Amarna consisted of several parts: a large ceremonial palace built around a great hall and,

---

\(^{855}\) Eigner 1985: 19 ff.

\(^{857}\) Kemp 1978b: 122 ff.

\(^{858}\) Lacovara 1997: 37. The basic format, as that described by the author, would consist of a pair of long rectangular buildings grouped along one side of a large enclosure.

\(^{859}\) Lacovara once refers to the northern mudbrick platform at Deir el-Ballas as a “campaign palace”, in Lacovara 1997: 24

\(^{860}\) Bietak 2010: 22.

\(^{862}\) Spence 2009: 167.
connected to it, sectors with administrative and residential functions.\textsuperscript{863} The same pattern has been observed even in the earlier example of the palace of Amenhotep III at Malkata.

Focusing on the architectural features of the so-called “ceremonial palaces” or the “ceremonial sections” within multifunctional palatial structures, they were laid out in a strongly rectangular form, a tripartite plan recalling the shape of the temple, with the succession of a court, a hypostyle hall and the throne-room corresponding to the sanctuary.\textsuperscript{864}

In O’Connor’s opinion\textsuperscript{865} this planimetric scheme would have been perfectly exemplified in Merenptah’s Palace at Memphis\textsuperscript{866}, whose “ceremonial” usage can be supposed also for its physical connection to the great temple of Ptah.\textsuperscript{867} The same strongly rectangular form can be observed in the “core” of the “North Palace”\textsuperscript{868} at Amarna (PL. XVIII) and the so-called

“North-Harim” in the Great Palace of the same site (PL. XXII). The “North Harim” and the Merenptah’s palace are also very similar to the harim section of the Palace of Malkata. The basic plan and the arrangement of all these palaces is strongly reminiscent of the mortuary temple palaces, whereas these latter tend to form square blocks facing the square courts of the mortuary temples.

In functional terms, the ceremonial palace would have worked as place in which the king underwent highly ritualised ceremonies connected with his kingship, such as the coronation and the enthronement of the king, officials’ promotion, reception of foreign princes and envoys, the worship of the divine image (in the so-called “Temple-palace”) and the celebration of the Ḥb-sd.

4.2 Architectural features of the “ceremonial palace”

a) Merenptah’s palace (PL XXVII) is a key source for the analysis of New Kingdom palaces because of its unique state of preservation. It was accessible from a ramp leading from an open area to a vestibule room facing a large stone-paved court, surrounded by a low platform sustaining a colonnade. A ramp at the centre of the southern short side of the rectangular hall led to a vestibule preceding the rectangular throne room with the throne dais attached to the rear wall. The complex of small rooms at the back of the throne room was probably used as residential area by the king. Its large scale and its emphasis upon courts and halls clearly intended for ceremonial use evoke the ceremonial nature of this palace. The entire 110.30 X 30 meters building is in fact comparable in scale to the impressive mortuary temples of Rameses II and III at Thebes. Regarding the interior of the palace, columns and doorframes were decorated with scenes of the king smiting foreign enemies and making offerings to Ptah.

---

871 The palace was destroyed by fire “not many years” after Merenptah’s death and many architectural elements such as columns and doorways have survived, in Fisher 1917: 227.
874 Fisher 1921: 222-25.
b) In the “North Palace” at Amarna\(^{875}\) (PL XVIII), beyond a first court (not attested at Memphis, where Merenptah’s palace has only one entrance-court), a highly pylon-like feature, comparable to the façade of Merenptah’s palace, brings to an inner court containing a large pool (instead of the colonnade of the Merenptah’s court). After the first court, we can recognize the tripartite plan of the audience-device with a square vestibule, followed by a hall east-west oriented, and a throne room at the end. A royal suite lays south of the square vestibule. Differently from the Merenptah’s palace, the “North Palace” at Amarna was flanked by areas of worship, animal quarters\(^{876}\) and non royal residential and/or office units and by an aviary and banqueting hall in the rear section: this complexity makes the functional interpretation of the “North Palace” properly unclear.

c) The “North Harim” at Amarna (PL XXII) and Merenptah’s Palace at Memphis are similar in scale and plan and, while not properly identical, show some striking similarities.\(^{877}\) Due to the poor status of preservation of the structure, the actual access-system to the palace is unclear. Pendlebury supposed that the entrance should be located on the south side, in order to provide a link with the route which connected the “Great Palace” with the “King’s House” of the site via a bridge.\(^{878}\) Another possibility is that a second entrance was located on the north side,\(^{879}\) such as at Memphis. The extant remains at the northern end of the palace might even be interpreted as casemate walls intended to support an elevated façade, reminiscent of that in Merenptah’s palace.\(^{880}\) Immediately south to the hypothetical entrance lies a succession of two halls with square piers and a small court which does not have any parallel in the Memphite palace. This compound is succeeded by a court flanked by colonnades on three sides which parallels the Memphis court, although the “North Harim” court have also storerooms on each long sides and is occupied by a sunken area in the centre supplied with flanking gardens, a pool at the north end and a well at the south end. These peculiar features are not found at Memphis where, however, the court seems to have been slightly sunken and paved with stone, the floor sloping down to a shallow depression running along the central axis.\(^{881}\) The court of the “North Harim” is followed by a columned vestibule, oriented east-west, and by a multi-columned hall; east of

\(^{876}\) Newton 1924: Pl. XXX, 1-2-3.

\(^{878}\) Pendlebury 1951: 38.

\(^{879}\) O’Connor 1991: 180.

\(^{880}\) Pendlebury 1951: pl. 13A.

\(^{881}\) O’Connor 1991: 180.
the last hall is another pillared room, probably used as throne hall, leading southwards to a cluster of rooms that might be the remains of a royal suite. The “North Harim” and Merenptah’s palaces are also similar in context, each one lying within a large enclosure; the walled area occupies roughly the same or very similar amount of space in both instances.\(^ {882}\) It has suggested that the “North Harim”, and the “Great Palace” including it, might have been intended for royal ceremonies. Especially Assmann has suggested that they might have been used during the celebration of the \textit{Sed}-festival,\(^ {883}\) while Kemp has raised the possibility that the Great Palace was used for semi-public ceremonies and the “reception of a foreign prince or envoy”.\(^ {884}\) The Amarna “Great Palace” and the Merenptah’s “Great Palace” are also similar in being located near the enclosure of a great temple and both facing the processional axis to the respective temple, the temple of Aten at Amarna\(^ {885}\) and that of Ptah at Memphis.\(^ {886}\) This conjunction seems to emphasize the ceremonial function of these two great palaces.\(^ {887}\)

d) The same articulation of the inner spaces can be recognized in the central section of the King’s Palace at Malkata (PL XIV), generally labeled by Egyptologist as “Royal Harim.”\(^ {888}\) It is possible to identify in it the tripartite succession of a transversal columned hall (which can be paralleled to the antechamber of the Memphite palace), a rectangular columned court (recalling the central halls of Merenptah’s palace, the “North Palace” and the “North Harim” at Amarna – although differently flanked by lateral suites), and the throne room at the bottom. At the southern and northern sides of this complex were located series of courts, many with a raised dais opposite to the entrance.

e) A ceremonial function has been suggested by Bietak even for one of the buildings of the Thutmosid palatial complex of Tell el-Dab’a (PL VII), the so-called Palace F (PL VIII).\(^ {889}\) The reconstruction of the superstructure has been suggested on the basis of the disposition and the shape of the walls of the foundation platform. The palace would have been composed by a central square courtyard, surrounded by columns or pillars on all four sides; the side rooms could be interpreted as part of the throne room-complex, composed by the throne room itself and flanking spaces, probably used as dressing or washing rooms. The

\(^{888}\) Smith 1998: 166.
\(^{889}\) Bietak 2010: 22.
ceremonial function of this structure seems suggested by the fact that there was no place for private apartments. A ceremonial section can be recognized also in the eastern hall of the palace G at Tell el-Dab’a (PL. IX), where the array of rooms corresponds to the tripartite plan of a New Kingdom temple, composed by a first big square colonnade courtyard and a transversal hall leading to a hall with four rows of columns occupying the left half, identified as the throne room.\textsuperscript{890} Behind those ceremonial rooms there were the private apartments of the king.

f) The features of the royal palace with ceremonial function as exemplified in the Merenptah’s Palace and the palace of Malkata can be recognized as the essential aspects of the temple-palaces within the 19th and 20th Dynasty mortuary temples of Sety I (PL. XXIX),\textsuperscript{891} Rameses II (PL. XXX),\textsuperscript{892} Merenptah (PL. XXXI),\textsuperscript{893} and Rameses III at Medinet Habu (PLS. XXXII-XXXIII).\textsuperscript{894} The palace at Medinet Habu is one of the best preserved and most completely published of all these structures. The Medinet Habu palace undergone two different phases of construction, the first one having been completely razed before the construction of the second one.\textsuperscript{895} The plan of the first palace (PL. XXXII) consisted of a central columned court, entered through two flanking vestibules, and the Window of Appearance opening into the south wall of the first court of the mortuary temple. At the south of the great court there was a throne room with a raised dais against its back wall. The throne room led to a bedroom in the southwest corner, flanked by vestibules and storerooms. Within the thick enclosure wall, to the south of the central block of the rooms of the palace, was a series of harim-suites. The initial plan of the temple-palace of Rameses III is - in a much-reduced form - remarkably similar to the layout of the palace of Merenptah and the palace of Amenhotep III at Malkata.\textsuperscript{896} The axial circulation system is altered by the presence of the Window of Appearance that does not allow a direct transition from the court of the mortuary temple to the central columned hall of the palace.

Particularly Dorothea Arnold has recently considered a theory about the palatial complex at Malkata, the central section of this palace being dedicated to the celebration of the Hb-
The central part of the so called King’s Palace of Amenhotep III has been immediately identified as occupied largely by “suites of rooms for the chief ladies of the harim”* and associated with a throne and residential suite for the king himself. Dorothea Arnold has challenged this reading stating that the “harim suites” were actually ritual spaces used by the king himself, for whom a throne dais was provided in the central largest room of each suite.* She also makes a comparison of the King’s House’s plan with that of the supposed Ḥib-sd complex at the step Pyramid of Djoser at Saqqara. In both cases she suggests that “a central north-south oriented space, an open court at Saqqara and a columned hall at Malkata, is flanked on both long sides by separate compartments”. At the south end is the king’s throne, behind which are located a number of private apartments (“the king’s bedchamber suite”) which would correspond to the so-called “temple T” of Saqqara complex. To the north of these arrangements at Saqqara are other “courts and halls”, equivalent to the similarly located throne-halls of the King’s Palace at Malkata.\[\]Arnold has also suggested that the surviving wall and ceiling paintings from the “harim suites” and the hall they flank refer to “the dominant role of the king in his capacity as pharaoh and ruler, not as a pleasure seeking potentate”.\[\] Where designs on wall plaster have been found in the colonnade and the cubicles of the Garden Court, they show false-door dado panels and grapes or other produces on stands.\[\] Bowls, vases and pot-stands painted on the walls of the cubicles were probably the same containers to be used on ceremonial occasions in the palace and suggest the interpretation of these spaces as small storerooms. This reading has been recently discussed by O’Connor in favor of the interpretation of the central section of the King’s Palace at Malkata as a harim complex.\[\]

One of the most important sources for the interpretation of the Egyptian royal harim is the East High Gate\[\] in the mortuary temple of Rameses III at Medinet Habu. The scenes surviving from this complex focus almost entirely upon intimate relationships between the king and groups of young women, so that the rooms themselves seem to refer to the harim component of such architecture.\[\] As regards to its architectural shape, this monument

905 O’Connor 2010: 64.
resembles the massively fortified gate of a fortress incorporating a tower recalling a *migdal* structure.\(^{906}\) It consisted of a series of rooms distributed over two stores and facing the central gate, which worked as a kind of patio. O’Connor has recently considered the analogies between the East High Gate and the harim component of the King’s Palace at Malkata as follows: “First, the open-air roadway leading to the gateway proper corresponds in location and proportions to the long hall of the Malkata harim component. (..) Rooms 2 and 5 (two superimposed rooms at the end of the roadway) are equivalent to the throne room at the south-end of the long hall at Malkata, i.e. each is conceptually a throne-room. (..) Pursuing the analogy further requires we consider the other rooms of the second story (all in proximity of room 2), on the third (throughout the entire story) and on the patio as approximately equivalent to the eight harim suites at the Malkata King’s Palace”.\(^{907}\) After having recognized these similarities, O’Connor has rightly stressed the major differences between the two complexes: “the rooms at the Gate are not laid out so as to resemble the suites at Malkata. (..) At Malkata each suite is a separate unit, linked only to the long hall; this was architecturally impossible at the Gate, if the long hall is considered equivalent to the roadway, although most of the Gate’s rooms are connected to the roadway, but necessarily through windows, not doorways”.\(^{908}\) These diversities and the different conception that moved the construction of these two buildings must be adequately highlighted. While taking the Eastern High Gate at Medinet Habu as a potential model of the harim-architecture, the archaeologically known New Kingdom harim sections within the palaces at Malkata and Amarna do not appear to be multistoried or articulated around a central patio. The architectural analysis presented above allows to identify similarities among palaces with the same function. Comparison between the King’s House at Malkata and Rameses III’s Mortuary Complex shows that the so-called harim at Malkata resembles the temple-palace at Medinet Habu more than the East High Gate of the same complex. As the harim at Malkata, the temple-palace at Medinet Habu shows a tripartite plan with the succession of a first court, a central colonnade hall and the throne room, although compressed into a square smaller building (PL. XXXII). The side rooms, which would correspond to the harim-suites of the Malkata complex, are reduced on a small scale, because they were not intended for residential function, considering the ritual nature of

\(^{906}\) Cavillier 2008.

\(^{908}\) *ibid.*: 66.
this building. The surviving decoration program of the harim section of the King’s House at Malkata completely differs from the Eastern Gate at Medinet Habu. At Malkata the vegetal theme of rosettes, alternating the geometrical scheme of spirals, decorated the ceiling of the small rooms alongside the large hypostyle hall of the so-called Harim (PL. XVI). The theme of subjection of the enemy was probably represented at the end of the hypostyle hall in the proximity of the audience system at its north side: fragments of a wall painting representing the seated king flanked by figures of prisoners have been found at the end of the great hypostyle hall, on one of the wall flanking the entrance to the following throne-room F (= no. 2). In the King’s bedchamber, details of mural paintings show a panel of false-door blocks set between alternating ‘nh and s3 signs (PL. XV, a-b). This panel was surmounted by paired figures of god Bes. The reconstruction of the ceiling decoration of the hypostyle hall H (= no. 4) shows a row of repeated winged goddess Nekhbet in the middle between two scroll pattern panels (PL. XV, c). This hall had a painted pavement with a pond and marsh scene, similar to that found in the small audience hall E (= no. 3) consisting of a pool with swimming ducks and fishes surrounded by a border of papyrus with flying birds. A dado of painted panels ran around the walls of the central hall H (= no. 4) and an image of the king seated on his throne was painted on the southern wall. Similar topics, although differently distributed, decorated the walls of the “North Harim” at Tell el-Amarna. As well as at Malkata, no depiction of women has been found in the rooms flanking the central colonnade hall. Representations of wine jars and pots on stands on the outer walls of the cubicles in the Garden court of the Northern Harim implies that the cubicles were used for storage of produces to be used on specific occasions such as banquets or delivery of gifts and tributes (PL. XXVI, b-c). The finding of shelves with cavetto cornices modeled in mud plaster in some of the rooms at the back of

909 Since its discovery the temple-palace at Medinet Habu was regarded as a temporary residential quarter occasionally used by the king when he came to Thebes to partecipate in religious feasts, in Hölscher 1941: 58-61. However, its too small dimension and its architectural design reveal that it could never have served for living, in Stadelmann 1994: 311.
913 Ibid.
914 Tytus 1903: 17-8.
915 Room “D” at the north-east side of the complex appears to have had a wall painting of “dancing girls” above a dado consisting of panels of “false-door” blocks set between alternating ‘nh and s3 signs with an ondulating line at its base, in Lacovara 2009: 88.
the “harim suites” supports this interpretation.917 A similar fragment of wall decoration representing jars in stands has been found in the throne room of the North Palace at Amarna (PL. XXI, c),918 suggesting that it was a theme suited to audience complexes. The motif of offering stands alternating with groups of kneeling foreigners decorated the dais of the throne room of the King’s House at Amarna.919 No decoration was reported from the throne room beyond the central hall H of the Northern Harim. The pond and duck-and-marshes motifs in the palace at Malkata920 have similarities with the waterside scenes depicted on the walls of the North Palace at Amarna (PLS. XX-XXI)921 and in the cross hall before the throne room in the palace of Merenptah at Memphis.922 In the North Palace at Amarna the theme of plants and animals, both terrestrial and aquatic, is predominant and almost exclusive and is richly expressed on the walls of the Green Room, one of the cells to the north east of the central garden (PL. XIX).923 The same theme can be found in the sector of the cattle/gazelle stables and the King’s Apartments, the ceiling and the walls being decorated with screw motif and bunches of grapes.924 The floors of the Throne Room complex of the so-called Harim within the Great Palace at Amarna showed ponds bordered by ducks and mash plants with outer borders composed of bouquets and offerings or unguent cones on stands (PL XXV).925 The pathway of bound captives leading south across the Main Hall of Northern Harim at Amarna clearly represented the king’s dominion over foreign lands and it has been suggested that it ended with a throne dais (PL. XXIV).926 The decoration of the throne of the small side throne room E (= no. 2) for audiences in the north-eastern corner of the palace at Malkata with figures of Nubian and Syrian prisoners, separated by arches, recalls the same theme (PL. XXV, b-c).927 Twenty-four limestone blocks with representation of enemies and arches within a complex frame with disks and floral panels, surrounded by a composition of birds with outstretched wings, formed the top of

920 Tytus 1903: 16-17, pl. 1, figs. 8-9. Daressy 1903: 165-6.
922 Fisher 1917: 216.
924 ibid.: 145.
925 During excavations at the Great Palace at Amarna, three large floor-paintings were found in the area known as the North Harim. They were connected by a painted pathway of captives. Study of the painted pavements, together with plans of the Great Palace and other New Kingdom palaces, suggests that the room called the Main Hall may have been a throne room: Whithready 1992: 179 ff.
926 Tytus 1903: 16-17
927 Daressy 1903: 166, pl. 4.
the dais of the palace of Merenptah at Memphis (Pl. XXVIII). The columns of the throne room were decorated partly with scenes of the king slaying enemies and partly with representation of him making offering to Ptah. Even the sides of the dais of the palace of Rameses II at Qantir should have been decorated with tiles representing captives. Four fragments of stone slabs belonging to the base of a throne had been reused in the steps of the Window of Appearance of the first palace at Medinet Habu (Pl. XXIV, b-d). The walls of the throne room of the palace of Merenptah at Memphis would have been decorated with a dado of alternating blocks and amuletic signs, ‘nḫ and w3s-sceptres along with papyrus and lotus plants, while the ceiling was painted blues with a pattern of yellow and gold stars.

According to the collected data, the architectural layout of the harim component at Malkata as well as its decorative system is strictly similar to the North Harim within the Great Palace and the eastern end of the North Palace at Amarna, the palace of Merenptah at Memphis and the first palace of Rameses III at Medinet Habu.

Before turning to the attempt to recognize the ceremonial palace in texts, another set of art-historical evidence relevant to the interpretation of the harim components at Amarna and Malkata needs to be briefly reviewed. The tomb-chapels of officials at Tell el-Amarna include in their decorative program representations of palaces in a typical mix of plan and elevation. Some versions of the generic palace depicted include components that suggest they might represent or relate to the harim components at the King’s Palace at Malkata and the Great Palace at Amarna. The representations most commonly mentioned in relation to the harim component are those from the tomb-chapel of Tw-tw. In one of the two main scenes of the royal palace, a chamber filled with the depiction of a pool, flanked by papyrus and other vegetation, is located immediately adjacent to the royal suite. O’Connor has suggested that “the depiction is of a hall with a floor painted with these motifs, as is actually the case with the long hall in the harim component of the King’s

929 The decoration of the palace of Merenptah at Memphis, despite well preserved, has not be fully documented. An account published by C. S. Fisher describes the decoration of the throne room of the building, in Fisher 1917: 222-25.
930 Hayes 1937: 13, fig. 1.
931 Hölscher 1941: fig. 30.
932 Fisher 1921: 222-25.
933 For a recent and exhaustive analysis of palatial representations at Amarna see Vomeberg’s work: Vomberg 2004.
935 Davies 1903-8, 6: pl 17, 19.
Palace at Malkata. Indeed in Tw-tw’s representation the rooms occupied solely by women in the depiction of the royal suite are not physically adjacent to the depicted garden or hall. In the tomb of Mri-R, a similar feature, a garden or a depicted garden is placed in the middle between two completely identical sectors. Each of these areas consists of a corridor with a row of trees in the centre, at the right and left sides of which there is a portico. A long, narrow room that serves as storeroom is located behind each column of the portico. The cells behind the colonnade flanking the two long sides of the central sunken garden of the Northern Harim are laid out in a formal mode similar to this representation. Rows of storerooms are arranged on both sides of a central courtyard with a central pool or platform even in the Southern Harim. The re-interpretation of the harim component at the northeast corner of the North Palace at Amarna as storage-area seems to be supported by this representation. In this architectural plan, the depicted structures resemble the Malkata harim suites with a large central colonnade hall (with a distinctive type of water and garden motifs decoration on its floor) flanked by two rows of small rooms at each long side. Gardens and pools (both actual gardens and those represented in painting) would seem to be specific components of a number of storage areas in Amarna representations of the royal palace. I would raise the possibility that the peculiar morphology of these storage areas would be due to their particular usage that goes beyond the simple storage function. The use of these storerooms can be related to the official ceremonies that may have occurred in buildings that comprise them, the so-called North Harim within the Great Palace and the North Palace at Amarna and the Harim in the King’s House at Malkata.

4.3 Identification of the “ceremonial palace” in written sources

Despite the extensive pictorial and inscriptive evidence about this ceremony, the fragmentary status of the documentation does not allow a sufficiently comprehensive picture of the nature and the celebration of the ḫb-ṣdq. However, reliefs and inscriptions in tombs and temples, obelisks, ostraca, statues, individual blocks of stone and so on from the Old Kingdom to the Late Period allow to reconstruct part of the program of the event.

---

936 O’Connor 2010: 70.
937 Davies 1903-8, 1: pl. 30.
939 The origins of the Sed-festival are lost, despite it is likely that it was celebrated from the Predynastic times. Evidences of the festival from the Early Dynastic Period consist almost entirely in
its name recorded on dockets and jars of the 1st and 2nd Dynasty from Hieraconpolis and Saqqara. Other possible materials can be statues of the first kings with the traditional Sed-festival robe or representations of the double crown. For a recent and complete list of the kings who celebrated Sed-festivals, with the supporting evidence, see Hornung - Staaehelin 1974: 16-25. One of the first architectural evidence of the celebration of such ceremony is found in the 3rd Dynasty. This is the Step Pyramid complex of Djoser at Saqqara, which seems to have included architectural elements, such as shrines and courts, which were used during the Sed-festival. The eastern section of the complex has been interpreted as Hb-sd court, with its double rows of shrines, one for the deities of Upper Egypt and the other for deities of Lower Egypt (Firth - Quibell 1936, I: 10 ff; 67 ff.). In the large open-court in front of the Step Pyramid are the remains of the B-shaped structures which were probably used to mark the extremes of the course (Firth - Quibell 1936, I: 70, II: 72). A lion-headed bas has been found in the entrance colonnade and resembles the throne depicted in several representations of the Sed-festival (von Bissing - Kees 1923: pl. 23). From the same area a number of other evidences seem to confirm the usage of this complex for the feast: unfinished statues of Djoser likely wearing the Sed-festival robe (Firth - Quibell 1936, I: 12; II: pls. 28-30); stone panels showing the king while performing the ritual dance or the running of the course (Firth - Quibell 1936, I: 19, 33, 59). From the reign of Sneferu, the first king of the 4th Dynasty there are some fragments of relief from the Valley Temple of the Bent Pyramid complex at Dashur (Hornung - Staaehelin 1974: 21. Fakhry 1961, I: fig. 53, pl. 42 f.; II: 1;). Evidence from the reign of Cheops consist of some blocks from the king’s funerary complex at Giza, and a number of re-used blocks from the 12th Dynasty Pyramid of Amenemhat I (Hornung - Staaehelin 1974: 21. Goedicke 1974: 24). Chepren is shown while wearing the red-crown and the Sed-festival robe in the fragment of a statue (Leipzig 1948) whose provenance is unknown (Hornung 1974: 21. Hölscher 1912: 85-86, 94). Blocks from the funerary temple of Sahure at Abusir (Borchardt 1913: 45-7) and scenes from the sun temple of Nyuserra at Abu-Gurob (von Bissing - Kees 1923 and 1928) indicate that there were depictions of the Sed-festival in those structures of the 5th Dynasty (Hornung - Staaehelin 1974: 22). The scenes from the temple of Nyuserra are the earliest detailed depictions from the Old Kingdom and represent the fullest record of the festival in the earlier period. The fragment of a statue (CG 40) and the inscription on an alabaster vase (Louve E 5323) are respectively the evidence of the Sed-festivals during the reign of Menkauhor and Djedkara (Hornung - Staaehelin 1974: 22-3). Inscriptions on fragmentary reliefs and statues as well as fragments of relief from the funerary temple of Pepi II at Saqqara indicate the celebration of Sed-festivals suggest the celebration of Sed-festivals by Pepi I and Pepi II in the 6th Dynasty (Hornung - Staaehelin 1974: 24). During the First Intermediate Period (7th - 9th Dynasty) there is no evidence for Sed-festivals. A statue of Antef II of the 10th Dynasty representing the king in a probable Sed-festival robe is ambiguous (Hornung - Staaehelin 1974: 25). Statues of the king Mentuhotep II of the 11th Dynasty in the Sed-festival robe have been found in his funerary temple at Deir el-Bahari (Hornung - Staaehelin 1974: 26) and an inscription in the Shatt-er-Rigal probably refers to the ceremony (Winlock 1947: pl. 37). An inscription in the Wadi-Hammamat records a Sed-festival in Year 2 of the reign of Mentuhotep IV (Cougat - Montet 1912: 110). Proper representations of the Sed-festivals from the Middle Kingdom are rare, probably because of the re-use of the blocks on which they were carved by New Kingdom rulers (Gohary 1992: 8). Evidence of the feast consists mainly of inscriptions for most of the kings of the 12th Dynasty (Simpson 1963: 63; Hornung 1974: 27-8). A door lintel from Medamud of the time of Sobekhotep II and statues of the king Sobekhotep VI in the Sed-festival robe are the evidence of Sed-festivals from the 13th Dynasty (Hornung 1974: 29-30). There are no proofs of Sed-festivals in the Second Intermediate Period, probably because of the short last of many of its reigns, so that it is likely that the festivals did not occur frequently or were not celebrated at all (Gohary 1992: 8). The occurrence of the Sed-festival is fully documented in the New Kingdom (for a complete list see Hornung 1974: 30-37). Focusing on the more complex pictorial representations of the feats there are some scenes of the time of Thutmose III in his Festival Hall at Karnak (Hornung - Staaehelin 1974: 31; PM II: 110 ff). The fullest depictions of the ceremony date back to the time of Amenhotep III and have been found in his temple at Soleb in Nubia (Giorgini 1965), in his temple at Luxor (PM II: 113), in his funerary temple in Western Thebes (Borchardt 1926: 37 ff.) and in the tomb of Hr-w-f (Fakhry 1942: 447 ff.). Blocks from the time of Amenhotep IV found at Karnak and the Theban area suggest that Amenhotep IV’s first Sed-festival was largely depicted in the Aten temple at Karnak (Gohary 1992: parts II and III). Several inscriptions attest Sed-festivals for most of the kings of the 19th Dynasty (Hornung - Staaehelin 1974: 37-9). For the 20th Dynasty we have
and to identify the large number of individuals involved. Egyptological studies have emphasized that the *Sed*-festival was a ritual of renewal of kingship after thirty years of rule.\textsuperscript{940} This festival took place in an ensemble of buildings from and to where the king had to process in different times of the celebration.

Focusing on the place where the festival was celebrated, there are a number of conflicting theories.\textsuperscript{941} Middle Kingdom representations show the king seated in a double-pavilion of the *Sed*-festival\textsuperscript{942} and sources mentions certain “jubilee mansions”, the *hwt Hb-sd*\textsuperscript{943} used during the celebration of the feast. Monuments such shrines and chapels erected by Sesostris I,\textsuperscript{944} Amenhotep I,\textsuperscript{945} Amenhotep II\textsuperscript{946} and Thutmose III\textsuperscript{947} at Karnak for the occasion of their *Sed*-festival do not prove that the rulers in question celebrated their *Sed*-festival there, but as Thebes was the principal city where commemorate these events.\textsuperscript{948}

During the Middle Kingdom for example, it is likely that the 12\textsuperscript{th} Dynasty kings celebrated their *Sed*-festivals at ‘Ity-t3wy.\textsuperscript{949} Rameses II seems to have held at least two *Sed*-festivals at his Delta Residence of *Pr-R’mmsw*\textsuperscript{950} and Rameses III may also have celebrated one in the same city.\textsuperscript{951} Presumably the festival was time by time celebrated in one particular place, while shrines or obelisks were erected in various temples to record the event up and down Egypt.\textsuperscript{952}

evidence for the celebration of a *Sed*-festival by Rameses III (Hornung - Staehelin 1974: 40). For the Late Period, *Sed*-festivals are attested for Seshong I, Osorkon II and Sheshong V, of the 22\textsuperscript{nd} Dynasty, and for Taharqa of the 26\textsuperscript{th} Dynasty (Hornung - Staehelin 1974: 40-1). The most complete series of scenes is that of Osorkon II at Bubastis (Naville 1892).

\textsuperscript{940} For an overall discussion of the *Sed*-festival see Gohary 1992. While trying to understand the original meaning of the term, Gohary suggests that “the word *sd* in some way referred to a period of time such as a generation or a man’s expected life-span”, in Gohary 1992: 2.

\textsuperscript{941} Mathieu 1956: 25 f.

\textsuperscript{942} A scene showing the king seated in this pavillion occurs on blocks from a door of Sesostris III from the Temple of Mont at Medamud (Gardiner 1944: 30, pl. 4) and the same can be said of the lintel from Tell Basta with a similar scene of Amenemhat III, in Farid 1964: 94, pl. 10.

\textsuperscript{943} Gardiner 1944: 27, note 2.

\textsuperscript{945} PM II: 134.

\textsuperscript{946} PM II: 185-6.

\textsuperscript{947} PM II: 110 ff.

\textsuperscript{948} Gohary 1993: 5. *Sed*-festival reliefs in mortuary temples and pyramid or tomb complexes were probably intended to ensure that the deceased king celebrate his own *Sed*-festivals, in Hornung – Staehelin 2006: 50-1.

\textsuperscript{949} Simpson 1963: 53 ff.

\textsuperscript{950} Habachi 1971: 67.

\textsuperscript{951} Gardiner 1918: 192 ff.

\textsuperscript{952} Several monuments showing *Sed*-festival scenes exist in various parts of Egypt: for example Sesostris I (Heliopolis obelisk: PM IV: 60; Karnak chapel: PM II: 61 ff.; Koptos reliefs: Petrie 1896: pls. 9-10), Thutmose I (Karnak obelisk: PM II: 74); Thutmose III (Festivall Hall at Karnak: PM II: 110 ff.;
Apart from the *Hb-sd*-temples, another building which is frequently represented and cited in *Sed*-festival scenes of New Kingdom sources is the ‘*h*-palace. The existence of an ‘*h* (*n*) *Hb-sd* is known since the Old Kingdom\(^{953}\) and continues to be attested in New Kingdom texts.

Jar labels and jar sealings from Malkata, referring to a series of commodities contained in the jars (*irp*, “wine”, *srm*, “ale”, ‘*d*, “fat”, *lwf*, “meat”, *snr*, “incense”) used for the first *Hb-sd* of the king have been found on the site of Amenhotep III’s palace complex.\(^{954}\) The majority of the jars from the palace of the site\(^{955}\) are said to be for the “*Sed*-festival(s) of His Majesty” and are dated to his 30\(^{th}\) regnal year (1370 BC).\(^{956}\) The concentration in the palace area of such huge quantities of festival supplies, sent in from many distant parts of the kingdom, makes suppose that was in the Malkata Palace that Amenhotep III celebrated his *Sed*-festival. In contrast to the first *Hb-sd* the labels dated to Year 34, containing the phrase “for the repetition of the *Hb-sd* of His Majesty”, were found in or near the forecourt of the Amun Temple; as suggested by Hayes, a peculiar group of buildings - the temple, the storerooms, the prominent terrace around, a courtyard and a multi-pillared festival hall on the right side of the processional way to temple\(^{957}\) – was designed for the celebration of the *Hb-sd*.\(^{958}\) The few inscribed jars associated with the third *Hb-sd*, like those linked to the first *Sed*-festival, were almost all found in the southern portion of the palace area.\(^{959}\) An additional indication of the general location in which all three *Hb-sd* were celebrated is contained in an inscription on the base of an ebony statuette of Amenhotep in the Brooklyn Museum no. 48.28. In this source, which may have come originally from the palace itself,
the king’s name is followed by the epithets *nb ḫb (Sd) m Pr-hʾy*, “Lord of (Sed-)festival in the House of Rejoicing”. 960

According to the impressions stamped on the sun-dried mud brick of the palace, the name *Pr-hʾy* was used in reference to this complex of structures. In Types VI and VII 961 the king’s name is followed by the phrase “in/of the House of Rejoicing (*n Pr-hʾy*)”. Since these types are mainly from the Palace of the King and the Middle Palace, the *Pr-hʾy* was probably not a single structure, but a complex which included different palatial buildings. 962 Type IX from the Temple of Amun reads “the Temple of Amun in the House of Rejoicing” showing that *Pr-hʾy* definition could be extended to the entire complex and comprehended the Amun Temple. 963 The inference that the palace was named *Pr-hʾy* in honor of the celebration of the *Ḥb-sd* is a plausible one. 964 Even the Great Palace of Amenhotep IV at Amarna seems to have been called *Pr-hʾy*, the extended title being *Pr-hʾy n p3 ḫtn*, “House of Rejoicing in the Temple Aten”. 965 Both the palace complex at Malkata and the Great Palace at Amarna seem to have been connected to the temple of the cities, although the Amarna *Pr-hʾy* is said to be “in the temple of Aten”, while the Malkata *Pr-hʾy* included a temple of Amun, 966 this connection underlying their ceremonial function. References to a *Ḥb-sd* ceremony taking place at Amarna are contained in the boundary stele of the city, 967 although they do not prove that it was actually celebrated. 968

Seal impressions on the stoppers of amphorae from Malkata referring to commodities such as wine, fat or honey for the *Sed*-festival 969 were found during the excavations of the

---

960 Hayes 1951: 86.
961 According to the typology made by Winlock, in Winlock 1912: 186.
962 Hayes 1951: 163.
963 Lansing 1918, Supplement: 8.
964 Wörterbuch defines the *Pr-hʾy* as the name of a building in which the celebration of the *Ḥb-sd* took place, in Wb III: 40. This function of the House of Rejoicing is also recorded in Ptolemaic times at Edfu, where the name occurs frequently: Chassinat 1960, II: 4, 3; III. 110, 3; 114, 12; IV. 299, 15; V. 39, 4; 160, 17; 217, 5; VI. 18, 14. Chassinat 1910: 139, 12; 148, 6.
966 According to Hayes, the temple of Amun in the *Pr-hʾy* was merely a mansion or a chapel built within the palace complex for the celebration of the king’s *Ḥb-sd*, in Hayes 1951: 178.
968 That the *Sed*-festival was actually celebrated at Amarna is the subject of conflicting opinions among the scholars. Some of them argue that neither the royal tomb nor the nobles’ tombs have any scenes which might represent the celebration of the *Sed*-festival and none of the many jar labels found at Amarna mentions this festival, in Gohary 1992. Suggestion for possible *Sed*-festival scenes from Amarna royal palaces have been made by Aldred, in Aldred 1973: 82 ff.
969 Hayes 1951: 157, A-D; 159, CC, HH
Metropolitan Museum of Art in 1910-20\textsuperscript{970} and came from magazines and rubbish heaps widely distributed over the palace area.\textsuperscript{971} Other fragments of small mud sealings from rolls papyrus, some of them containing epithets of the king related to his \textit{Sed}-festival\textsuperscript{972} come from the outbuildings of the King’s Palace.

In the case of the first \textit{Hb}-\textit{sd} the evidence of jar-labels integrates other sources such as blocks and reliefs from Amenhotep III’s temple at Soleb in Upper Nubia\textsuperscript{973} and his mortuary temple at Kom el Hetān in western Thebes,\textsuperscript{974} an inscription from the funerary temple of his great official, ‘\textit{imn-htp}, the son of \textit{Hpw},’\textsuperscript{975} and inscriptions in the Theban tombs of two prominent officials of his time, the king’s Scribe \textit{Hrw-}\textit{f}\textsuperscript{976} and the King’s scribe \textit{K3-m-ht}.\textsuperscript{977}

Both in \textit{Hrw-}\textit{f}’s tomb no. 192 and at Soleb, the building from and to which Amenhotep III and Queen Tiy process while performing the ceremonies of the first \textit{Hb}-\textit{sd} is labeled ‘\textit{ḥ}.

Scenes, which can definitely be ascribed to the first \textit{Sed}-festival of Amenhotep III, occur on the north face of the north side of the gateway between the court and the outer hypostyle-hall of the temple of the king at Soleb in Upper Nubia. The scenes are arranged in eight main registers; the sequence of events begins in the bottom register and works its way up to the top. The festival opens at the right-hand side of the first register with a procession in which the king is borne along on the \textit{wtst}-palanquin. At the left of the first register, the king proceeds to the palace on foot, accompanied by the queen and the chief lector priest and royal scribe \textit{Nb-mrw-tf}. At the extreme left, the king and the queen with the royal children, are shown outside the palace where the king comes to rest (\textit{ḥtp}) when coming to perform all the rites of the \textit{Sed}-festival:\textsuperscript{978}

\begin{quote}
\begin{center}
\textit{ḥtp m ‘ḥ li lr ḫrt nb n Hb-(sd)}
\end{center}
\end{quote}

\begin{quote}
Resting the ‘ḥ when coming to perform all the rites of the \textit{Sed}-festival
\end{quote}

\textsuperscript{970} Winlock 1912: 184-9.
\textsuperscript{971} Duplicates and additional types occur among the palace jar-sealings discovered by Daressy in 1888-89 and now in the Cairo Museum (nos. 11424-6), in: Daressy 1903: 168-9. Lepsius 1973, Text III: 185, 224.
\textsuperscript{972} Hayes 1951: 167: S 23-26, 59, 72.
\textsuperscript{974} Borchardt 1926: 37-51.
\textsuperscript{975} Robichon – Varille 1936: pl. 35.
\textsuperscript{976} Fakhry 1943: 491-5.
\textsuperscript{977} Brugsch 1883-1891, 5: 1123; PM I: 89-90.
\textsuperscript{978} Naville 1892: Pl. 4 bis, 15.
There is no evidence of foundation ceremonies preceding this opening procession like those at Abu Gurob, but such scenes may have been carved on the pylon or elsewhere in the court. At the extreme left of the second register, the king and the queen stand outside the palace near the inscription below: \(^{979}\)

\[ htp \, m \, \text{‘}h\, \text{in}\, n[sw]\, hft\, llt\, hr\, \text{tn}_{3}t\, m\, hrw\, 3\, n\, Hb-(sd) \]

Resting in the ‘\(h\) when coming from the dais [on day 3] of the \textit{Sed}-festival

In the fifth register he appears again offering to Horus and Khnum before returning to the palace: \(^{980}\)

\[ htp \, m \, \text{‘}h\, \text{in}\, nsw\, hft\, llt\, hr\, \text{tn}_{3}t\, m\, [hrw\, 13]\, n\, Hb-(sd) \]

Resting in the ‘\(h\) when coming from the dais [on day 13] of the \textit{Sed}-festival

Officials and priests depicted in the subsidiary register include the vizier (\textit{t3ty}), the “sole friend” (\textit{smr w’ty}), the “friend of the House” (\textit{smr pr}), the \textit{sm}-priest, the priest of \textit{Srkt} (\textit{hm ntr Srkt}) and several courtiers. In the surviving part of the eighth and last register, the standard of Wepwawet of the South is shown being carried to the court (\textit{šsp tp w3t nst ntr r wsḥt}). There follow two depictions of the king and the queen once more proceeding to the palace, apparently on day 14 of the festival. In general, the surviving scenes at Soleb are largely concerned with the king making offering to various deities and then returning to the palace, usually proceeded by the standards of Wepwawet and their attendants. As rightly stated by Gohary, \(^{981}\) the representation of the \textit{Sed}-festival of Osorkon II on the walls of his temple at Bubastis appears to follow very closely that of Amenhotep III at Soleb. At the bottom of the buttress on wall B, the king and the queen are shown outside a building near an inscription similar to that found at Soleb (Fig. 3):

\[ htp \, m \, \text{‘}h\, \text{in}\, nswt\, hft\, llt\, hr\, \text{irrwt}\, m\, [Hb-sd] \]

The resting (of the king) in the ‘\(h\), when he goes to perform the rites, Lord of the [\(Hb-sd\)]

\(^{979}\) Naville 1892: pl. 13, i.
\(^{980}\) Naville 1892: pl. 10, 3.
\(^{981}\) Gohary 1992: 18.
The scenes of Amenhotep III’s first Sed-festival in the south portico of the tomb of Hrw-f are clearly a very much-abbreviated illustration of moments of the festival and are probably restricted to ceremonies in which Hrw-f himself had an active role. Three main events are depicted: the rewarding of high officials - Hrw-f among them - by the king who is enthroned on a dais; the procession of the king and queen from “his palace of the House of Rejoicing” (‘ḥ.f n pr-h’y), where Hrw-f appears amongst the accompanying officials,982 and finally, the towing of the evening solar bark, in which Hrw-f appears with the royal couple, the chief lector priest and two viziers. A text of eleven lines is over the scene of the king’s baldachin. In front of it there are two tables on which are several precious goods. According to the text the king presented these golden objects to the different officials and noble on the occasion of his first Sed-festival:983

This inscription refers to the ḫ as a building comprehending the prwy, "double houses",
used during the celebration of the Sed-festival as a component of the title of officials taking
part in it.984

The celebration of the Ḥb-sd by Amenhotep IV is known thanks to scenes from the temple
built by the king for the Aten at Karnak using small sandstone blocks known as talatat,
reused by succeeding kings - particularly Horemheb and Rameses II - in other structures at
Karnak, such as the Hypostyle Hall and the filling in the 2nd, 9th and 10th pylons.985 Of the
35000 decorated talatat about 1500 can be identified as coming from probable Sed-festival
scenes. In the positively identified scenes, the only building named as place used for the
celebration of the Sed-festival is the gm pꜣ-ĭtn, which is part of the Aten temple and the
ẖ.986

The scenes depicted on the Karnak talatat are quite different from each other and show
various rites and ceremonies which took place in different parts of the Ḥb-sd temple: the
queen and the king leaving the palace, mounting their palanquins, in procession, entering
the temple and dismounting, then returning to the palace, presumably after performing
rites in the temple, and the king offering to Aten in a series of identical roofless kiosks and
processing from one to another.987

The largest Sed-festival scene has been reconstructed by blocks extracted by the 9th pylon
of Karnak;988 the scene covers 11 courses of talatat and shows 3 registers depicting several
episodes in the Upper Egyptian palanquin procession. In the bottom register the king,
wearing the white crown and the Sed-festival robe and accompanied by the queen, comes
out of the palace, mounts the basket-shape palanquin and is borne off. In the two upper
registers the procession returns to the palace.

984 Examples of connections between the boats or the boats-oversee and the Ḥb-sd ceremony are
known since the Old Kingdom, in Goelet 1982: 334-5.
986 ibid.: 34.
987 ibid.: 39.
988 ibid.: 40-43.
A section of this scene preserved on two courses of *talatat* depicts at the left of the second lower register several priest carrying offerings and god’s standards. Beside these figures are three columns of hieroglyphs reading as follows:²⁸⁹

l. 1) *ḥ*’ *m* *ḥ* *ḥ* *ḥ* *m* *nswt*  
   l. 2) *ḥr st* *ḥr* *ḥr* *ḥr*  
   l. 3) *ḥr* *ḥ* *ḥ* *ḥ* *ḥ* *ḥ* *ḥ* *ḥ* *ḥ*  

Appearing [in] the ‘ḥ’ by the king  
on the throne [in order] to perform the rites appropriate  
on the days of the red crown

The expression *ḥrw n dšrt* “the days of the red crown” clearly refers to the days on which rites of Lower Egypt were performed. At the right of the inscription are the tops of the two Aten cartouches, which presumably belong to the sun-disk under which the king is depicted. The scene under discussion has been interpreted as a possible Sed-festival scene because of the inscription, and the occurrence of the building name *gm p3 ḫtn* at the left of the lower register.²⁹⁰

In other *talatat* the term ‘ḥ’ is used as a component in the official titles of some participants: in a scene showing five bending officials, taking part in a palanquin procession with titles over them, the fourth is entitled *ḥrp ‘ḥ*’, “controller of the ‘ḥ’”.²⁹¹

---

²⁸⁹ *Ibid.*: 92-3, no. 111; pl. 46.  
²⁹⁰ *Ibid.*: 93.  
²⁹¹ *Ibid.*: 55, scene no. 32, pl. 15.  
²⁹² *Ibid.*: 58, scene no. 58, pl. 17.
Other blocks simply show officials with their titles inscribed beside them, such as the block no. 13 with the epithet hrp ḫnty ḫr šmst nsw, “the controller of the ‘ḥ’ who is in the following of the king” and the block no. 14 carrying the title hrp ḫḥ, the controller of the ‘ḥ’.

The presence of the hrp ḫḥ functionary in the celebration of the Sed-festival is known since the Old Kingdom.

A small wooden shabti dated to the 18/19th Dynasty carries an inscription referring to the owner with the title (Leiden 3.1.1.37 - B.II.120):

\[ \text{imy-r k3wt m hwt Hb-sd m 'ḥ n pr-nswt} \]

Overseer of the works in the temple of the Sed-festival from/in the 'ḥ (and) in the pr-nswt

It likely refers to an official responsible for organizing the necessary works for the Sed-festival in its dedicated temple or sanctuary, the hwt Hb-sd, who worked in the ‘ḥ’ involved in the same celebration. The reference to the pr-nswt probably depends on the administrative nature of the title imy-r k3wt.

More generally, written documentation offers a confirmation of the use of a ‘ḥ’ building at the Hb-sd ceremony since the Old Kingdom, when the hieroglyph ‘ḥ’ is depicted in a number of royal reliefs representing the Sed-festival. The Abusir papyrus from the papyrus archive in the funerary temple dedicated to the cult of Neferirkara Kakai (2446 – 2426 B.C.) in his pyramid complex at Abusir mentions the presence of the two gods Horus and Seth in the ‘ḥ Hb-sd, “the ‘ḥ of the Sed-festival’”. In the Hb-sd reliefs of King Nyuserra’s sun-sanctuary at Abusir, the ‘ḥ appears as one of the most important structures to have been built prior to the ceremony performance, in fact it is the sole type of royal-building that Nyuserra’s reliefs mention in the captions accompanying the scenes that depict the foundation rites preceding the festival.

Analyzing all the Old Kingdom Hb-sd reliefs,

993 Ibid.: 162, pl. 104.
994 Ibid.: 162, pl. 104.
995 A re-used block (MMA 09.180.18) from the north side of the Pyramid of Amenemhat I at Lisht probably dates back to the 4th Dynasty and originally belonged to the funerary temple of Khufu. The fragmentary block shows a row of officials at the Sed-festival. Above each man’s head is his title. Three different types of officials can be distinguished by their costumes, three of whom are entitled as hrp ḫḥ, “controller of the ‘ḥ’”. The attribution of these scene to a Sed-festival representation has been supposed on the basis of a closely related parallel in Nyuserra’s Sed-festival relief. Goedicke 1971: 38-9. For other examples of the title see Goelet 1982: 344 ff.
996 For a complete analysis of the Old Kingdom documentation see Goelet 1982: 267 ff.
998 Ibid.: 322.
Goelet has pointed out that the ‘ḥ’ was one of the most important constructions to be built prior to the performance of the Sed-festival and that it was apparently used as a type of changing room or as king’s dwelling place for the duration of the ceremonies.

The form and disposition of several structures at the Djoser’s Pyramid complex make it clear that they were intended to represent the shrines and the buildings of the Ḥḫ-sd and the ‘ḥ’ was probably included among these.\(^\text{999}\) Old Kingdom studies have concentrated on the possible location of the ‘ḥ’ at the Djoser complex. The problem in designating some part of the funerary complex as actual ‘ḥ’ is in the nature of the available documentation. Sources consist mainly of few inscriptions and reliefs found within Djoser’s monument and they all have been discovered in the subterranean area of the precinct and not in the aboveground portions. The stele showing Djoser performing the “donation of the field” mentions a ‘ḥ-hd’,\(^\text{1000}\) suggesting that an ‘ḥ’ may have been located somewhere within Djoser’s complex, without specifying exactly where. In such panel the inhabitants of the ‘ḥ-hd are named wrw, meaning “the great ones”.\(^\text{1001}\) Other underground relief panels of king Djoser mention a wsḥt court as place for celebration of the Ḥḫ-ṣd. The wsḥt hieroglyph would be echoed in the Great wsḥt-court aboveground – to the west side of the proper Ḥḫ-ṣd court - where the king would have performed the act of running a course.\(^\text{1002}\)

Considering the common conjunction between the wsḥt and an ‘ḥ-like building,\(^\text{1003}\) it is likely that a building located near the Great wsḥt-court of Djoser’s complex possibly functioned as ‘ḥ’. The connection between the two terms is known since 5\(^{\text{th}}\) Dynasty examples in which the ‘ḥ appears written inside a wsḥt-glyph.\(^\text{1004}\) Considering the different attempts to identify the actual location of the ‘ḥ within the Great wsḥt-court and the Ḥḫ-ṣd court, Friedman\(^\text{1005}\) has recently suggested its identification with the south tomb, while Goelet has proposed a number of reasons to interpret the “temple T” as ‘ḥ-building.\(^\text{1006}\) He starts from the consideration that this structure would have served as “changing room” and has been quite small, like the “temple T”. Personally, I would support Arnold’s identification of the ‘ḥ-building with the whole Ḥḫ-ṣd-court on the basis of its architectural features that

\(^{999}\text{Ibid.}: 386.\)

\(^{1000}\) The same specific sign, composed by the ḥd sign written inside an ‘ḥ structure is also known from the Pyramid Texts, where it has not a clear association with the Ḥḫ-ṣd. Goelet 1982: 280.

make it look like other palatial buildings such as the palace of Amenhotep III at Malkata, the Harim Palace at Amarna and the palace of Merenptah at Memphis.

4.4 Conclusions

As already noted in the previous chapters, the word ‘ḥ’ is one of the five terms most frequently mentioned in several kinds of texts: biographical narratives, account-papyri, brief inscriptions on jars and royal tablets, titles, captions in royal reliefs and narrative religious material.

The contexts where the term is used bring to the interpretation of the ‘ḥ’ as a building with religious or ceremonial functions:

- the ‘ḥ’ appears to be connected with the celebration of feasts such as the Opet Festival\(^{1007}\), the Feast of the Valley\(^{1008}\) and the \(Hb\,sd\);
- such a “ritual palace” also functioned as “coronation palace” from and to where the new king went in procession to be crowned by the god (Amun-Ra);
- the word ‘ḥ’ is rarely associated with administration departments like granaries or treasuries;
- a number of deities are closely associated with the ‘ḥ. The most common titles for the living king, “Horus in the palace” and “Horus, Lord of the palace” refer to the king as divine personification and holder of magical powers.

The difficulty in relating palatial terminology to the archeologically known palace of Malkata relies on the fact that written sources from the site do not explicitly define it with anyone of the five words used for the royal palace. Sources from the site refer to this palace only with its proper name, \(Pr\,ḥ\,y\), and not with one of the five generic words for

---

\(^{1007}\) During the Opet Festival, the palace of Karnak is the place from where the king issued forth, like the god (Amun-Ra) from his temple, to join in the procession of Luxor, and to where the king returned again at the end of the feast. The palace is also the site where some of the rituals of the coronation were reenacted on such occasion. Murnane 1982: 574-9.

\(^{1008}\) The Festival of the Valley originated in Karnak temple and palace, moved to the relevant funerary temples, where temple and palace replicas of the original temple of Karnak reproduced the roles of Karnak temple and palace. In this way the deceased forms of Amun Ra and the king could join the festival and continue to the Hathor temple of Deir el-Bahari. From here the living king and the image of Amun-Ra returned to Karnak, while the deceased god and the king went back to the funerary temple and the temple-palace. Graefe 1982: 187-9.
“palace”. The inscription in the tomb of *Hrw-f* seems to show that a ‘h’-building used during the *Hb-sd* ceremonies - was included in the *Pr-h’y*. Although this is a single source, it suggests the presence of a ‘h’ within the palace of Amenhotep IV at Malkata.

The attempt to identify the ‘h’ in the archaeological evidence is made possible by the integration of the architectural analysis of archeological data. The architectural analysis of the so-called Harim in the palace of Malkata together with the study of its decoration system has shown the possibility of a different interpretation of its function and its similarity with the complex of Merenptah at Memphis. Inscriptions from the palace of Merenptah report the appearance of the king in the ‘h’ (*nswt ḫ’(t) m ‘h*), most likely referring to the same building from which they come.

The tripartite plan of this building is similar to that of the so-called Temple-Palaces of the 19th and 20th Dynasty. Inscriptions from the palace of Medinet Habu confirm the identification of the building attached to the south court of the Mortuary Temple of Rameses III as a ‘h’-palace. Inscriptions on the large false door behind the dais of the throne room of the first palace (B.I.56) mention a building called ‘h’:

\[
\begin{align*}
'h\ hwt.f\ špsi\ &\text{ and } 'h\ n\ ʹnh\ w3s \quad \text{The “palace of his noble temple” and the “palace of life and dominion”}^{1009} \\
\end{align*}
\]

On the doorjambs of the two entrances to the palace the king enters and leaves “the palace of his noble temple” (‘h hwt.f špsi) in order to join the god Amun during the Feast of Opet (eastern entrance) and the Feast of the Valley.\(^{1010}\) The ‘h’ palace is also mentioned in the dedication inscription of Papyrus Harris I, IV 11-12 (B.I.73):

\[
\begin{align*}
iry.n.k\ 'h\ špsi\ nswt\ m\ hnw.s \quad &\text{I made a noble ‘h, the king being in it - the temple} \\
\end{align*}
\]

The ‘h’ is presented as part of the *hwt* (temple) within which the palace was built, these inscriptions suggesting the ceremonial and religious nature of the ‘h’.

The design of the first temple-palace of Rameses III is, in a much reduced form, remarkably faithful to the layout of the palace of Amenhotep IV at Malkata, as well as the temple

\(^{1009}\) Hölscher 1941: fig. 28 and pl. 37.

\(^{1010}\) *Ibid.*: 238 B and 239.
palace of Rameses II in the Ramesseum, that of Merenptah at Qurna, and that of Sety I at Qurna.

From the collected data, we can assume that the so-called “ceremonial palaces” as they have been identified thanks to recurrence of specific architectural features, with their elongated shape and the tripartite articulation of inner spaces, correspond to the 'ḥ'-palace described in written sources (A.III.5). The most famous literary text that presents the description of the inner section of the ‘ḥ’ is the Tale of Sinuhe dating back to the Middle Kingdom. The passage in question describes the moment in which Sinuhe was ushered (st3) through the palace (‘ḥ’) before Sesostris I and the royal entourage, after a lifetime in exile:

\[
\text{ḥ}d(t3).n\ r f d\ w3\ s p\ 2\ i\ w\ w(w)\ i3\ s\ n.i
\]

When it was dawn, very early, they came and summoned me;

\[
10\ (n)\ s\ m\ iwt
\]

Ten men coming,

\[
10\ (n)\ s\ m\ šm\ h\ r\ s t3.i\ r\ ḥ
\]

ten men going, ushering me to the ‘ḥ’.

\[
dhs. n.i\ t3\ im(y)t(w)\ 3spw
\]

(There) I touched the ground between the sphinaxes

\[
msw-nswt\ ḥ'(w)\ m\ wmt\ hr\ irt\ ḫsw.i
\]

as the royal children stood in the portal, receiving me;

\[
smrw\ s t3w\ r\ ḫby\ hr\ rdt.i\ hr\ w3t\ ḫnwty(y)
\]

and the friends who ushered to the Pillared Hall were showing me the way to the Audience Hall.

\[
gm.n.i\ h\ m.f\ hr\ st\ wrt\ m\ wmt\ nt\ ẖm
\]

I found His Majesty on the great throne in the portal of electrum.\(^{1011}\)

\[
wn.k(w)i\ rf\ dwn.kwi\ hr\ h.t.i
\]

Then I was stretched out prostrate, unconscious of myself in front of him (..)

\[
ḥm.n.(l)\ wi\ m-b3ḥ.f
\]

After having received help by the royal children at the portal (wmt) of the ‘ḥ’, which can be interpreted as a strong monumental entrance in the enclosure wall of the palace, Sinuhe passes through it. The first columned hall he crosses is the ḫby, according to Quirke to be intended as the point were the outer and the inner sectors of the main palace met.\(^{1012}\)

Then he is put on the way (w3t ‘ẖnwty), to which Quirke\(^{1013}\) refers as the possible path on which the visitors approached the audience hall, the ḫnwty, here intended as inner section of the palace. The last section he passes through is the throne room where he finds His Majesty on the great throne (st wrt) of the palace. The following expression \(m\ wmt\ nt\ ḫm\) has been differently interpreted;\(^{1014}\) taking Kuhlmann’s interpretation of \(m\ wmt\)\(^{1015}\) as a

\(^{1011}\) The expression \(m\ wmt\ nt\ ḫm\) generally interpreted as “on a podium of electrum” has been differently translated by Kuhlmann “Ich fand Seine Majestät auf dem hohen Thron im Türdurchgang aus Weissgold (sitzen)”, in Kuhlmann 1977: 30.

\(^{1012}\) Quirke 1990: 40.

\(^{1013}\) ibid: 20.

\(^{1014}\) Spencer 1984: 188.

\(^{1015}\) “Türdurchgang”, in Kuhlmann 1977: 30.
view of the throne though the doorway into the audience hall before entering this room from outside, the \textit{wmt} would be the entrance to the throne room, whereas \textit{nt d'm} would again refer to word \textit{st}, as the decoration of the throne.\textsuperscript{1016} I refer here to the plan published by Gnirs after Van Siclen’s plan (fig. 1) of the palace at Tell Basta, where he offers a hypothetical reconstruction of the “way to the inner palace” (\textit{w3t nswt}) (fig. 1).\textsuperscript{1017} The succession of the first entrance courtyard, the second central hall and the possible throne room is based on an off-axis entryway. No definite sequence of a vestibule, a long central hall and the throne room at the end is clearly visible here, as well as in the Second Intermediate palace discovered at Ezbet Helmi, part of Tell el-Dab’a (PL. V),\textsuperscript{1018} remarkably similar to the North Palace at Deir el-Ballas (PL. XI). Starting from the New Kingdom “ceremonial palaces”, the above evidence from actual palaces demonstrates that they developed according to an axial shape, with an entrance courtyard, a long narrow hall along the central axis of the structure and the throne hall at the end. The \textit{w3t nswt} is organized so that the raised dais opposite the entrance to the throne room (\textit{wmt}) is abstractly visible from the entrance to the first hall (\textit{w3hy}).

This section wants to be an attempt of application of the philological study of written sources to the interpretation of archaeological remains. The philological study has allowed to display a correspondence of the sections and the function of the \textit{h}-palace in texts with the shape of some palatial structures subscribed to a basic architectural formula (under the label of “ceremonial palace”), as identified by the archaeological analysis. Both the architectural articulation of inner spaces and the decoration system show that there was a fairly strict conception of the essential elements of the royal palace in the New Kingdom corresponding to its function. The \textit{h} of the \textit{Hb-sd} is expressly linked to a particular festival, which may mean that it was a temporary structure built just for the duration of the ceremony. Its impermanence, however, is far from certain, especially since the jubilee could be performed several times during a reign. More probably such a \textit{h} may have been constructed by each king,\textsuperscript{1019} and its use would have been not strictly restricted to the celebration of the \textit{Hb-sd}. Some of the palaces described above may have not been actually used during the celebration of this kind of festival, but their conception of ceremonial palaces was similar to the \textit{h}-palaces used during the celebration of the \textit{Hb-sd} in both

\textsuperscript{1016} Gnirs 2009: 15, note 9.
\textsuperscript{1017} \textit{Ibid.}: 16, fig. 1.
\textsuperscript{1018} Eigner 1985: 19-25.
\textsuperscript{1019} Goelet 1982: 268.
design and decoration. This is clearly the case of the temple-palaces attached to the mortuary temples of the 19th and 20th Dynasty at Thebes.  

The ritual functions of a ‘ḫ-building ranged from the rebirth of the reigning king and the renewing of his office to his coronation or enthronement on specific occasions. Special “ritual palaces” were the “Temple-Palaces” attached to the courtyard of the mortuary temples of the 19th and 20th Dynasty at Thebes, for the use of the deceased king. All these buildings, intentionally designed, based on common architectural features. It is not surprising that these features are very similar to those that one can find used in the New Kingdom temples, characterized by the sequence of a first entrance courtyard, a central columned hall and the vestibule at the end. It seems that the tripartite plan, with its variations, was ideologically understood as identification of a “ceremonial architecture” both religious and secular.

\[1020\] Daressy 1889: 82. Referring to the inscription from the temple of Rameses III at Medinet Habu and the Ramesseum at Thebes, he states: "Il semblerait résulter en outre de cela que le ‘ḫ n’est pas le palais du roi, sa résidence habituelle. Cette construction n’est qu’un annexe du temple, une sote de sacristie; c’est de là que le roi sortait, après s’être montré au balco, pour diriger la fête d’Amon <<de la vallée>>".
CONCLUSIONS:

After having analyzed the occurrences of each of the five principal terms for palace in texts, it is now possible to provide a clearer interpretation of their meaning in a given context and consequently of their specific functions. Considering the extent and the complexity of such a topic, I refer to pertinent chapters for a best understanding of the usage of the palace-vocabulary, of its nuances and applications in context. The purpose of this final section is to summarize the preceding discussion in order to provide the reader with an overall view of how the five words in this study were used in Egyptian texts from the Middle Kingdom to the Late Period.

I have presented above a series of reasons as to why an univocal translation of each word remains a non-definitive solution, first of all the possibility that the meaning of a term may vary according to the context and the chronological development of each word’s usage. Despite the choice to render each palace-term by transliteration, in order to give a more objective view of the word under consideration, I hope I have offered interpretive key to facilitate the possible translation according to the context of use. By limiting the application of modern labels and categorization of monumental architecture and contextualizing Egyptian palace terminology I aim to a better representation of the function and significance of the ancient Egyptian royal palace.

Primarily importantly, I hope I have brought out that the ancient Egyptian royal palace was a very complex institution, corresponding to multiple functions, which could take place in different sections of the same building (or a cluster of buildings physically associated with each other) or in separate structures, called from time to time with different names. The variations in vocabulary correspond to the broad range of different functions fulfilled by royal palaces and their architectural diversity. The architectural vocabulary in the present study was to find concrete realization in real royal buildings, some of which being archeologically known. A palace would require an “architectural language” that had to be symbolically recognizable to its occupants and its visitors. Such architectural vocabulary may comprise specific arrangement of spaces and circulation system conferred to independent architectural entities or inner sections of a wider building. Some architectural
elements were common to buildings or departments with different functions, and the corresponding definitions may be compound with each of the five words for palace; other architectural terms are specifically linked to one or two of the palace words. Monumental gateways, audience halls, throne rooms as well as private spaces and service areas, with increased specialization of palace and temple architecture from the New Kingdom onwards, were differently distributed, enlarged or reduced, thus distinguishing for example between residential palaces or residential quarters and state or “ceremonial” palaces or sectors.

Although a concise definition of an Egyptian palace cannot be delivered because of a considerable variation in function, it is hoped that the present combined lexicographical and architectural study will clarify both the different activities taking place in a “royal” palace and the diverse architectural features designated for their performance. The main difficulty in attempting to reconstruct the palace entity lies in the lack of a clear separation between secular and religious activities carried out by the Egyptian kingship in the royal palace. According to textual sources, the performance of the ritual activity was not confined to the temple and could take place in the palace together with more profane affairs. Sacred duties and secular matters were framed by specifically dedicated spaces which are recognizable in palace architecture. Spaces for the performance of ceremonial activities could constitute a separate building or be clustered together with the actual living quarters of the king, fortified complexes, administrative and economic facilities.

• The usage of term ‘ḥ’:

The function of the ‘ḥ’ is immediately set by its hieroglyphic sign , the only one consisting of a two dimensional representation of the royal building. The ideographic origin of the sign makes suppose that the term was the one originally used to indicate the palace, or a part of it, in its most generic meaning and its primary function.

---

1021 Goelet points out how the term ‘ḥ’ is the only representation of the royal building for Old Kingdom, since there are not depictions of the palace for this period comparable to those occasionally found in the New Kingdom. Goelet 1982: 210.
1022 Unlike the term ḫnw, which may be related to the triliteral stem ḫnw meaning “inside, interior”, there does not seem to be a comparable root word from which ‘ḥ’ might have been derived. See Goelet 1982: 400.
While introducing to the study of the usage of the term ‘h in the Archaic Period and Old Kingdom texts, Goelet considers the existence of a number of variants of the original ideographic form, in which the basic ‘h-sign contains another hieroglyph within it, specifically the signs ntr, hd and htp. All the three varieties of hieroglyph representations have the same appearance suggesting that they were most likely closely related structures, all used as buildings or shrines with religious or ceremonial functions. According to Goelet’s analysis of these complex forms, the ‘h-ntr would have been primarily “a changing area or a resting place for the king”; the ‘h-hd may have been a sort of shrine perhaps used for divine images at festivals. Such combined forms of the ‘h, of which the plain ‘h is likely a later version, suggest the original ceremonial or religious function of this entity.

The connection between the ‘h and the divine presence continues to be attested in later examples that depict the ‘h as place where a number of deities may be found. In many cases it is hard to identify what kind of ‘h is intended by stating that different deities are “in” the ‘h (ntr m ‘h) or “of” the ‘h (ntr ‘h), because nothing is said about their relationship with the structure, nor where it may be located. Recurring titles from the Middle Kingdom onwards are those composed by the name of the god or goddess and the formula nb/nbt ‘h, “Lord/Lady of the ‘h”. They may be referred to gods like Nekhbet, Mut, Isis, Sekhmet, Wrt-Hk3w, Horus, Seth and Apis, who probably had worships associated with the ‘h, here to be intended as a religious building more than as a secular one. Only few examples of this kind of occurrences have been cited in the present work, with the sole aim to show this possible usage of the term ‘h that goes far beyond the proper “palace” meaning. Together with these titles, the occurrence of the expression ‘h ntr must be mentioned as opposed to ‘h nswt, “the ‘h of the king”, the latter being referred to a proper royal building or “palace”. The ‘h ntr in Middle Kingdom and later sources can be seen as reminiscence of the Old Kingdom complex form ‘h-ntr cited above and suggests the existence of a ‘h-building with a religious nature.

Since the Old Kingdom, the deity most frequently connected with the ‘h is Horus. In the Pyramid Texts the king is identified with both Horus and Seth, the two gods being mentioned as imy(w) ‘h, “those who are in the ‘h”. As well as Horus, the living king, is linked to the ‘h, Osiris, a god who is associated with the deceased king, is mentioned in the

1025 Ibid.: 272, 283.
Pyramid Texts as “the one who is within the ‘ḥ’.”  The seat of Horus as the living king continues to be the ‘ḥ’ in Middle Kingdom, New Kingdom and Late Period texts as suggested by recurring expressions referring to Horus as “Lord of the ‘ḥ’” (nb ‘ḥ’) or as being “in his ‘ḥ’” (m ‘ḥ.f). Even in those occurrences where the word ‘ḥ’ is the seat of the king as sovereign and ruling king (nswt) and has a meaning closer to “palace”, its interpretation as secular building or a religious one is not so clear. The offices of the king as Horus-sovereign were partly divine and had to be exercised by cult performance. The ‘ḥ’-palace must be intended as a holy locality as well as the temples because the Horus-king is the holder of religious and magical power. The ‘ḥ’ would have been the place where all the ceremonies connected to the transition of the magical power of the sun-god to the king were performed: here the king took over the role of Horus and was legitimated as his successor. When the king is mentioned without divine connotations - as nswt, hm or nb-t3wy - in connection with the ‘ḥ’, festivals or religious rituals are anyway involved. The ritual nature of the ‘ḥ’-palace is well documented by those narrative passages where it is described as coronation and enthronement place for the king. Crowning (ḥb3w) and enthroning (ḥ’w) ceremonies are recorded in Middle Kingdom private inscriptions as taking place in the ‘ḥ’, probably on specific occasions (BM 146 [574] – A.II.45 and UC 14333 – A.II.5). During the 18th Dynasty, the ‘ḥ’-palace functioned as coronation palace from which the new Queen Hatshepsut went in procession inside the Karnak temple where the god Amun crowned her (B.I.11).

---

1026 Ibid.: 284.
1027 Gundlach 2009: 64.
1028 Ibid.: 60.
1029 Gundlach has recently identified the ‘ḥ’ as the “seat of Horus” whose function was to serve the kingship in order to “secure the transition of the magical-power of the sun-god so as to enable the king to take over the role of Horus and to govern”. He distinguishes the ‘ḥ’ from the pr-nswt, as the place of the ruling king.
1030 FCD: 321.
1031 Ibid.: 185.
References to ceremonies during which the king makes his appearance (ḥš) in the ‘ḥš often occur in Middle Kingdom and New Kingdom texts. According to the Building Inscription of Sesostris I in Papyrus Berlin 3029 (A.I.5), the king made his appearance in the ḍ3dw-hall of the ‘ḥš, ordering an assembly (hmst) in this place to announce his intention to build a temple in Heliopolis. Rulers could appear in the ‘ḥš-palace to make formal declaration of policy or during more sporadic ceremonies, such as specific structured feasts. References to royal appearances in the ‘ḥš occur quite frequently in New Kingdom texts and may be related to the Ḥb-sd festival. The discovery of raised reception areas as well as windows and balconies of appearance in archeologically known Egyptian royal palaces meets the attestation of such ceremonies in texts. From the New Kingdom onwards, epiphanies of the king could take place in the Window of Appearance\textsuperscript{1032} and would have been strictly related to the exchange of diplomatic gifts as suggested by a number of Egyptian texts\textsuperscript{1033} and tomb representations.\textsuperscript{1034} A Window of Appearance had to be located in each of the temple-palaces within the Mortuary Temples of the 19 and 20\textsuperscript{th} Dynasty;\textsuperscript{1035} it is a prominent feature of the palace of Rameses III at Medinet Habu, at the centre of the façade to the first court of the temple.\textsuperscript{1036} As suggested by K. Spence in her architectural analysis of the palaces of el-Amarna, the Windows of Appearance would have been a feature of axial palaces, lying on the axis between the throne room and the main entrance.\textsuperscript{1037} Specifically she designates as axial structures the palaces “ordered around a notional line of visibility between entrance and throne room”, such as the North Palace and Great Palace at Amarna, the palace attached to the mortuary temples and the Merenptah palace at Memphis.\textsuperscript{1038} As regards the site of Amarna, Whittemore has recognized remains of a Window of Appearance at the time of the original excavation in the North Palace, at the end of the first courtyard, on the opposite side of the main entrance.\textsuperscript{1039} It is likely that another Window was located at a similar point in the Great Palace of the site. The Window of the Appearance would seem to be a specific device of “ritual” palaces, such as the North

\textsuperscript{1032} The Window of Appearance seems to have been introduced under the reign of Amenhotep III and his son. For the introduction of such architectural device and its further use in Egyptian architecture see Kemp 1976: 81-99.
\textsuperscript{1033} For an analysis of the motif of presenting foreign tributes under the Window of Appearance in Late Egyptian Miscellanies see Gnirs 2009: 25 ff.
\textsuperscript{1034} One of the most complete scene of such kind is preserved in the tomb of Tw-tw at Amarna: here the owner is represented beneath the Window of Appearance in the palace from where the king leads of and passes rewards to him, in Davies 1903-1908, VI: pl. 19.
\textsuperscript{1035} Stadelmann 1973: 224-227.

Palace at Amarna and the Theban temple-palaces, whose axial ordering and tripartite plan render them comparable in some ways with temples.

The term ‘ḫ’ is explicitly related to the temple-palaces within the temenos walls of the mortuary temples of the 19th and 20th Dynasty. Specifically, the ritual palace of Rameses III to the south of the first court of the Mortuary Temple at Medinet Habu is mentioned as ‘ḫ-palace in its own inscriptions. In the text carved on the large door behind the seat of the throne room of the first palace, it is described as “the palace of his noble temple” (‘ḫ n hwt.f špsî), and “the palace of life and dominion” (‘ḫ n ’nh w3s).1040 On the doorjambs of the two entrances to the palace, the king “appears” (ḥ’) at “his ‘ḫ of his noble temple” (‘ḫ n hwt.f špsî) in order to join the god Amun during the Feast of Opet1041 and the Feast of the Valley.1042 A close architectural analysis of these palaces show that they could never have served as residential palaces, even for a short stay and they were intended to be ritual palaces for the use of the dead king.1043 Their planimetric shape suggests the identification of the ‘ḫ-palace with tripartite and axial structures, such as the palace of Merenptah at Memphis or the harim components of the palaces at Amarna and Malkata. Inscriptions from the palace of Merenptah (B.I.49), on the columns of the main hall mention twice the appearance of the king in the ‘ḫ, referring to the same structure where they have been found. The tripartite scheme of such palaces remind that of the New Kingdom temples, with the succession a first colonnade court, a hypostyle hall and the sancta sanctorum at the bottom of the Egyptian Temple. The shrine after the two courts in the religious building is replaced by the throne room in the palace. The architectural similarity of the ‘ḫ with the temple would correspond to their functional similarity, the ‘ḫ being used for ceremonial functions sometimes associated with major religious festivals as well as the temple.

1040 Hölscher 1941: fig. 8, pl. 37.
1041 The New Kingdom festival of Opet was a rite expressly connected with the Pharaoh and his father Amun(-Ra), during which the Pharaoh traveled to the temple of Luxor at Thebes. Here Amun gave to the king the powers of kingship as the living Horus. Murnane 1982: 574-9. Lanny 1985; 1986. Spalinger 2000: 521.
1042 During the feast of the valley the statues of Amun, his consort Mut and their son Khonsu, were carried across the Nile to Deir el-Bahari in the western bank. Spalinger 2000: 521. For a more detailed analysis of the main Egyptian royal festivals see Breasted 1972.
1043 Since its discovery, this palace was regarded as a temporary residential quarter used by the king during his occasional visits to Thebes to partecipate in the feast of the southern residence (Hölscher 1941: 58-61).
The ‘ḫ’ seems to be connected with the celebration of the Ḥb-sd festival from the Old Kingdom onwards. The so-called Sed-festival consisted in the renewing of the royal office after a period of government and was made possible by an ensemble of buildings, among which there was a ‘ḫ-palace’. Here the king had to rest in specific moments of the festival before processing to other buildings used during its celebration.

Sections of the Abusir Papyri offer one of the first official confirmation of the ‘ḫ’s presence at the Ḥb-sd or jubilee festival as a probably temporary structure built for the duration of the ceremony. The ‘ḫ’ is specifically mentioned once among the captions accompanying the scenes of Nyuserra’s Ḥb-sd reliefs and is used as a component in the official titles of some participants. In one of the underground panels of king Djoser representing the celebration of the Ḥb-sd festival the wrw ‘ḫ-hd, “the great ones of the ‘ḫ-shrine” are mentioned, the ‘ḫ-hd being described in Pyramid Texts as a wooden building that may have been a small shrine for a cult statue. According to several Old Kingdom sources, the ‘ḫ was a type of building especially used during the Sed-festival, where the king rested in between ceremonies and changed his clothes.

Architectural studies of archeologically known royal palaces may help to recognize those structures which would conform to the functions of the ‘ḫ-palace as reconstructed thanks to written sources. A proper ‘ḫ could have been physically located within the Pyramid complex of Djoser at Saqqara (Fig. 2). The similarity of such Ḥb-sd courtyard to the Harim in the King’s House at Malkata has been amply discussed in a dedicated chapter of the present study.

---

1046 ibid.: 316.
1049 ibid.: 682-3. The six panels that have been found below ground in the Pyramid Complex of Djoser at Saqqara show the king in different forms of dress during the celebration of the Sed-festival, in: Friedman 1995: 1 ff.
1050 Dorothea Arnold has recently made a fascinating comparison of the plan of the Harim in the King’s House at Malkata with that of the supposed Ḥb-sd complex at the Step Pyramid of Djoser at Saqqara, in Arnold 2002: 290-1.
While making a fascinating comparison of the plan of these two complexes, Dorothea Arnold has recently stated as follows: “a central north-south oriented space (an open courtyard at Saqqara, a columned hall at Malkata) is flanked on both sides by separate compartments. At the south end is the king’s throne, and behind it to the southwest a number of private apartments are located: the so-called ‘Temple T’ at Saqqara, the ‘king’s bedchamber suite’ at Malkata”.\textsuperscript{1051} According to Dorothea Arnold’s thesis, the “harim suites” of the King’s House at Malkata would have been actually ritual spaces utilized by the king only during the celebration of the $Hb$-$sd$ festival: she suggests that the king performed purifications or ablutions in the first room of each suite, that he was enthroned in the central room and that he was invested there “with eight different sets of garments and

\textsuperscript{1051} Arnold 2002: 290-1.
insignia that served during an important ritual performance”, while the items needed for
the celebration were kept in the storerooms attached to each suite.\textsuperscript{1052} She has also
recognized a similar plan in the central sector of the Great Palace at Amarna,\textsuperscript{1053} almost
certainly referring to the so-called Northern Harim. In the chapter dedicated to the
recognition of the ‘h in archeological evidence, I have stressed the architectural similarities
between the Malkata and Amarna Harim components and the palace of Merenptah at
Memphis.\textsuperscript{1054}

Figure 6. Comparison between the Harim component in the King’s House at Malkata at the top and
the Northern Harim at Amarna below.

The central axis of all these structures shows a tripartite arrangement of spaces with a first
transversal columned hall, a central lengthwise oriented hall and a throne room at the end.
Inscriptions from the palace of Merenptah describing the scenes of the king coming from
the palace refers to this as a ‘h-palace (B.I.49).

Scenes which can definitely be ascribed to the first Sed-festival of Amenhotep III occur on
the north face of the north side of the gateway between the court and the outer hypostyle
of the temple of the king at Soleb in Upper Nubia (B.I.17) and in the southern portico of the
tomb of Hrw-f (B.II.80). In the temple of Soleb the king and the queen with the royal

\textsuperscript{1052} Ibid.: 289.
\textsuperscript{1053} Ibid.: 294.
\textsuperscript{1054} See above.
children are shown outside the palace where the king comes to rest (\textit{htp})\textsuperscript{1055} when coming to perform all the rites of the \textit{Sed}-festival.\textsuperscript{1056} In \textit{Hrw-}\textit{f's} tomb the king and queen are shown coming from the \textit{'h.f n Pr-h'y}, “his palace of the House of Rejoicing”, where \textit{Hrw-}\textit{f} appears amongst the accompanying officials.\textsuperscript{1057} Basing the impressions stamped on the sun-dried mud-bricks of the palace at Malkata, the \textit{Pr-h'y} was used in reference to this complex of structures.\textsuperscript{1058} As suggested by the text in \textit{Hrw-}\textit{f's} tomb a \textit{'h}-palace would have been located within the \textit{Pr-h'y} as the palace complex at Malkata and might be consequently identified with the Harim component of the palace. The Great Palace at Amarna, this also named \textit{Pr-h'y}, had hence \textit{Sed}-festival connotations\textsuperscript{1059} and included in its east wing a ceremonial palace, the so-called North Harim, which was probably used by the king while engaged in ceremonies taking place in the Great Palace.

Textual evidence concerning the \textit{'h} suggests that it was a specific kind of building with ritual functions. Unlike the \textit{hnw} and the \textit{pr-nswt}, the \textit{'h} is not commonly associated with granaries, treasuries or other economic institutions.

Summarizing, the \textit{'h} may be identified with a generic “ritual palace” used from time to time with specific functions as:

- Temple palace,\textsuperscript{1060}
- \textit{Sed}-festival palace,
- Coronation Palace and Birth Palace.\textsuperscript{1061}

\textsuperscript{1055} Earlier, in Nyuserra’s \textit{Hb-sd} reliefs, the king is showed approaching the \textit{'h} which has the word \textit{htp} written next to it and the \textit{'h} is shown as place where the ceremony came near its start and finish, in Goelet 1982: 322.
\textsuperscript{1056} Naville 1892: Pl. IV bis, 15.
\textsuperscript{1057} Fakhry 1943: 491-3.
\textsuperscript{1058} Hayes 1951: 35-40, 82-104, 156-83, 231-42.
\textsuperscript{1059} A reasonable hypothesis would be that the Great Palace was used for the celebration of the \textit{Sed}-festivals of Sun-Disc a king not every thirty years, but more regurally and frequent in the city’s ceremonial life, in Assmann 1972: 143-155.
\textsuperscript{1060} These palaces were not properly used as ceremonial palaces, but they were understood in the same way and planned with the same architectural shape. Stadelmann’s analysis of the funerary temples on the west bank of Thebes, were not actually used by the living king, but were intented for solely for the use of the deceased king. Stadelmann 1973: 224-4, 235-41. After having suggested that these funerary temple palaces were used by the living king as temporary buildings during the festivals performed in the funerary temple (Stadelmann 1973: 227-8, 236, 241), he later stressed their funerary character, inferring that the throne-dais was occupied permanently by a royal statue (Stadelmann 1979: 321, no. 68).
\textsuperscript{1061} Classified by Gundlach as “ritual palaces” in his subdivisions of localities where kings and gods acted, in Gundlach 2009: 61, fig. 10.
Texts often refer to the palace of Karnak as ‘ḫ’ used during specific ceremonial occasions related to the temple. Hatshepsut’s Coronation text from the Red-Chapel (B.I.9) mentions a ‘ḫ’-palace used on the occasion of the procession of Amun’s image carried out of the Karnak temple during the Opit Festival; a ‘ḫ ẖ n ẖmy Wrt would have been the place for a sitting taking place under Thutmose III (B.I.5); Amenhotep III would have had a ‘ḫ built at ‘ḥpt-swty according to the inscription of the stele in front of the 8th Pylon of Karnak temple (B.I.14). In a fragment of Horemheb’s stele, he is represented while offering in front of Ptah as nswt bity nb m ‘ẖ n ‘ḥpt-swty (B.I.30). Although the most common recurrent word referring to the palace of Karnak is ‘ẖ, a Theban pr-swty is mentioned in Horemheb’s Coronation Text (B.I.25) and the autobiography of vizier Rḫ-mi-R’ (B.II.33), suggesting the existence of more palaces or more sections of the same palace at Thebes, probably with different functions, which may have been part of the same complex or separate buildings. From texts it is clear that Theban ‘ẖ-palaces were intimately involved in the great rituals of public festivals that were major events in the life of the city. For example during the Opit Festival, Amun’s image and king leave respectively the Karnak temple and the palace and join the procession to Luxor, to return again to their estates.\(^{1062}\) The Opit Festival was strictly connected to the annual renewal of the king’s k3 and had a close interrelationship with the ḫb-sd as 30-year royal renewal.\(^{1063}\) Another important event which originated in Karnak temple and palace was the Valley Festival, which crossed the river to the relevant funerary temple and then continued to the temple of Hathor.\(^{1064}\) From there the living king and Amun’s image returned to the Karnak palace and temple, the deceased god and king to the funerary temple. The Valley Festival had the symbolic function to unite leaving and dead, king and god. The juxtaposition of this palace to the Karnak temple clearly suggests the dependence of the palace and the king upon the temple and the imperial god. Palace of Karnak would have had a governmental function too, being provided with a bureaucratic zone, offices and archives, with high officials periodically entering it upon routine business and attending major ceremonies such as royal pronouncements and official’s appointments. The Administrative role of the Theban palace is evoked by the Instructions to the Vizier from Rḫ-mi-R’s tomb (B.II.33) and even in an earlier evidence from an earlier period such as the

Middle Kingdom, the Papyrus Boulaq 18, recording deliveries and expenses at the palace of Thebes during visits of the royal court to it (A.I.17).

Ceremonies of more secular nature that would seem to have taken place in the ‘h’ are those consisting of inw-delivery. This seems confirmed by autobiographical texts in private tombs which emphasize the responsibility of the official to bear the tribute (hr inw: A.II.151; A.II.152; B.I.45) as well as by royal inscriptions referring to the ‘h nswt as final destination of the inw brought by foreign chiefs (A.I.10; B.I.42). The ‘h’ can be mentioned as place where this royal tax was received by the king probably on the occasion of specific official ceremonies. Scenes from private tombs of the 18th Dynasty depict the reception of foreign tribute and royal gifts as a triumphal procession to which princes and ambassadors were invited.1065 It is likely that such royal festivals, intended to celebrate the king’s power, would have taken place within the ‘h-building. Officials could be appointed, promoted and rewarded in this palace, possibly on occasion of specific state ceremonies, as suggested by the inscription in the Theban tomb 192, where vizier P3-sr is said to have been raised to “first friend of the ‘h” and invested with the responsibility for receiving inw (B.II.128).

The ‘h-palace was also used for the royal audience of the official. The most famous literary text that describes such an occasion is the Tale of Sinuhe (A.III.5), which records the moment in which Sinuhe, a court official, was introduced to the ‘h before Sesostris I, amid the full panoply of the court, after a time life in exile. The reception of Sinuhe is described as a frightening experience: he, terrified, bows before the king and collapses, being not able to distinguish life from death.1066 Palace architecture must have contributed to create this feeling of intimidation, producing a sense of waiting and in the visitor who had to pass through different courtyards, high pillared halls and gates before arriving before the king, until he was admitted to the place where the king would decide his fate.1067 Such an intimidating impact was determined by both the architectural form and the decorative motifs of the palace. Egyptian palaces were generally perceived as inaccessible from outside, because they were surrounded by massive fortification walls and massive entrance gates, whose access was restricted. In the specific case of Sinuhe, after having crossed a first doorway (wmt), he is ushered to the columned hall (w3hya) and put on the way of to the inner palace (w3t ‘hntwy). A second portal (mnt nt d’m) mentioned in the text may refer

1066 Gnirs has recently analyzed passages rephrased in similar contexts where the emotional state of the official who was about to meet the king is described: Ibid.: 13 ff.
1067 Ibid.: 49.
to the canopy of the king’s throne or the portal between the Pillared Hall and the Audience Hall, were the king seated.\textsuperscript{1068}

- The usage of term \textit{pr-nswt}: The literal translation of the term \textit{pr-nswt}, “house of the king” makes the identification of the term with the actual “estate/domain” of the king.\textsuperscript{1069} Both narrative expressions and titles show several institutions which were considered part of the \textit{pr-nswt} or operated alongside it, such as the \textit{pr-hd}, “the treasury”, the \textit{s\textsuperscript{n}}, “storreroom”/“workshop”, the \textit{h\textsuperscript{3} n pr-nswt} or the ‘\textit{ryt},\textsuperscript{1070} “court” of the palace.

Judging from the context of usage of the term, the \textit{pr-nswt} seems more largely concerned with the distribution and collection of goods. The function of the \textit{pr-nswt} as a place for collecting a range of facilities (\textit{b\textsuperscript{3}kw})\textsuperscript{1071} can be reconstructed thanks to various expressions in written sources. In both private and royal Middle Kingdom inscriptions \textit{pr-nswt} appears as the source of goods to be brought to or taken from a person or another institution. The format of some private inscriptions, and especially that in \textit{R\textsuperscript{3}m-i-R”s} tomb suggests that the \textit{pr-hd} was the place where palatial entries were physically stored and that the \textit{pr-nswt} was instead the centre where incomes and outcomes were administrated. Particularly \textit{The Duties of the Vizier} in TT 100 (B.II.33) refer to the \textit{pr-nswt} as centre of royal government where two important dignities of the administration, the vizier and the treasurer, performed their functions: controlling the incomes and outcomes of this institution, guaranteeing the security and justice as well as inspecting the personnel of the palace or organizing the army within it. Another role of the \textit{pr-nswt} consisted in receiving reports from Egyptian provinces to update the government on happenings in outlying areas of the

\textsuperscript{1068} Parkinson 1997: note no. 69.
\textsuperscript{1069} Goelet 1982: 477.
\textsuperscript{1070} Analyzing the various sections referring to the ‘\textit{ryt} in the tomb of \textit{R\textsuperscript{3}m-i-r’}, Van de Boorn claims to determine the exact position of the ‘\textit{ryt}, “being a kind of building erected on the front area of the \textit{pr-nswt}’ (Van de Boorn 1989: 84). As sources under discussion suggest a connection between the functions performed in the ‘\textit{ryt} and the activities in the \textit{pr-nswt}, they do not establish with certainty the physical link of the two structures, although the location of the “court” near or within the \textit{pr-nswt} seems likely. One can assume that the control of the activities within the ‘\textit{ryt} would be included among the administrative functions of the \textit{pr-nswt}.
state. Judging from the Middle Kingdom titles compound with pr-nswt, official activities referring to it involved the receiving of reports, the assessment of inventories (irw, “cattle-lists”, in: A.II.137) or the opening of sealed-doorways. According to The Duties in Rḫ-mi-R”s tomb (B.II.33, R7-8), the doors (sb3w) of it were opened for the free flow of traffic into and out of the pr-nswt after the vizier had exchanged reports with the treasurer outside this institution. The ḥtmw, literally meaning “something that is closed or sealed”, and mentioned in The Duties with the wider sense of “enclosure” or “gates” (B.II.33, R3), were other sections of the pr-nswt, whose closing was recorded and managed by the vizier.

Several other compositions refer to the pr-nswt as place where entries and outflows were recorded and physically stored. Inscriptions from the tomb of ‘Inny (TT 81 - B.II.6) for example refer to the pr-nswt as place of origin of provisions which would have enriched ‘Inny’s house and Papyrus Anastasi III describes it as place of destination for ḫrw-delivery (B.I.67). A number of New Kingdom private titles refer to the owner as one who fills (mh) the pr-nswt with different kinds of supplies that range from food-provisions to precious stones (TT 63 – B.II.63; TT 76 – B.II.56; TT 93 – B.II.52; TT 107 – B.II.85).

Word pr-nswt in private titles can be compound with a type of k3t, “work”, whose nature is rarely specified and that had surely been ordered by the king or the central administration. The ʾimyr k3wt (n) pr-nswt was probably a carpenter in charge of different kinds of constructions on king’s behalf. The recurring connection of the term with the profession of sš, “scribe” (A.II.136; B.II.16; B.II.22; B.II.173; B.I.91), seems to confirm the prominent administrative function of the pr-nswt: the sš n pr-nswt was entitled to the registration of all the economic and bureaucratic operations of this specific palace or section of a wider palatial structure called pr-nswt. The treasurer (ḥtmw), another profession attached to the pr-nswt, was in charge of the administration of the entries which were physically stored in the pr-hd (A.II.10; B.II.71; B.II.79; B.II.83).

As written sources convey the picture of the pr-nswt as an administrative unit, the problem arises asking how this institution materialized in an actual building.
• The usage of term *stp*-s3:

Goelet’s lexicographical study on the terms for the royal palace in the Old Kingdom has been very useful to investigate the original meaning of every word since the earliest period. In the case of *stp*-s3, the term did not have the proper sense of “palace” during the Old Kingdom, when, unlike all the other common nouns for king’s residence during this period, it is never written with a *pr*-sign.\(^{1072}\) The presence of the *pr*-determinative is a post Old Kingdom phenomenon. The indefinite meaning of the noun in the earliest times depends on its own nature and etymology. As stated by Goelet,\(^{1073}\) “the term *stp*-s3 consists of two elements, both of which are relatively common as independent words: the verb *stp*, “to choose, select, cut up”\(^{1074}\) and a noun *s3*, “protection”.\(^{1075}\) In many narrative passages of Old Kingdom texts, the verbal form *stp*-s3 seems to mean something close to “protect” or “escort” and, when it is used nominally, *stp*-s3 seems not to be a place-name, but rather an activity in which both the king and other people could participate.\(^{1076}\) The term *stp*-s3 seems to be used as place-name starting with the Middle Kingdom, although it probably developed from the Old Kingdom concept of *stp*-s3 as a sort of protection offered to the king.\(^{1077}\) Despite these changes, the term continues to be used in verbal compounds without the *pr*-determinative to mean “protect” or “escort” also after the Old Kingdom.\(^{1078}\)

While the usage of word *stp*-s3 in Middle Kingdom texts seems more consistent in private titles rather than in narrative passages, it can be found more frequently in verbal compounds from the New Kingdom onwards. Apart from the inclusion of the *pr*-determinative around the beginning of the 12\(^{th}\) Dynasty, another important change in the orthography after the Old Kingdom is the phrase ‘\(n\text{ḥ} \text{w}d_{3} \text{s}nb\,\) “life, prosperity and health”,\(^{1079}\) added after the word, considered by Goelet a proof that the term had come to mean a type of palace since the Middle Kingdom.\(^{1080}\) As Garry J. Shaw has recently pointed out, “the main issue (...) is whether the meaning of *stp*-s3 truly does evolve to mean a physical place during the Middle Kingdom or whether it should be consistently regarded as

---

\(^{1072}\) Goelet 1982: 443.
\(^{1073}\) *Ibid.*: 444.
\(^{1074}\) Wb IV: 336, 1-2. Wb IV 339, 1 ff.
\(^{1075}\) Wb III: 413, 6 ff.
\(^{1076}\) Goelet 1986: 94.
\(^{1077}\) *Ibid.*: 94.
\(^{1078}\) Goelet 1982: 443-444.
\(^{1079}\) Wb I: 196, 10-17.
\(^{1080}\) Goelet 1986: 95.
a type of activity – doing (royal) service”.\textsuperscript{1081} In most post Old Kingdom examples, the term does not necessarily refer to a physical building, but rather it seems to mean a sort of committee or councillor body composed by officials performing a royal service.\textsuperscript{1082} Of course such a meeting among those involved had to occur in a physical place (giving origin to the \textit{stp-s3} as place with the \textit{pr}-determinative), so that the term can be referred both to the location and the people. Particularly recurrent in Middle Kingdom and New Kingdom texts are those cases in which \textit{stp-s3} is connected with verb \textit{hs3}, “to praise” or expressions involving \textit{mrwt}, “love”, in contexts suggesting that the “praising” and the “loving” were done by the king.\textsuperscript{1083} The bestowal of king’s approval may have occurred on specific occasions and have taken place before an audience consisting of the royal family and high officials. Passages in both private and official inscriptions using variants of the expressions \textit{wddt m stp-s3}, “what was ordered in the \textit{stp-s3}” or \textit{dddt m stp-s3}, “what was said in the \textit{stp-s3}” emphasize the connection of the \textit{stp-s3} with the royal decision-making process.\textsuperscript{1084} Proclamation of orders and commands by the king could happen in the presence of councilors. Particularly one inscription from the time of Thutmose III records the speech of the courtiers during a royal audience in the presence of the king, suggesting that orders were not only drawn up in the \textit{stp-s3}, but they were also approved by high officials (B.I.4). Narrative passages and private titles mentioning \textit{smrw nswt (n) stp-s3}, “royal companions of the \textit{stp-s3}” denote the \textit{stp-s3} as a place or an activity in which more people - the kings and other officials - could participate.\textsuperscript{1085} Such a kind of compounds with verbs as \textit{dd}, “to speak” or \textit{wd}, “to order” often involve the prepositional phrase \textit{m hm n stp-s3}, generally rendered as “in the Majesty of the palace”:\textsuperscript{1086} \textit{wddt m hm n stp-s3}, “what was ordered in the Majesty of the \textit{stp-s3}” and \textit{dddt m hm n stp-s3}, “what was said in the Majesty of the \textit{stp-s3}”. Garry J. Shaw has recently highlighted the difficulties of interpretation of this expression where the term \textit{hm} would not refer to the king as physical presence and the acts of speaking and commanding could be issued by officials performing \textit{stp-s3} in order to realize royal desire on the primary authority of the courtiers.\textsuperscript{1087} The ambiguity of the meaning of the term depending on the context does not allow to precisely identify it with a specific structure, since the meeting or the council would take place somewhere, but not necessarily always in the same place.

\textsuperscript{1081} Shaw 2010: 183.
\textsuperscript{1082} \textit{Ibid.}: 184.
\textsuperscript{1083} Goelet 1986: 96.
\textsuperscript{1084} \textit{Ibid.}: 97.
\textsuperscript{1085} Goelet 1982: 470.
\textsuperscript{1086} Shaw 2010: 175.
\textsuperscript{1087} \textit{Ibid.}: 188.
A more explicit meaning of “palace” can be assumed by the usage of the term in those passages of narrative compositions where it is described as place from and to where people and products move, such in the context of gift-giving and exchange of commodities from foreign countries. The Gebel Barkal stele of Thutmose III (B.I.8) for example describes the delivery of Nubian taxes consisting of wood and other precious goods destined to the \textit{stp-s3} while Hatshepsut’s inscription from Deir el-Bahari mentions the royal order to offer gifts \textit{m stp-s3}, l. p. h. to the chiefs and gods of \textit{Pwnt} (B.I.12). Particularly meaningful are those expressions in private inscriptions listing the freedom of movement of a person in the \textit{stp-s3} among his faculties and honors. Courtiers can be described as \textit{wstn rd m stp-s3}, “free of foot in the \textit{stp-s3}” (B.II.24) or while having access to the sacred place within the \textit{stp-s3}, ‘\textit{k hr dsrw m stp-s3 ‘nh wd3 snb} (Florence 2565 – B.II.69). These expressions suggest a location of the \textit{stp-s3} near the inner and less accessible places of a possible palace.

- The usage of the term \textit{hnw}:

The term \textit{hnw} is one of the several words derived from a trilateral stem whose base meaning is “interior/inside”.\textsuperscript{1088} Such a concept is evoked by the word in those contexts where it is connected by a genitival relation with another term for palace, to indicate the innermost part of some wider royal structure, such as the \textit{hnw ‘h} or \textit{hnw pr-nswt} probably referring to the inner part of the ‘\textit{h} or the \textit{pr-nswt}. In Hatshepsut’s inscription carved on the blocks of the Red Chapel (B.I.9) at Karnak, the Queen is described while entering in the \textit{hnw dsrw ‘h}, the association between \textit{hnw} and \textit{dsrw} suggesting that \textit{hnw} may indicate a restricted section of the ‘\textit{h}, whose access was limited to few people.

As already observed by Goelet in Old Kingdom occurrences of the term, the commonest expressions have the preposition \textit{m}, “in” or “out of” and \textit{r} “to”, which are usually closely associated with a main verb of motion (\textit{spr/k/iw r hnw}).\textsuperscript{1089} The prepositional compound \textit{r hnw}, “to the \textit{hnw}” is frequently employed in passages mentioning journeys commissioned by the king. The purpose of the trip is rarely stated and the point of origin of the trip is not given, so that what followed the official’s arrival at the \textit{hnw} is generally unknown.

\textsuperscript{1088} Goelet 1982: 4.
\textsuperscript{1089} \textit{Ibid.}: 3-4.
Inscriptions recording an official’s arrival to the \textit{hnw} rarely give further indications of where the place might be. Some texts mention “downstream” or “northward” as direction of the official’s travel, often by ship (in such case the verb used is \textit{ḥdl}, “to sail”). It is not always clear from the context whether this term was used as designation of a royal building alone or meant the entire capital city. One of the most meaningful Middle Kingdom example of the usage of the term is the Story of Sinuhe (A.III.5), where \textit{hnw} is often mentioned referring to a place from and to where the protagonist escapes and goes back. In such context the voyage to the \textit{hnw} is a trip to Itjtawy, the royal capital of the 12\textsuperscript{th} Dynasty. References to the \textit{hnw} can be found also in a number of Middle Kingdom papyri from the town of Lahun, where it is again clearly referred to the town of Itjtawy. In these documents the recurring expression \textit{w$d3 r hnw}, “progress to the \textit{hnw}” introduces despatches to be intended as by-product of festivals delivered to the \textit{hnw}. The 19\textsuperscript{th} Dynasty Turin Canon refers twice to the pharaohs of the 12\textsuperscript{th} Dynasty as “kings of the \textit{hnw} \textit{lt-t3wry}”.\textsuperscript{1090} Passages from the Duties of \textit{Ḥḥ-mi-r}’s tomb (B.II.33) where the term is used as opposed to Thebes, referred to as \textit{Niwt rst} or “Southern city”, attest the usage of the word to indicate not only the palace, but the site of the royal residence and specifically Memphis.\textsuperscript{1091} The use of word \textit{hnw} as apposition of the name of a capital city lasts in the Ramessid Period, when the term frequently follows the name of the new capital \textit{Pr-Ḥrmessw-ḥḥm-lmnn ‘nh ṭ$3 snb} suggesting its interpretation as “residence-city” (Louvre C 96, pAnastasi IV, pBologna 1094, pSalier I). Narrative texts and captions as well as private titles compound with \textit{hnw} indicate that it was an extensive place, since they mention several departments and institutions operating within this institution. Examples of expressions containing prepositional compounds like \textit{m hnw}, “in the \textit{hnw}” or \textit{n hnw}, “of the \textit{hnw}” are from contexts associated with the \textit{hnw}’s economic activity. The ‘\textit{kw}, a word that functions as the generic term for “provisions”,\textsuperscript{1092} including several commodities to be brought to the palace area, is compound with the term \textit{hnw} in a number of expressions in Middle Kingdom inscriptions. In \textit{The Duties of the Vizier} (B.II.33, R3) from the tomb of \textit{Ḥḥ-mi-r}’, the \textit{hnw} is presented as place of arrival and departure of several kinds of commodities whose traffic was dealt by a vizier’s messenger (\textit{wpwt}). In the same composition the \textit{hnw} is also described as location of the army, the organization of which is listed among the vizier’s duties (B.II.33, R23). In addition to its aspect as the residence city, the \textit{hnw} had a special administrative significance, most probably as the country’s capital activity and the seat of government for several

\textsuperscript{1090} Hayes 1953: 37. Gardiner 1959: V, 19; VI, 3.
\textsuperscript{1091} See paragraph above: § 2.8.
\textsuperscript{1092} Quirke 1990: 29.
The collected data suggest the translation “residence” for the *hnw* when used to mean the main centre of kingship and administration different from time to time in a specific period of the Egyptian history. While in a 12\(^{th}\) and 13\(^{th}\) Dynasty context, the word *hnw* is used in place of Itjtawy, during the 18\(^{th}\) Dynasty the term comes to refer to Thebes and Memphis, working both as main governmental centers. In the Ramessid Period word *hnw* corresponds instead to Piramesse, the new capital city founded by Rameses II in the eastern Delta. First Millennium occurrences of the word present the *hnw* as place where the king would reside and govern for longer and shorter periods of time. In Late Period inscriptions *hnw* is often identified with Memphis, which worked as permanent residential city during the Libyan, Kushite and Saite reigns, as well as with other political centers like Piramesse (cited in the Gebel el-Silsilah stele no. 100 – C.I.2), which would have been used by Sheshonq I for a certain period of time. The inscription on the statue of Bentehor (Louvre A 83 – C.II.35) confirms this usage of the word, as it locates the residence of Nekau II in the Saite nome: *m *hnw *Nit*. Whether Nekau II would have actually resided at Sais during his 1\(^{st}\) regnal year or he would have wanted to stress the connection of his Dynasty with its prototypical residence is difficult to ascertain.

- **The usage of the term *pr-'3*:**

The *pr-'3*, literally “the great house”, is the term with the closest connection with the king that became the designation for the ruler himself - “Pharaoh” - from the Late New Kingdom onwards.\(^{1094}\) This later terminology probably developed from the usage of the term in connection with the living king since the Old Kingdom, when the titles compound with *pr-'3* attest offices involved in the daily life of the king and his family.\(^{1095}\) The term *pr-'3* frequently occurs as an element in official titles, far outnumbering the other words studied here. Such titles are quite informative about the kinds of functions which were associated with the term. One aspect that distinguishes *pr-'3* from the other words in this study is the extensive range of activities performed in the *pr-'3* and offices attached to it.

---

The most informative document as regard to the usage of the term pr-‘3 in the Middle Kingdom is the 13th Dynasty Papyrus Boulaq 18 containing daily accounts of incomes and outcomes of the palace of Thebes over twelve days during which the court resided there (A.I.17). The papyrus lists different categories of people employed in the royal palace allowing to distinguish among different sections of the pr-‘3 with different functions: the šn’w or “provisioning-quarters”, the pr-hd, “treasury”, and the w’rwt, or generally “sectors (of state)”. While analyzing all the sections of the document mentioning different beneficiaries and destinations of palace expenditure, Quirke has distinguished two main sections of the pr-‘3-palace: the ḫnty,¹⁰⁹⁶ which would have been the first and most official place for delivering supplies as the outer section of the palace, and the k3p,¹⁰⁹⁷ which would have been destined to host the royal family as the private quarter of the palace.¹⁰⁹⁸ Papyrus Reisner II (A.I.15) lists the transactions of the royal workshop (wḥrt) of the pr-‘3-palace of This during the 1st regnal year of Sesostis I. The activities of the workshop (wḥrt) in this series of accounts deal generally with carpentry and the recasting of metal tools. Both Papyrus Boulaq 18 and Papyrus Reisner II present the pr-‘3 as a wide structure comprehending several sections with different functions and connect it to economic and administrative activities.

The middle of the 18th Dynasty witnessed the transition of pr-‘3 (from the 12th Dynasty regularly provided with the formula ‘nh ḫwt snb)¹⁰⁹⁹ as “great house” or “palace” to pr-‘3 as “Pharaoh”.¹¹⁰⁰ In Horemheb’s decree (B.I.26) the word is used as direct object of verbs such as šms, “to follow/serve/accompany”¹¹⁰¹ mki, “to guard”,¹¹⁰² which allow the unique translation of pr-‘3 as “Pharaoh”. In other passages of the same text, the translation of the term remains ambiguous; in those passages dedicated to the delivery of b3kw¹¹⁰³ the pr-‘3 could be both the actual royal building as place of destination and the king’s person as beneficiary of such provisions. Other architectural sections such as the ‘t hnkt, “room of the offerings”, and the w’bt, a place used for all the physical operations of preparation of foods and other kinds of services, are mentioned in connection with the pr-‘3. On such occasion

¹⁰⁹⁶ According to Quirke, the word ḫnty, literally meaning “front part” (Wb III: 301) would indicate specifically the outer part of the palace, in Quirke 2004: 26.
¹⁰⁹⁷ Wb V: 105.
¹⁰⁹⁸ Quirke 1990: 39.
¹⁰⁹⁹ See paragraph above: § 1.10.
¹¹⁰² GEG: 570. Wb II: 160.
the pr-3 might be intended as wider building comprehending inner sectors with different functions, as well as the king’s person to which these sections belonged.

The term keeps its original meaning of physical place in some New Kingdom documents describing the staying or the arrival of the king or a high official into the pr-3. Section RS of Ṭḥ-mi-r’s inscription (B.II.33), for example, describes the entering of the vizier in the pr-3 to greet the king, here referred to as “Lord” (nb). The pr-3 is the building to where the vizier goes for his audience in front of the king. The sequence of the events described in the tomb is particularly interesting in order to understand the physical location of the pr-3 in relation to the pr-nswt. The direction of the vizier’s movement should be interpreted from the pr-nswt to the pr-3,1104 the first being likely an inner section of the latter.

As noted above, the usage of the term pr-3 in Horemheb’s decree suggests the architectural complexity of this entity (B.I.26). Occurrences of pr-3 in official titles confirm the wide range of activities which were related to that term. New Kingdom titles such as sš n pr-3 ‘ṛḥ wd3 snb, “scribe of the pr-3, l. p. h.”, imy-r pr-hd pr-3 ‘ṛḥ wd3 snb, “overseer of the treasury of the pr-3, l. p. h.”, idw n3 n śmntyw pr-hd n pr-3, “deputy of the western treasury of the pr-3” or imy-r šnw n pr-3 ‘ṛḥ wd3 snb, “overseer of the granaries of the pr-3, l. p. h.”, ascribe certain administrative and economic activities to the pr-3 itself, performed by the official in departments like the šnw n pr-3, “the granary of the pr-3” or the pr-hd n pr-3, “the treasury of the pr-3”.1105 Other institutions such as the ‘t, “chamber” or “storeroom”1106 and the p3 ḫps, “armory”1107 can be related to the pr-3 in imy-r-compound titles.

A number of titles simply refers to officials in charge of activities concerning the living king: the “overseer of the herds” (imy-r ḫḥw), the “overseer of the bowmen” (imy-r ḫdyw), the “cultivators” (ḥḥwtyw), the “butler” (wḥ3), the “sailor” (w‘w), the “door-opener” (wḥn-3), the “herald” (wḥmw), the “stable-master” (ḥḥy-ḥḥw), the “sealer” (ḥtm), the “washerwoman” (ṛḥtyw), the “butler” (wḥpw), the “skipper” (wḥmhw), the “scribe” (sš), the “servant” (sdḥ ‘š) or the “fan-bearer” (ḥḥw). In similar titles word pr-3 might be referred to the physical place

1104 In his review of Van de Boorn’s interpretation of The Duties Lorton states that the context of this session “actually cannot indicate an immediate entry in the pr-3” after the report to the vizier “since it is followed by a conversation between the vizier and the treasury”. Lorton 1991: 291.
1106 Wb I: 160.
1107 Wb III: 268: ḫps as “army” with article p3 from the New Kingdom onwards.
where the owner worked as well as to the king’s person for whom the official performed his service. The use of pr-‘3 in private titles provides support for relating pr-‘3 to the affairs concerning the living king as well as to the activities connected with his funerary estate. The word pr-‘3 is frequently linked to the concept of hwt in titles such as imy-r pr n t3 hwt pr-‘3, “overseer of the house of the hwt of the pr-‘3” (B.II.77) and hry k3wt n t3 hwt n pr-‘3, “one who is over the workmen of the hwt of the pr-‘3” (B.II.59; B.II.60), generally referring to employees of the mortuary estate of the Pharaoh. Other officials active in the pr-‘3 were involved with escort and other service to the person of the king, as suggested by titles referring to activities performed in the Temple of the Million Years of the king (n hh n rpmwt n pr-‘3). All these expressions occur in context where a form of royally connected worship may be involved and the word pr-‘3 is clearly used as synonymous for the king himself.

All these titles, those referring to “secular” duties as well as those mentioning ritual occupations, would seem intended to stress some sort of generic attachment of the inscription owner to the royal palace and the king’s person. They are various and they reflect such an extensive organization so as to lead to the conclusion that pr-‘3, whether intended as physical place, would have referred to a large multifunctional institution. The pr-‘3 seems to have been a word used to refer to the royal building in a generic sense, as a place somehow connected with the king since the earliest period of the Egyptian history. After a careful analysis of the usage of the word pr-‘3 in Old Kingdom inscriptions, Goelet concludes stating: “pr-‘3 has a such close link with the living king, that it already shows a tendency towards becoming a word for the ruler himself, the “Pharaoh” of Egyptian texts from the 18th Dynasty onwards”.

Despite some of the titles compound with economic departments such as the “treasury” or the “granary” and offices for the scribal profession would suggest an administrative nature of the pr-‘3-palace, the word pr-‘3 has virtually no use in economic or legal contexts outside its employment in titles. The pr-‘3 is never mentioned as administrative or economic entity in its own right in New Kingdom official documents. A similar kind of titles referred to offices held by the officials in economic and administrative departments are most often

1108 GEG: O,6.
1109 Ullmann 2002.
1110 Priesthood, escorts and other ritual positions were related to the pr-‘3 since the Old Kingdom onwards. Goelet 1982: 585.
1111 ibid.: 631.
compound with *pr-nswt* rather than with *pr*-3. It seems possible that word *pr*-3 has been chosen instead of *pr-nswt* when needed to stress a more direct relationship of the inscription owner with the king. From collected data, *pr*-3 might be considered a large multi-functional institution including several sections and departments with specific functions and generally intended as royal property: its close link with the ruler and the ambiguity of its meaning in different contexts would explain its transformation from word meaning “palace” to a term for “Pharaoh”.

The “Pharaoh” meaning of the term becomes final with the adoption of a specific compound to indicate the royal building, *pr pr*-3/pr n *pr*-3, literally translated “estate of the *pr*-3”, where *pr*-3 as apposition of -pr must be intended here as “Pharaoh”. The expression *pr n pr*-3 starts to appear in private inscriptions1112 from the reign of Amenhotep III and continues to be used until the late Ramessid Period together with the variation *pryt pr*-3 recurring in a number of sources from the Amarna Period. *Pr pr*-3 becomes the normal expression for “palace” in demotic texts, being used in a wide range of contexts, referring to the concept of “royal court” as group of people or to the royal building itself.1113 The effective transformation of the *pr*-3 meaning seems to be confirmed by the use of the word as apposition of the royal name already during the 22nd and definitely with the 26th Dynasty.

Variability in interpretation and translation of the word in different contexts is a meaningful factor as to understand the nature of the term *pr*-3. The possibility that the same word can refer both to the figure of the king as to the royal palace suggests alone the nature and meaning of *pr*-3, perhaps intended to indicate the royal building in its most generic and widest sense and its strict relationship with the king. Its intrinsic association with the figure of the king may be the reason that would have taken the term to the mean the “Pharaoh” himself on the course of time.

---

1112 Expressions such as *imy-r pr n ’t pr*-3, “overseer of the house of the room of the *pr*-3” (B.II.57) or *imy-r gs pr n pr*-3, “overseer of the side of the house of the *pr*-3” (B.II.75) mark the transition to the “Pharaoh” rendering of the word which will be definitive from the Late New Kingdom onwards, with the elaboration of the compound *pr n pr*-3, “house of the Pharaoh” to refer to the royal residence.

1113 For the use of *pr n pr*-3 as normal expression for “palace” in demotic texts see Late Period Chapter below.
Specific architectural sections associated with the royal palace:

- The d3dw as specific section of the ‘h

The d3dw would have been a specific section of the ‘h used on particular occasions connected to the appearance ḫ‘, lit. “to appear in glory”, of the king, his crowning or his enthronement.

Thutmose III is described as enthroned in the “audience hall”, d3dw n imb wr, lit. “on the west” (Thebes), when he respectively announces an ambitious building project\textsuperscript{1114} in the inscription of the king at the Festival Hall of Karnak (B.I.4):

\begin{center}
c. 1) hpr hmst nswt m d3dw n imb wr, m [‘h] f
\end{center}

There occurred a sitting of the king in the audience hall of the west in his [‘h]

In her Coronation Inscription Hatshepsut declares that her father, Thutmose I, had designated her as the next king.\textsuperscript{1115} After the establishment of the Queen in the ‘hnmty.f m ‘h.f (B.I.11), a sitting occurring in the d3dw n imb Wrt, “the d3dw of the West”, is described:

\begin{center}
l. 8-10) di.in hm.i ini.tw n.f nswt špsw šhw smrw šnwt nḥnw ḫtyw r ḫt mn wdjt ḫt mn n ḫt ūn m ḫnwty.f m ‘b.f [mr(ḥw)] ḫt [n] ‘b(f) ḫpr hmst nswt dš.f
\end{center}

My Majesty has made come the royal nobles, the dignitaries and the companions, the entourage of the ḫnw, the principal chiefs to execute your command, in order to give the Majesty of Horus’ daughter in his ḫnwty in his ‘h, beloved in the ‘h. There occurred a sitting of the king in the audience hall of the West. These people are on their bellies in the stp-s3

\begin{center}
l. 11) m d3dw n imb Wrt iw rmtyw ipw n ḫt htw.sn m stp-s3
\end{center}

Political actions of that sort could be exercised in a great audience in the presence of the court, as suggested in the report of the installation of the vizier Wsr (TT 131 – B.I.11):\textsuperscript{1116}

\textsuperscript{1114} Gardiner 1952: pl. IV, col.
\textsuperscript{1115} URK IV: 257, 1.
\textsuperscript{1116} URK IV: 1380: 12-16. Dziobek 1994: 75, pl. 81.
\textit{hpr nswt hmst nswt m} [\textit{d3dw} n] \textit{imy-wrt nswt bity Mn-hpr-R'} rdl 'n\textit{h st3} [\textit{srw smrw nswt} $\textit{psw}$] s\textit{hw st w'w} \textit{imyw $\text{hnty wrrw nwr stp-s3 $\text{hnw srw}$ Hr m 'hr.f r nd $\text{hrt nswt}$ ['n\textit{hw wd}\textit{3 snb}]

A session of the king which took place in the [audience hall] of the West Side by king \textit{Mn-hpr-R'} (=Thutmose III), given life. Draw of officials [and the friends, the nobles of the king], the dignitaries of the private audience room, the chamberlains, the magnates of the \textit{stp-s3}, the entourage of Horus in the ‘h to consult the affairs of the king [may he live, prosper and healthy].

The inscription recording the expedition to \textit{Pwnt} of Queen Hatshepsut from Deir el-Bahari (B.I.12) tells the happening of a meeting of the king himself in the \textit{d3dw} hall before the appearance (h') of the Queen with the double crown on the throne of gold within the sacred interior (\textit{hnw dsrw}) of the ‘h:

l. 1) rnpt 9 \textit{hpr hmst m} \textit{d3dw h'lt} nswt m s\textit{hnty Hr st wrt nt d'm \textit{hnw dsrw nw} 'hr.f st3 srw smrw nw stp-s3 r sdm s\textit{sm n wdt}

In the 9\textsuperscript{th} year the Queen was in the audience hall; appearance of the king in the double crown on the great throne of gold in the sacred \textit{hnw} of his ‘h; walk of officials and courtiers of the \textit{stp-s3} to hear the guide of the command.

The text carved on the northern wall of the middle colonnade of the temple of Deir el-Bahari (B.I.11) records a meeting of the king himself in the \textit{d3dw} hall of the palace, in the presence of the king in front of people laid on their bellies:

l. 10) (...) \textit{hpr hmst nswt d3.f} 11) m \textit{d3dw n imy Wrt lw rmtw ipw n hr $\text{htw.sn}$ m stp-s3

There occurred a sitting of the king in the audience hall of the West. These people are on their bellies in the \textit{stp-s3}

The introduction of the Building Inscription of Sesostiris I (pBerlin 3029 - A.I.5) records “the appearance of the king with the double crown” and the “happening of a meeting in the \textit{d3dw hall}”, which is presented as an assembly of the friends of the palace (\textit{smrw nw stp-s3}).

This inscription, together with the later sources mentioned above, shows the \textit{d3dw} hall as meeting place and audience hall.
All these inscriptions establish a clear link between the two terms ‘ḥ and ḏḏḏw, locating the latter in a palatial structure. Other sources simply refer to the ḏḏḏw as place for royal and court sitting without any explicit reference to some form of palace.\(^{1117}\) As recently suggested by Eileen Hirsch, “there could have been more than one ḏḏḏw hall simultaneously and some of these halls probably did not belong to the palace.”\(^{1118}\) A recurring happening in sources mentioning a ḏḏḏw is the appearance of the king in this hall wearing his crowns in high official functions. The other main important point is the presence of the court forming council together with the king. The activities that took place in this space are not clearly specified: we can imagine the king giving statements and making decisions regarding specific matters. Eileen Hirsch has defined the ḏḏḏw as a “multifunctional hall inside a royal palace”, which might “be found in any palace in which the king resided”.\(^{1119}\) I would like to highlight its connection with the ‘ḥ-palace, suggesting that this hall was mainly used on ceremonial occasions which took place in such ritual palace.

- **The w‘w:**

In the 18\(^{th}\) Dynasty, the mayor of Thebes Sn-nfr (TT 96 - B.II.26) tells us something about the function of the palatial w‘w:\(^{1120}\)

\[
\text{‘nhwy } Hr \ m \ ‘h.f \ imy-ib \ ‘3 \ m \ pr-nswt \ ‘k \ hr \ nb.f} \quad \text{Ears of Horus, Lord of his ‘ḥ, the great confidant in the pr-nswt, who enters to his Lord in private}\n\text{w‘w}\n\]

\[
\text{Sn-nfr enjoys the privilege of meeting the king in private audience. While the ḏḏḏw might have worked as audience hall for political and ceremonial actions to be exercised by the king in the presence of the court, the w‘w, which literally means “being sole”, might have functioned as place for private audience, as restricted area where authorized people could go.}\n\]

\(^{1117}\) For a complete overview of the sources referring to the ḏḏḏw see Hirsch 2009: 77.
\(^{1118}\) Ibid.: 78.
\(^{1119}\) Ibid.: 78.
\(^{1120}\) URK IV: 1430, 7-9.
Apart from this example, in Middle Kingdom and New Kingdom sources the word w“w is most frequently linked to the stp-s3 or its personnel. Ddw-Sbk is described while entering in the w“wt, as ūnty st m stp-s3, “foremost of position in the stp-s3”, to attend a royal audience in the presence of the king and other officials in his 12th Dynasty stele BM 193 [566] (A.II.111):

c.6-8) ph.f w“wt ūnty st m stp-s3 hrw m ṣḏm mdw w’ hryw m b3ḥ nb t3wy ḫt.f tw st ṣḥ.s ḫf3 nswt.r ḫtryw swd nb ‘ḥ

He enters in the privacy foremost of position in the stp-s3 during the day to hear the unique word of the chiefs in the presence of the Lord of the two lands ḫt.f tw st your council of the provisions of your king bequeath of the Lord of the ‘ḥ

In his Building inscription (A.I.5) on Papyrus Berlin 3029, Sesostiris I is described while taking counsel (nḏnd) with his followers among whom the “companions of the stp-s3” are listed together with “the officials at the st w“wt”:

l. 1) ḫ”(t) nswt m ṣḏmy ty ḫpr hmst m ḫḏdw nḏnd ḫmyw-ḫt.f smrw nw stp-s3 ’nḥ wd3 snb srw r st w“w

Appearance of the king in the double crown. A session took place in the ḫḏdw. One took counsel with his followers, the companions of the stp-s3, l. p. h., the officials at the place of privacy

The s’hw st w“w, “dignitaries of the private audience room” are listed together with the ḫmyw ūnty, “the chamberlains”, the wrw nw stp-s3, “the magnates of the stp-s3” and the ṣnyt srw ḫr m ‘ḥ.f, “the entourage of Horus in his ‘ḥ” in the tomb no. 131 of vizier ’lmn-w-sr (B.II.36) among people employed “to consult the affairs of the king”, r nd ḫrt nswt.

• The ḫsrw

Word ḫsrw appears compound with ‘ḥ in a number of New Kingdom and Late Period inscriptions, both official and private. In the Coronation Text of Hatshepsut from the Red Chapel at Karnak (B.I.9), a procession of the bark of the god Amun leaving the temple area
and entering the royal palace is described: the Queen and the bark move from the interior (\textit{hnw}) of a place called \textit{d\textsc{srw} nw 'h.s}, “the sacred places”\textsuperscript{1121} of her ‘\textit{h}’\textsuperscript{1122}.

\textit{I. 9-12) \textit{wn.'in \textit{hm \textit{Nb-r-dfr s\textsc{hd}.n hr.f r \textit{ldbt \textit{hr bi3yt r sb3wy imnt 'h n ws\textsc{ht} nt nn \textit{w3i-r.f nty hr m3'} n tp \textit{ltw} in rs nbt \textit{t3wy m \textit{hnw d\textsc{srw} nw 'h.s}}}}}

Then the Majesty, Lord of the Universe had his head inclined to the east making an oracle to the western double gate of the ‘\textit{h}’ in the hall of \textit{nn \textit{w3i-r.f}}, which is on the bank of the head of the river; The Lady of the Two Lands came from inside the sacred places of her ‘\textit{h}’

Eileen Hirsch has recently suggested that word \textit{d\textsc{srw}} specifies a “sanctuary room” within the palace”, being the place where the sacred bark stationed before the procession, and more specifically a “sacred area connected with festivals and containing sacred room”\textsuperscript{1123}. \textit{D\textsc{srw}} is also the name given to the place where the Queen made his appearance in the double crown at the presence of her courtiers in the inscription of the 9\textsuperscript{th} year of Hatshepsut’s reign recording the expedition to \textit{Pwnt} at Deir el-Bahari (Deir el-Bahari 3 – B.I.13):

\textit{\textit{rnpt 9 \textit{hpr hmst m d\textsc{3dw 'h}(t) nswt m s\textsc{h}myt hr st wrt nt d'\textsc{m} \textit{hnw d\textsc{srw} nw 'h.f st3 srw smrw nw stp-s3 r sdm s\textsc{m} n wdt}}}

In the 9\textsuperscript{th} year the Queen was in the audience hall; appearance of the king in the double crown on the great throne of gold in the sacred \textit{hnw} of his ‘\textit{h}’; walk of officials and courtiers of the \textit{stp-s3} to hear the guide of the command.

Therefore \textit{d\textsc{srw}} could be interpreted as space with ritual connotation involved in the procession of gods\textsuperscript{1124} and the appearance of the king and we can imagine that access to this area was limited to a restricted number of people, as suggested by the inscription on the cube statue Berlin 17272 (C.II.18) from the time of Osorkon III:

\textsuperscript{1122} URK IV: 349, 10-12.
\textsuperscript{1123} Hirsch 2009: 76.
\textsuperscript{1124} A room similar to the \textit{d\textsc{srw}} is mentioned in the building inscription of Sesostris I which would have been placed in the “Chapelle blanche” of Sesostris I. An inscription on a pillar shows the god “Amun at the front of the \textit{d\textsc{srwt}}”. Eileen Hirsch has suggested that the building mentioned in the same inscription, called \textit{h\textsc{pr-k3-R’ ptry-k3ww}, was a ritual palace involved in the procession of the god, who paused perahps in a \textit{d\textsc{srwt}} room. Hirsch 2009: 76.
bs hr nswt m w""w m33 'h m dsrw.s  The unique one who is introduced the king, overseer of the 'h of the sacred places

A number of expressions in private inscriptions from the New Kingdom and the Late Period emphasize the owner’s freedom of entering into the dsrw of the 'h, to be consequently intended as section of the 'h whose access was restricted to few people. The quite common title m33 dsrw 'h in Late Period texts was probably held by officials in charge of controlling this less accessible area of the palace.

• The ‘rryt/rryt

The ‘rryt is an important architectural component of both temples and palaces.1125 When compound with a palace word, the most commonly used among the five terms in this study is pr-nswt. In the Middle inscription on stele GL WAF 35 (A.II.41) Wp-w3wt-‘3 describes his reception at the palace: on that occasion the people at the ‘rryt are mentioned while controlling his admittance to the pr-nswt.

l. 14-16) ďš.j m ḫdl.i r nd ḫrt hrw pf wn hmr.f
hrtw nhw m pr-nswt ‘nhw nt r ‘rryt m33 st3.i r pr-nswt (..) When I had gone north to offer salutations at the hrw, that which belongs of His Majesty, the sealers who are in the pr-nswt and the people at the ‘rryt see my admittance to the pr-nswt (..)

The connection of the word with the pr-nswt and its administrative role becomes clearer in the New Kingdom,1126 particularly from the tomb of Rḥ-ḫi-r’, where the ‘rryt is described as place to where commodities are delivered (B.II.33, R29-R30):

---

1125 Generally used in reference to the religious architecture, it came to indicate the “porch” attached to a private house, a palace or an administrative building, in Spencer 1984: 168.
1126 “Increasingly from the Middle Kingdom onwards the ‘rryt became an administrative department. This can be shown by the fact that it could own and control transport-berges”. De Buck 1938: 91, 14.
R29-30) nb inn (?) n ‘ryt drpt nb n ‘rryt ntf sdm
ntf wn pr-nbw hn’ imy-r htm (...) (?} everything delivered to (?} the ‘rryt and
everything offered to the ‘rryt. It is he (the vizier)
who hears concerning it. It is the vizier who
opens the Gold House together with the
overseer of the treasury

According to the following sentence (ntf sdm), where the vizier is said to have to hear
concerning it and opening the “house of gold” (pr-nbw) together with the “overseer of the
treasury” (imy-r htm), one might speculate that the ‘rryt have something to do with the pr-

nbw and the pr-nswt.1127 Another passage of the same text refers to the vizier as one in
charge of the appointment of the personnel of the ‘rryt (B.II.33, R27-R38):

R27-289 ntf dhn dhnw nb r ‘ryt iw n.f šnw nb m
pr-nswt ntf sdm wdt nb(t) It is he who appoints anyone to be appointed to
the ‘ryt. It is to him (the vizier) that anyone who
has to be interrogated in the pr-nswt has to
come; it is he who hears every decree (of the
king)

Even in this section the physical connection between the ‘ryt and the pr-nswt is not
explicitly stated and can be only assumed on the basis of the vizier’s responsibility of
controlling its personnel and his duty of interrogating people in the pr-nswt in the following
sentences. From these occurrences from Rḫ-mi-r’s tomb, the ‘ryt can be interpreted as a
proper department with its own personnel under the supervision of the vizier which
receives some kind of commodities.1128 Whether it was located within the pr-nswt or in its
neighbourhood is difficult to state with certainty.

The word is used with a juridical aspect in the Horemheb’s decree in a passage drawing
again a parallel between the pr-nswt and the ‘ryt (B.I.26):

li,3) sdm(y) md t pr-nswt hw nw ‘ryt Obedient to the injunctions of the pr-nswt and
the laws of the court

1127 Van de Boorn 1989: 82.
1128 Ibid.: 83.
The fact that the ‘rryt worked as office in which documents could be deposed can be illustrated by the Ramessid Inscription of Ms (B.II.157):

\[ N,6] irw m stny rdI m ‘rryt nt pr-‘3 \]

A copy was made and it was placed in the ‘rryt of pr-‘3

The Middle Kingdom occurrence on the aforementioned stele GL WAF 35 of Wp-w3wt-‘3 (A.II.41) together with other contemporary and later examples\(^{1129}\) show that the ‘rryt/’rryt could describe the area immediately in front of the door of a temple, a palace or a private house. Although ‘rryt retained its original interpretation, it started to be used with the extended meaning of department of justice and the official-administration somehow connected to the pr-nswt starting from the New Kingdom onwards. As suggested by Spencer in her lexicographical study on the Egyptian Temple, ‘the general translations of “door” and “gate” are therefore unsuitable for ‘rryt and should be not retained’ and the ‘rryt should be rather understood as an independent palatial department or block of buildings probably situated at the entrance of the pr-nswt.

- **The rwty**

In Middle Kingdom texts the term rwty starts to appear in the dual form rwty, with the added dual adjective wrty, to describe an important entrance to a palace or a temple.\(^{1130}\) In the Tale of Sinuhe the dual forms occurs in several passages. At the beginning of the story for example, the death of Amenemhat I is marked by the closing of the rwty wrty of the hnw:

\[ R 8:9] lw hnw m sgr lbw m gmw mrw rwty wrty htmw \]

The hnw was in silence, hearts were in pain, the great double gates were sealed

\(^{1129}\) For an overall analysis of the occurrences mentioning the ’rryt see Spencer 1984: 149 ff.

\(^{1130}\) *Ibid.*: 215
Later in the tale, when Sesostris I writes to Sinuhe to ask his return to Egypt, the protagonist says that he will kiss the ground at the rwty wrty.

B 188) ḫw. n.k īwt r Kmt ḫmr n.k ḫmr n.f sn.k t3 r rwty wrwy

Prepare your return to Egypt that you may see the ḫmr where you born, kiss the earth of the double gates.

Finally, when Sinuhe has returned to Egypt and had his audience with the king, he came out from the ḫmr ‘ẖmrwy and went through the rwty wrty:

B 283-5) prt.i r.f m ḫmr m ‘ẖmrwy msw-nst br rdt n ‘sn ṣm.sn ḫ rwty wrwy

I went forth from the ‘ẖmrwy, with the royal children giving their hands. And we went through the double portal.

The rwty is clearly connected to the word pr-nswt and used for its entrance in the Middle Kingdom expression īw n.f wrw m kswm ksw r rwty pr-nswt, “one to whom the great ones of the North and the South come bowing at the gates of the pr-nswt” and the New Kingdom title ḫmr-r rwty pr-nswt, “overseer of the doors of the pr-nswt”. Horemheb’s Decree confirms the link between the two terms, while describing the councilors doing obeisance at the gates of the pr-nswt (B.I.25):

l.9) ḫn. n.k ḫmr t3wy r ‘ẖw rμnt ‘s3 smi

l. 10) [...] d3d3t m ksm r wrw pr-nswt spr. n.f wrw pdt ᵟn ‘w n. T3-mhw ‘w.sn pd m swd.f sw3s.sn n br.f mī nτ

Now he acted as vicegerent of the Two Lands over a period of many years (and) reported [...] the councilors doing obeisance at the gates of the pr-nswt, the great ones of the Nine Bows approaching him, South as well as North, their arms outstretched at his encounter, and they paid honor to his face as (to) a god.

The Duties of the Vizier from the tomb of Rḥ-mī-R’ tells how the vizier meets other officials at the sb3 of the rwty wrty (B.II.33). Here the vizier, the overseer of the treasury and every responsible functionary (nb ssm) exchange reports on the affairs of the pr-nswt. As suggested by Patricia Spencer, this usage of the rwty shows that it was regarded more as an

263
“entrance” than a “door”, as it could have a door (sb3) of its own.\textsuperscript{1131} Old Kingdom sources confirm the fact that the \textit{rwt}, in certain contexts, did not serve as simple entrance, but as an entrance area with a proper specific staff.\textsuperscript{1132}

In the Saite Period the inscription on the statue CG 807 of \textit{Hr-\textit{ir}-R'}, a royal official in the \textit{pr-nswt} (\textit{wr nt pr-nswt}), allows to better define the role of the \textit{\textit{imy}-r \textit{rwt}}, “overseer of the \textit{rwt}”, whose essential tasks were to receive, listen, and please those who appealed at the presence of the king. The access to the king’s presence depended on him who had a mediating function between officials and the king.\textsuperscript{1133}

\begin{quote}
\textit{\textit{Sm\textit{m nswt bity tnw. i n hm.f m 3t r 3t ph.i i3t wr nt pr-nswt rdlt.n.f wi imy-r rwty wnm.n.i sw(r)i.n.i r-gs nswt bity r' nb m 'rw st 3$h [shb.n?] m33.n.i $t3w n pr-nswt kn hr hsw pr n-m h"wt m w\_nt $tr (?) ir.n.i dbbw n s n.f sprw $r nb t3wy}}
\end{quote}

For the service of the king of Lower Egypt, I am chosen of His Majesty at any time. I received the office of dignitary of \textit{pr-nswt}. He (the king) appointed me overseer of the \textit{rwty}. I ate and I drank to the king’s side every day at the headquarters of the horizon. I saw the secrets of the \textit{pr-nswt}. I entered full of praise and rejoicing for what I got out my powerful Lord commanded. I did what I asked for a person if, by petition to the Lord of Two Lands

Although frequently compound with \textit{pr-nswt}, the \textit{rwty wrty} can be combined with other words for palace, being indistinctly the entrance area in palatial and religious architecture.\textsuperscript{1134} A scene from the tomb of \textit{Hr(l)w.f} (B.II.80) describes the appearance of the king at the \textit{rwty wrty} of the ‘\textit{h} and later \textit{Ns-p3-R’} (C.II.7) and \textit{N\textit{ht},f-Mwt} (C.II.17) emphasize their freedom to enter in the ‘\textit{h} while the large remains outside its door (\textit{rwty.s}).

\textsuperscript{1131} \textit{Ibid.}: 202.
\textsuperscript{1132} Buongarzone 1995: 61.
\textsuperscript{1133} \textit{Ibid.}: 62.
\textsuperscript{1134} Spencer 1984: 196 ff.
• The *wsḥt*

According to Spencer’s lexicographical study on the Egyptian temple architecture, the term *wsḥt* was used since the Middle Kingdom for a hall containing columns, but it is not certain whether this was a hypostyle hall or a court with colonnades in a temple or a palace.\textsuperscript{1135}

The text of Coronation of Hatshepsut from the Red-Chapel (B.I.9) mentions a royal palace (‘ḥ) attached to the temple of Amun at Karnak, called ‘ḥ *n wsḥt*.\textsuperscript{1136} No remains of this palace have been identified, but Gitton has suggested that it stood in front of the 4\textsuperscript{th} pylon of the temple of Karnak and that it was the entrance to the temple.\textsuperscript{1137} The addition of *n wsḥt* to the term ‘ḥ may have been to establish the position of the palace in relation to a particular hall or court in the temple. Rameses III is equated to god Ra as one grown in the ‘ḥ *wsḥt* in the inscriptions on the walls of his Mortuary Temple at Medinet Habu (B.I.55). The term ‘ḥ would seem to be referred to the palace attached to the southern court (wsḥt) of the temple of Medinet Habu:

\begin{quote}
‘3 *nswt m mltt R’ rd ‘ḥt wsḥt.f The great king is great like Ra in his ‘ḥ wsḥt
\end{quote}

More often in New Kingdom sources, especially with the 19\textsuperscript{th} Dynasty, *wsḥt* occurs in its plural form in contexts from which it can only be deduced that *wsḥt pr-nswt* had become a standard phrase to describe the royal palace itself, the full formula being *n3 wsḥt pr-nswt Ḥr-pr ‘nh wd3 snb* (pAnastasi V - B.I.70; pTurinA - B.I.86; pLansing – B.II.88). The expression in Papyrus Turin A implies that access to *wsḥt pr-nswt* was not always easy:

\begin{quote}
3,10) *ph n3 wsḥt pr-nswt Ḥr-pr ‘nh wd3 snb sw mỉ tỉ dn h3 nt nw p3 m-‘ nwyt ‘k3 wn w’ ‘nhw iw Ḫ3 Ḥr m(w)ʃt Who reaches the broad hall of the pr-nswt l. p. h. he is exactly like the weaves of the sea, one remains alive while a thousand die
\end{quote}

Summarizing the word *wsḥt* seems to be used to mean a colonnade hall which could be either a roofed space or an open court in a religious building as well as in a secular one.

\textsuperscript{1135} Ibid.: 77-78.
\textsuperscript{1136} Lacau - Chevrier 1977-79: 98.
\textsuperscript{1137} Gitton 1974: 63-73
• The 'hnwty

The word 'hnwty' occurs quite frequently in Middle Kingdom texts especially in private titles of high officials working in some department or office probably attached to the royal building. An explicit grammatical relation between the word 'hnwty' and one of the terms for "palace", that would let to better understand its location and function, is very rare. Some of the owners of the title imy-r 'hnwty, "overseer of the 'hnwty" were somehow employed in the pr-nswt such as 'Intf (BM 572 - A.II.40) or Rmny-'nh (CG 20571 - A.II.101), as suggested by the combination with other epithets in their inscriptions. The title imy-r 'hnwty n pr-nswt registered in the later Onomasticon of 'lmn-m-ipt (B.I.91) is mentioned by Gardiner as unique example explicitly referring to the 'hnwty as section of (n) the pr-nswt-palace.

The usage of the word in the Tale of Sinuhe (A.III.5), where the 'hnwty and specifically the w3t 'hnwty is quoted as part of the 'h where courtiers were received and as private area of the palace to where Sinuhe was ushered during his royal audience, has induced Gardiner to render the term as "privy chamber". The same rendering of the term is suggested by the occurrence in Papyrus Boulac 18 (A.I.17) of the title imy-r 'hnwty n k3p referred to a pair of officials who were responsible for the interior arrangements of the private rooms of the palace and for deliveries and execution of orders concerning supplies for the residents in the private rooms of the building, the term k3p being referred to the "inner palace".

Moving to a New Kingdom example, the Coronation Text of Queen Hatshepsut reports on the sitting occurred in the d3dw-hall of the West after the establishment of the Queen in the 'hnwty m 'h.f (B.I.11), probably to be intended as an inner restricted section of the palace.

A completely different nuance of the word is that suggested by the title imy-r 'hnwty compound with departments or palatial institutions like the pr-hd or the pr-nswt. Such titles

---

1138 Wb I: 226, 16. According to Gardiner’s analysis of the origin of the word, 'hnwty is probably a compound consisting of the word ‘, “region”, “part” and the adjective hnwty connected with word hnw, “interior”, in Gardiner 1947: 44.
1139 Ibid.: 45.
1140 Ibid.: 45.
1142 Quirke 2004: 27.
1143 For an overview of the available examples of the title see Gauthier 1918: 169 ff.
would seem to imply more participation of the ‘hnhwty in administrative business.\textsuperscript{1144} Among the Middle Kingdom epithets referring directly to the treasury (pr-hd), the ḫmy-

r ‘hnhwty (wr) n pr-hd, “(great) interior overseer to the treasury”, denotes that officials working for the treasury might be entitled ḫmy-r ‘hnhwty.\textsuperscript{1145} Other Middle Kingdom titles, such as ḫmy-r ‘hnhwty wr n ḫmy-r ḫtmp, “chief interior overseer to the treasurer” or ḫmy-r ‘hnhwty n ḫmy-r ḫtmp, “interior overseer to the treasurer”, imply that at least sometimes the department under the treasurer employed several ḫmy-r ‘hnhwty.\textsuperscript{1146} Ht-sty-wrt’s title ḫmy-r ‘hnhwty n pr ḫtmpw, “the overseer of the ‘hnhwty of the office of the house of the sealer”, in stele Louvre C 5 (A.II.69) suggests again an administrative function for the ‘hnhwty section.\textsuperscript{1147}

- The hnty

Among the sources in this study more useful to understand the meaning and function of the hnty and the k3p as sections of the royal palace is Papyrus Boulak 18 (A.I.17). While analyzing the different sections of the text, Quirke distinguishes between two main sectors of the palace (here mentioned as pr-‘3), the k3p and the hnty, which might be identified respectively with “the Inner palace” and “the Outer palace”.\textsuperscript{1148} While the hnty would have been the first and most official place for delivering supplies by means of intermediaries named ḡdpw, the rmt pr mn, “the people of the house of the nurses”, receiving mnt should have been located in the private quarters of the palace. Papyrus Boulak 18 contains separate lists of people related to the royal palace generally divided in two groups: members of the royal family and officials.\textsuperscript{1149} Specifically section S11 lists separately the main people assembled in the royal palace in three columns: the functionaries listed after the vizier – srw, the members of the royal family and the servants - rmt pr mn ‘wt – and the unnamed attendants.\textsuperscript{1150} According to Quirke, while the hnty - the “Outer palace”\textsuperscript{1151}...
would have been the area dedicated to the first group, the k3p — the “inner palace” — would have been destined to the second one. As suggested by the author, while the ūnty would have been the first and most official place for delivering supplies by means of intermediaries named wdpw, the rm pr mn, “the people of the house of the nurses”, receiving mnt should have been located in the private quarters of the palace, to be identified with the k3p. According to the text the pr-ʿ3ʾs entries would have been delivered directly to the wdpw ūnty, “the cupbearers of the Outer Palace”1154, while the two other groups were supplied directly from the šnʾ or “provisions quarters”, suggesting a division of the palace building into two principal sections: “the official quarters at the front”, ūnty, and the private quarters at the back provided with storerooms or general servicing quarters, šnʾ.1155

- The k3p

Section 9 of Papyrus Bulaq 18 (A.I.17) records several commodities destined to the queen, which were sent to the k3p, strengthening the association between this word and the royal family.1156 A pair of officials with the title ḫm-r ʿḥnwty n k3p are described as responsible for the interior arrangements of the private rooms of the palace and for deliveries and execution of orders concerning supplies for the residents in the private rooms of the building, to be identified with the rm pr mn ʿwt, “the people of the house of the nurses”, mentioned in other sections of the same text.1158 Other Middle Kingdom titles such as ḫr d n k3p and ḫk3y n k3p suggest that the k3p was characterized by the presence of children and magicians,1159 that makes reasonable to regard it as the complex of the palatial inner rooms.1160 The function and the location of the k3p are suggested by an elaborate variant of

---

1152 Wb V: 105.
1153 The literal translation of ʿyvw would have been “people with access”, implying that their access was restricted to the area of the ʿ3ʾ3 of the palace, in: Quirke 1990: 37.
1154 For the meaning of ūnty as “the front” of “the Outer part” of the palace building see Berlev 1960: 146-8.
1155 Wb IV: 507.
1156 Quirke 1990: 40.
1157 For an overall analysis of the occurrences of the title ḫm-r ʿḥnwty n k3p in Middle Kingdom private inscriptions see ibid.: 87-90; 106-107.
1158 See above. Quirke 2004: 27.
1159 Ward 1982: no. 1229, 1231; 1121.
1160 Quirke 1990: 27.
this title, \textit{hdr n k3p n ipt nswt,}\footnote{Ward 1982: no. 1230.} establishing a connection between \textit{k3p} and \textit{ipt nswt}, “the private quarters of the king”.\footnote{The \textit{ipt nswt} would denote the private quarters of the palace in which lived the queen and the royal children.} The \textit{hk3y n k3p} was probably intended to provide the \textit{k3p} with books of the \textit{hk3}-words, deemed necessary to the safety of the palace; he may have had the general responsibility of the health of people living in the royal building.\footnote{Quirke 2004: 28.} Considering the combination of the private titles in the same monument, it would help to understand the function and the location of the \textit{k3p} within the palatial institution. The \textit{`ry t n `h}, “overseer of the chamber of the ‘h’ Snb, for example, is titled as \textit{hk3y n k3p}, “hk3y official of the inner palace” in another passage of stele Leiden 46 - V 105 (A.II.134). We can assume that the function expressed by \textit{hk3y n k3p} may have taken place in the \textit{k3p} of the ‘h’, the inner section of the palace.\footnote{One of the servants represented on his stele worked in the ‘h with the title \textit{hry-pr n `h}, “majordomo of the ‘h”}.\footnote{Quirke 2004: 65.}

\begin{itemize}
  \item The \textit{šn’}
\end{itemize}

The \textit{šn’}\footnote{Quirke 1990: 41.} is mentioned in Papyrus Boulaq 18 in connection with term \textit{pr-‘3} as an area of “provisioning-quarters” where materials for meals were stored and prepared for the royal family \textit{(rm† pr mn ‘wt) and servants}.\footnote{Quirke 2004: 65.} Of the specialized departments within the \textit{šn’}, only the ‘t \textit{iwf}, “meat chamber”, is mentioned in Section 30 of the text; it was divided into a \textit{3ḥt}, “stillroom”, for the \textit{ḥnty “Outer palace”}, and a \textit{3ḥt} for the \textit{k3p}, the “Inner palace”.\footnote{In other Middle Kingdom examples, the word is used to mean proper “storehouses” where a series of commodities were collected and is explicitly linked to the \textit{pr-nswt}. In a graffito from the Wadi Hammamat (Hammamat 87 - A.II.28) \textit{‘lmn-h3t} is mentioned as \textit{prw m šn’w s m ‘kw n pr-}}
nswt, “master of the stores, man of the provisions for the pr-nswt”. The section of The Admonitions of ipuwer (A.III.8) reporting on the bad condition in which the pr-nswt pours during the First Intermediate Period refers to the šn’w as empty of what they should normally have: food (emmer, barley, fowl, fish and oil), fabric (clothes, linen) and metals (copper). The New Kingdom title ḫmr šn’ pr-nswt nswt-bity in TT 84 (B.II.9) confirms the connection between the two terms šn’ and pr-nswt as well as the administrative nature of this word for “palace”.

• The w3ḥy

According to Sections 36, 60 and 74 of Papyrus Boulaq 18 (A.I.17), the w3ḥy is a “columned hall” within the pr-’3 in which groups of officials are supplied with special provisions (‘kw):

\[\text{‘kw m w3ḥy pr-’3 ‘nh wd3 snb} \quad \text{Provisions to the columned hall of the pr-’3, l. p. h.}\]

Lists of over sixty people in sections 60 and 74 of the same text are introduced by the formula ḫmr nsw prî r wnm t m w w3ḥy m hrw pn, “list of names of the officials who were admitted in order to eat in the columned forecourt on this day”.\footnote{Spalinger 1985: 240.} The w3ḥy is mentioned here as location for payment of food in the palace to king’s officials, to where a large number of people were gathered at one time.

In Papyrus Westcar (A.III.6) the w3ḥy is mentioned again as section of the pr-’3 to where prince ḩdd.f-Hr introduces a living magician, ḩdl, to entertain King Khufu. In this passage the w3ḥy is shown as an “audience hall” where people are received by the king, after having asked his permission.

\[8,9-10) \text{dd.in s3-nswt ḩdd.f-Hr ḫmr ‘nh wd3 snb nb.i} \quad \text{And prince ḩdd.f-Hr said: ‘Sovereign (l. p. h.), My Lord, I have brought ḩdl.’ His Majesty said: “go and bring him to me!” His Majesty proceeded to}\]

\[\text{iw inn.i ḩdl dd.in hm.f is ln n.i sw wd3 pw} \quad \text{\ldots}\]

\[\text{ir.n.hm.f r w3ḥy n pr-’3 ‘nh wd3 snb}\]
PART I

the audience hall of the pr-‘3, l. p. h.

From Middle Kingdom occurrences of the term, it would seem that the w3ḥy was a great hall of great size and importance within the pr-‘3 working as audience chamber, \(^{1170}\) or meeting hall, where officials received their food-provisions.

• **The ḫ3 n ṭḥty**

The ḫ3 n ṭḥty, literally “the office of the vizier”, is often mentioned in contexts referring to the palace institution, although it does not have any grammatical connection with one of the five words in this study. This bureau is cited in section S 19 of Papyrus Boulaq 18 (B.I.17), where it receives the order for an increase in regular palace provisioning, \(^{1171}\) its scribes convey messages concerning movements of foreign people at Thebes in Sections 44 and 69 of the same text. Papyrus Berlin 10470 (A.II.134), mentions the ḫ3 n ṭḥty, “the office of the vizier” as place where a copy of the request concerning the she-slave girl Snbt was brought. Vizier ‘lmn-m-ḫ3ṭ had to get the letter in his office which was probably connected to the pr-nswt of the previous line (l.6).

l. 6) ḫ3b pw ḫr ṭḥ ty rḥ. sn st ḫy ḫ[i] [ḥft] pr-nswt

l. 7) mḥ n ḫnt init m ḫ3 n ṭḥty init ḫr n ṭm ‘ītf.f-

snb on m [ḥṛw]

So runs what he reported. This is sent from them of it. Then you shall act...the pr-nswt.

Copy of the leather roll which was brought from the office of the vizier, which the ḫr n ṭm (master of the..) ‘ītf.f-snb brought on this day

The ḫ3 n ṭḥty is presented here as location for delivery of reports from Egyptian provinces.

The starting expression in the tomb of Ṣḥ₃-m-ṛ’, ṭḥty n n ḫnw m ḫ3 n ṭḥty, \(^{1172}\) “the vizier of the Southern City and the ḫnw in the bureau of the vizier” \(^{1173}\) mention the ḫ3 n ṭḥty in relation to the ḫnw. \(^{1174}\) Unlike Van de Boorn argues in his discussion on *The Duties*, \(^{1175}\)

\(^{1170}\) Quirke 1990: 40.

\(^{1171}\) *Ibid.*: 117.

\(^{1172}\) Van de Boorn 1989: 12, R1.

\(^{1173}\) the noun ḫ3 is regularly used in the Middle and New Kingdom to denote the office of an official. FCD: 183. Wb III: 221-22.

\(^{1174}\) Van de Boorn focuses on the relation of the ḫ3 n ṭḥty with the pr-nswt, in Van de Boorn 1989: 20.
text does not indicate a physical relationship between the ē3 n ṭ3ṭy and the pr-nswt. The location of the “office of vizier”, as well as the house of the vizier (pr.f in R5) within the pr-nswt,\footnote{According to Lorton “if the vizier’s house had been located within the pr-nswt, a report to him on te latter’s condition would have been superfluous”, in: Lorton 1991: 292.} is based on the author’s assessment that the vizier was its “managing director” and not on explicit expressions of the text.\footnote{Ibid.: 22, 58.}

- The ēt

Word ēt can be regularly used in expressions referring to different kinds of workshops as attested in Papyrus Boulaq 18 (A.I.17), where the term is used in relation to word pr-ṣ3 to indicate ateliers for the preparation of food.\footnote{Quirke 2004: 66.} The ēt īwʃ “meat chamber” is mentioned in Section 30 of the text as one of the specialized departments within the šn or “provisioning-quarters” of the pr-ṣ3.\footnote{Quirke 1990: 41.} The ēt is regularly compound with word pr-ṣ3 in the title īry ēt n pr-ṣ3 which is commonly used during the 12th Dynasty\footnote{el-Sayed 2008: 269.} as well as in the New Kingdom titles īmy-r pr n ēt pr-ṣ3, “overseer of the house of the room of the pr-ṣ3” (B.II.57) and wb3 nswt ēt n ūn pr-ṣ3, “chief royal butler in the chamber of the offer (kitchen) of the pr-ṣ3, I. p. h.” (B.II.155). The ēt ūn, “chamber of the offering”, as section of the pr-ṣ3 is mentioned also in several passages of Horemheb’s decree (B.I.26). Title īry ēt n(t) ūn, “chamber-keeper of the ēh” occurs many time in Middle Kingdom private inscriptions. As well as the aforementioned īry ēt n pr-ṣ3, the title is composed of a nisba adjective derived from the preposition r and literally meaning “one who is in relation with” and the word ēt, generally translated as “chamber” or “department”. The purpose for which the chambers of the ēh or the pr-ṣ3 were actually intended from time to time is not easily deducible from the context of the Middle Kingdom titles.

After having recognized the meaning of each term, one may ask how these institutions materialised in an architectural environment. While for the term ēh, it has been possible to assume its identification with archaeologically known royal structures, recognition is much
more difficult for other institutions. Firstly, we must carefully distinguish between the
layout of a “typical” Middle Kingdom palace and that of the New Kingdom “royal city”,
keeping in mind that we must base our considerations on those archaeological sites that
have been actually investigated. A Middle Kingdom palatial site such as Tell Basta (PL. I)
shows a juxtaposition of areas with different functions within the same structure. The
various institutions recognized by this lexicographic study could perhaps be identified with
each one of the individual sectors of this palatial building. Otherwise, “the separate palatial
sites of Tell el-Amarna, dispersed over a vast area, may highlight some of the problems
encountered when correlating textual sources and the archaeological evidence”. This
physical separation of the structures does not seem to correspond to an actual functional
separation, since each of these complexes appears to have hosted more sectors with
different functions. For example, the pr-nswt, for which it has been assumed an
administrative function, may have formed a separate physical unite or the division of a
larger palatial structure. Jurman has rightly stressed that the Record Office outside the
compound of the King’s House at Amarna may have had a function similar to that
suggested by the sources for the pr-nswt. However, the pr-nswt could be also
recognized in those sectors of the Great Palace used for entry and exit of facilities, labeled
as šn’w, “magazines”, with reference to their practical function and as pr-nswt with
reference to their administration. In written sources the treasury and the storerooms are
often linked to the pr-nswt institution. Whether these facilities did form part of the palace
complex, referred to as pr-nswt, or whether they were situated in the neighborhood of the
palace unit is difficult to tell. Most of the available texts seem to refer to the palace with
different words, in order not to identify a specific building or sector, but rather its function,
different from time to time. Thus, for example, when the aim of the expression is to stress
the relationship with the king and his property, the term pr-3 is preferred, and when the
purpose is to emphasize the collective meaning of "court", the term stp-s3 is chosen. The
identification of the stp-s3 with the archaeological evidence is particularly difficult because
of its double meaning, as corpus of people involved in the administration of the palace and
the private service of the ruling family and as place that hosted this collective. Before
becoming a common designation of the king from the late 18th Dynasty, the use of pr-3 for

1184 This interpretation follows Lorton’s view of the Duties, in Lorton 1991: 305.
1185 For the Central City at Amarna see: Petrie 1894. Peet - Woolley 1923: chapters I and II. Kemp –
referring to the royal palace must be considered in relation to this transformation. Being the term that more than others highlights the relationship of a building with the king, it was probably intended for referring to the “royal palace” in the broadest sense of the term. In the ancient Egyptian “architectural vocabulary” the use of the term pr-3 with reference to the civil architecture could be compared to that of hwt with reference to the religious building: as the word pr-3 would have generally designate a “royal property”, the hwt would have mean a “religious building” (such as a temple/shrine or tomb/tomb chapel).\textsuperscript{1187}

In the context of the Middle Kingdom palatial architecture, the entire complex of Tell Basta (PL. I),\textsuperscript{1188} or the 13\textsuperscript{th} Dynasty palace in the area F/1 at Tell el Dab’a, could be identified with a pr-3-building.\textsuperscript{1189} Taking the site of Tell el-Amarna as example for the New Kingdom instead, each of the various palatial sites of the city, such as the North Palace,\textsuperscript{1190} the North Riverside Palace,\textsuperscript{1191} the King’s House and the Great Palace,\textsuperscript{1192} may have been understood as pr-3. Pr pr-3 became the normal expression for “royal palace” by the Late Period, replacing the simple form pr-3, finally become a word for Pharaoh. In his work on the problem of locating the royal residence in Late Period Egypt, Jurman has exhaustively considered the difficulties of applying the modern terminology to the study of the ancient lexicography.\textsuperscript{1193} While considering these limits, he also acknowledged our dependence on the usage of modern vocabulary if we want to seek any correlations between our modern concept of palatial entities and the ancient one. The complexity of the vocabulary encountered within Egyptian texts parallels the actual terminology, word “palace” meaning both the physical place used as residence of a king/prince and all the people living in this, carrying out their activities in the wake of a king/prince and taking care of its administration and ceremonial. Also the word “court” may indicate the residence of a sovereign as well as the whole royal family and the entourage of a king/prince, the corpus of people involved in the administration of the palace and the private service of the ruling family. So for example word “court” in the modern expression “court chapel”, referred to as physical location of a specific section, has a different meaning from word “court” in “court ceremonial”, here

\textsuperscript{1187} GEG: O.6.
\textsuperscript{1193} Jurman 2006: 5 ff.
intended as group of people with specific rules of conduct. In the modern language as in
the ancient Egyptian one, the context specifies the exact meaning of each word for
“palace”. The study of the most common contexts has allowed to identify a meaning
prevailing on others for each one of these words more than a definitive translation. The
recognition of a preponderant significance and therefore of a specific function for each of
these institutions, allows a more immediate interpretation of the texts or passages where
the related word is used. In this sense, this study offers several possibilities for a more
detailed analysis of each one of its individual aspects and hopefully aims to be the basis for
future development of the Egyptological researches.
